TRENDS AND CONDITIONS STATEMENT

The Department of Citrus, headquartered in Lakeland, Florida, is an executive agency of state government. It was established in 1935 at the request of the citrus industry to enhance the welfare of the industry. The primary purpose was to set standards for Florida citrus products and to fund marketing and research programs for the direct benefit of the citrus industry. That continues to be the Department's primary purpose today.

The Department implements policies of the Florida Citrus Commission, a 12-member Board of Directors appointed by the Governor and representing all areas of the industry. The Commission and the Department are organized and operate as provided in Chapter 601, Florida Statutes. The Department is charged with setting quality standards for Florida Citrus products, promoting and marketing citrus products, and conducting research to support the regulatory and marketing programs. Chapter 601 F.S. also provides the authority to collect a tax on each box of citrus moving into commercial channels of trade and this supports the operations of the Department. The Department also receives matching federal dollars from USDA to support our international marketing programs.

In April 2005, the Florida Citrus Commission adopted a new mission statement and Strategic Plan for the Florida Department of Citrus (FDOC). The Strategic Plan concentrated on objectives and strategies that grow the market for Florida citrus. Its sole purpose is to provide a roadmap for the Department and to focus it on the core responsibilities of marketing, research and regulating product quality for all Florida citrus products. The four objectives and associated strategies carefully delineate those activities that are geared to grow the market.

- **Marketing**: Promote the Florida citrus industry's products by developing positive, consumer-driven messages about citrus, thereby increasing awareness and demand via advertising, public relations and consumer/trade communications.
- **Research**:
 - **Market**: Conduct research to understand consumer attitudes and behavior, product attributes and benefits, and sales trends and status.
 - **Scientific**: Provide scientific validation of the nutritional benefits of Florida citrus products and support efforts to preserve the viability of the Florida citrus industry through citrus disease research, and increase efficiency in harvesting, handling and processing of industry products.
- **Regulatory**: Protect the integrity of the Florida citrus industry's interest through advocacy and regulation.
- **Communication and Fiscal Responsibility**: Provide consistent communication to the industry and ensure fiscal accountability.

- The 2006 Special Industry Committee identified threats relating to the supply and demand of Florida citrus products and also noted that consistent, unified communication was needed to help resolve issues at the State and Federal levels. They recommended that the Department continue and even expand involvement in

research efforts, continue efforts to generically influence consumers to grow demand, and continue lobbying efforts while working with other industry groups to assure a unified message.

- In January 2008 the Florida Citrus Commission passed a resolution to fund citrus disease research, particularly greening disease research, as it is recognized as the greatest threat to the future of the Florida citrus industry. The Department expended \$7.2 million in 2008-09 to support disease research.
- Research staff continues to work closely with several industry and research groups in the development of a process to conquer this dreaded disease and establish research protocol for a viable future for the Florida citrus industry. The Florida Citrus Commission has approved \$10 million for 2009-10 to continue support of disease research.

Internal program evaluation measurements are the basis for the Long Range Program Plans and Legislative Budget Request. Each year, the Florida Citrus Commission, with input from the citrus industry, adopts certain measures that set the priorities of the Department and establish realistic goals based upon the annual operating budget. The perspectives of the measures are aligned with and capture the direction of the Department's Strategic Plan.

The Department's goals reflect our statutory charge, the mission statement, strategic plan and projected crop sizes for the next five years. Orange crops are projected to steadily decline in future seasons due to several natural forces: the spread of pests and diseases, weather influences, and the use of agriculture land for commercial and residential development, to name a few. Therefore, the Department's goals with respect to utilization and shipments are adjusted downward accordingly.

FDOC Goal #2 is to increase fresh citrus sales by conducting cost-effective marketing programs domestically and internationally. Sales of fresh Florida citrus have suffered due to crop shortages and supply issues. In addition, aggressive competition, coupled with supply limitations, (Canker, Greening, Tristeza and Urban Development) suggest a downward forecasted trend of fresh fruit shipments through 2014-15. To measure the effectiveness of the Department's marketing activities of a declining crop, an additional outcome measurement, "on-tree earnings," was established internally. The citrus industry's on-tree earnings are forecast to increase even as the industry has requested a reduction of the fresh fruit tax and domestic marketing programs they would support for the 2009-10 season. The primary fresh program focus will be on research efforts to bring a more competitive product to market. The Department will continue to measure the movement and on-tree earnings for the industry.

Budget Entities

The services we provide are under three budget entities: agricultural products marketing, citrus research and executive direction and administrative support.

The Agricultural Products Marketing Service objective is to promote the Florida citrus industry's products by developing positive, consumer-driven messages about citrus, thereby increasing awareness and demand via advertising, public relations, and consumer/trade communications. The Department develops and implements a domestic and international integrated marketing program consisting of advertising, public relations and consumer promotions. To measure the marketing program's effectiveness, consumer awareness of Florida citrus products (including recall of our advertising) and consumer intent to purchase our products are tracked.

The objective of Citrus Research is to conduct research to understand consumer behavior, product attributes and benefits, and increase efficiency in harvesting, handling, and processing of industry products. As a result of the Special Industry Committee recommendations and the specific disease research needs, more emphasis has been placed on internal research activities and the coordination and support of research activities through the industry and with research organizations.

It is the responsibility of Executive Direction and Support Services to oversee these activities, provide direction, administer the programs, monitor results, provide support services, and also to serve as liaison to the Florida Citrus Commission, the Governor's Office, and the Legislature. The objectives of this budget entity are two-fold. Protect the integrity of the Florida citrus industry's interest through advocacy and regulation; and provide consistent communication to the industry and legislative authorities, and to ensure fiscal accountability.

A continuation budget of approximately \$67.0 million is projected for 2009-10 and 2010-11. Revenue projections were developed using the projected crop estimate for 2009-10 and the tax rates authorized by Chapter 601F.S.

PERFORMANCE MEASURE VALIDITY AND RELIABILITY - LRPP EXHIBIT IV

LRPP EXHIBIT IV: Performance Measure Validity and Reliability

Department: Department of Citrus

Program: Citrus

Service/Budget Entity: Citrus Research/57010000

Measure: Number of health or nutrition research reports completed annually in support of marketing messages

Action (check one):

- Requesting revision to approved performance measure.
- Change in data sources or measurement methodologies.
- Requesting new measure.
- Backup for performance measure.

Data Sources and Methodology: Internal staff records. Each research scientist submits activities each year; a schedule of research/marketing projects/reports are prepared; progress is tracked by our Research Director and reported to the Florida Citrus Commission.

Validity: Confirmed by Florida Department of Citrus marketing staff, professional marketing agencies, and a professional/industry advisory council.

Reliability: Results are published and citrus commission and industry provide feedback, if applicable.

LRPP EXHIBIT IV: Performance Measure Validity and Reliability

Department: Department of Citrus

Program: Citrus

Service/Budget Entity: Citrus Research/57010000

Measure: Number of reviews conducted on health or nutrition research projects to provide new marketing messages and translate results to consumer-friendly reasons to consume Florida citrus products

Action (check one):

- Requesting revision to approved performance measure.
- Change in data sources or measurement methodologies.
- Requesting new measure.
- Backup for performance measure.

LRPP EXHIBIT IV: Performance Measure Validity and Reliability

Department: Department of Citrus
Program: Citrus
Service/Budget Entity: Citrus Research/57010000
Measure: Number of acres mechanically harvested

Action (check one):

- Requesting revision to approved performance measure.
- Change in data sources or measurement methodologies.
- Requesting new measure.
- Backup for performance measure.

Data Sources and Methodology: Mechanical harvesting contractors and growers are contacted quarterly for a total of the acres and field boxes harvested to date.

Validity: The harvest tracking survey is designed to measure:

- The number of contractors
- The number/type of harvesters
- The total volume of fruit that was mechanically harvested

Reliability: This survey provides a good estimate of the adoption and use of mechanical harvesting technologies throughout the Florida citrus industry.

LRPP EXHIBIT IV: Performance Measure Validity and Reliability

Department: Department of Citrus

Program: Citrus

Service/Budget Entity: Agriculture Products Marketing Service/57030000

Measure: Percent of consumer recall after television orange juice advertising

Action (check one):

- Requesting revision to approved performance measure.
- Change in data sources or measurement methodologies.
- Requesting new measure.
- Backup for performance measure.

Data Sources and Methodology: A Consumer Tracking Study is contracted for and conducted by Data Development Worldwide (DDW), headquartered in New York with its regional office in Maitland, Florida. DDW conducts telephone interviews that typically last 25 minutes. They are conducted daily, throughout the entire year, with results reported quarterly.

Validity: The Consumer Tracking Study is designed to measure:

- U.S. populace attitudes regarding citrus products;
- U.S. populace usage of citrus products; and
- U.S. populace recall and responsiveness to Florida Department of Citrus (FDOC) advertising.

This document provides an excellent marketing report to evaluate the effectiveness of FDOC advertising and public relations activities. The measurement of “recall” of our advertisements and understanding consumer responsiveness to FDOC advertising message is critical to the evaluation of the program.

Reliability: On a quarterly basis, approximately 375 telephone interviews are conducted; 200 among the general population and 175 augments among women with children ages 6-17. Interviews are conducted among a random sample of adults at least 18 years of age, yielding a nationally representative view of the U.S. population in terms of geographic location, age, household income, ethnicity and other lifestage/demographic considerations.

Data Sources and Methodology: Tree census from United States Department of Agriculture, grower returns from Florida Citrus Mutual, and other reliable sources.

Validity: Economic reports validated by University of Florida (IFAS) and Florida Department of Citrus – Economic and Marketing Research.

Reliability: The Economic and Marketing Research department of the Florida Department of Citrus prepares a Citrus Reference Book annually which is reviewed by industry experts, published, and utilized by all citrus growers/ industry.

Data Sources and Methodology: On a monthly basis staff members record the number of industry presentations, meetings and conferences, along with sufficient information regarding attendees and subject matter of meeting.

Validity: Data can be traced back to staff and industry member calendars.

Reliability: A typical meeting has several staff members in attendance, therefore attendance can be verified with more than one source.

LRPP EXHIBIT IV: Performance Measure Validity and Reliability

- Requesting new measure.
- Backup for performance measure.

Data Sources and Methodology: As required by Chapter 601, Florida Statutes and Chapter 20 of the Florida Administrative Code governing the Department of Citrus, the Florida Department of Agriculture and Consumer Services (FDACS) is assigned the responsibility to inspect and ensure quality standards are met on all fresh citrus which enters the primary channel of trade. Confirmation of this activity includes manifest and certificates of inspection from each Florida packinghouse (which includes, among other information, the number of cartons and destination of the fruit). That information is transferred to the Florida Department of Citrus (FDOC), division of economic and market research, who reports industry total movement on a monthly basis.

Validity: The “workload” of the Florida fresh fruit industry can be identified annually as the number of boxes to be harvested. Comparison to prior year activities, percent of the total crop and delivery to domestic or international markets are all appropriate measures of the FDOC marketing, regulatory and legislative efforts.

Reliability: This measurement is unique to the FDOC inasmuch as no other source captures the associated information of fresh fruit shipments. Comparison to prior years, year-end reports, as well as monthly industry publications have proven the reliability of the methodology. In addition, periodic audits are conducted on the private packinghouse, which confirm tax (advertising) payments and total fresh fruit shipments.
