EXECUTIVE SUMMARY

Chapter 2011-47, Laws of Florida, directs the Department of Management Services (DMS), with the cooperation of agencies having existing lease contracts for private office or storage space in excess of 2,000 square feet, to renegotiate or reprocure all private leases that expire before June 30, 2013, to achieve cost savings in future years. Chapter 2011-47, Laws of Florida, provides that to achieve this initiative, DMS may use tenant broker services to explore the possibilities of collocation, to review the space needs of each agency, and to review the length and terms of potential renewals or renegotiations. Pursuant to this directive, DMS continues to work with state agencies and the state's three tenant brokers to identify, review, and renegotiate existing lease contracts that meet the criteria of the law. In addition, several agencies have also worked to renegotiate leases less than 2,000 square feet, providing further cost savings.

Exhibits A and B of this report show the savings achieved to date on the designated leases, as well as other leases processed during this time frame. Renegotiations since July 1, 2011, will result in a reduction in lease costs of \$15.4 million and a net reduction of 328,594 square feet in leased space. To date, agencies have reviewed 58 percent of the total number of leases that expire before June 30, 2013.

For those leases over 2,000 square feet, renegotiations since July 1, 2011, will result in a projected \$15 million reduction in lease costs and a net reduction of 311,836 square feet for Fiscal Years 2011-12 through 2012-13. In addition, DMS has worked with agencies to renegotiate leases less than 2,000 square feet. These renegotiations will result in a projected reduction in lease costs of \$465,756 and a net reduction of 16,758 square feet over fiscal years 2011-12 and 2012-13. For specific lease information, Exhibit C shows each lease action by agency.

REPORT

State of Florida Leasing Overview

The Department of Management Services Division of Real Estate Development and Management (REDM) oversees the operation and maintenance of the Florida Facilities Pool (FFP) and other DMS REDM-managed facilities and administers public and private leasing for the State of Florida.

The state's leased space portfolio includes the offices and facilities in FFP buildings, private sector buildings, as well as spaces leased from other governmental (federal and local) entities. The FFP includes 104 of the 17,999 state-owned buildings.¹ As of July 1, 2011, there are 203 leases with state agencies in FFP buildings. In addition, agencies have entered into 971 leases with private landlords or with federal and local governmental entities.

The state's lease procurement process is administered in accordance with sections 255.248, 255.249, and 255.25, Florida Statutes. Under the state's partially decentralized leasing

¹ As of July 1, 2011, and reported in the 2011 Master Leasing Report

process, most leases come through DMS for approval with few exceptions; however, individual agencies are responsible for procuring their leased space. The first step in this process is for agencies to inform DMS of their need for space. If state-owned space is available, the agency works to develop a lease in that space. However, if state-owned space is not available, the agency then begins the process of finding space to fit its needs.

In this role, DMS has primary fiduciary responsibility to provide facilities that meet the business and operational needs of the state agencies at optimal value pricing, based on availability. A key element of the DMS leasing strategy is to deliver best value for taxpayer dollars, best achieved by maintaining high occupancy levels in FFP buildings whenever possible.

In addition, the state has contracted with three tenant brokers, selected in a competitive solicitation, to provide agencies with leasing transaction assistance and market data research. The state's tenant brokers, under the state's partially decentralized leasing system, can provide needed transaction expertise to agencies to seek more favorable lease terms and rates and better monitor and track cost savings.

Information Collection

To compile this report, lease data was pulled from the Facilities Accountability and Communication Tool (FACT) system and organized by DMS leasing staff. FACT serves as the core business system for the REDM division, providing information technology for the business processes of leasing, Fixed Capital Outlay and building construction project management, and maintenance and operations. The compiled leasing data includes all existing lease contracts for private office or storage space in excess of 2,000 square feet, other leases that expire within the identified time frame, and any lease action finalized or that will be finalized during the period in question. DMS leasing staff reviewed each lease file to determine the nature and extent of any square footage or rental rate reductions, and determined the total savings by comparing the annual payments prior to any reductions to those after the reductions. A comprehensive report with detailed instructions was sent to all agencies on January 23, 2012, which highlighted individual agency lease cost savings and provided the methodology used for capturing the data. Agencies have reviewed and validated this information and provided comments as necessary.

Leasing Actions

The following section provides, for the purpose of this report, definitions of leasing actions captured in this report and associated exhibits.

"Lease expiration" is when an agency lets a lease expire and closes the office at the end of the lease term and no new lease takes its place. To date, 64 leases in excess of 2,000 square feet have expired and will result in a total savings of \$2,581,412 over Fiscal Years 2011-12 and 2012-13. In addition, 11 leases for less than 2,000 square feet have expired and will result in a total savings of \$203,131 over Fiscal Years 2011-12 and 2012-13.

The Department of Corrections has relocated to state-owned Florida Facilities Pool buildings from six private leased facilities, one of which was a lease for less than 2,000 square feet. These moves will result in a total savings of \$5,635,298 over Fiscal Years 2011-12 and 2012-13.

A "lease modification" is a lease renegotiation to achieve either a square foot rate change or a square footage space change. A lease renewal is a lease renegotiation conducted to add additional terms, either in months or years, to a lease that might also result in a square foot and/or rate change. To date, 72 leases in excess of 2,000 square feet have been renegotiated for a lease modification or renewal to result in a total savings of \$2,974,927 over Fiscal Years 2011-12 and 2012-13. In addition, 25 leases for less than 2,000 square feet have been renegotiated for a lease modification or renewal to result in a total savings of \$88,184 over Fiscal Years 2011-12 and 2012-13.

"New lease procurements" arise when a lease ends, either upon termination or at the end of the agreed lease term, and an agency enters into a new lease. At this point, agencies are encouraged to reduce the overall square footage of the lease; however, some agencies may merge two offices into a single lease, increasing the new square footage. Savings are realized when a lease expires and is not replaced or when an agency achieves a reduction in the rate for newly-procured lease space. To date, 41 new lease procurements for leases in excess of 2,000 square feet will achieve a total savings of \$2,614,324 over Fiscal Years 2011-12 and 2012-13.

"Lease cancellations" arise when legislative action is taken to request funds used to pay a lease be non-appropriated, thereby effecting a lease cancellation prior to the actual lease expiration. In this situation, no new lease takes the place of the cancelled lease. To date, 19 lease cancellations for leases in excess of 2,000 square feet will result in a total savings of \$1,103,432 over Fiscal Years 2011-12 and 2012-13. In addition, eight lease cancellations for leases less than 2,000 square feet will result in a total savings of \$171,925 over Fiscal Years 2011-12 and 2012-13.

The Department of Corrections has proviso language that specifically non-appropriates contracted lease rate escalations for their 14 private leases. This language will result in a total savings of \$106,328 over Fiscal Years 2011-12 and 2012-13.

DMS Outreach Efforts

In addition to monitoring and tracking progress on lease renegotiations, DMS has worked with agencies over a series of months to educate them on the directive in Chapter 2011-47, Laws of Florida, and to assist agencies in the required renegotiations. DMS provided all agencies with a comprehensive report that highlighted individual agency savings and the methodology used for capturing this data and savings calculations. Agencies have reviewed and validated this information and provided comments as necessary.

DMS has used the last three Quarterly Leasing Liaison meetings to highlight the law's objectives, results, and pending actions. DMS has provided information on this directive to the Florida Association of State Agency Administrative Service Directors. We will now begin more intensive outreach to encourage, assist, and monitor our agency partners and the actions of the state's three tenant brokers to continue to seek savings through renegotiations. DMS leasing agents will begin monthly meetings with their assigned agency leasing liaisons to update the status of all unworked leases.

CONCLUSION

DMS is working with partner agencies and the state's tenant brokers to renegotiate or reprocure all private office or storage leases in excess of 2,000 square feet that expire before June 30, 2013, to achieve cost savings in future years. Renegotiations since July 1, 2011, will result in a reduction in lease costs of \$15.4 million and a net reduction of 328,594 square feet in leased space. To date, agencies have reviewed 58 percent of the total number of leases that expire before June 30, 2013. Over the next 16 months, DMS will continue to monitor and report the savings the state will achieve in compliance with this law.

AGENCY COMMENTS

Comments regarding 710:0237 Sarasota, 710:0239 Sebring, 710:0240 Brooksville, 710:0241 Lakeland

Effective FY 09-10, FDLE investigative operating costs, associated with regional field offices, were reduced by the Legislature. These field offices were strategically located throughout the State to provide timelier, cost-efficient public safety services to the more remote areas of the regions. In response to the public's need for continued services, FDLE pursued innovative alternatives to secure a number of "nominal" (zero cost) leases for office space. Since that time, most of the nominal leases have expired and have been replaced with low-cost lease agreements. In some instances, the lessor chose not to renew the agreement. In other instances, the facility proved to be less than ideal for law enforcement operations. The snapshot taken at the time this data was published appears to indicate an increase in costs; however, actual savings (even taking into account the low-cost replacement leases) is currently over \$1 million as a result of FDLE's aggressive action. These efforts should have relatively limited fiscal impact but provide substantial public safety support to these rural communities
