

FLORIDA  
BROWNFIELDS  
REDEVELOPMENT  
PROGRAM

ANNUAL REPORT  
January 2009 thru June 2010

IKEA  
Ybor City, Tampa

**On the cover:** Originally developed and operated as a cannery from 1936 until 1981, the site of Florida's newest IKEA store had been characterized by local media as a "gritty industrial site between the Port of Tampa and Ybor City". Panattoni Development purchased the property in 2005 and entered the Florida Brownfields Redevelopment Program in 2007. IKEA purchased the property in 2008 from Panattoni after most of the environmental remedial work was complete and opened the store in May 2009. The environmental issues associated with the property were managed by removal of underground storage tanks, railroad tracks and contaminated soil and the use of engineering and institutional controls. The redeveloped 29-acre site now contains a 353,000 square foot store, a 350 seat restaurant and approximately 1,700 parking spaces. With the opening of the IKEA store, a destination shopping location has been created immediately adjacent to historic Ybor City and within the Adamo corridor, which stretches between the Tampa suburb of Brandon and downtown Tampa. The IKEA project created 500 construction jobs and 400 new, in-store jobs. When the store opened, the Tampa area had been particularly hard hit by the effects of the economic downturn and jobs were being lost. The opening of IKEA and the number of jobs being created was widely anticipated and reported from the time that store was announced until several months after the opening. The presence of the IKEA store is expected to be a catalyst for additional redevelopment in the area.

## EXECUTIVE SUMMARY

A brownfield site is real property, the expansion, redevelopment or reuse of which may be complicated by actual or perceived environmental contamination. The Brownfields Redevelopment Program (Program), established in 1997, empowers communities, local governments and other stakeholders to work together to assess, clean up and reuse brownfields.

Participation in the Program declined in 2009. This decline is most likely attributable to the economic downturn. However, the pace of new brownfield area designations and brownfield site rehabilitation agreements (BSRAs) in the first half of 2010 suggests that this year may be slightly better than 2009. For the year ending in December 2009, 10 new brownfield areas were designated by local governments. In addition, 14 BSRAs were executed. Through June of 2010, 14 brownfield areas have been designated and four BSRAs have been executed. The number of applications for voluntary cleanup tax credits continues to increase. The Department received 52 applications in January 2009 for 2008 expenditures and 55 applications in January 2010 for expenditures in 2009. Perhaps the most notable impact of the Program is in the number of jobs created and the total amount of capital investment. The program has created nearly 30,000 new direct and indirect jobs and resulted in almost \$1.68 billion of capital investment over the last 11 years.

### Brownfields Highlights January 2009 thru June 2010

Brownfield Area Designations	24
Brownfield Site Rehabilitation Agreements	18
Site Rehabilitation Completion Orders	10
Voluntary Cleanup Tax Credits for Brownfield Sites	\$4,938,302
Capital Investment	\$387,903,000
New Direct and Indirect Jobs	5,728

Highlights and milestones for the period from January 2009 through June 2010 include:

- ◆ **Brownfield Areas:** Twenty municipalities and county governments approved local resolutions that designated 24 additional brownfield areas. With the additional six 2008 resolutions received in 2009, the total number of brownfield areas in Florida has increased to 252.
- ◆ **Brownfield Site Rehabilitation Agreements:** Eighteen brownfield site rehabilitation agreements were executed (one of which was originally executed in 2004 but revised in 2009), bringing the Program total to 146.
- ◆ **Site Rehabilitation Completion Orders:** Ten site rehabilitation completion orders (SRCO) were issued for sites that completed cleanup of property to standards protective of human health and the environment. The issuance of these SRCOs, and a 2007 order that was not previously counted, brings the total number of SRCOs issued to 35 since inception of the Program in 1997.
- ◆ **Voluntary Cleanup Tax Credits (VCTC):** In 2010, DEP received 43 tax credit applications and approved a total of almost \$5 million in tax credits for site rehabilitation work completed at brownfield sites in 2009. Each year since 2007,

approved tax credits have exceeded the \$2 million annual authorization. Approved tax credits are issued as each new annual authorization becomes available. However, awards for currently approved tax credits will not be complete until July 1, 2014. If VCTC application rates remain at current levels, the backlog of tax credit awards and the time it takes for an applicant to receive its tax credit certificate will continue to increase. This will weaken the value of the strongest incentive in the Program.

- ◆ **New Jobs** From January 2009 through June 2010, 2,336 new direct jobs, 3,392 new indirect jobs and nearly \$387 million in new capital investment were attributable to the Program.<sup>1</sup>
- ◆ **Florida Brownfields Conference:** The 12<sup>th</sup> annual Florida Brownfields Conference was held in Tampa in November 2009. Participation at this two and a half day conference remained strong with attendees representing lenders, real estate professionals, community advocacy groups, environmental consultants, attorneys and federal, state and local governments.

---

<sup>1</sup> Data provided by the Executive Office of the Governor, Office of Tourism, Trade and Economic Development, January 2009.

## **INTRODUCTION AND HISTORY**

Many areas in Florida contain sites with actual or perceived environmental contamination that may present a significant barrier to redevelopment. The Florida Brownfields Redevelopment Act (Act), sections 376.77 - 376.86, Florida Statutes, was adopted by the Florida Legislature in 1997 to assist local governments and individuals responsible for site rehabilitation and redevelopment. The Act establishes the framework for the Program by providing incentives for voluntary environmental cleanup and protection of public health. These incentives facilitate redevelopment of properties and job creation within designated brownfield areas

### **Florida Brownfields Redevelopment Program Objectives**

- ◆ Site rehabilitation
- ◆ Job creation
- ◆ Increased capital investment
- ◆ Broadened tax base
- ◆ Better utilization of infrastructure and community resources
- ◆ Improvements in quality of life and the environment

Local governments play a key role in the Program. Financial and regulatory incentives become available when a local government designates a brownfield area by resolution. These financial and regulatory incentives enable local governments and state agencies to partner with the private sector to rehabilitate blighted properties, create jobs and promote sustainable reuse of properties within designated brownfield areas.

- A **brownfield area** is defined by statute as, "...a contiguous area of one or more brownfield sites, some of which may not be contaminated, and which has been designated by a local government by resolution ...".
- A **brownfield site** is defined by statute as, "...real property, the expansion, redevelopment, or reuse of which may be complicated by actual or perceived environmental contamination".

Since passage of the Act, DEP has provided education and outreach to a variety of interest groups, including communities, environmental consultants, lenders, local governments, economic redevelopment boards and realtors. DEP has also provided technical assistance and streamlined regulatory service to Program participants.

During the 2010 session, the Florida Legislature established August 1 as the annual deadline for this report. Although previously there was no statutory deadline for this report, it was typically submitted in the spring. In order to adjust to the new schedule, this report covers the 18 month period from January 1, 2009 through June 30, 2010. Future annual reports will cover the state fiscal year.

## BROWNFIELDS REDEVELOPMENT PROGRAM STATUS

### Florida Designated Brownfield Areas

Note: Data for 2010 is through June 30, 2010.

Successful brownfield projects and enhanced economic incentives have encouraged local governments to designate more brownfield areas for revitalization. Upon designation, properties within a brownfield area may participate in the stand-alone economic incentives such as a job bonus refund or sales and use tax exemption for building materials used in a mixed-use project or housing project.<sup>2</sup> If contamination is known or suspected, the local government may designate the area and identify the person responsible for brownfield site rehabilitation. This entitles the identified person to negotiate a brownfield site rehabilitation agreement with DEP.

In 2009, 10 local governments reported approval of resolutions designating 10 brownfield areas. During the first half of 2010, 11 local governments have designated 14 brownfields areas. Through this reporting period, there are a total of 252 designated brownfield areas in 96 communities across the state (Figure 1), including six 2008 designations received in 2009 and not included in the previous annual report. The number of brownfield areas designated in 2009 was notably less than in recent years. However, designations in 2010 have already exceeded the number for 2009.

The 252 locally designated areas encompass approximately 185,030 acres of both contaminated and uncontaminated properties, including residential and viable business properties. Appendix A presents the name, location and approximate size of each brownfield area in the state.

<sup>2</sup>Florida Department of Revenue Tax Tip Sheet TIP # 00A01-23, issued August 11, 2000, at <http://dor.myflorida.com/dor/tips/tip00a01-23.html>

**Brownfield Site Rehabilitation Agreements**

Once a local government designates a brownfield area and identifies a “person responsible for brownfield site rehabilitation” (voluntary responsible party), the voluntary responsible party may execute a brownfield site rehabilitation agreement (BSRA) with DEP. The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP’s Brownfields Cleanup Criteria Rule.<sup>3</sup> In addition, the BSRA provides liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Chapter 376.30781, Florida Statutes.

Through June 30, 2010, voluntary responsible parties have executed 146 agreements with DEP since inception of the Program in 1997. Fourteen agreements were executed in 2009, one of which is a revised 2004 agreement that is now reported for 2009 rather than 2004. Four agreements have been executed through the first half of 2010 (Figure 2).

**Site Rehabilitation Completion Orders Issued**

Ten Site Rehabilitation Completion Orders (SRCO), confirming that site rehabilitation was complete, were issued for brownfield sites in the period from January 2009 through June 2010. SRCOs issued in this period increased the total issued since 1997 to 35. This total includes a 2007 SRCO that had not previously been reported. Other sites with executed agreements continue to make progress on site rehabilitation and redevelopment.

Appendix B presents the name, location and approximate size of each brownfield site in the state with an executed BSRA. The table includes a completion date for sites that have received a SRCO (or “no further action” order) or a SRCO with conditions. A SRCO with

<sup>3</sup> Chapter 62-785, Florida Administrative Code

conditions is issued when DEP has approved alternate cleanup target levels for a site because the voluntary responsible party has agreed to use engineering and institutional controls to eliminate exposure to contaminants.

*Status of State Financial Incentives*

**Note:** Figure 3 shows the growth of the Voluntary Cleanup Tax Credit Program since its inception, the annual \$2 million authorization, and the actual and estimated carryover of un-issued tax credits resulting from the \$2 million limit.

In 1998, the Florida Legislature established the Voluntary Cleanup Tax Credit Program to provide an incentive for the voluntary cleanup of drycleaning solvent contaminated sites and brownfield sites in designated brownfield areas (section 376.30781, Florida Statutes). At brownfield sites in designated brownfield areas and at eligible drycleaning solvent sites, a tax credit of 50 percent is allowed for the cost of voluntary cleanup activity that is integral to site rehabilitation, with a maximum of \$500,000 per site per year. At brownfield sites in designated brownfield areas, a one-time 50 percent tax credit is allowed for solid waste removal, with a maximum of \$500,000 per site. Tax credits may be applied to state corporate income tax. The statute authorizes DEP to issue up to \$2 million annually in voluntary cleanup tax credits.

On July 1, 2009, DEP issued 23 tax credit certificates, exhausting the FY 09-10 \$2 million authorization, while leaving a backlog of \$3,191,168. In January 2010, DEP received 55 VCTC applications and approved \$5,637,970 in tax credits for applicants' expenditures in 2009. Of this total, \$4,938,302 - approximately 78 percent - was for 43 brownfield sites. Through June 30, 2010, the backlog for VCTC awards un-issued is \$8,829,138. In January

2011, VCTC applications for site rehabilitation conducted during 2010 are expected to be submitted in approximately the same amounts as for 2009.

The VCTC Program has issued a total of \$13,523,651 in tax credits since it began. This total reflects private sector expenditures for site rehabilitation and solid waste removal of more than \$26 million. Approximately 86 percent of the total amount in tax credits issued since 1998 has been for site rehabilitation at brownfield sites (Figure 3). As shown in Figure 3, since 2007 the dollar value of voluntary tax credit approvals has exceeded the \$2 million per year authorization. In accordance with section 376.30781(11), Florida Statutes, the un-issued tax credit balance is carried over each year. Tax credits are issued in the order that they were received, as fiscal year tax credit authorizations become available. At the annually authorized funding level of \$2 million, presently approved tax credit awards will not all be issued until July 2014.

The brownfields and VCTC programs have been successful, but the financial incentives are falling behind. As shown in Figure 3, the \$2 million annual limit on the VCTC authorization is causing increasing carryover amounts and delays in issuing tax credits. If this continues, it will weaken the value of the strongest incentive in the Program.

The Act also provides financial and economic incentives administered by the Executive Office of the Governor, Office of Tourism, Trade, and Economic Development (OTTED), which includes the Brownfield Redevelopment Bonus Refund<sup>4</sup> and a limited state loan guaranty. In calendar year 2009, 1,234 new direct jobs, 1,997 new indirect jobs, and \$361,746,000 in new capital investment were attributable to the Program. In the first half of 2010, 1,102 new direct jobs, 1,395 new indirect jobs and \$26,157,000 in new capital investment are attributable to the Program. The cumulative totals for new job creation and capital investment attributable to the Program since 1997 are:

- 13,163 new direct jobs,
- 16,529 new indirect jobs, and
- \$1,679,539,591 in capital investment in designated brownfield areas.<sup>5</sup>

The Brownfields Area Loan Guaranty Council, established in section 376.86, Florida Statutes, reviewed and approved one loan guaranty in December 2008. The loan guaranty for \$3.1 million is the only current loan guaranty and is effective for three years from the date of issue. Since inception of the loan guaranty program, one other loan guaranty has been approved. That guaranty was terminated upon full repayment of the subject loan by the borrower.

### *Brownfield Success Stories*

The success of the Program is best demonstrated by the completed projects. Appendix C presents summaries of each project that has entered into a BSRA, completed all cleanup and achieved no further action status. All of the projects have completed cleanup in accordance

---

<sup>4</sup> Pre-approved applicants for the Brownfield Redevelopment Bonus may receive a tax refund of up to \$2,500 for each new job created in a designated brownfield area.

<sup>5</sup> Data provided by the Executive Office of the Governor, Office of Tourism, Trade and Economic Development, June 2010.

with the Brownfields Cleanup Criteria rule (Chapter 62-785, Florida Administrative Code), and most have been redeveloped.

### *Local Pollution Control Program Delegations*

Three county governments - Broward, Hillsborough and Miami-Dade - have received delegation from DEP to administer the Program locally. The original delegation agreements for Broward and Miami-Dade counties were signed in 2000, and the agreement with Hillsborough County was signed in 2004. The Broward County delegation agreement was renewed in May 2010 and renewal of the Miami-Dade County delegation agreement will be completed later this year.

### *Environmental Protection Agency Memorandum of Agreement*

The current Memorandum of Agreement (MOA) between DEP and the U.S. Environmental Protection Agency (EPA) specifies the criteria under which EPA will forego its oversight of cleanups in Florida. Through the MOA, certain sites subject to corrective action under federal Comprehensive Environmental Response Compensation and Liability Act (CERCLA) and Resource Conservation and Recovery Act (RCRA) authority are eligible for state brownfields incentives.

Additionally, to be eligible to receive CERCLA Section 128(a) grant funding authorized by the federal Small Business Liability Relief and Brownfields Revitalization Act of 2002, a state must be a party to a voluntary response program MOA with EPA or demonstrate that its response program includes, or is taking steps to include, the elements of a response program. Florida is one of only 24 states with an existing MOA making the Program automatically eligible for Section 128(a) funding. In 2009, DEP received \$816,540 from this EPA program (see additional grant information on pages 11 and 12).

### *Front Porch Communities and Designated Brownfield Areas*

DEP continues to work cooperatively with other state agencies to identify the needs of Front Porch Communities and use Program resources to assist these communities. Presently, nine Front Porch communities overlap or are contained within a designated brownfield area:

- ◆ Greater Sylvania Heights, Ft. Walton (Okaloosa County);
- ◆ Opa-Locka (Miami-Dade County);
- ◆ Northwest Florida Community Outreach Development Corporation, Pensacola (Escambia County)
- ◆ Greater St. Petersburg (Pinellas County)
- ◆ Northwood, Pleasant City, Northwest Community, West Palm Beach (Palm Beach County);
- ◆ Newton (Sarasota County);
- ◆ West Ocala (Marion County);
- ◆ Holden Heights, Orlando (Orange County); and
- ◆ Goldsboro Community, Sanford (Seminole County).

### *Public Outreach and Education*

As an ongoing responsibility of the Program, DEP staff participated in numerous outreach and educational speaking engagements for various city and county organizations, trade shows and industry groups.

DEP's Brownfields web site, [www.dep.state.fl.us/waste/categories/brownfields](http://www.dep.state.fl.us/waste/categories/brownfields), provides the latest Program-specific information and links to web-sites for the OTTED, Enterprise Florida, Inc., local governments, U.S. Department of Housing and Urban Development, EPA's Brownfields Program and other federal agencies involved in partnering for the redevelopment of brownfields. The site also contains map images of all designated brownfield areas and copies of local government resolutions and executed cleanup agreements. Brownfields can also be located using DEP's new [Contamination Locator Map \(CLM\)](#) website. This tool allows users to locate all sites that are currently under DEP's cleanup oversight and to subscribe to an online service that provides users updates on cleanup milestones.

### *Annual Florida Brownfields Conference*

The 12<sup>th</sup> Annual Florida Brownfields Conference was held in Tampa in November 2009. With the theme "Finding Green in the New Economy," more than 270 people attended this informative conference.

The city of Tampa and the Florida Brownfields Association cooperated in organizing this successful conference with support from Enterprise Florida, Inc., EPA and DEP. Numerous environmental consulting firms, vendors, and law firms provided funds for sponsorship, coordination efforts, speakers and exhibits. DEP staff participated in the conference by making presentations and participating in discussion panels and ad hoc meetings regarding ongoing brownfield projects. The success of this annual conference is due to the many partnerships built among private and public entities.

## **FEDERAL BROWNFIELDS UPDATE**

### *Small Business Liability Relief and Brownfields Revitalization Act of 2002*

Through passage of the Small Business Liability Relief and Brownfields Revitalization Act, policies that EPA developed over recent years were incorporated into law. The brownfields law expanded EPA's assistance to the public and private sectors by providing new tools for promoting sustainable cleanup and reuse.

Brownfields grants continue to serve as the foundation of EPA's Brownfields Program. These grants support revitalization efforts by providing seed money for environmental assessment, cleanup and job training:

- ◆ Assessment Grants provide funding for brownfield inventories, planning, environmental assessments and community outreach. Grant amount - up to \$200,000.
- ◆ Revolving Loan Fund Grants provide funding to capitalize loans that are used to clean up brownfield sites. Grant amount - up to \$1 million.
- ◆ Job Training Grants provide environmental job training for residents of brownfield communities. Grant amount - up to \$200,000.
- ◆ Cleanup Grants provide direct funding for cleanup activities at certain properties with planned green space, recreational or other nonprofit uses. Grant amount - up to \$200,000.
- ◆ Coalition Grants represent a new grant format added in the 2008-2009 grant cycle. A minimum of three eligible applicants may form a coalition to conduct brownfields assessment. Grant amount - up to \$1 million.

In May 2009, Brownfield Competitive Grants were awarded to 10 eligible Florida recipients. Grants totaling \$4.8 million (including \$1.8 million in American Recovery and Reinvestment Act funded grants) were awarded to the following:

- ◆ Central Florida Regional Planning Council
  - \$500,000 Coalition Grant for Petroleum Assessment
  - \$500,000 Coalition Grant for Hazardous Site Assessment
- ◆ City of Clearwater
  - \$200,000 Hazardous Site Assessment
  - \$200,000 Petroleum Site Assessment
- ◆ City of Cocoa
  - \$200,000 Hazardous Site Assessment
  - \$200,000 Petroleum Site Assessment
- ◆ Dixie County
  - \$200,000 Hazardous Site Assessment
  - \$200,000 Petroleum Site Assessment
- ◆ City of Eustis
  - \$200,000 Hazardous Site Assessment
  - \$200,000 Petroleum Site Assessment
- ◆ City of New Smyrna Beach
  - \$200,000 Hazardous Site Assessment

- \$200,000 Petroleum Site Assessment
- ◆ City of Plant City
  - \$200,000 Hazardous Site Assessment
  - \$200,000 Petroleum Site Assessment
- ◆ City of St. Marks
  - \$200,000 Hazardous Site Assessment
  - \$200,000 Petroleum Site Assessment
- ◆ City of Tallahassee
  - \$500,000 Hazardous Site Cleanup
  - \$100,000 Petroleum Site Cleanup
- ◆ City of Tampa
  - \$200,000 Hazardous Site Assessment
  - \$200,000 Petroleum Site Assessment

In May 2010, Florida Brownfield grant applicants were very successful again. A total of \$3 million was awarded to eight local governments, more than double the dollar value of any other state in Region 4. The successful applicants were:

- ◆ City of Casselberry
  - \$200,000 Hazardous Site Assessment
  - \$200,000 Petroleum Site Assessment
- ◆ Clay County
  - \$200,000 Petroleum Site Assessment
- ◆ City of Daytona Beach
  - \$200,000 Hazardous Site Assessment
  - \$200,000 Petroleum Site Assessment
- ◆ Escambia County
  - \$200,000 Hazardous Site Assessment
  - \$200,000 Petroleum Site Assessment
- ◆ Fort Pierce Redevelopment Agency
  - \$200,000 Cleanup HD King Power Plant, Main Site
  - \$200,000 Cleanup HD King Power Plant, Avenue C
  - \$200,000 Cleanup HD King Power Plant, 2<sup>nd</sup> Street
- ◆ Gadsden County
  - \$200,000 Hazardous Site Assessment
  - \$200,000 Petroleum Site Assessment
- ◆ City of Miami
  - \$200,000 Cleanup, Former Shamrock Gas Station
- ◆ City of South Daytona
  - \$200,000 Hazardous Site Assessment
  - \$200,000 Petroleum Site Assessment

The grants will be used to conduct Phase I and Phase II environmental assessments and cleanup activities at sites with known or suspected hazardous substances or petroleum contamination.

DEP received a State and Tribal Response Program Grant (SRP) under CERCLA 128(a) in the amount of \$816,540 from EPA for the 2009-2010 federal fiscal year. This is the seventh year in which DEP has received an SRP grant, with the total amount awarded over the seven years totaling almost \$6 million. Since inception of the SRP grant program, DEP has assisted 62 applicants with 80 projects on contaminated or potentially contaminated sites. DEP uses the grant to pay for staff and contractors that provide brownfields services at eligible sites for local governments, non-profit organizations and other eligible applicants. These services include site-specific assessment and limited cleanup of source areas.

Area ID	Area Name	City	County	DEP District	Original Resolution Date	Amended Resolution Date	Acreage <sup>1</sup>
<b>Total Approximate Acreage:</b>							<b>185,029.99</b>

<sup>1</sup> NR = Not Reported

Total approximate acreage includes actual contaminated and perceived contaminated properties, viable business properties, residential properties, green spaces, and parks etc. Total approximate acreage is not representative of the number of areas that may require cleanup due to contamination but properties (acres) that may be eligible for economic and regulatory incentives pursuant to the Brownfields Redevelopment Act. The determination and designation of a brownfield area is the responsibility of the municipality or county government.

APPENDIX B  
Sites with Executed Brownfield Site Rehabilitation Agreements

# Sites with Executed BSRAs

Florida Brownfields Redevelopment Program

Tuesday, June 29, 2010

3:14:30 PM

APPENDIX C  
Success Stories

## **BROWNFIELDS REDEVELOPMENT SUCCESS STORIES**

The effectiveness of the Florida Brownfields Redevelopment Program (Program) is demonstrated through the cleanup and reuse of previously underused properties. The following projects benefitted from the Program.

### **Lowe's Store, Fern Park**

**Location:** Fern Park  
**Historical Use:** Commercial oil change facility  
**Contaminants:** Petroleum constituents  
**Reuse:** Large scale retail

When Lowe's acquired this property in Fern Park, the former location of a discount retail business had been sitting empty for some time. During redevelopment, Lowe's discovered soil and groundwater contamination associated with the retail car maintenance facility operated by the previous occupant. Remediation included removal of two above ground storage tanks, one underground storage tank, three hydraulic lifts and 73.2 tons of contaminated soil. Completion of this project resulted in the creation of 125 jobs, site cleanup and improvements to an underutilized property.

### **Harbour Cove**

**Location:** Hallandale  
**Historical Use:** Landfill/lakefill and former auto repair  
**Contaminants:** Petroleum, ammonia and arsenic  
**Reuse:** Affordable, multi-family housing

In accordance with the brownfields statute, DEP has delegated authority to Broward County to implement the Program in the county. This project was managed by Broward County Environmental Protection and Growth Management Department (EPGMD), through that delegation agreement. The majority of the 7.06 acre property that is now occupied by Harbour Cove Apartments was originally an old lakefill site. Lakefills are generally non-natural surface water bodies, i.e., a quarry, that are permitted to receive inert solid waste such as construction debris. An old auto repair shop was also located on the property and was the likely source of the petroleum contamination. After completion of assessment, the site was monitored in accordance with Chapter 62-785, F.A.C., to confirm that the low level contaminant plume was stable or shrinking. EPGMD issued a conditional SRCO in May 2009 indicating that no further remediation of the property was necessary as long as the registered engineering and land use controls were maintained. The property has been redeveloped into a four-story, 212 unit affordable housing complex. Approximately 75 construction jobs were created during development and the operation of the complex resulted in 10 permanent jobs. The taxable

value of the property, prior to cleanup was \$290,950. The taxable value of the improved property is now \$6.6 million.

### **Tampa International Center - IKEA**

**Location:** Tampa  
**Historical Use:** Cannery, auto parts recycling, newspaper production  
**Contaminants:** Petroleum constituents, arsenic, aluminum, iron  
**Reuse:** Destination retail store

Originally developed and operated as a cannery from 1936 until 1981, the Tampa International Center property was characterized by local media as a “gritty industrial site between the Port of Tampa and Ybor City.” Environmental testing at the site revealed elevated levels of polycyclic aromatic hydrocarbons (PAHs), total petroleum hydrocarbons and arsenic in the soil, as well as aluminum and iron in the groundwater. The environmental issues associated with the property were managed by removal of tanks, railroad tracks and contaminated soil and the use of engineering and institutional controls. Institutional controls were recorded to ensure that the soil cap is maintained and to limit future land use to commercial/industrial. IKEA opened its third Florida store on the property in May 2009. The redeveloped 29-acre site now contains a 353,000 square foot store, a 350 seat restaurant and approximately 1,700 parking spaces. The IKEA project created 500 construction jobs and 400 new, in-store jobs.

### **Century**

**Location:** Century  
**Historical Use:** Lumber mill, wood door manufacturing  
**Contaminants:** Volatile Organic Compounds  
**Reuse:** Sale of the property in negotiation

From approximately 1900 until the late 1960s, Alger-Sullivan Company operated a lumber mill on the site. Various companies, including Wayne Dalton Corporation, manufactured wooden doors at the facility from approximately 1971 until 1992. As part of the manufacturing process, the wooden doors were dipped in pentachlorophenol wood preservative. The contamination on the property was associated with a release from the dipping tank. Cleanup of groundwater and soils was conducted and a conditional SRCO was issued by DEP in 2009, indicating that no further remediation of the property was necessary as long as the registered engineering and land use controls were maintained. Another manufacturing concern was originally interested in acquiring the property after cleanup, but didn't take place. Although the property is now vacant, a sale is under negotiation.

### **Sandefur Site**

**Location:** Sanford  
**Historical Use:** Agricultural  
**Contaminants:** Arsenic  
**Reuse:** Elementary school

Seminole County selected the Sandefur property for construction of the Midway Elementary School of the Arts. Sampling of the property prior to development revealed arsenic contamination in the soils. Contaminated soils were excavated and the site received a SRCO without conditions in April 2009. The school was opened in January 2010.

### **Clearwater Automotive**

**Location:** Clearwater  
**Historical Use:** Former foundry and auto salvage yard  
**Contaminants:** Metals and PAHs  
**Reuse:** Ready for redevelopment

A variety of businesses have occupied the Clearwater Automotive site for more than 80 years. In the 1920s a drycleaning facility was located on the property. A metal foundry operated at the site from 1947 until 1975, and then Hart Electric, Inc. owned the site until 1981. From 1981 until approximately 2005, the Clearwater Automotive salvage yard operated on the property. The site is located immediately adjacent to a residential area and represented an eyesore, as well as a potential health risk to nearby residents. The city of Clearwater purchased the property and entered into a BSRA with DEP. Cleanup of the property was completed in 2009. Planned redevelopment of the property has been slowed by economic conditions, but the eyesore and health risk have been removed.

### **Dimmitt Parcel B**

**Location:** Clearwater  
**Historical Use:** Car dealership and light industry  
**Contaminants:** Volatile and semi-volatile organic compounds, metals  
**Reuse:** Ready for redevelopment

A car dealership was operated on the Dimmitt property for many years. Records also show that a gas station occupied a portion of the property during the 1940s. Operations at the site included new and used car sales, administrative offices, car rental, car washing and auto repair. After Dimmitt Chevrolet ceased operations, a number of other automobile rental, maintenance and repair businesses operated on the property until

1999. At that time, the city of Clearwater acquired the property, demolished the buildings on the site, and began the process of site rehabilitation. Groundwater and soil contamination were present as the result of a discharge associated with the automobile operations. Contaminated soils were removed from the property and an interim land use control was implemented to prevent use of groundwater while the resources necessary to complete cleanup were acquired. Groundwater cleanup was completed in 2009 and DEP issued an unconditional SRCO for the property. The Dimmitt site is located within the city of Clearwater's Community Redevelopment Area (CRA). Plans to redevelop the property have been stalled twice due to economic conditions.

### **GCS Downtown Phase I, Parcel A**

<b>Location:</b>	Green Cove Springs
<b>Historical Use:</b>	Car dealership
<b>Contaminants:</b>	Petroleum constituents
<b>Reuse:</b>	Ready for redevelopment

The former Garber Pontiac property is located on Highway 17 in downtown Green Cove Springs. This property, along with a handful of others along Highway 17, has been inactive for a number of years. The city of Green Cove Springs targeted the corridor for redevelopment, actively recruiting developers, and supporting redevelopment efforts through the designation of the brownfields area and acquisition of federal brownfields grants. Parcel A is the first site along the corridor to complete site rehabilitation under the Florida Brownfields program. Planned redevelopment of the property is for residential and commercial land use.

### **Embry-Riddle Aeronautical University**

<b>Location:</b>	Daytona Beach
<b>Historical Use:</b>	Agricultural
<b>Contaminants:</b>	Arsenic
<b>Reuse:</b>	Proposed research and technology park

Embry-Riddle Aeronautical University owns 77.6 acres of property located south of its Daytona Beach campus. An assessment of the property revealed low level concentrations of arsenic in groundwater. The university entered into a BSRA with DEP to address the contamination and received a SRCO in March 2010. As part of a private-public partnership with the city of Daytona Beach, the university intends to develop an aeronautical and aerospace research and technology park on the property. The approved development plan for the proposed technology park includes 595,000 square feet of office and building space and will feature an amphitheatre, plaza and walking trails. The technology park will promote research, development, technological, aeronautical and aerospace education activities; provide an economic engine to attract new businesses to the area, and; create employment opportunities for local residents and recent university graduates.

### Baratta ROCC

<b>Location:</b>	Apopka
<b>Historical Use:</b>	Used tire storage
<b>Contaminants:</b>	88,000 buried tires
<b>Reuse:</b>	Light industry, including a biodiesel plant

The Baratta property sat vacant for more than 20 years before a developer purchased the property for redevelopment. During the early stages of site preparation, 88,000 buried tires were discovered on the property. The cost of dealing with the tires threatened to undermine the entire project. Working with the Program, the developer was able to sign a BSRA in the fall of 2007 and remove all the tires before the end of that year. After removal, the developer conducted site assessment to confirm that there were no further impacts on the property. The DEP issued an SRCO in May 2008. The Baratta site was the first project to take advantage of the Voluntary Cleanup Tax Credit (VCTC) for solid waste available to brownfield sites. When purchased in 2002, the property was valued at \$210,000. The current value is \$1.56 million. Construction of 22,000 square feet of flex-space warehousing was completed in December 2008 and the property is already 50 percent leased. The developer's plans include turning this brownfield site into a brightfield (a contaminated site that has been converted to usable land using pollution-free solar energy bringing high-tech solar manufacturing jobs to the site). A solar panel company and a bio-diesel fuel company will be located on the property in the next six months. With current tenants and the two green energy projects, approximately 12 new jobs will be created.

### 2780 South Street

<b>Location:</b>	Fort Myers
<b>Historical Use:</b>	Truck servicing and light manufacturing
<b>Contaminants:</b>	Petroleum constituents
<b>Reuse:</b>	Ready for redevelopment

The property at 2780 South Street, Fort Myers was utilized between 1962 and 1993 as a truck servicing facility. Subsequent to that, a plastics manufacturing facility operated on the property for approximately five years. In 1998, operations of the plastics company ceased and the site was left unoccupied for eight years. Cleanup of the property, under the Program, was completed in approximately one year. The cleanup addressed petroleum contamination in soil and groundwater associated with the former fueling areas. A light manufacturing operation was originally planned for the site, however, these plans changed and the property is now under contract to a landscape supply company. The landscape supply company plans to use the property to operate a bagging facility for river rock and other landscape stones.

### Wagner Square

**Location:** Miami  
**Historical Use:** Plant nursery, dump site  
**Contaminants:** Incinerator ash, metals, dioxins/furans  
**Reuse:** Affordable/workforce housing

In 1998 a due-diligence investigation of the 3-acre Wagner Square property site was conducted for an impending property sale. The vacant parcel was owned by the city of Miami and was known as the Civic Center Property. The Phase I environmental assessment documented that the property was first developed with residences in the 1930s. A nursery was located on the northern portion of the site from approximately 1949 to the mid 1980s. The nursery and all residential structures were cleared from the subject site by 1986. Investigation of the site revealed debris from illicit dumping. In addition, test pits showed a layer of incinerator ash across the eastern portion of the property. Soils contained elevated concentrations of arsenic, barium, lead and dioxins/furans. No groundwater contamination was documented. The city of Miami and Wagner Square were awarded a Brownfields Economic Development Initiative (BEDI) grant from the U.S. Department of Housing and Urban Development to address the contamination and redevelop the site. The property was sold to Wagner Square, LLC in 2004. Wagner Square, LLC entered into a BSRA with DERM in June 2004. The first phase of the proposed development is construction of 56 units of affordable/workforce housing. The second phase consists of the development of a 330,000 square foot medical office building with a 1,300 car parking garage. The third phase is another 48-unit affordable/workforce condominium. Underground infrastructure was started in 2008 but construction stalled thereafter due to the downturn in the economy. However, the developer anticipates that the development will soon begin again.

### JM Family Enterprises

**Location:** Jacksonville  
**Historical Use:** Bulk petroleum storage  
**Contaminants:** Petroleum  
**Reuse:** Expanded vehicle receiving and distribution

The JM Family Enterprises property is located in the Port of Jacksonville. A bulk petroleum storage facility occupied the property across the street from the JM Family vehicle receiving and distribution facility. Petroleum contamination was discovered on the property. Cleanup was completed in 2007 and the site received an SRCO that year. Cleanup of the property allowed expansion of the vehicle receiving and distribution facility.

### Casbah Properties

**Location:** Melbourne  
**Historical Use:** Gas station  
**Contaminants:** Petroleum  
**Reuse:** Restaurant

This former gas station property is located in downtown Melbourne and had become a rundown eyesore. Knowing that underground storage tanks were present on the property and that contamination might be present, the new property owner/developer chose to enter the Program. The VCTCs available through the Brownfields Program made the project financially feasible. A total of nine underground and above ground storage tanks were removed from the property. No impacts to soil or groundwater were found. After cleanup and renovation, the new restaurant has become a must-eat dining destination. The rehabilitation of the Matt's Restaurant property is playing an important role in the revitalization of downtown Melbourne.

### Former W.T. Edwards Property

**Location:** Tampa  
**Historical Use:** Former tuberculosis hospital  
**Contaminants:** Petroleum  
**Reuse:** Educational and job training facility

The W.T. Edwards Hospital, erected in 1952, was one of three tuberculosis (TB) hospitals built in Florida after World War II and was funded by a state cigarette tax and federal sources. With the decline in the occurrence of TB, the hospital closed in 1974. The facility was subsequently used by the Florida Department of Health for a number of years. In 2003, Hillsborough Community College was allowed to purchase the property. The property will be the centerpiece of a public-private partnership on the campus, "Center for Workforce Innovation." The W.T. Edwards site had environmental considerations including five underground storage tanks, a drum storage area, and asbestos in the old building. The storage tanks were closed in accordance with state regulations. One tank area had documented contamination which was closed with a soil removal and monitored natural attenuation. The drum storage area was cleaned up by removing contaminated soil. Groundwater assessment revealed no impacts to the groundwater in the area. The college received an EPA Revolving Loan, which included a \$170,000 sub-grant and a \$255,000 loan, to assist in paying for asbestos removal from the old hospital building.

### Circle Tampa Venture

<b>Location:</b>	Tampa
<b>Historical Use:</b>	Aluminum can plant, former army airfield
<b>Contaminants:</b>	Metals, solvents, polychlorinated biphenyls (PCBs), oil and grease
<b>Reuse:</b>	Upscale apartments and townhomes

The former Ball Metal Plant operated for 36 years and then sat unused for six years. Circle Tampa Ventures entered the Program and completed voluntary cleanup of the property. Cleanup included removal of 443 tons of contaminated soil and execution of a restrictive covenant prohibiting the use of groundwater. The site is located north of Busch Gardens and south of the University of South Florida and H. Lee Moffitt Cancer Center and Research Institute. Redevelopment of the site is underway and features upscale, three-story apartments and townhomes. The 468 apartments and townhome units opened in early 2008. The sales price of the property in 2004, prior to cleanup, was \$3.15 million. When complete, the property value is projected to be approximately \$44 million. The project has resulted in the creation of 10 management, leasing and maintenance jobs.

### Tallahassee Residence Inn

<b>Location:</b>	Tallahassee
<b>Historical Use:</b>	Bulk petroleum facility
<b>Contaminants:</b>	Petroleum and dioxin
<b>Reuse:</b>	Hotel

Tallahassee's Gaines Street Corridor is a historically industrial area located near the heart of downtown. Gaines Street's prime location, between Florida State University and Florida Agriculture and Mechanical University and immediately south of the State Capitol complex stimulated a plan for revitalization of the area. The first major project in the corridor was the completion of the Marriott Residence Inn in the fall of 2006. The property was known to be contaminated and had been the site of a bulk petroleum storage facility in addition to other industrial uses. By working with the developer to pool economic and environmental incentives, the city of Tallahassee was able to secure a commitment for redevelopment of the property and create a benchmark for redevelopment of the remainder of the corridor. DEP issued a conditional SRCO in the spring of 2007, indicating that no further cleanup of the property was necessary as long as the registered engineering and land use controls were maintained. Total construction cost for the Marriott Residence Inn was \$10 million. The hotel now employs 32 full-time and nine part-time staff. Prior to redevelopment, the property was valued at \$588,166. The property is now valued at more than \$10 million.

### Sunterra Site

**Location:** Orlando  
**Historical Use:** Former Montgomery Ward store  
**Contaminants:** Hydraulic oils  
**Reuse:** Sheriff's substation

This former retail department store sat empty for some time after the Montgomery Ward Corporation went bankrupt. Operations at the property had included an automotive service center. Approximately eight hydraulic lifts remained on the property. Sunterra Corporation entered into a BSRA with DEP to conduct voluntary cleanup of the property. The hydraulic lifts and associated contaminated soils were removed. No groundwater contamination was found. Sunterra originally redeveloped the property as a call center to market timeshare properties, but the property is currently being used as an annex to the Orange County Sheriff's Office. The facility includes training and office areas.

### Dania Motocross

**Location:** Dania Beach  
**Historical Use:** Motocross race track  
**Contaminants:** Metals in groundwater  
**Reuse:** Warehouse complex

The Dania Motocross facility operated as a recreational and competitive motocross track from 1995 until 2005. Prior to 1989, the property was an illegal dump. The developer entered into a BSRA with Broward County to address metals contamination in the groundwater. In accordance with the brownfields statute, DEP has delegated authority to Broward County to implement the Program in the county. In August 2006, Broward County issued a conditional SRCO for the property indicating that no further action was necessary at the site, as long as land use was restricted in accordance with the conditions recorded on the deed. The site is currently in the permitting stages of redevelopment for use as a warehouse complex.

### Sunray Enterprises, Inc.

**Location:** Pensacola  
**Historical Use:** Gas station  
**Contaminants:** Petroleum  
**Reuse:** Automobile repair shop

The storage tanks from this former gas station site were removed in the 1970s. In accordance with rules in place at that time, the dispenser island was left in place. Under the Program, the new owner removed the dispenser island and cleaned up the petroleum

contaminated soils and groundwater. The original building was left on the property and it is currently being used as an automobile repair shop.

### Centro Asturiano

<b>Location:</b>	Tampa
<b>Historical Use:</b>	Hospital
<b>Contaminants:</b>	Petroleum, incinerator debris, and biohazards
<b>Reuse:</b>	Mixed income retirement housing

Centro Asturiano Hospital was built in 1928 and served the Ybor City community until the early 1990s. In 1996, the city condemned and demolished all but one of the buildings on the hospital's campus. The remaining hospital building suffered from neglect and vandalism during its 10-year vacancy. The Centro Asturiano property has been rehabilitated in accordance with state environmental standards and redeveloped to benefit the community. The seven-acre campus is now affordable housing for senior citizens. The 7,000 square foot historic hospital building was renovated to house administrative functions and a clubhouse for residents. More than \$16 million in public and private funds were invested in the project and four full-time jobs were created. The pre-development value of the property was \$290,110. The current value of the property is more than \$3.6 million.

### Riverfront (Heights Redevelopment Area) Complex

<b>Location:</b>	Tampa
<b>Historical Use:</b>	Marine repair, dump site for bridge demolition debris, lift station
<b>Contaminants:</b>	Metals, petroleum compounds and PCBs
<b>Reuse:</b>	Residential condominiums

Located in downtown Tampa on the Hillsborough River, this property was a former dump site and marine repair facility. Demolition debris and other waste from an old bridge had been stockpiled on the property. An assessment revealed low level concentrations of metals, volatile organic compounds and petroleum products in site soils. The developer entered into a BSRA with DEP with plans to build condominiums on the property. Contaminated soils were removed from the site and it is currently ready for redevelopment. Although the original developer withdrew its redevelopment plan, the property is now included in the Heights Community Redevelopment Area and a new redevelopment plan is underway. The project is located adjacent to the new Stetson University Law Building and across the river from the Blake Magnet High School for the performing arts.

### Former Clearwater Sun Property

<b>Location:</b>	Clearwater
<b>Historical Use:</b>	Printing and publishing facility
<b>Contaminants:</b>	Arsenic and petroleum
<b>Reuse:</b>	Residential

Soil and groundwater contamination at this facility were present at this former printing and publishing facility operated by the Clearwater Sun newspaper. The principal contaminants were arsenic and petroleum compounds. Upon completion of assessment and remediation, DEP issued a conditional SRCO in January 2007. The conditional SRCO stated that no further remediation of the property was necessary as long as registered engineering and land use controls are maintained. The original building was left in place and renovated for reuse. The facility is now an industrial equipment supply operation.

### Former White's Meat Packing Facility

<b>Location:</b>	Ocala
<b>Historical Use:</b>	Meat packing facility
<b>Contaminants:</b>	Petroleum and unknown hazards
<b>Reuse:</b>	Commercial office space

This derelict meat packing facility sat vacant for 10 years. The owner, who also ran a construction business, used the seven-acre site for storage of heavy equipment and a staging area for materials. For a variety of reasons, the owner deeded the property to the city of Ocala. During the cleanup, several unregistered underground storage tanks with petroleum products and more than thirty 55-gallon drums of unknown substances were removed from the site. An investor was found who offered to build a 75,000 square foot, multi-level office complex. At project completion, \$1,838,000 in grant funds had been acquired, the city of Ocala had invested almost \$100,000 and the private investor had spent more than \$10 million in land purchase and construction. The project has created in excess of 100 jobs and stimulated revitalization of the surrounding area.

### Ware Family Realty, LLC

<b>Location:</b>	Jacksonville
<b>Historical Use:</b>	Drycleaning facility
<b>Contaminants:</b>	Chlorinated solvents
<b>Reuse:</b>	Heating, ventilation, and air conditioning (HVAC) equipment supply facility

The former Raines Drycleaners property was purchased by a neighboring property owner who wanted to expand an existing HVAC equipment supply business. Ware Family Realty, LLC, completed the cleanup and redevelopment of the chlorinated solvent contaminated

property. The redevelopment included 8,000 square foot expansion of an existing warehouse resulting in seven new jobs, creation of retail and office space for four businesses and the creation of office space for a furniture distributor. Prior to site rehabilitation the property value was \$325,000. The property is currently valued at more than \$1.2 million.

**Wal-Mart Buckley-Shuler, Parcels A-E and Gunn Highway**

**Location:** Tampa  
**Historical Use:** Former paint facility and commercial dairy  
**Contaminants:** Volatile (VOC) and semi-volatile (SVOC) organic compounds  
**Reuse:** Wal-Mart store and outlying retail parcels

The 40-acre Buckley Shuler property, located near the intersection of Henderson Road and Gunn Highway in Tampa, was once home to a paint factory and dairy farm. Wal-Mart purchased the property, a total of six parcels, in 2001 for \$2,533,400. The developer, Buckley Shuler, completed cleanup of VOC and SVOC contamination of the soils and groundwater at a cost of approximately \$700,000. The five outparcels (parcels A-E) were assessed and cleaned up relatively quickly. All five outparcels had received approval for no further action by 2004. Natural attenuation with monitoring was conducted on the sixth parcel and a SRCO without conditions was issued in 2009. Wal-Mart was able to redevelop the property while groundwater remediation was ongoing. The current taxable value of the property is around \$17.5 million. Wal-Mart and the businesses on the out parcels provide more than 400 jobs.

**Weatherford McIntyre Property**

**Location:** Pensacola  
**Historical Use:** Construction and demolition debris (C&D) landfill  
**Contaminants:** Arsenic  
**Reuse:** Commercial supply warehouse

This former C&D debris landfill was located in an area of Pensacola targeted for economic renewal. Under the Program, approximately 500 tons of arsenic contaminated soil was removed from the property. Construction of the building and parking areas provided engineering controls to prevent exposure to the low levels of arsenic still present on the property. The property was redeveloped into a commercial marine parts supply facility. The project resulted in \$724,000 of private investment and 25 new jobs.

### Strategic Crossing Corporation, CSX Property

**Location:** Pensacola  
**Historical Use:** Former railroad right-of-way  
**Contaminants:** Arsenic and SVOCs  
**Reuse:** Commercial parking lot

The city of Pensacola successfully used the Program to reuse a marginal piece of property in the downtown area. The Strategic Crossing Corporation redeveloped the property to provide parking in conjunction with a commercial redevelopment project. A portion of the project was on the site of an old industrial rail spur which was contaminated by arsenic and semi volatile organic compounds (SVOCs). Cleanup of the on-site contamination was completed and the rail spur property was redeveloped as a much needed downtown parking facility for a new office complex. The total project resulted in \$8 million of private investment and the creation of 120 jobs.

### Robbins Manufacturing

**Location:** Tampa  
**Historical Use:** Wood treating, pole storage  
**Contaminants:** Chromated copper arsenate (CCA)  
**Reuse:** Multi-family residential

The Robbins Manufacturing facility was the first designated brownfield area in Hillsborough County. The site's past uses included treatment of lumber and poles with CCA and storage of treated telephone poles. Over time, the soil at the facility became contaminated with arsenic. The site development plan called for a residential multi-family apartment complex on 16 acres and commercial land use on the adjoining eight acres. Site rehabilitation removed all contaminated soil from the residential site and relocated contaminated soil to the commercial site. In accordance with state law, engineering controls and deed restrictions were used to cap and control exposure to contamination remaining on the commercial site.

### Community Health Center

**Location:** Clearwater  
**Historical Use:** Abandoned gas station  
**Contaminants:** Petroleum  
**Reuse:** Community Health Center

The city of Clearwater came into possession of a rundown former gas station in a low income neighborhood. There were liens against the property and no one was interested in pursuing an apparently

*Florida Brownfields Redevelopment Act - Annual Report  
January 2009 through June 2010*

---

risky investment. A community group with knowledge of the Program was assembled to convert the property into a much needed healthcare facility. Four underground storage tanks and hydraulic lifts were removed and 450 tons of contaminated soil were removed and disposed of. Community Development Block Grant funding was acquired to demolish the old structure and Florida State Tobacco Settlement funds were appropriated for the construction of a new health care facility. Upon completion, the Willa Carson Community Health Resource Center was able to provide quality healthcare to a medically underserved neighborhood. In the first year of operation, more than 7,000 patients were served. New jobs were created, a contaminated site was cleaned up and an undesirable property became a valuable community asset.
