FLORIDA BROWNFIELDS REDEVELOPMENT PROGRAM

2007 ANNUAL REPORT

Residence Inn Tallahassee Universities at the Capitol On the cover: Tallahassee's Gaines Street Corridor is a historically industrial area located near the heart of downtown. Gaines Street's prime location, between Florida State University and Florida A&M University and immediately south of the State Capitol complex, stimulated a plan for revitalization of the area. The first major project in the corridor was the completion of the Marriott Residence Inn in the fall of 2006. The property was known to be contaminated and had formerly been the site of a bulk petroleum storage facility in addition to other industrial uses. By working with the developer to pool economic and environmental incentives, the City of Tallahassee was able to secure a commitment for redevelopment of the property and create a benchmark for revitalization of the remainder of the corridor. The Department of Environmental Protection issued a conditional Site Rehabilitation Completion Order in the spring of 2007, indicating that no further remediation of the property was necessary as long as the registered engineering and land use controls were maintained. Total construction cost for the Marriott Residence Inn was \$10,000,000. The hotel now employs 32 full-time and nine part-time staff. Prior to redevelopment, the property was valued at \$588,166. The property is now valued at \$10,139,737.

EXECUTIVE SUMMARY

A brownfield site is real property, the expansion, redevelopment or reuse of which may be complicated by actual or perceived environmental contamination. The Brownfields Redevelopment Program (Program), established in 1997, empowers communities, local governments and other stakeholders to work together to, assess, clean up and reuse brownfields.

The P	rogram	exp	perience	ed r	ecord	growt	h in

Site Rehabilitation Completion Orders 3				
Voluntary Cleanup Tax Credits for Brownfield Sites	\$1,633,382			
Capital Investment	\$129,050,000			
New Direct and Indirect Jobs	1,165			

Rehabilitation Agreements (BSRA) were executed, a 60 percent increase over 2006 and the most in any year since the inception of the Program. In addition, the number of applications for voluntary cleanup tax credits nearly doubled. This growth is a continuing response to House Bill 7131, passed in 2006 by the Florida Legislature. The bill expanded eligibility opportunities and tax credit incentives for the Program. The Program continues to show growth in the number of designated brownfield areas, jobs created and capital investment.

Highlights and milestones during 2007 include:

- Brownfield Areas: Sixteen municipalities and county governments approved local resolutions that designated 23 additional brownfield areas, increasing the total number of brownfield areas in Florida to 168.
- ♦ **Brownfield Site Rehabilitation Agreements:** Twenty-four Brownfield Site Rehabilitation Agreements were executed, bringing the Program total to 112.
- ♦ Site Rehabilitation Completion Orders: Three Site Rehabilitation Completion Orders (SRCO) were issued for sites that completed cleanup of property to standards protective of human health and the environment. The issuance of these SRCOs brings the total number of SRCOs issued to 20 since inception of the Program in 1997.
- ♦ Voluntary Cleanup Tax Credits: In 2007, the Florida Department of Environmental Protection (DEP) issued tax credits totaling \$1,633,382 for site rehabilitation work completed at brownfields sites in 2006. DEP received 40 applications requesting a total of \$4,410,768 in tax credits for site rehabilitation work completed in 2007. After eligibility determination, DEP issued \$3,261,228 in tax credit certificates for site rehabilitation costs incurred in 2007. Of this amount, \$2,836,597 was for site rehabilitation at brownfield sites.
- ♦ New Jobs: In 2007, 1,165 new direct jobs, 1,265 new indirect jobs, and \$129,050,000 in new capital investment were attributable to the Program. The cumulative totals for new job creation and capital investment attributable to the Program, from inception,

includes 8,595 new direct jobs, 7,264 new indirect jobs, and \$883,713,993 of capital investment in designated brownfield areas.¹

♦ Florida Brownfields Conference: The 10th annual Florida Brownfields Conference was held in Orlando in November 2007. Participation at this two and a half day conference remained strong with 284 individuals in attendance, representing lenders, real estate professionals, community advocacy groups, environmental consultants, attorneys, and federal, state, and local governments.

¹ Data provided by the Executive Office of the Governor, Office of Tourism, Trade and Economic Development, January 2006.

INTRODUCTION AND HISTORY

Many areas in Florida contain sites with actual or perceived environmental contamination that may present a significant barrier to redevelopment. The Florida Brownfields Redevelopment Act (Act), sections 376.77-376.86, Florida Statutes, was adopted by the Florida Legislature in 1997 to assist local governments and individuals responsible for site rehabilitation and redevelopment. The Act provides the framework for Florida's Brownfields Redevelopment Program (Program), which facilitates redevelopment of properties within designated brownfield areas by providing for environmental cleanup and protection of public health.

Local governments play a key role in the Program. Financial and regulatory incentives become available when a local government designates a brownfield area by resolution. These financial and regulatory incentives enable local governments and state agencies to

Florida Brownfields Redevelopment Program Objectives

- ♦ Site rehabilitation
- Increases capital investment
- Broadens tax base
- Create jobs
- Better utilization of infrastructure and community resources
- Improvements in quality of life and the environment

partner with the private sector to rehabilitate and provide for sustainable reuse of properties within designated brownfield areas. A brownfield area is defined by statute as, "...a contiguous area of one or more brownfield sites, some of which may not be contaminated, and which has been designated by a local government by resolution ...". The statutory definition of brownfield site is, "...real property, the expansion, redevelopment, or reuse of which may be complicated by actual or perceived environmental contamination".

Since passage of the Act, the Florida Department of Environmental Protection (DEP) has provided education and outreach to a variety of interest groups, including communities, environmental consultants, lenders, local governments, economic redevelopment boards, and real estate professionals. DEP has also provided technical assistance and streamlined regulatory service to Program participants. As these efforts enable successful rehabilitation and redevelopment of properties around the state, the Program will continue to grow.

BROWNFIELDS REDEVELOPMENT PROGRAM STATUS

Successful brownfield projects and enhanced economic incentives have encouraged local governments to designate more brownfield areas for revitalization. Upon designation, properties within a brownfield area may participate in the stand-alone economic incentives such as a job bonus refund or sales and use tax exemption for building materials in a mixed-use project or housing project². If contamination is known or suspected, the area designation and the identification by a local government of a person responsible for brownfield site rehabilitation entitle the identified person to negotiate a brownfield site rehabilitation agreement with DEP.

In 2007, 16 local governments reported approval of 23 resolutions designating brownfield areas. As of December 31, 2007, there was a total of 168 designated brownfield areas in 70 communities across the state (Figure 1).

The 168 locally designated areas encompass 149,815 acres of contaminated and uncontaminated properties, including residential and viable business properties. Appendix A presents the name, location, and approximate size of each brownfield area in the state.

²Florida Department of Revenue Tax Tip Sheet TIP # 00A01-23, issued August 11, 2000, at http://www.dep.state.fl.us/waste/categories/brownfields/pages/economic_incentives.htm#state.

Brownfield Site Rehabilitation Agreements

Another element of the Florida Brownfields Redevelopment Program (Program) is the voluntary execution of a Brownfield Site Rehabilitation Agreement (BSRA) between the "person responsible for brownfield site rehabilitation" (voluntary responsible party) and DEP. For an agreement to be negotiated and executed, a brownfield area must be designated by a local government resolution and a voluntary responsible party must be identified. The BSRA provides the DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Brownfields Cleanup Criteria Rule³. In addition, the BSRA provides liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by the DEP to review technical reports according to an agreed upon schedule. Only those brownfields sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant.

Through December 2007, voluntary responsible parties have executed 112 agreements with DEP since inception of the Program in 1997. Twenty-four agreements were executed in 2007 (Figure 2).

Site Rehabilitation Completion Orders Issued

Three Site Rehabilitation Completion Orders (SRCO), signifying that site rehabilitation was complete, were issued for brownfields sites in 2007. SRCOs issued in 2007 increased the total issued since 1997 to 20. Other sites with executed agreements continue to make progress on site rehabilitation and redevelopment.

Appendix B presents the name, location and approximate size of each brownfield site in the state with an executed BSRA. The table includes a date of completion for sites that have received an SRCO (or "no further action" order) or an SRCO with conditions. An SRCO with conditions is issued when DEP has approved alternate cleanup target levels for a site because the voluntary responsible party has agreed to use engineering and institutional controls to eliminate exposure to contaminants.

³ Chapter 62-785, F.A.C.

Status of State Financial Incentives

Note: Tax credits for work completed in 2007 were issued March 31, 2008 for all sites with eligible site rehabilitation costs.

In 1998, the Florida Legislature created a tax credit for persons that voluntarily participate in the cleanup of a brownfield site in a designated brownfield area or the cleanup of a drycleaning solvent contaminated site (section 376.30781, Florida Statutes). There have been several changes to the Voluntary Cleanup Tax Credit Program since 1998. Currently, tax credits may be applied to state corporate income tax. A tax credit of 50 percent is allowed for the cost of voluntary cleanup activity that is integral to site rehabilitation, with a maximum of \$500,000 per site per year. The annual tax credit allocation is \$2 million.

The Voluntary Cleanup Tax Credit Program has issued a total of \$10,659,815 in tax credits since its inception in 1998. This total equates to a private sector contribution for site rehabilitation of over \$26 million. Approximately 86 percent of the total amount in tax credits issued since 1998 has been for site rehabilitation at brownfield sites (Figure 3).

Twenty-one applications were submitted in 2006, requesting a total of \$2,747,550 in tax credits. After eligibility determination, the total amount issued in tax credit certificates was \$1,875,266. Of the total, \$1,633,382 was for 16 brownfield sites, representing 87 percent of the total amount issued in tax credit certificates in 2006. The deadline for 2007 tax credit applications was January 15, 2008. DEP received 40 applications requesting \$4,410,768 in tax credits. Thirty-three of these applications were for brownfield site rehabilitation. After eligibility determination, DEP issued \$3,261,228 in tax credit certificates for site rehabilitation costs incurred in 2007. Of this amount, \$2,836,597 was for site rehabilitation at brownfield sites.

The Act also provides financial and economic incentives administered by the Executive Office of the Governor, Office of Tourism, Trade, and Economic Development (OTTED),

which include the Brownfield Redevelopment Bonus Refund⁴ and a limited state loan guaranty. The cumulative totals for new job creation and capital investment attributable to the Brownfields Redevelopment Program since 1997 are 8,595 new direct jobs, 7,264 new indirect jobs, and \$883,713,993 in capital investment in designated brownfield areas⁵.

Brownfields Success Stories

The success of the Program is best demonstrated by the completed projects. Appendix C presents brief summaries of each of the projects that have entered into brownfield site rehabilitation agreements, completed all cleanup and achieved no further action status. All of the sites have completed cleanup in accordance with the brownfields rule, and most of the sites listed in Appendix C have been redeveloped.

Local Pollution Control Program Delegations

Three county governments – Broward, Hillsborough, and Miami-Dade – have received delegation from DEP to administer the Program locally. Delegation agreements for Broward and Miami-Dade Counties were signed in 2000, and the agreement with Hillsborough County was signed in 2004.

Environmental Protection Agency Memorandum of Agreement

On November 28, 2005, DEP and the United States Environmental Protection Agency (EPA) executed a Memorandum of Agreement (MOA) for the Program. This MOA supersedes the previous MOA between DEP and EPA executed in December 1999. The current MOA specifies the criteria under which the EPA will forego its oversight of cleanups in Florida. In addition, it expands the types of sites that are eligible for consideration. Through the MOA, certain sites subject to corrective action under the federal Resource Conservation and Recovery Act (RCRA) are eligible for state brownfields incentives.

Additionally, to be eligible to receive grant funding under the federal Comprehensive Environmental Response Compensation and Liability Act Section 128(a) authorized by the federal Small Business Liability Relief and Brownfields Revitalization Act of 2002, a state must be a party to a voluntary response program MOA with EPA or demonstrate that its response program includes, or is taking steps to include, the elements of a response program. The State of Florida is one of only 23 states with an existing MOA making the Program automatically eligible for Section 128(a) funding. In 2007, DEP received \$816,537 from this EPA program.

Front Porch Florida Initiative communities and Designated Brownfield Areas

DEP continues to work cooperatively with other state agencies to identify the needs of Front Porch Florida Initiative communities and use Program resources to assist these communities. Presently, nine Front Porch communities overlap or are contained within a designated brownfield area:

- Greater South Central Neighborhood, St. Petersburg (Pinellas County);
- Escambia County and Greater Pensacola, Pensacola (Escambia County);

⁴ Pre-approved applicants for the Brownfield Redevelopment Bonus may receive a tax refund equal to 20 percent of the average annual wage of the new jobs created in a designated brownfield area up to a maximum of \$2,500 per new job created.

- Opa-Locka (Miami-Dade County);
- Northwood, Pleasant City, Northwest Community, West Palm Beach (Palm Beach County);
- Riverside Community of Little Havana (Miami-Dade County);
- Newton (Sarasota County);
- West Ocala (Marion County);
- Holden Heights (Orange County); and
- Goldsboro Community (Seminole County).

Public Outreach and Education

As an ongoing responsibility of the Program, DEP staff regularly participate in numerous outreach and educational speaking engagements for various city and county organizations, trade shows, and industry groups, and help coordinate an annual conference for stakeholders.

DEP's Brownfields Web site, www.dep.state.fl.us/waste/categories/brownfields, provides the latest Program-specific information and links to web sites for the OTTED, Enterprise Florida, Inc., local governments, United States Department of Housing and Urban Development, EPA's Brownfields Program, and other federal agencies involved in partnering for the redevelopment of brownfields. The site also contains map images of all designated brownfield areas and copies of local government resolutions and executed cleanup agreements.

Annual Florida Brownfields Conference

The 10th Annual Florida Brownfields Conference was held in Orlando in October 2007. With the theme "Revitalizing Florida's Future: From People to Properties", 284 individuals attended this informative conference.

The City of Orlando, Florida Brownfields Association, OTTED, Enterprise Florida, Inc., the Environmental Law Institute, EPA and DEP cooperated in organizing a successful conference. Numerous environmental consulting firms, vendors, and law firms provided funds for sponsorship, coordination efforts, and exhibits. DEP staff participated in the conference by making presentations, participating in discussion panels, and participating in ad hoc meetings regarding ongoing brownfield projects. The success of this annual conference, which is organized by the Florida Brownfields Association, is due to the many partnerships built among private and public entities.

FEDERAL BROWNFIELDS UPDATE

Small Business Liability Relief and Brownfields Revitalization Act of 2001

Through passage of the Small Business Liability Relief and Brownfields Revitalization Act, policies that U.S. EPA developed over recent years were incorporated into law. The brownfields law expanded EPA's assistance to the public and private sectors by providing new tools for promoting sustainable cleanup and reuse.

Brownfields grants continue to serve as the foundation of EPA's Brownfields Program. These following grants support revitalization efforts by funding environmental assessment, cleanup, and job training:

- Brownfields Assessment Grants provide funding for brownfield inventories, planning, environmental assessments, and community outreach.
- Brownfields Revolving Loan Fund Grants provide funding to capitalize loans that are used to clean up brownfield sites.
- Brownfields Job Training Grants provide environmental training for residents of brownfield communities.
- Brownfields Cleanup Grants provide direct funding for cleanup activities at certain properties with planned green space, recreational, or other nonprofit uses.

In 2007, 11 Brownfields Competitive Grants were awarded to six eligible Florida recipients. Grants totaling \$2,000,000 were awarded to the following:

- Clearwater Homeless Intervention
 - \$200,000 Hazardous Site Assessment
- City of Clearwater
 - \$200,000 Hazardous Site Assessment
 - \$200,000 Petroleum Site Assessment
- City of Homestead
 - \$100,000 Hazardous Site Assessment
 - \$100,000 Petroleum Site Assessment
- City of Miami
 - \$200,000 Hazardous Site Assessment
 - \$200,000 Petroleum Site Assessment
- City of Tampa
 - \$200,000 Hazardous Site Assessment
 - \$200,000 Petroleum Site Assessment
- Treasure Coast Regional Planning Council
 - \$200,000 Hazardous Site Assessment
 - \$200,000 Petroleum Site Assessment

The grants will be used to conduct Phase I and Phase II environmental assessments at sites with known or suspected hazardous substances or petroleum contamination.

DEP received a State and Tribal Response Program Grant (SRP) in the amount of \$816,537 from the EPA for Fiscal Year 2007-2008 to enhance the Florida Brownfields Redevelopment

Program. This is the fourth year that the DEP has received an SRP grant, with the total amount awarded over the four years totaling \$4,308,440. The 2007-2008 grant will be used to fund site-specific assessments and limited cleanup of source areas for eligible applicants and to conduct outreach activities. Since inception of the SRP grant, DEP has assisted 29 local governments, non-profit organizations and private investors with 45 contaminated or potentially contaminated sites.

Area ID	Area Name	City	County	DEP District	Resolution Date	Acreage ¹

Total Approximate Acreage: 149,815.78

¹ NR = Not Reported

Total approximate acreage includes actual contaminated and perceived contaminated properties, viable business properties, residential properties, green spaces, and parks etc. Total approximate acreage is not representative of the number of areas that may require cleanup due to contamination but properties (acres) that may be eligible for economic and regulatory incentives pursuant to the Brownfields Redevelopment Act. The determination and designation of a brownfield area is the responsibility of the municipality or county government.

APPENDIX C Success Stories

BROWNFIELDS REDEVELOPMENT SUCCESS STORIES

The effectiveness of the Florida Brownfields Redevelopment Program is demonstrated the through cleanup and reuse of previously underused properties. The following projects were completed using the Program.

Circle Tampa Venture

Location: Tampa

Historical Use: Aluminum can plant, former Army

airfield

Contaminants: Metals, solvents, polychlorinated biphenyls

(PCBs), oil and grease

Reuse: Upscale apartments and townhomes

The former Ball Metal Plant operated for 36 years and then sat unused for six years. Circle Tampa Ventures entered the Program and completed voluntary cleanup of the property. Cleanup included removal of 443 tons of contaminated soil and implementation of a restrictive covenant on the use of groundwater. The site is located north of Busch Gardens and south of the University of South Florida and H. Lee Moffitt Cancer Center and Research Institute. Redevelopment of the site is under way and will feature upscale, three-story apartments and townhomes. The 468 apartments and townhome units will be open in 2008. The sales price of the property in 2004, prior to cleanup, was \$3.15 million. When complete, the property value is projected to be approximately \$44 million. The project has resulted in the creation of 10 management, leasing, and maintenance jobs.

Tallahassee Residence Inn

Location: Tallahassee

Historical Use: Bulk petroleum facility
Contaminants: Petroleum and dioxin

Reuse: Hotel

Tallahassee's Gaines Street Corridor is a historically industrial area located near the heart of downtown. Gaines Street's prime location, between Florida State University and Florida A &M University and immediately south of the State Capitol complex, stimulated a plan for revitalization of the area. The first major

project in the corridor was the completion of the Marriott Residence Inn in the fall of 2006. The property was known to be contaminated and had formerly been the site of a bulk petroleum storage facility in addition to other industrial uses. By working with the developer to pool economic and environmental incentives, the City of Tallahassee was able to secure a commitment for redevelopment of the property and create a benchmark for redevelopment of the remainder of the corridor. The Department of Environmental

Protection (DEP) issued a conditional Site Rehabilitation Completion Order (SRCO) in the spring of 2007, indicating that no further remediation of the property was necessary as long as the registered engineering and land use controls were maintained. Total construction cost for the Marriott Residence Inn was \$10,000,000. The hotel now employs 32 full-time and nine part-time staff. Prior to redevelopment, the property was valued at \$588,166. The property is now valued at \$10,139,737.

Sunterra Site

Location: Orlando

Historical Use: Former Montgomery Ward store

Contaminants: Hydraulic oils
Reuse: Sheriff's substation

This former retail department store sat empty and deserted for some time after the then Montgomery Ward

went bankrupt. Operations at the property had included an automotive service center. Eight hydraulic lifts remained on the property. Sunterra Corporation entered into a Brownfields Site Rehabilitation Agreement (BSRA) with DEP to conduct voluntary cleanup of the property. The hydraulic lifts and associated contaminated soils were removed, and no groundwater contamination was found. Sunterra originally redeveloped the property as a call center to market timeshare properties, but the property is currently being used as an annex to the Orange County Sheriff's Office. The facility includes training and office areas.

Dania Motocross

Location: Dania Beach

Historical Use: Motocross race track
Contaminants: Metals in groundwater
Reuse: Warehouse complex

The Dania Motocross facility operated as a recreational and competitive motocross track from 1995 until 2005. Prior to 1989, the property was an illegal dump. The developer entered into a BSRA with Broward County to address metals contamination in the groundwater. In accordance with the brownfield statute, DEP has delegated authority to Broward County to implement the Program in the county. In August 2006, Broward County issued a conditional SRCO for the property indicating that no further action was necessary at the site. The site is currently in the permitting stages of redevelopment for use as a warehouse complex.

Sunray Enterprises, Inc.

Location:PensacolaHistorical Use:Gas stationContaminants:Petroleum

Reuse: Automobile repair shop

The tanks from this former gas station site were removed in the 1970s. In accordance with rules in place at that time, the dispenser island was left in place. Under the Program, the new owner removed the dispenser island and cleaned up the petroleum contaminated soils and groundwater. The original building was left on the property, and it is currently being used as an automobile repair shop.

Centro Asturiano

Location: Tampa **Historical Use**: Hospital

Contaminants: Petroleum, incinerator debris, and biohazards

Reuse: Mixed income retirement housing

Centro Asturiano Hospital was built in 1928 and served the Ybor City community until the early 1990s. In 1996, the city condemned and demolished all but one of the buildings on the hospital's campus.

The remaining hospital building suffered from neglect and vandalism during its 10-year vacancy. The Centro Asturiano property has been rehabilitated in accordance with state environmental standards and redeveloped to benefit the community. The seven-acre campus is now affordable housing for senior citizens. The 7,000 square-foot historic hospital building was renovated to house administrative functions and be a clubhouse for residents. Over \$16 million in public and private funds were invested in the project and four full-time jobs were created. The pre-development value of the property was \$290,110. The current value of the property is \$3,635,200.

Riverfront (Heights Redevelopment Area) Complex

Location: Tampa

Historical Use: Marine repair, dump site for bridge

demolition debris, lift station

Contaminants: Metals, petroleum compounds, and PCBs

Reuse: Residential condominiums

Located in downtown Tampa on the Hillsborough River, this property was a former dump site and marine repair facility. Demolition debris and other waste from an old bridge had been stockpiled on the property. An assessment revealed low-level concentrations of metals, volatile organic compounds and petroleum products in site soils. The developer entered into a BSRA with DEP, with plans to build condominiums on the property. Contaminated soils were removed from the site, and it is currently ready for redevelopment.

Although the original developer withdrew its redevelopment plan, the property is now included in the Heights Community Redevelopment Area and a new redevelopment plan is under way. The project is located adjacent to the new Stetson University Law Building and across the river from the Blake Magnet High School for the performing arts.

Former Clearwater Sun Property

Location: Clearwater

Historical Use: Printing and publishing facility

Contaminants: Arsenic and petroleum

Reuse: Residential

Soil and groundwater contamination at this facility were present at this former printing and publishing facility operated by the Clearwater Sun newspaper. The principal contaminants were arsenic and petroleum compounds. The property was rehabilitated and institutional and engineering control strategies were employed as conditions of the SRCO. The original building was left in place and renovated for reuse. The facility is now an industrial equipment supply operation.

Former White's Meats Packing Facility

Location: Ocala

Historical Use: Meat packing facility

Contaminants: Petroleum and unknown hazards

Reuse: Commercial office space

This derelict meat packing facility sat vacant for 10 years. The owner, who also ran a construction business, used the seven-acre site for storage of heavy equipment, as well as a staging area for materials. For a variety of reasons, the owner deeded the property to the City of Ocala. During the

cleanup, several unregistered underground storage tanks with petroleum products and over thirty 55-gallon drums of unknown substances were removed from the site. An investor was found who offered to build a 75,000 square foot, multi-level office complex. When the project is finished, \$1,838,000 in grant funds will have been acquired, the City of Ocala will have invested almost \$100,000, and the private investor will have spent over \$10 million in land purchase and construction. The project will create over 100 jobs and stimulate revitalization of the surrounding area.

Ware Family Realty, LLC

Location: Jacksonville

Historical Use: Drycleaning facility
Contaminants: Chlorinated solvents

Reuse: Heating, Ventilation, and Air Conditioning

(HVAC) equipment supply facility

The former Raines Drycleaners property was purchased by a neighboring property owner who wanted to expand an existing HVAC equipment supply business. Ware Family Realty, LLC, completed cleanup and redevelopment of the chlorinated solvent contaminated property. The redevelopment included an 8,000 square foot expansion of an existing warehouse resulting in seven new jobs; creation of retail and office space for four businesses; and the creation of office space for a furniture distributor. Prior to site rehabilitation, the property value was \$325,000. The property is currently valued at \$1,213,358.

Wal-Mart Buckley-Shuler, Parcels A-E

Location: Tampa

Historical Use: Former paint facility and commercial dairy Volatile (VOC) and semi-volatile (SVOC)

organic compounds

Reuse: Wal-Mart store and outlying commercial retail parcels

The 40-acre Buckley-Shuler property, located near the intersection of Henderson Road and Gunn Highway in Tampa, was once home to a paint factory. Wal-Mart purchased the property in 2001 for \$2,533,400. The developer, Buckley-Shuler, completed cleanup of VOC and SVOC contamination of the soils and groundwater at a cost of approximately \$700,000. The property is now redeveloped and contains a Wal-Mart retail store, as well as a number of other retail businesses. The current taxable value of the property is \$17,455,770. The Wal-Mart and the businesses on the out parcels provide more than 400 jobs.

Weatherford McIntyre Property

Location: Pensacola

Historical Use: Construction and demolition debris

landfill

Contaminants: Arsenic

Reuse: Commercial supply warehouse

This former construction and demolition debris landfill was located in an area of Pensacola targeted for economic renewal. Under the Program approximately 500 tons of arsenic contaminated soil was

removed from the property. Construction of the building and parking areas provided

engineering controls for the low levels of arsenic still present on the property. The property was redeveloped into a commercial marine parts supply facility. The project resulted in \$724,000 of private investment and 25 new jobs.

Strategic Crossing Corp., CSX Property

Location: Pensacola

Historical Use: Former railroad right-of-way

Contaminants: Arsenic and SVOCs
Reuse: Commercial parking lot

The City of Pensacola successfully used the Florida Brownfields Redevelopment Program to reuse a marginal piece of property in the downtown area. The Strategic Crossing Corporation redeveloped the property to provide parking in conjunction with a commercial redevelopment project. A portion of the project was on the site of an old industrial rail spur contaminated by arsenic and SVOCs. Cleanup of the on-site contamination was completed, and the rail spur property was redeveloped as a much needed downtown parking facility for the new office complex. The total project resulted in \$8 million of private investment and the creation of 120 jobs.

Robbins Manufacturing

Location: Tampa

Historical Use: Wood treating, pole storage

Contaminants: Chromated copper arsenate (CCA)

Reuse: Multi-family residential

The Robbins Manufacturing facility was the first designated Brownfield area in Hillsborough County. The site's past uses included treatment of lumber and poles with CCA and storage of treated telephone poles. Over time, the soil at the facility became contaminated with arsenic. The site development plan called for a residential multi-family

apartment complex on 16 acres and commercial land use on the adjoining eight acres. Site rehabilitation removed all contaminated soil from the residential site and relocated contaminated soil to the commercial site. In accordance with state law, engineering controls and deed restrictions were used to cap and control exposure to contamination remaining on the commercial site.

Community Health Center

Location: Clearwater

Historical Use: Abandoned gas station

Contaminants: Petroleum

Reuse: Community Health Center

The City of Clearwater ended up with responsibility for a rundown former gas station in a low-income neighborhood. There were liens on the property and no one was interested in pursuing such a risky

investment. A community group, with knowledge of the Program, was assembled to convert the property into a much-needed healthcare facility. Four underground storage tanks and hydraulic lifts were removed and 450 tons of contaminated soil was removed and disposed of. Community Development Block Grant funding was acquired to demolish the old structure, and Florida State Tobacco Settlement funds were appropriated for the construction of a new health-care facility. Upon completion, the Willa Carson Community Health Resource Center was able to provide quality healthcare to a medically underserved neighborhood. In the first year of operation, over 7,000 patients were served. New jobs were created, a contaminated site was cleaned up, and an undesirable property became a valuable community asset.
