Comprehensive Annual Financial Report

Fiscal Year Ended September 30, 2014 Prepared by: Finance Bureau

WATERMATTERS.ORG · 1-800-423-1476

A Component Unit of the State of Florida

Mission Statement:

The mission of the Southwest Florida Water Management District is to manage water and related natural resources to ensure their continued availability while maximizing the benefits to the public. Central to the mission is maintaining the balance between the water needs of current and future users while protecting and maintaining water and related natural resources which provide the District with its existing and future water supply.

The Governing Board of the District assumes its responsibilities as authorized in Chapter 373 and other chapters of the Florida Statutes by directing a wide range of programs, initiatives and actions. These include, but are not limited to, flood protection, water use, well construction and environmental resource permitting, water conservation, education, land acquisition, water resource and supply development, and supportive data collection and analysis efforts.

The Southwest Florida Water Management District (District) does not discriminate on the basis of disability. This nondiscrimination policy involves every aspect of the District's functions, including access to and participation in the District's programs and activities. Anyone requiring reasonable accommodation as provided for in the Americans with Disabilities Act should contact the District's Human Resources Bureau Chief, 2379 Broad St., Brooksville, FL 34604-6899; telephone (352) 796-7211 or 1-800-423-1476 (FL only), ext. 4703; or email ADACoordinator@WaterMatters.org. If you are hearing or speech impaired, please contact the agency using the Florida Relay Service, 1(800)955-8771 (TDD) or 1(800)955-8770 (Voice).

March 31, 2015

To the Citizens of the Southwest Florida Water Management District:

The Comprehensive Annual Financial Report of the Southwest Florida Water Management District (District) for the fiscal year ended September 30, 2014, is hereby submitted.

State law requires that local governmental entities publish within 9 months of the close of each fiscal year a complete set of audited financial statements. This report is published to fulfill that requirement for the fiscal year ended September 30, 2014.

Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with management. To provide a reasonable basis for making these representations, management of the District has established a comprehensive internal control framework that is designed both to protect the government's assets from loss, theft or misuse and to compile sufficient reliable information for the preparation of the District's financial statements in conformity with U.S. generally accepted accounting principles (GAAP). Because the cost of internal controls should not outweigh their benefits, the District's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. To the best of our knowledge and belief, the information presented is accurate in all material respects, and is reported in a manner that presents fairly the financial position and results of operations of the District. All disclosures necessary to enable the reader to gain an understanding of the District's activities have been included.

KPMG LLP, Certified Public Accountants, has issued an unmodified opinion on the District's financial statements for the year ended September 30, 2014. The independent auditors' report is located at the front of the financial section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditors' report and provides a narrative introduction, overview and analysis of the basic financial statements. The MD&A complements this letter of transmittal and should be read in conjunction with it.

The District encompasses approximately 10,000 square miles of a 16-county area in west-central Florida and is one of five regional water management districts charged by Chapter 373 of the Florida Statutes to preserve and protect the state's water resources.

About the District

Approximately one quarter of the state's population (5 million) resides within the District. The District was established in 1961 by a special act of the Florida Legislature to serve as local sponsor of the Four River Basins, Florida Project. This was a major flood control project sponsored by the U.S. Army Corps of Engineers after Hurricane Donna caused extensive damage in west-central Florida in 1960.

The District's original mission was to protect people and property from flooding caused by tropical storms and other heavy rains. This was done in part by building structures to control high waters. The Tampa Bypass Canal, which diverts Hillsborough River overflow away from the flood-prone areas of Tampa and Temple Terrace, is the most prominent example of this water resources management responsibility.

Today's regional flood protection efforts remain an important element of the District's mission. Since the District was created in 1961, additional responsibilities have been added to the District by the Florida Legislature. The District now authorizes permits for consumptive use of water, well construction, surface water management, and the protection of wetlands. Water supply, water resource development, and water quality are major concerns, and many projects with local, state and federal funding partners focus on ensuring adequate sustainable quality water for the future.

A 13-member Governing Board establishes the District's policies, oversees its regulatory responsibilities, administers contracts, hires the Executive Director subject to approval by the Governor and confirmation by the Florida Senate, and authorizes the tax levy for the District budget subject to review by the Governor. Each member is appointed by the Governor and confirmed by the Florida Senate. District Governing Board members serve staggered four-year terms, are eligible for reappointment, and serve as unpaid citizen volunteers.

The District is authorized by the Florida Constitution and Florida Statutes to fund its general operations from ad valorem property taxes. The District Governing Board, with the approval of the Executive Office of the Governor, may levy up to one mill Districtwide to fund regulatory activities and projects of Districtwide significance. One mill equals \$1 of tax for each \$1,000 of assessed land value. Funding for District programs is supplemented by District permit fees and by grants from federal, state and local governments.

The annual budget serves as the foundation for the District's financial planning and control. The Truth-in-Millage (TRIM) Act enacted by state legislation requires disclosure of information regarding the ad valorem millage rate and budget adoption. Each year, following the required disclosures, the conduct of two public hearings for taxpayer comment, and review by the Executive Office of the Governor for comments between the first and second hearings, the Governing Board sets the millage rate and adopts a budget in September. The appropriated budget is prepared by fund, bureau and activity and reported programmatically. The Governing Board delegates authority to the Executive Director to execute transfers of budgeted funds not to exceed \$50,000, if no reserve funds are involved. Delegated transfers are presented to the Governing Board for ratification at their next regular scheduled meeting. All transfers of funds from reserve accounts require prior Governing Board approval and a budget amendment.

The Reporting Entity

The financial statements of the District include all operations for which the District is financially accountable.

The District is a component unit of the State of Florida for financial reporting purposes. The state has historically provided funding for District programs through the sale of state debt, sharing of documentary stamp tax revenues, and the approval of various annual grants and entitlements. State funding in recent years has been limited due to economic conditions.

The District's financial statements for the fiscal year ended September 30, 2014, will be incorporated into the State of Florida's financial statements for the State's fiscal year ending June 30, 2015, as a discretely presented component unit. Discretely presented component units are reported in a separate column in the basic financial statements to emphasize that they are legally separate from the primary government, which is the State of Florida, and to differentiate their financial position, results of operations and cash flows.

Factors Affecting Financial Condition

Economic Conditions and Outlook. Florida's recovery continues to improve within key economic segments. Building on the success of previous years, Florida's economy has experienced a progressive, steady recovery since the peak of recession in the spring of 2010. The current economic conditions for the State of Florida, and moreover the 16 counties within the Southwest Florida Water Management District are well on their way to a stable recovery built on a solid foundation derived from lessons learned during the recovery. Consequently, within the current 2014 fiscal year, several key measures of the Florida economy had achieved or surpassed previous levels and continue to show improvement across key sectors that influence economic stability and lend credibility to consumer confidence.

Among other economic incentives; lower fuel prices, an increase in Florida's minimum wage, and the availability of service industry and construction employment has provided an incentive to relocate to the Sunshine State. Between 2013 and 2014, the total permanent population for the District increased 1.44 percent by 70,721 residents to approximately 4.985 million. The District's population is expected to increase from the current 2014 level at an average rate of 1.44 percent per year over the next five years. It is projected that by 2040, the District's population will grow by 2.49 million to 7.475 million people.¹ Population growth is a key determinant in the state's long-term economic stability. With an improved economic environment, higher wages, and an increase in savings per family, the resulting higher level of disposable income should increase the demand for goods and services, driving demand and production.

Florida's unemployment rate has retracted to a level that has not been seen since pre-recession rates in May of 2008. The unemployment rate has continued on a steady decline from the highest rate of 11.4 percent during the year ending 2010. Florida's seasonally adjusted unemployment rate was 5.8 percent in November 2014. The state unemployment average from November 2013 to November 2014 decreased from 6.5 percent to 5.8 percent, respectively.² The national average for the same time period was 7.0 percent in 2013 and 5.8 percent in 2014.³ "Florida's unemployment rate has been less than or equal to the national rate for 15 of the last 19 months."⁴ As unemployment rates continue to decrease the total per capita personal income in the District has experienced an increase of 0.87 percent between 2013 and 2014, compared to an increase of 0.93 percent for the state. By 2019, real per capita income in the

¹ Except as noted, all data are based on countywide data and are derived from Woods and Poole Economics, <u>2014 State Profile: State and County Projections to 2040</u>. District population in split counties were calculated from GIS Associates' 2010 property parcel-based population estimates summarized by county and WMD boundaries (SWFWMD - Planning Department, 2011)

² Bureau of Labor Statistics: Florida Statewide Unemployment statistics. December 2014 http://data.bls.gov/timeseries/ LASST12000000000003

³ Bureau of Labor Statistics: Nation Wide Labor Force Statistics from the Current Population Survey. December, 2014 http://data.bls.gov/timeseries/LNS14000000

⁴ "Florida's November Employment Figures Released". Florida Department of Economic Opportunity. December 19, 2014. http://www.floridajobs.org. Accessed: January 6, 2015.

District is projected to increase 5.91 percent over its 2014 level and remain slightly below the state projection of 6.25 percent. Counties with the highest projected increases in real per capita income through 2019 are Sarasota (7.72 percent) with Charlotte & Pinellas both projected at (7.39 percent).

The real estate market is a key determinant in Florida's economy, as it plays an integral role in conditions driving job growth and population expansion. The housing market hasn't returned to pre-recession levels; however, improvement, although slow, is continuing year-over-year. Sustained population growth and continued in-migration are helping bolster key market sectors, fueling both sales and new construction in the real estate sector. The additional benefit of lower fuel prices will influence input costs for the sector, conversely the added benefit to consumers will allow for additional options in the housing market as the cost of commuting becomes less of a factor in selecting the location of a potential real estate purchase. Statewide single family home sales in November 2014 totaled 17,772, up 10.7 percent over the November 2013 figure. The statewide average sales price for single-family homes during the same time period was \$176,000, which is an increase of 3.5 percent year-over-year. Given current market conditions, single family home sales are projected to increase on average 10 percent in 2015. Decreased supply in the lower price ranges of the market have produced upward pressure on prices in that market segment. These shortages are projected to increase median and average home prices by 10–15 percent, which would be in line with the current 5-year historical price trends. Cash sales represented 39 percent of total single family home sales in November 2014; this represents a change in the market compared to 44.4 percent in November of 2013. The overall effect being a decrease in cash purchases of 1.2 percent year-over-year; as a result, the current median days on market has increased 10.2 percent to 54 days.⁵ Sustained higher prices have continued throughout the fiscal year which may ease the budgetary crunch affecting local governments.

The District saw continued improvements within the economy this year. Although not all sectors within the economy have returned to pre-recession levels, improvement, although slow, is steady and sustained. Florida's unemployment rate has been less than or equal to the national rate for 15 of the last 19 months with the District average keeping pace with the state average. Lower fuel prices, an increase in Florida's minimum wage, and the availability of service industry and construction employment has provided incentives to the state and District labor forces. With the end of Quantitative Easing, interest rates will begin to normalize, allowing for the economy to continue on a longer-run growth path with continued expansion, providing for additional investment opportunities generating revenue for the state and local economy.

Long-term financial planning. The District exercises its management of water resources through four statutorily designated areas of responsibility: Water Supply, Flood Protection, Water Quality and Natural Systems. Long-term financial planning is conducted to connect the program planning and the budget processes. The District's financial planning efforts include the 2014-18 Strategic Plan, which provides strategic direction through the identification of priorities, the Long-Range Funding Plan (Funding Plan), Program Budget, Five-Year Technology Plan, and Five-Year Capital Improvements Plan.

The development of the District's Funding Plan is an example of long-term financial planning in the area of water supply. This plan is a pay-as-you-go funding strategy for the Regional Water Supply Plan (RWSP). The RWSP projects water demand and needed water supply sources for the period 2010-2030, and is updated on a five-year cycle with the next revision scheduled for the fall of 2015. The Funding Plan currently demonstrates that fiscal resources supplemented with project reserves adequately maintain a healthy investment in water resources. To ensure the plan keeps pace with evolving water supply and resource development initiatives and potential revenue impacts of economic fluctuations and legislative changes, the District examines it on an ongoing basis.

Awards and Acknowledgements

The Government Finance Officers Association (GFOA) of the United States and Canada awarded a Certificate of Achievement for Excellence in Financial Reporting to the District for its comprehensive annual financial report for the fiscal year ended September 30, 2013. This was the 26th consecutive year that the District has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that the District's current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Sincere appreciation is extended to the many District employees who assisted with the preparation of this report, with special thanks to the employees of the Finance Bureau, especially the Accounting & Financial Reporting Section. Special recognition is due the Public Affairs Bureau - Communications Section staff for the design of the cover, and the Document Services Section staff for printing the report. In closing, this report would not have been possible without the support and leadership of the District Governing Board and the District's Executive staff.

Sincerely,

John J. Campbell Division Director Management Services

Melisa J. Lowe

KPMG LLP Suite 1700 100 North Tampa Street Tampa, FL 33602

Independent Auditors' Report

The Members of the Governing Board Southwest Florida Water Management District:

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities and each major fund of the Southwest Florida Water Management District (District), a component unit of the State of Florida, as of and for the year ended September 30, 2014, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities and each major fund of the Southwest Florida Water Management District, as of September 30, 2014, and the respective changes in financial position, and the budgetary comparison for the general fund and DOT Mitigation special revenue fund for the year then ended in accordance with U.S. generally accepted accounting principles.

Other Matters

Required Supplementary Information

U.S. generally accepted accounting principles require that the management's discussion and analysis and the schedule of funding progress on pages 5 through 13 and 42, respectively, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary and Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The introductory and statistical sections, other supplementary information and schedule of expenditures of federal awards and state financial assistance, as required by the U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and Chapter 10.550, *Rules of the Auditor General*, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The other supplementary information and schedule of expenditures of federal awards and state financial assistance are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the other supplementary information and schedule of expenditures of federal awards and state financial assistance are fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory and the statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 16, 2015 on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

Management's Discussion and Analysis (unaudited)

The Southwest Florida Water Management District's (District) discussion and analysis is designed to offer readers of the District's financial statements a narrative overview and analysis of the financial activities of the District for the fiscal year ended September 30, 2014. Readers are encouraged to read the Management's Discussion and Analysis in conjunction with the transmittal letter beginning on page i and the District's financial statements, which begin on page 15.

Financial Highlights

- The assets of the District exceeded its liabilities at the close of the most recent fiscal year by \$1.3 billion (net position). Of this amount, \$334.7 million may be used to meet the District's ongoing obligations to citizens and creditors. It is the District's intent to use these assets to: satisfy contracts and purchase orders in the amount of \$74.9 million; fund future long- and short-term projects in the amount of \$177.6 million; maintain an economic stabilization reserve of \$23.5 million; support land management activities in the amount of \$5.8 million; pay claims associated with the District's Workers' Compensation Self-insurance Program in the amount of \$0.5 million; and carry forward \$19.4 million into the fiscal year 2014-15 budget. The additional remaining funds will be carried forward for allocation in the fiscal year 2015-16 budget.
- The District's total net position decreased by \$50.5 million. The decrease is primarily attributable to the use of restricted funds for watershed basin projects for which the ad valorem property taxes were collected prior to fiscal year 2011-12.
- As of the close of the current fiscal year, the District's governmental funds reported combined ending fund balances of \$442.8 million, a decrease of \$37.9 million in comparison with the prior year. Of this total amount, \$50,113 relates to inventory on hand and is nonspendable; \$117.6 million is restricted for the watershed basins and land acquisition; and \$325.2 million is available for spending at the District's discretion, with the majority committed or assigned as noted above.
- The District continues to have no bonded debt.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The District's basic financial statements are comprised of three components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the District's finances, in a manner similar to a private-sector business.

The statement of net position presents information on all of the District's assets, liabilities, and deferred inflows/outflows of resources, with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The statement of activities presents information showing how the District's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event

giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

The government-wide financial statements distinguish functions of the District that are principally supported by taxes and intergovernmental revenues (governmental activities). The governmental activities of the District include: water resource planning and monitoring; land acquisition, restoration and public works; operation and maintenance of works and lands; regulation; outreach; and management and administration.

The government-wide financial statements can be found on pages 15 and 16 of this report.

Fund financial statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The District, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating the District's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental funds balance sheet and the governmental funds statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The District maintained one general fund, one special revenue fund and two capital projects funds, all of which were considered to be major funds during fiscal year 2013-14. Information for all funds is presented separately in the governmental funds balance sheet and in the governmental funds statement of revenues, expenditures, and changes in fund balances.

The District adopts an annual appropriated budget for all funds. To demonstrate compliance with the adopted budget, budgetary comparison statements have been provided for all funds in accordance with Governmental Accounting Standards Board, Statement No. 34. Although not required, budgetary comparison schedules for the District's capital projects funds have been provided on pages 45 and 46 of this report, as other supplementary information.

The governmental funds financial statements can be found on pages 17 through 20 of this report.

Notes to the financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 21 through 43 of this report.

Additional information. Additional information about the District, which may be of interest to the reader, is found under the Statistical, Single Audit Compliance, Management Letter and Independent Accountants' Report sections of this report.

Government-wide Overall Financial Analysis

For fiscal year 2013-14, the overall condition of the District remained consistent with fiscal year 2012-13.

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. In the case of the District, assets exceeded liabilities by approximately \$1.3 billion at September 30, 2014.

Net Investment in Capital Assets	833,973,713	862,299,507			
Restricted for:					
Watershed Basins	117,325,873	168,721,598			
Land Acquisition	282,593	282,593			
Unrestricted	334,665,586	305,453,821			
Total Net Position	\$ 1,286,247,765	\$ 1,336,757,519			

By far the largest portion of the District's net position, at September 30, 2014, in the amount of approximately \$834 million (64.8 percent) reflects its investment in capital assets (e.g., land, buildings, machinery, equipment, infrastructure, intangible assets). The District uses these capital assets to carry out its statutory responsibilities; consequently, these assets are not available for future spending.

Restricted net position in the amount of approximately \$117.6 million (9.2 percent) represents resources that are subject to external restrictions on how they may be used. The majority of the resources represent the net position of the former seven watershed basins that must be spent within the geographical boundaries of each watershed basin. It is the District's intent to use these assets to satisfy contracts and purchase orders and fund future long- and short-term projects that fall within the specific geographical boundaries of the basins.

Unrestricted net position in the amount of \$334.7 million (26 percent) may be used to meet the District's ongoing obligations to citizens and creditors. As noted earlier, it is the District's intent to use these assets to: satisfy contracts and purchase orders; fund future long- and short-term projects; support land management activities; pay claims associated with the District's Workers' Compensation Self-insurance Program; fund an economic stabilization reserve; and carry forward funding for allocation in subsequent years budgets.

At September 30, 2014, the District reported positive balances in all categories of net position. The same held true for the prior fiscal year. For fiscal year 2013-14, the District's total net position decreased by \$50.5 million (3.8 percent). The reasons for this decrease are discussed in the following section for governmental activities.

Governmental activities. Governmental activities decreased the District's net position by \$50.5 million.

	Governmental Activities					
	2014	2013				
Revenues:						
Program revenues:

Net position - end of year	\$ 1,286,247,765					

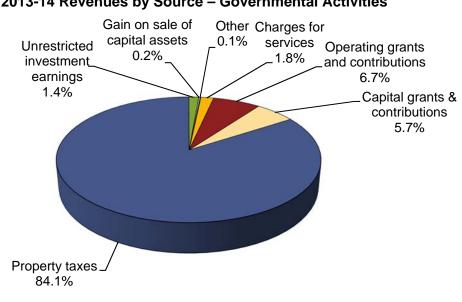

Southwest Florida Water Management District's Changes in Net Position

As discussed earlier, the decrease in the overall net position is primarily attributable to the use of restricted funds for watershed basin projects for which the ad valorem property taxes were collected prior to fiscal year 2011-12. During fiscal year 2010-11, the Governing Board approved the merger of seven watershed basins and their functions into the District in order to streamline and improve efficiencies. As a result, the basins no longer exist as ad valorem taxing units and will no longer levy ad valorem tax. The net position of each basin was transferred to the District's General Fund and will be held as restricted net position of the District until expended for water management purposes within the geographical boundaries of the basin in which the ad valorem tax revenue was previously collected.

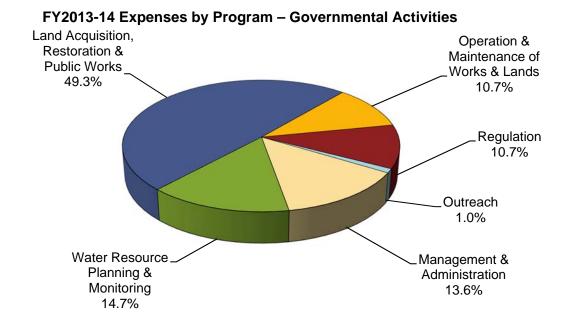

In addition, notable fluctuations have appeared in operating grants and contributions, capital grants and contributions, and other revenues. Operating grants and contributions decreased by \$7.9 million (49.6 percent), primarily in the Land Acquisition, Restoration and Public Works (\$4.9 million); and the Operation and Maintenance of Works and Lands (\$2.5 million) programmatic areas. Overall, in the past several years, the District has continued to receive less outside funding from federal, state and other local governments than it has in the past. The use of operating grants and contributions also fluctuates from year to year depending on what projects the District's funds have been allocated to and the timing of expenditures related to those projects. Projects that are currently in the planning stages have not incurred a significant amount of expenditures as opposed to projects that have been substantially completed.

Capital grants and contributions increased by \$6.8 million (6899.8 percent), primarily due to the donation of capital assets including land, land easements and infrastructure items.

Other revenues decreased by \$1 million (90.5 percent), primarily due to insurance proceeds received in the prior year for water damage that occurred at the Brooksville service office, Building 4, and a refund from a pro-share revenue incentive for lower health insurance claims.

FY2013-14 Revenues by Source – Governmental Activities

Financial Analysis of the Government's Funds

As noted earlier, the District uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the District's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the District's funding requirements. In particular, unassigned fund balance may serve as a useful measure of the District's net resources available for discretionary use as they represent the portion of fund balance which has not yet been limited to use for a particular purpose by either an external party, the District itself, or a group or individual that has been delegated authority to assign resources for use for particular purposes by the District's Governing Board.

At September 30, 2014, the District's governmental funds reported combined fund balances of \$442.8 million, a decrease of \$37.9 million in comparison with fiscal year 2012-13. *Unassigned fund balance* of \$23.5 million represents 5.3 percent of the entire fund balance, which is available for spending at the government's discretion. The remainder of the fund balance is either *nonspendable*, *restricted*, *committed* or *assigned* to indicate that it is: 1) not in spendable form (\$50,113), 2) legally required to be maintained intact (\$117.6 million), 3) committed for particular purposes (\$78.1 million), or 4) assigned for particular purposes (\$223.6 million).

The general fund is the chief operating fund of the District. At the end of fiscal year 2013-14, unassigned fund balance of the general fund was \$23.5 million, while the total fund balance decreased to \$432.7 million. As a measure of the general fund's liquidity, it may be useful to compare both the unassigned fund balance and the total fund balance to total general fund expenditures. Unassigned fund balance represents 15.4 percent of the total general fund expenditures, while total fund balance represents 282.5 percent of that same amount.

The fund balance of the general fund decreased \$37.8 million during the current fiscal year. As noted above, the decrease is primarily attributable to the use of restricted funds for watershed basin projects for which the funds were collected prior to fiscal year 2011-12.

The fund balance of the Florida Forever capital projects fund decreased \$70,845 due to the majority of expenditures relating to the District's land program being funded from resources received from prior fiscal years.

The fund balance of the Facilities fund decreased \$8,947 due to minor renovations and repairs using resources received from prior fiscal years.

General Fund Budgetary Highlights

Although there were budget transfers made between the six program areas, the District's General Fund budget in total was not amended during fiscal year 2013-14.

In total, the general fund revenue budget was \$132.3 million with actual revenues of \$113.4 million, resulting in a variance of \$18.9 million (14.3 percent). The variance is primarily due to a reduction in intergovernmental revenues and interest earnings, offset by an increase in other revenues.

Intergovernmental revenues are recognized at the time related expenditures are incurred. For fiscal year 2013-14, the Intergovernmental Revenues budget was \$25.2 million and actual revenues were \$8.2 million, resulting in a variance of \$17 million (67.5 percent). From year to year, the budgeted amount of intergovernmental revenue compared to the recognized amount can fluctuate for various reasons; projects can be in the planning stages and have not incurred a significant amount of expenditures, or anticipated projects may be canceled.

Interest on invested funds was budgeted at \$3.7 million and actual revenues were \$1.7 million, resulting in a variance of \$2 million (54.1 percent). The interest earnings budget was based on a 0.75 percent expected rate of return. The District earned 0.53 percent yield on investments and recognized \$2.8 million. However, in accordance with Governmental Accounting Standards Board Statement No. 31, interest earnings have been adjusted to reflect the changes in the fair value of

investments. Therefore, interest earnings have been adjusted by the unrealized loss of \$1.1 million, reducing interest earnings on invested funds to \$1.7 million representing 45.9 percent of the budget.

Other revenues were budgeted at \$260,700 and actual revenues were \$562,793, resulting in a variance of \$302,093 (115.9 percent). Each year, items that fall within the "Other" revenue category are budgeted conservatively due to the uncertainty of the amounts to be collected. For example, revenues from timber sales, hog hunts, and insurance recoveries can vary significantly from year to year. The majority of funds collected this year relate to timber sales.

The District's program areas include a variety of projects and initiatives that are necessary to carry out the District's mission to preserve and protect the state's water resources (see Note I.D, page 23). The general fund budget-to-actual expenditure variances are primarily due to encumbrances that exist at year-end for projects that are often multi-year, resulting in expenditures that do not always coincide with the budget period. After removing the encumbrances from the budget-to-actual variances, one program area showed a significant variance.

The District Management and Administration program budget was \$14.9 million and actual expenditures were \$11.4 million. After adjusting for encumbrances, a variance of \$1.9 million (12.7 percent) remains. The variance is primarily due to: a \$1.2 million reduction in other operating expenses associated with property tax commissions, rental of photocopiers, travel/training costs, postage, and printing and reproduction supplies.

These variances will not have a significant effect on future services or liquidity of the District.

Capital Asset and Debt Administration

Capital assets. The District's investment in capital assets at September 30, 2014, amounted to \$834 million (net of accumulated depreciation) a decrease from prior year of \$28.3 million (3.3 percent). This investment in capital assets includes land, land interests, buildings, machinery and equipment, infrastructure, construction in progress, software, and other capital assets. The decrease in capital assets is due primarily to the reclassification of various land parcels (\$15.2 million), that the Governing Board approved for surplus, to land held for resale; the decommissioning of several software programs (\$4.1 million) that are no longer utilized; the sale of the Bartow service office (\$2.8 million) and the surplus of various pieces of machinery and equipment (\$2.3 million).

Major capital asset events during the current fiscal year include the following:

- Various parcels of land that have been approved by the Governing Board for surplus were reclassified as land held for resale. Land held for resale is not available to pay for current period expenditures and, therefore, are not reported in the governmental fund statements, only the entity wide statements.
- The District's Bartow Service Office was sold for approximately \$1.8 million to the Board of Trustees of the Internal Improvement Trust Fund of the State of Florida. Payment was made in the form of \$1.3 million in cash proceeds and prepaid rent for a fifteen year lease with a value of \$0.5 million.
- Through the issuance of an environmental resource permit, an easement valued at approximately \$500,000, representing 11.9 acres was donated to the District by an entity located within Hernando County.
- Infrastructure of approximately \$6.4 million was added to the District's capital assets consisting of various items, such as pedestrian/bike trails, nature centers, playgrounds, walkways, docks, etc., as donations from various local governments that have constructed these items on District lands.

- Following are some of the construction in progress projects that were completed during fiscal year 2013-14:
 - Wellsite: Bennet Park, Manatee County
 - Structures: P-11 Lake Hancock and the Lake Hancock Outfall Treatment Plant
 - Building: renovations at the Lake Hancock Field Office.

Southwest Florida Water Management District's Capital Assets (net of depreciation)

	2014	2013
Land	\$ 592,808,220	\$ 608,530,272

Infrastructure	94,677,393	69,637,989
Construction in Progress	2,965,437	26,482,607
Software	6,536,474	17,225,175
Other Capital Assets	21,258	29,919
Total Assets	\$ 833,973,713	\$ 862,299,507

Additional information on the District's capital assets can be found in Note I.E.4. on page 24 and Note IV.E. on page 34.

Economic Factors and Next Year's Budgets and Rate

The District's primary source of funding is ad valorem property taxes. The fiscal year 2014-15 budget of \$102.3 million of ad valorem property taxes represents 96 percent of the taxable property values as certified by the District's 16 counties, which is based on historical collections. This represents an increase of \$791,805.

A millage rate of 0.3658 mill, a reduction of 4.2 percent below the rate levied for fiscal year 2013-14, was adopted by the Governing Board at the final public hearing held on September 30, 2014. The rate is based on taxable property values as certified by the District's 16 counties and is at the rolled-back rate and maximum millage rate in compliance with Section 200.065, Florida Statutes. The 2014 tax roll, upon which taxes for fiscal year 2014-15 are based, increased by 5.19 percent from 2013.

The current economic conditions and the continuation of interest rates at or near historically low levels have negatively affected the District's interest earnings for fiscal year 2013-14. The District utilizes the services of two investment advisory firms to manage a substantial portion of the District's portfolio. The District's investment advisors anticipate interest rates to remain at the current low levels during fiscal year 2014-15, given forecasts and current available information. The District received an overall return of 0.53 percent on its investments for fiscal year 2013-14. The fiscal year 2014-15 budget for interest earnings is based on an expected return of 0.75 percent. As of the end of the first quarter of fiscal year 2014-15, interest rates in short term maturities of two years and less remain low, while interest rates in longer term maturities have risen in response to the Federal Open Market Committee's tapering of the quantitative easing program and market expectations of modest economic growth during 2015.

In fiscal year 2014-15 the District reduced its operating budget \$2.3 million, over three percent. Eleven full-time equivalent positions were eliminated resulting in an \$841,177 reduction in salaries and benefits. These reductions have enabled the District to maintain the necessary annual capital investment in our region. The District has accumulated resources over the past fiscal years to fund future short-term projects. In the fiscal year 2014-15 budget \$3.8 million was utilized from the short-term projects reserves to fund District projects. It is anticipated as economic growth returns, the requests for cooperative funding and other District projects will far outpace the current ad valorem revenue available to the District. These funds will be allocated through the budget development process to supplement current revenues to fund projects in future years until ad valorem revenue increases through normal growth, allowing the District to continue to operate on a pay-as-you-go basis.

Requests for Information

This financial report is designed to provide a general overview of the District's finances. Questions concerning any of the information should be addressed to the Office of the Finance Bureau Chief, Southwest Florida Water Management District, 2379 Broad Street, Brooksville, Florida, 34604-6899; or by calling (352) 796-7211, extension 4121; or by email to Melisa.Lowe@swfwmd.state.fl.us.

This page left blank intentionally.

The Basic Financial Statements include both the Government-wide Financial Statements and Governmental Fund Financial Statements.

The Government-wide Financial Statements consist of a statement of net position and a statement of activities which report information about the District as a whole using the economic resources measurement focus and the accrual basis of accounting.

The Governmental Fund Financial Statements report additional detailed information about the District's governmental funds using the current financial resources measurement focus and the modified accrual basis of accounting.

Net change in fund balances - total governmental funds	\$ (37,	870,837)
Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of these assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which depreciation expense exceeds capital outlays in the current period.	(17,	923,981)
The net effect of various miscellaneous transactions involving capital assets (i.e., sales, trade-ins, donations and adjustments) resulted in an increase to net position.	4,	777,306
Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds. Delinquent taxes recorded as of September 30, 2014, were less than the amount recorded at prior year-end, resulting in a net decrease to income.		(88,568)
Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in governmental funds.		596,326
Change in net position of governmental activities	\$(50,	509,754)

Notes to the Financial Statements

The notes to the financial statements contain a summary of significant accounting policies and other notes considered necessary for a clear understanding of the financial statements.

Description

The Southwest Florida Water Management District (District) is one of five regional water management districts charged by Chapter 373 of the Florida Statutes to preserve and protect the state's water resources. The District covers all or parts of 16 counties along Florida's central west coast. Approximately 17 percent of the state's total land area and roughly a quarter of its population are contained within the boundaries of the District, which stretches from Levy County in the north to Charlotte County in the south and inland as far as Highlands and Polk counties.

I. Summary of significant accounting policies

The financial statements of the District have been prepared in conformity with U.S. generally accepted accounting principles (GAAP) as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard setting body for establishing governmental accounting and financial reporting principles. The more significant of the District's accounting policies are described below.

A. Reporting entity

The District is an independent special district of the State of Florida and is governed by a 13-member board, which is appointed by the Governor of Florida and confirmed by the Florida Senate. As required by GAAP, these financial statements include all operations for which the District is financially accountable. The District is a component unit of the State of Florida for financial reporting purposes and these financial statements will be included in the State of Florida's Comprehensive Annual Financial Report as a discretely presented component unit for the fiscal year ending June 30, 2015.

B. Government-wide and fund financial statements

The government-wide financial statements consist of a statement of net position and a statement of activities that report information about the District as a whole. The statement of net position reports all financial and capital resources of the District.

The statement of activities demonstrates the degree to which the direct expenses of a given program are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific program. Program revenues include: (1) charges to customers who purchase, use or directly benefit from goods, services or privileges provided by a given program and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Ad valorem property tax revenue and other items are not reported as program revenues; instead, they are general revenues of the District.

Fund financial statements are presented to report additional and detailed information about the District. Fund financial statements accompany the government-wide financial statements and present a summary reconciliation to explain differences between the data reported in the governmental funds and the data reported for the corresponding governmental activities in the government-wide financial statements.

C. Measurement focus, basis of accounting, and financial statement presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and

expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Ad valorem property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, expenditures related to compensated absences and claims and judgments are recorded only when such liabilities have matured.

Ad valorem property taxes are recorded as revenues in the fiscal year in which the taxes are due and collected within 60 days of fiscal year-end. Intergovernmental revenues are recognized at the time related expenditures are incurred, if such amounts are expected to be collected within one year. Investment earnings are recognized when earned. All other revenue items are recognized when earned and are both measurable and available.

The District reports the following major governmental funds:

The General Fund is the District's primary operating fund. It accounts for all financial resources except those required to be accounted for in another fund. Accounted for within the general fund are the restricted funds associated with the former seven watershed basins. During fiscal year 2010-11, the District's Governing Board revoked all prior basin boundary designations and merged all basin boundaries into the boundary of the District. As a result, the seven basins no longer exist as ad valorem taxing units. The respective ending fund balances as of September 30, 2011, were transferred to the general fund as restricted fund balance at that time. These funds are legally restricted to be used for expenditures for specified purposes within the respective geographical boundary of each watershed basin.

The *DOT Mitigation Fund* accounts for revenue sources received from the State of Florida that are restricted for mitigation activities, pursuant to Section 373.4137, Florida Statutes. The state-mandated Florida Department of Transportation (FDOT) program requires that mitigation to offset the adverse wetland impacts of transportation projects be funded by the FDOT and be carried out by the use of mitigation banks and any other mitigation options that satisfy state and federal requirements. (See Note I.E.8., page 27).

The District has two *capital projects funds* that are maintained to account for financial resources to be used for the acquisition or construction of major capital projects.

The *Florida Forever Fund* accounts for financial resources received from the State of Florida and local governments for the acquisition of lands necessary for water management, water supply, and conservation of water resources under the Florida Forever land acquisition program (see Note I.E.8., page 27).

The *Facilities Fund* accounts for financial resources from the District's general fund for the acquisition of land and construction and major renovations of District facilities.

D. Classification of expenditures

The District currently categorizes the revenues, expenditures, and budget data it submits to the Executive Officer of the Governor, the Department of Environmental Protection and the Legislature by six program areas. These programs, which are set forth in Section 373.536(5)(e)4., Florida Statutes, are:

1.0 Water Resource Planning and Monitoring

This program includes all water management planning, including water supply planning, development of minimum flows and levels, and other water resources planning; research, data collection, analysis, and monitoring; and technical assistance (including local and regional plan and program review).

2.0 Land Acquisition, Restoration, and Public Works

This program includes the development and construction of all capital projects (except for those contained in Program 3.0), including water resource development projects/water supply development assistance, water control projects, and support and administrative facilities construction; land acquisition (i.e., Florida Forever program); and the restoration of lands and water bodies.

3.0 Operation and Maintenance of Works and Lands

This program includes all operation and maintenance of facilities, flood control and water conservation structures, lands, and other works authorized by Chapter 373, Florida Statutes.

4.0 Regulation

This program includes water use permitting, water well construction permitting, water well contractor licensing, environmental resource and surface water management permitting, permit administration, compliance and enforcement, and any delegated regulatory program.

5.0 Outreach

This program includes all environmental education activities, such as water conservation campaigns and water resources education; public information activities; all lobbying activities relating to local, regional, state, and federal governmental affairs; and all public relations activities, including public service announcements and advertising in any media.

6.0 Management and Administration

This program includes executive management, executive support, governing board support, ombudsman, general counsel, inspector general, administrative support (general), procurement, finance, human resources, and risk management.

E. Assets, liabilities, deferred outflows/inflows of resources, and net position/fund balance

1. Cash and investments

Cash balances are pooled for investment purposes and recorded in the General Fund with the exception of advanced funds that are restricted assets, which are separately invested and recorded in their respective fund. Cash includes cash-on-hand and demand deposits. Interest earned from investments is allocated to the General Fund.

Investments are stated at fair value pursuant to GASB Statement No. 31, *Accounting and Financial Reporting for Certain Investments and for External Investment Pools*. The District has limited its investments to the following investments authorized in Section 218.415, Florida Statutes: (a) Local

Government Surplus Funds Trust Fund (known as Florida PRIME); (b) Securities and Exchange Commission registered money market funds with the highest credit quality rating from a nationally recognized rating agency; (c) Interest-bearing time deposits or savings accounts in qualified public depositories, as defined in Section 280.02, Florida Statutes; (d) Direct obligations of the U.S. Treasury; (e) Direct obligations of federal agencies and instrumentalities and other investments as authorized by the District's Governing Board through a resolution, including negotiable certificates of deposit, mortgage-backed securities, state and /or local government taxable and/or tax-exempt debt, registered investment companies (mutual funds and money market mutual funds), repurchase agreements, bankers' acceptances, commercial paper, corporate notes and an intergovernmental investment pool.

2. Inventories

Inventories are valued at cost using the average cost method and consist of expendable supplies of chemicals used for treating aquatic vegetation. The costs of such inventories are recorded as expenditures when consumed rather than when purchased.

3. Restricted assets

Certain proceeds, including cash restricted for the basins, advanced funds received, and intergovernmental receivables of the General Fund (\$1,382,047), Alafia River Basin (\$5,942,124), Hillsborough River Basin (\$56,764,824), Coastal Rivers Basin (\$6,407,630), Pinellas-Anclote River Basin (\$49,972,479), Withlacoochee River Basin (\$5,760,601), Peace River Basin (\$8,923,954), Manasota Basin (\$12,899,224), DOT Mitigation Fund (\$14,069,219), and the Florida Forever Fund (\$282,593) are classified as restricted assets on the statement of net position because their use is limited to specific purposes as identified within their related agreements or as required by Florida Statutes.

4. Capital assets

Capital assets, both tangible and intangible, which include land, land interests, buildings, equipment, infrastructure assets (e.g., bridges, water control structures, levees and similar items) and software, are reported only in the government-wide financial statements. Tangible capital assets are those acquired for general government purposes with an initial, individual cost equal to or more than \$1,000 and an estimated useful life of more than one year. Intangible capital assets are those acquired for general government purposes with an initial, individual cost equal to or more than \$5,000 and an estimated useful life of more than one year. Such assets are recorded at historical cost if purchased or constructed. Donated assets are recorded at their estimated fair value at the date of the donation. The estimated fair value is based on the most recent appraisal documentation available. Maintenance, repairs and minor renovations are not capitalized.

Capital assets of the District are depreciated using the straight-line method over the following estimated useful lives:

<u>Assets</u>	Years
Buildings Machinery & Equipment	5 - 50 3 - 15
Infrastructure	20 - 50
Software	3
Other	5

5. Compensated absences

District employees accrue annual and sick leave benefits based on hours worked and length of service. Annual leave is vested after 6 months of service. Regular employees can carry forward from one fiscal year to the next up to 360 hours of accrued annual leave but the maximum hours that will be paid upon separation in good standing is 240 hours. Employees in the Administrative Pay schedule may carry up to 480 hours of accrued annual leave and the maximum hours to be paid upon separation in good standing is 480 hours. Sick leave benefits do not vest until an employee has earned six years of creditable service with the District. Upon retirement, death, resignation or separation in good standing, an employee is eligible to receive, at his/her current rate of pay, 100 percent of accrued annual leave (up to a maximum of 240 or 480 hours as per above) and 25 percent of accrued sick leave benefits (up to a maximum of 480 hours).

The accrued liability for compensated absences represents the liability for accrued annual and sick leave benefits for employees currently eligible or likely to become eligible to receive those leave benefits in the future. The District permits employees to accrue earned but unused vacation and sick leave benefits. The amount estimated to be used in subsequent fiscal years is accrued when incurred in the government-wide financial statements. A liability for these amounts is reported in the governmental funds only if they have matured, for example, as a result of employee resignations and retirements.

6. Deferred outflows/inflows of resources

In addition to assets, the statement of financial position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will *not* be recognized as an outflow of resources (expense/expenditure) until then.

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period(s) and so will *not* be recognized as an inflow of resources (revenue) until that time.

7. Fund balances

Fund balance is reported pursuant to the provisions of Governmental Accounting Standards Board Statement Number 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. This statement establishes criteria for classifying fund balances into specifically defined classifications and clarifies definitions for governmental fund types. Fund balance is divided into five classifications based primarily on the extent to which the District is bound to observe constraints imposed upon the use of the resources in the government funds.

The classifications are as follows:

Nonspendable – includes amounts that cannot be spent because they are not in spendable form, or legally or contractually required to be maintained intact. The "not in spendable form" criterion includes items that are not expected to be converted to cash.

Restricted – includes amounts where constraints placed on the use of resources are either externally imposed by creditors, grantors, contributors, or laws or regulations of other governments or is imposed by law through constitutional provisions or enabling legislation that identifies and describes circumstance under which a need for use of funds arise.

Committed – includes amounts that can only be used for specific purposes pursuant to constraints imposed by a formal action of the District's highest level of decision-making authority. The District Governing Board, being the District's highest level of decision-making authority establishes, modifies or rescinds the commitment of funds for specific purposes through Board resolutions.

Through a Governing Board resolution that identifies and describes a circumstance under which a need for use of funds arise, the District established an Economic Stabilization Fund from the committed general fund balance in the amount of \$23.5 million, to maintain sufficient working capital for a two-month period. The amount of the reserve is established annually during the budgetary process for the next fiscal year, and will fluctuate (increase/decrease) based on the amount of funds needed to maintain sufficient working capital for a two-month period. The reserve is to provide sufficient funds for circumstances that are not expected to occur routinely and ensure the District's continued orderly operational and financial stability. The District's Governing Board would have to approve the use of the Economic Stabilization Fund and the District's budget would be amended for any of the following specific reasons: when a state of emergency is declared by the Governor of Florida or the President of the United States: or when the Governing Board determines through adoption of a resolution that an emergency (incurring damage or loss) or other circumstance has arisen that directly impacts the citizens and/or environment within the District boundaries, including structural emergencies for which remedial action cannot wait until the next fiscal year; or when anticipated ad valorem tax collections are 2 percent less than budgeted (e.g., due to refunds of prior year tax collections resulting from successful challenges of property assessments, county unable to sell sufficient tax certificates for unpaid property taxes).

Assigned – includes amounts that are intended to be used by the District for specific purposes but do not meet the criteria to be classified as restricted or committed. The authority for making an assignment is not required to be the government's highest level of decision-making authority. It can include a body (a budget or finance committee, for example) or an official to which the governing body has delegated the authority to assign amounts to be used for specific purposes. The District has a policy approved by the board that designates management (senior level) to determine assignments. Assignment of fund balance may be (a) made for a specific purpose that is narrower than the general purposes of the District itself; and/or (b) used to reflect the appropriation of a portion of existing unassigned fund balance to eliminate a projected deficit in the subsequent year's budget in an amount no greater than the projected excess of expected expenditures over expected revenues. In accordance with the District's Fund Balance Policy, assigned fund balance shall reflect management's intended use of resources as set forth in the annual budget (and any amendments thereto). Significant encumbrances are displayed in total by each major fund within the Assigned category of fund balance (see note IV.H., page 37 and note V.B., page 38).

Unassigned – includes the residual positive fund balance within the general fund which has not been classified within the other above mentioned categories. In addition, stabilization arrangements that do not meet the criteria to be reported within the restricted or committed fund balance classifications are reported as unassigned in the general fund.

The District applies restricted resources first when expenditures are incurred for purposes for which either restricted or unrestricted (committed, assigned and unassigned) amounts are available unless there are legal documents/contracts that prohibit doing this, such as grant agreements with specific matching requirements. Similarly, within unrestricted fund balance, committed amounts are reduced first followed by assigned, and then unassigned amounts when expenditures are incurred for purposes for which amounts in any of the unrestricted fund balance classifications could be used.

8. State trust funds

Under Florida Statutes, the District is entitled to funding from the State of Florida, which is allocated and appropriated to various trust funds. These funds are released to the District for various programs when eligibility requirements have been met. It is the District's policy to recognize funding received through these state trust funds as intergovernmental revenues at the time an eligible cost has been incurred.

The <u>Water Management Lands Trust Fund</u> was established in 1981 pursuant to Section 373.59, Florida Statutes. Funded primarily from a portion of the documentary stamp taxes collected by the State, the non-lapsing trust fund provides funding to the District for 1) ongoing management, maintenance, and capital improvements of lands; 2) payments in lieu of taxes; 3) pre-acquisition costs associated with land purchases; and 4) the Surface Water Improvement and Management (SWIM) Program. Revenues received from the trust fund are accounted for in the District's General Fund, and the Florida Forever Fund. The Florida Department of Environmental Protection (FDEP) has oversight responsibility for this trust fund.

The <u>Florida Forever Trust Fund</u> was established in 1999 pursuant to Section 259.105, Florida Statutes. The Florida Forever program is the successor program to the Florida Preservation 2000 program. The Trust is funded through bond proceeds and may be used for land acquisition (including less-than-fee purchases), pre-acquisition costs associated with land purchases, water resource development, storm water management, water body restoration, recreational facility construction, public access improvements, invasive plant control and related projects. Over the life of the program, at least 50 percent of the funds must be spent on land acquisition. Revenues received from the trust fund are accounted for in the Florida Forever Fund and the general fund. The FDEP has oversight responsibility for this trust fund.

The <u>Ecosystem Management and Restoration Trust Fund</u> was established in 1996 pursuant to Section 403.1651, Florida Statutes. The trust fund is funded through various sources, such as documentary stamp taxes, transfers from other trust funds, general revenues, interest earnings and fines. It provides funding to the District for the detailed planning and implementation of programs for the management and restoration of ecosystems, including the SWIM Program, Facilitating Agricultural Resource Management Systems Program and the Weeki Wachee River. Revenues received from the trust fund are accounted for in the District's general fund. The FDEP has oversight responsibility for this trust fund.

The <u>Water Protection and Sustainability Trust Fund</u> was established in 2005 pursuant to Section 403.890, Florida Statutes, and is funded by excise tax proceeds. The State's Water Protection and Sustainability Program (WPSP) provides funds for the District Governing Board's highly effective partnership programs (i.e., Water Supply and Resource Development and Cooperative Funding Initiative) for alternative water supply development assistance, the SWIM Program and other surface water restoration activities in the water management district designated priority water bodies, and the West-Central Florida Water Restoration Action Plan. Revenues received from the trust fund are accounted for in the District's General Fund. The FDEP has oversight responsibility for this trust fund.

The <u>State Transportation Trust Fund</u> was established in 1931 pursuant to Section 206.46, Florida Statutes. The trust fund is funded through gas tax proceeds as authorized by Chapter 83-3, Laws of Florida, and such other funds which accrue to the Florida Department of Transportation (FDOT) which are not required to be maintained in separate trust funds. It provides funding to the District for mitigation activities that offset the adverse wetland impacts of transportation projects.

Revenues received from the trust fund are accounted for in the District's general fund (indirect charges) and the DOT Mitigation Fund. The FDOT has oversight responsibilities for this trust fund.

9. Use of estimates

Management of the District has made a number of estimates and assumptions relating to the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates.

F. New accounting pronouncements

GASB Statement No. 66, *Technical Corrections - 2012; an amendment of GASB Statements No. 10 and No. 62.* The objective of the Statement is to improve accounting and financial reporting for a governmental financial reporting entity by resolving conflicting guidance that resulted from the issuance of two pronouncements, Statements No. 54, Fund Balance Reporting and Governmental Fund Type Definitions, and No. 62, Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements.

GASB Statement No. 68, Accounting and Financial Reporting for Pensions; an amendment of GASB Statement No. 27, Accounting for Pensions by State and Local Governmental Employers. The objective of the Statement is to improve accounting and financial reporting by state and local governments for pensions. It also improves information provided by state and local governmental employers about financial support for pensions that is provided by other entities. The statement results from a comprehensive review of the effectiveness of existing standards of accounting and financial reporting for pensions with regard to providing decision-useful information, supporting assessments of accountability and interperiod equity, and creating additional transparency. The effective date for this statement is for periods beginning after June 15, 2014. The District will implement in fiscal year 2014-15. The District is evaluating the impact of this Statement on its government-wide financial statements.

II. Reconciliation of government-wide and fund financial statements

A. Explanation of certain differences between the governmental funds balance sheet and the government-wide statement of net position.

The governmental funds balance sheet includes reconciliation between *fund balances–total governmental funds* and *net position of governmental activities* as reported in the government-wide statement of net position.

One element of that reconciliation states that "Long-term liabilities are not due and payable in the current period and, therefore, are not reported in the funds."

The details of the \$6,254,301 difference are as follows:

Compensated Absences	\$ 4,793,998
Other Post-Employment Benefits (see Note V.D., page 40)	942,303
Claims (Workers' Compensation) (see Note V.A., page 38)	<u>518,000</u>
Net adjustment to decrease fund balance-total governmental funds to arrive at net position of governmental activities	<u>\$ 6,254,301</u>

B. Explanation of the differences between the governmental fund statement of revenues, expenditures, and changes in fund balances and the government-wide statement of activities.

The governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between *net change in fund balances-total governmental funds* and *change in net position of governmental activities* as reported in the government-wide statement of activities. One element of the reconciliation explains that, "governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of these assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which depreciation expense exceeded capital outlays in the current period."

The details of this \$17,923,981 difference are as follows:

Capital outlay	\$ 4,494,052
Depreciation expense	(22,418,033)
Net adjustment to decrease <i>net changes in fund balances</i> – total governmental funds to arrive at change in net position of governmental activities	<u>\$ (17,923,981)</u>

Another element of that reconciliation states that, "The net effect of various miscellaneous transactions involving capital assets (i.e., sales, trade-ins, donations and adjustments) resulted in an increase to net position."

The details of this \$4,777,306 difference are as follows:

In the statement of activities, only the gain on the sale of capital assets is reported. However, in the governmental funds, the proceeds from the sale increase financial resources. Thus, the change in net position differs from the change in fund balance by the cost of the capital assets sold.	\$(2,123,257)
Donations of capital assets increase net position in the statement of activities, but do not appear in the governmental funds because they are not financial resources.	6,900,563
Net adjustment to increase net change in fund balances-	

Net adjustment to increase *net change in fund balances– total governmental funds* to arrive at *change in net position of governmental activities.*

Another element of the reconciliation states that, "Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in governmental funds." The details of this \$596,326 difference are as follows:

\$ 4,777,306

Judgment (Skyway Trap and Skeet Club, Inc., see Note IV.G., page 36)	\$ 642,465
Compensated absences	(24,924)
Workers Compensation	(62,000)
Other Post-Employment Benefits (see Note V.D., page 40)	<u>40,785</u>
Net adjustment to increase <i>net change in fund balances</i> – total governmental funds to arrive at change in net position of governmental activities	<u>\$ 596,326 </u>

III. Stewardship, compliance and accountability

A. Budgetary information

Annual budgets are adopted on a basis consistent with generally accepted accounting principles for all governmental funds. Annual appropriated budgets for fiscal year 2013-14 were adopted by the District Governing Board for all governmental funds. If the District receives unanticipated funds after the adoption of the final budget, the District Governing Board may amend the budget, following review and approval by the Executive Office of the Governor, if notice of intention to amend is provided to the Legislative Budget Commission. Remaining encumbered appropriations at fiscal year-end are carried forward and re-appropriated in the following fiscal year. Unencumbered appropriations lapse at fiscal year-end.

The District Governing Board approves budget transfers among departments and capital projects during the year. Expenditures in excess of appropriations in one or more departments of a fund do not constitute a violation of budgetary controls as long as total expenditures do not exceed total appropriations for the fund. Budgetary control (i.e., the level at which expenditures may not legally exceed appropriations) is the fund level.

IV. Detailed notes

A. Cash and investments

As of September 30, 2014, the District had the following cash and investments:

Investment Type	Fair Value	Weighted Average Maturity (Years)
U.S. Treasuries	\$ 170,653,038	1.83
Corporate Notes	133,420,564	1.76
U.S. Agencies	83,846,090	1.63
Municipal Bonds	1,499,400	0.92
Commercial Paper	32,553,821	0.15
State Board of Administration Florida PRIME	57,162,977 ⁽¹⁾	0.11
Money Market Funds	20,495,004	liquid daily
Total Fair Value of Investments	499,630,894	
Portfolio weighted average maturity		1.39
Demand Deposit Accounts	2,149,987 ⁽²⁾	
Petty Cash	950	
Total Demand Deposits and Petty Cash	2,150,937	
Total Cash and Investments	\$ 501,781,831	

⁽¹⁾ The District participates in the State Board of Administration's (SBA) Florida PRIME. As a Florida PRIME participant, the District invests in pools of investments whereby the District owns a share of the respective pool, not the underlying securities. GASB Statement No. 31, titled Accounting and Financial Reporting for Certain Investments and for External Investment Pools, applies to Florida PRIME. GASB Statement No. 31 outlines the two options for accounting and reporting for money market investment pools as either "2a-7 like" or fluctuating net asset value (NAV). GASB Statement No. 31 describes a "2a-7 like" pool as an external investment pool that is not registered with the Securities and Exchange Commission (SEC) as

an investment company, but nevertheless has a policy that it will, and does, operate in a manner consistent with Rule 2a-7 under the Investment Company Act of 1940 (the 1940 Act). Rule 2a-7 is the rule that permits money market funds to use amortized cost to maintain a constant NAV of \$1.00 per share, provided that such funds meet certain conditions.

Florida PRIME is considered a SEC "2a-7 like" fund, thus the account balance is also considered the fair value of the District's investment.

⁽²⁾ At September 30, 2014, the carrying amount of the District's cash demand deposit account was \$2,149,987 and the bank balance was \$3,722,711. The District actively manages its cash balance and invests excess cash on a daily basis.

Interest rate risk: In accordance with the District's investment policy, the exposure to declines in fair values is managed by structuring the investment portfolio so that securities mature to meet cash requirements for ongoing operations and limiting the weighted average maturity of its investment portfolio to five years or less. Of the District's investments, \$23,644,426 is callable by the issuers and is subject to the risk of being called prior to maturity. For purposes of calculating the weighted average maturity in years, the callable date was used in the calculation.

Credit Risk: In accordance with the District's investment policy, the District minimizes credit risk, the risk of loss due to the failure of the security, by limiting investments to the authorized investments in the investment policy (see note I.E.1., page 23), pre-qualifying the financial institutions, brokers/dealers, intermediaries, and advisors with which the District will do business, and diversifying the investment portfolio to protect against losses on individual securities. All of the District's investments in the U.S. Agencies and U.S. Treasuries were rated AA+ by Standard and Poor's, and Aaa by Moody's Investor Services. The SBA Florida PRIME is rated by Standard and Poor's. The current rating is AAAm. The money market funds in which the District has invested funds were rated AAAm by Standard and Poor's, and Aaa by Moody's Investor Services. The SBA Florida and Poor's and P-1 by Moody's Investor Services. The investments in corporate notes were rated AAA through A- or AAAm by Standard and Poor's and Aaa through A3 or Aa1 by Moody's Investor Services. The investment in municipal bonds were rated AA by Standard and Poor's and Aa3 by Moody's Investor Services.

Custodial Credit Risk - Deposits: At September 30, 2014, the District's deposits were entirely covered by federal depository insurance or by collateral pledged with the State Treasurer pursuant to Chapter 280, Florida Statutes. Under this chapter, in the event of default by a participating financial institution (a qualified public depository), all participating institutions are obligated to reimburse the governmental entity for the loss.

Custodial Credit Risk - Investments: Investments are subject to custodial credit risk if the securities are uninsured, not registered in the District's name, and are held by the party that either sells to or buys for the District. The District's investment policy requires that all securities be held with a third-party custodian in a separate account which is registered as an asset of the District. The custodian acts as the safekeeper of the District's investment securities. No withdrawal of securities, in whole or in part, is made from safekeeping without written authorization of designated District staff. All of the District securities are held in the District's name; therefore, no investments held at year-end were subject to custodial credit risk.

Concentration of Credit Risk: The District's policy authorizes investment allocation limits on security types, maturity and issuer limitations which may be modified by the Management Services Division Director from time to time based on market conditions, risk and diversification investment strategies. Of the District's total investments, more than 5 percent are in Florida PRIME (11.44 percent) and Federal Home Loan Bank (7.99 percent). For the investments held at September 30, 2014, the District's policy had the following limitations.

Security Type	Minimum Rating	Maturity	Maximum	Maximum
	Requirement	Limits	Allocation	Issuer
			Limit	Limit
Florida PRIME	AAAm	N/A	50%	N/A
United States Government Securities	N/A	5 Years	100%	N/A
Federal Instrumentalities (United States Government Sponsored Enterprises ("GSE") which are non-full faith and credit).*	N/A	5 Years	50%	40%
State and/or Local Government Taxable and/or Tax-Exempt Debt	Single "A" category by two NRSROs**	5 Years	25%	10%
Registered Investment Companies (Money Market Mutual Funds)	AAAm	N/A	50%	25%
Commercial Paper***	Highest rating by two NRSROs**	270 Days	35%	10%
Corporate Notes***	single "A" category by any two NRSROs**	5 Years	35%	5%

*The combined maximum amount of available funds invested in Federal Instrumentalities and mortgage-backed securities, if applicable, will not exceed fifty percent (50%).

**National Recognized Statistical Rating Organization (NRSRO).

***The maximum amount of corporate investments will not exceed forty percent (40%). Therefore, the combination of Commercial Paper and Corporate Notes shall not exceed forty percent (40%). Corporate Notes are limited to 15% per industry.

Total

B. Receivables

Receivables at year-end for the District's individual major funds are as follows:

	Inter	governmental	Interest	R	eceivables
Fund					
General	\$	4,683,274	\$ 657,106	\$	5,340,380
DOT Mitigation		7,218	 -		7,218
Total	\$	4,690,492	\$ 657,106	\$	5,347,598

C. Property Taxes

Ad valorem property taxes are computed using property values at January 1 of each year and are considered to be levied upon the District Governing Board's adoption of the final millage rate in September. The taxes are due November 1 and become delinquent April 1 of the following year. A four percent discount is allowed if the taxes are paid in November, with the discount declining by one percent each month thereafter. Tax certificates for the full amount of any unpaid taxes on real property and assessments must be sold no later than June 1 of each year at which time a lien attaches to the property.

D. Unearned Revenue

Governmental funds delay revenue recognition in connection with resources that have been received, but not yet earned because all eligibility requirements have not been met. At the end of the current fiscal year, the various components of unearned revenue reported in the governmental funds were as follows:

	Unearned Revenue
General	
Grant drawdowns prior to meeting all eligibility requirements	\$ 3,105,729
DOT Mitigation	
Grant drawdowns prior to meeting all eligibility requirements	 12,993,313
Total unearned revenue for governmental funds	\$ 16,099,042

E. Capital Assets

Capital asset activity for the year ended September 30, 2014, was as follows:

		Balance at October 1, 2013	Increases	Decreases	Rec	lassifications	S	Balance at eptember 30, 2014
Capital assets, not								
being depreciated:								
Land	\$	608,530,272	\$ 60,139	\$ (15,634,256)	\$	(147,935)	\$	592,808,220

Depreciation expense was charged to programs of the District as follows:

Governmental activities	
Water Resources Planning and Monitoring	\$ 489,574
Acquisition, Restoration and Public Works	3,775,263
Operation and Maintenance of Works and Lands	4,824,119
Regulation	1,292,384
Outreach	9,588
Management and Administration	 12,027,105
Total depreciation expense - governmental activities	\$ 22,418,033

F. Leases

Operating Leases

The District has lease commitments under various operating leases for buildings, 2-way radio antennas, Supervisory Control and Data Acquisition (SCADA) tower leases, and copier equipment, with the longest operating lease in effect until 2029. Lease expenditures for the year ended September 30, 2014, amounted to \$427,459.

Future minimum lease payments for the non-cancelable operating leases with remaining terms of more than one year are as follows:

Fiscal Year		Minimum
Ending		Lease
September 30,	_	Payments
2015	\$	307,052
2016		60,292
2017		61,133
2018		45,808
2019		37,982
2020-2024		161,369
2025-2029	_	161,369
	\$	835,006

G. Long-term obligations

		Beginning Balance Additions		F	Reductions		Ending Balance			Due Within One Year		
Governmental activities:												
Judgment	\$	642,465	\$	-	\$	642,465	(1)	\$	-		\$	-
Compensated Absences		4,769,074		5,033,033		5,008,109			4,793,998	(2)		479,400
Other Post Employment Benefits		983,088		477,605		518,390			942,303	(2)		-
Workers' Compensation		456,000		241,760		179,760			518,000	(3)		152,372
Total	\$	6,850,627	\$	5,752,398	\$	6,348,724		\$	6,254,301		\$	631,772
			_		_		=					

Long-term liability activity for the year ended September 30, 2014, was as follows:

(1) In fiscal year 2003-04, the District settled a legal matter, which obligated each of the parties to perform certain activities. The District estimated its cost to comply with the judgment at \$19.8 million based on cost estimates obtained from a third-party engineer. The obligation at September 30, 2014, is \$0 and is completed.

⁽²⁾ The general fund will be used to satisfy the obligations for the compensated absences and other post-employment benefits.

⁽³⁾ The general fund will be used to pay for workers' compensation claims.

H. Fund Balance

Fund balances for all major funds at September 30, 2014 were as follows:

	General	Florida	Facilities	Total		
	Fund	Forever	Fund	All Funds		
Nonspendable:						
Inventory	\$ 50,113	\$-	\$-	\$ 50,113		
Total Nonspendable	50,113			50,113		
Restricted for:						
Alafia River Basin	3,394,779	-	-	3,394,779

V. Other information

A. Risk Management

The District is exposed to various risks of loss related to: tort; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural or manmade disasters. The District purchases commercial insurance coverage for all liabilities except workers' compensation as discussed below. During the year ended September 30, 2014, there were no significant reductions in insurance coverage from the prior year. In addition, no claims settlement has exceeded the insurance coverage amounts for the past five fiscal years.

The District has a self-insurance program for its workers' compensation exposure, with excess coverage purchased for claims in excess of \$500,000 per occurrence. Current expenditures related to the self-insurance program are accounted for in the District's General Fund.

Liabilities of the District are reported when it is probable that a loss has occurred and the amount of the loss can be reasonably estimated. Liabilities include estimates of prior and current year existing claims and incurred but not reported claims (IBNR). The long-term liability for workers' compensation claims is based on an independent actuarial determination.

Changes in the balances of workers' compensation claims liabilities during the past two years are as follows:

	Year ended 09/30/2014		_	ear ended 0/30/2013
Unpaid claims, beginning of fiscal year Incurred claims, including IBNRs and		456,000		\$ 456,000
changes in estimates		241,760		89,688
Claim payments		(179,760)	_	(89,688)
Unpaid claims, end of fiscal year	\$	518,000		\$ 456,000

At September 30, 2014, general fund assets of \$518,000 were assigned for the purpose of funding future workers' compensation claims liabilities, with a corresponding assignment of the General Fund's fund balance.

B. Commitments and contingencies

At September 30, 2014, the District had unrestricted net position of approximately \$334.7 million that may be used to meet the government's ongoing commitments to citizens and creditors. It is the District's intent to use these assets to: satisfy contracts and purchase orders in the amount of \$74.9 million; fund future long- and short-term projects in the amount of \$177.6 million; maintain an economic stabilization reserve of \$23.5 million; support land management activities in the amount of \$5.8 million; pay claims associated with the District's Workers' Compensation Self-insurance Program in the amount of \$0.5 million; and carry forward \$19.4 million into the fiscal year 2014-15 budget. The additional remaining funds will be carried forward for allocation in the fiscal year 2015-16 budget.

The District had restricted net position of \$117.6 million. Of this amount, \$117.3 million must be used for projects in the seven former watershed basins and \$282,593 for land acquisition.

The District has been named as a defendant in several legal actions resulting from various causes. In the opinion of management and its legal counsel, any ultimate liability to the District resulting from resolution of the suits will not have a material effect on the financial condition of the District.

The District participates in various federal and state grant programs that are subject to review and audit by the grantor agencies. Entitlement to these resources is generally conditional upon compliance with the terms and conditions of grant agreements and applicable federal and state regulations, including the expenditure of resources for allowable purposes. Any disallowance resulting from a grantor audit may become a liability of the District.

C. Employee retirement systems and pension plans

The District contributes to the Florida Retirement System (FRS), a cost-sharing multiple-employer defined benefit pension plan and a defined contribution investment plan. The State of Florida Division of Retirement administers the plans. The FRS defined benefit pension plan provides retirement and disability benefits, cost-of-living adjustments for service earned prior to July 1, 2011, a health insurance subsidy, and death benefits to plan members and beneficiaries. The Florida Legislature established the FRS under Chapter 121, Florida Statutes, and has sole authority to amend benefit provisions.

In March 2002, the FRS introduced a second retirement plan option – The FRS Investment Plan. The FRS Investment Plan is a defined contribution plan in which the contributions are defined by law. The ultimate benefit, however, depends in part on the performance of the investment funds. The FRS Investment Plan is funded by employer and employee contributions that are based on the employee's salary and FRS membership class. The Investment Plan directs contributions to individual member accounts, and the employee selects the allocation of funds within his/her account. The FRS offers a wide selection of funds from which to choose. The employee's retirement benefit is the value of his/her account at termination. After six years of service, the Investment Plan participant is eligible for the same health insurance subsidy that is provided under the defined benefit pension plan.

Each year, the FRS issues a publicly available financial report that includes financial statements and required supplementary information. The report may be obtained by writing to the Division of Retirement, Research & Education Section, P.O. Box 9000, Tallahassee, FL 32315-9000, or accessing the FRS web site at http://www.myfrs.com.

Until June 30, 2011, the FRS was non-contributory for employees and the District was required to contribute an actuarially determined rate. Effective July 1, 2011, regular class and senior management class District employees are required to contribute 3 percent to their retirement plans.

The contribution rates (as applied to covered payroll) by class from October 1, 2013 thru June 30, 2014, were as follows:

	Employee	Employer	Total
	Contribution	Contribution	Contribution
Retirement Class	Rate	Rate	Rate
Regular Class	3.00%	6.95%	9.95%
Senior Management Class	3.00%	18.31%	21.31%
Deferred Retirement Option Program (DROP)	N/A	12.84%	12.84%

The contribution rates (as applied to covered payroll) by class from July 1, 2014 thru September 30, 2014, were as follows:

	Employee	Employer	Total
	Contribution	Contribution	Contribution
Retirement Class	Rate	Rate	Rate
Regular Class	3.00%	7.37%	10.37%
Senior Management Class	3.00%	21.14%	24.14%
Deferred Retirement Option Program (DROP)	N/A	12.28%	12.28%

Statewide contribution rates are established annually by the Florida Legislature for all participating governmental units. Accordingly, the actuarial information and related disclosures attributable to District employees are not determinable.

The District's contributions to the FRS for the years ended September 2012, 2013 and 2014 were \$1,797,545, \$1,981,058, and \$2,576,441 respectively, equal to the required contributions for each year.

D. Other postemployment benefits (OPEB)

Plan Description

The District's single-employer healthcare plan provides medical and dental benefits utilizing Blue Cross Blue Shield of Florida, as well as a voluntary vision plan to eligible retired employees. Coverage is extended to qualifying spouses of retirees. If the retiree predeceases the spouse, coverage for the surviving spouse continues. A participant is eligible to receive benefits from the District's plan upon retirement under the Florida Retirement System plan provisions.

Employees enrolled in FRS prior to July 1, 2011.

Unreduced Retirement under FRS: Age 62 with 6 years of service, or any age with 30 years of service.

Early Retirement under FRS: Any age and 6 years of service.

Employees enrolled in FRS on or after July 1, 2011.

Unreduced Retirement under FRS: Age 65 with 8 years of service, or any age with 33 years of service.

Early Retirement under FRS: Any age and 8 years of service.

Participants qualifying for retirement are eligible to elect to enter a deferred retirement option (DROP) feature of the FRS for a period of up to 60 months. For the purpose of this valuation, medical claims incurred while a retiree is in the DROP are not considered a liability under GASB 45.

To be eligible for retiree medical and dental benefits, the participant must have been covered under the medical plan as an active employee immediately prior to retirement. Also, participants not eligible for retirement at the time of their termination are not eligible for immediate future benefits from the plan. In addition, the District provides a premium subsidy to reduce the cost of medical coverage for retirees until age 65 to participants who retired prior to December 31, 2012 and elected medical coverage. The subsidy consists of a reduction to the medical premium paid by retirees equal to \$5 per month for each year of service. A minimum of 6 years of service at retirement is necessary to qualify for the subsidy. The subsidy has a maximum amount payable of \$150 per month. The subsidy ceases at age 65 or Medicare enrollment, whichever is earlier. Retiree and spousal coverage is provided for the lifetime of the participant. However, the subsidy benefit is only payable until age 65, as the option of enrolling in Medicare is a much more attractive

option at a lower cost. The District accounts for this plan in accordance with GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions.* The Plan does not issue a separate financial report.

Funding Policy

The contribution requirements of plan members are established and may be amended by the District's Governing Board. The District's employer OPEB contributions consist of an implicit rate subsidy and the cost of the premium subsidy. The District, in accordance with Section 112.0801, Florida Statutes, makes the health and dental benefits available for retired employees at a premium cost of no more than applicable to active employees. However, the retirees pay 100 percent of their premium costs less the premium subsidy. To determine the healthcare plan costs, the District is required to commingle the claims experience of the retiree group with that of the active employees. The table listed below summarizes monthly retiree contributions for the period beginning January 1, 2014.

		Retiree +
	Retiree	Spouse
Blue Options	\$613.06	\$1,203.56
Blue Choice	673.08	1,328.02

Annual OPEB Cost and Net OPEB Obligation

The District's annual OPEB cost is calculated based on the annual required contribution (ARC) of the employer, an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal costs each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years.

The following table shows the calculation of the ARC and Net OPEB Obligation for the fiscal year ended September 30, 2014:

Determination of Annual Required Contribution:	
Normal Cost at year-end	\$ 203,734
Amortization of Unfunded Actuarial Accrued Liability (UAAL)	291,399
Annual Required Contribution	\$ 495,133
Determination of Net OPEB Obligation:	
Annual Required Contribution	\$ 495,133
Interest on prior year Net OPEB Obligation	39,324
Adjustment to ARC	(56,852)
Annual OPEB Cost	477,605
Assumed Contributions made	(518,390)
Decrease in Net OPEB Obligation	(40,785)
Net OPEB Obligation - beginning of year	983,088
Net OPEB Obligation - end of year	\$ 942,303

The District's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for fiscal year 2013-14 and the two preceding years were as follows:

			Percentage	
Fiscal			of Annual	
Year	Discount	Annual	OPEB Cost	Net OPEB
Ended	Rate	OPEB Cost	Contributed	Obligation
09/30/2014	4.0%	\$477,605	108.5%	\$ 942,303
09/30/2013	4.0	475,374	106.7	983,088
09/30/2012	4.0	473,864	105.8	1,014,710

Funded Status and Funding Progress

As of September 30, 2014, the most recent actuarial valuation date, the plan was not funded. The actuarial accrued liability for benefits was \$5,038,871, resulting in an unfunded actuarial accrued liability of \$5,038,871.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, as presented below, is required supplementary information and presents multi-year trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Actuarial Valuation Date	Actuarial Value of Assets	Discount Rate	Actuarial Liabilities (AAL)	Unfunded Actuarial Liabilities (UAAL)	Funded Ratio	Covered Payroll	UAAL as a Percentage of Covered Payroll
10/1/2013	0	4.0%	\$5,038,871	\$5,038,871	0.00%	\$32,638,819	15.44%
10/1/2012	0	4.0	5,147,662	5,147,662	0.00	34,074,800	15.11
10/1/2011	0	4.0	5,260,147	5,260,147	0.00	37,421,848	14.06

Schedule of Funding Progress – Unaudited Required Supplementary Information

The UAAL is being amortized over a 30-year open period in a level dollar amount.

Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

In the September 30, 2014, actuarial valuation, the Projected Unit Credit Actuarial Cost Method was used. Significant methods and assumptions include:

- A discount rate of 4 percent per annum, compounded annually.
- The mortality rate assumptions utilized the RP 2000 system tables with floating Scale AA projections for Males and for Females. Employee mortality is projected to valuation year plus 15 years. Annuitant mortality is projected to valuation year plus 7 years.
- An inflation rate of 2.50 percent annual increase.
- A healthcare cost trend assumption as follows:

<u>Year</u>	Trend
2014	5.60%
2015	5.50
2016	5.70
2017	5.80
2018	5.70
2019	5.80
2020	6.20
2021	6.20
2022	6.20
2023	7.20
2024	7.40

The ultimate healthcare trend rate of 4.50 percent is reached for the first time in 2082.

- The plan is unfunded and no investment return was assumed.
- Benefits under the Plan are not salary related. No salary increase assumption was used.
- The provisions of the Plan were assumed to remain in place in future years. No improvements to post-retirement benefits in future years were assumed.

The statistical section of the Comprehensive Annual Financial Report is the chief source of information regarding the District's economic condition. All of the information presented in this section is organized around five specific objectives:

- *Financial Trend* schedules contain trend information to help the reader understand and assess how the District's financial performance and well-being have changed over time.
- *Revenue Capacity* schedules contain information to help the reader assess the District's most significant local revenue source, the property tax.
- *Debt Capacity* schedule contains information to help the reader understand and assess the District's debt burden and its ability to issue additional debt.
- *Operating Information* schedules offer demographic and economic indicators to help the reader understand the environment within which the District's financial activities take place.
- *Demographic and Economic* schedules contain service data to help the reader understand how the information in the District's financial report relates to the services the government provides and the activities it performs.

Sources: Unless otherwise noted, the information in these schedules is derived from the comprehensive annual financial reports for the relevant year.

(1) This schedule includes General, Special Revenue and Capital Projects Funds.

(2) The Hillsborough River Basin and the Northwest Hillsborough Basin were merged effective January 1, 2009.

(3) The reduction in Ad Valorem Property Tax Revenues was due to declining property values and the impact of the amendment to the Florida Constitution (Amendment 1) that was passed by voters January 29, 2008.

(4) Effective May 31, 2011, the District's Governing Board revoked all prior Basin boundary designations and merged all Basin boundaries into the boundary of the District, therefore the District General Fund was the only taxing authority for fiscal years 2012 and later.

(1) Taxable Assessed Value is calculated at 100 percent of market value less exempt and immune values and are as of January 1 on the calendar year preceding the applicable District fiscal year.

(2) Taxable Assessed Value is calculated at 100 percent of market value less exempt and immune values, represents only those portions of counties within District boundaries and are as of January 1 on the calendar year preceding the applicable District fiscal year.

(3) The Estimated Just Value represents the estimated total value of taxable property within the 16-county area encompassed by the District, and is updated based on the Department of Revenue Comparative Statement of Just Values, Real Property Only as of January 1 on the calendar year preceding the applicable District fiscal year.

(4) The reduction in Taxable Assessed and Estimated Just Values in fiscal year 2009 was due to declining property values and the impact of the amendment to the Florida Constitution (Amendment 1) that was passed by voters on January 29, 2008.

(1) The maximum legal millage rates for ad valorem taxes are established under Chapter 373.503, Florida Statutes, for the District and Basins.

(2) In fiscal year 2009, the Governing Board approved the merger of the Hillsborough River Basin and the Northwest Hillsborough Basin, effective January 1, 2009. The newly merged basin is known as the Hillsborough River Basin. The Governing Board recommended the newly merged Basin Board adopt the lower of the two fiscal year 2009 millage rates for fiscal year 2010, which was the Northwest Hillsborough Basin's millage rate of 0.2421.

(3) Effective May 31, 2011, the District's Governing Board revoked all prior Basin boundary designations and merged all Basin boundaries into the boundary of the District, therefore the District General Fund was the only taxing authority for fiscal year 2012 and later.

Data collection is based on calendar year 2013.

* Data is for portion of the county located within the District boundaries.

(1) Total (Withdrawal) - Represents the sum of the preceding six columns and represents total water withdrawal by county for all categories.

(2) Public Supply (Use) - Represents total consumptive use of public supply water within a county. When compared to Public Supply (Withdrawal) column,

the difference represents treatment losses, as well as imports and exports, and net storage changes of publicly supplied water from one county to another.

(3) Total (Use) - The sum of "Total (Withdrawal)" minus "Public Supply (Withdrawal)" plus "Public Supply (Use)." Represents consumptive use of publicly supplied water in the county.

Independent Auditors' Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

The Members of the Governing Board Southwest Florida Water Management District:

We have audited, in accordance with the auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of the governmental activities and each major fund of the Southwest Florida Water Management District (the District), a component unit of the State of Florida, as of and for the year ended September 30, 2014, and the related notes to the financial statements, which collectively comprise the Southwest Florida Water Management District's basic financial statements, and have issued our report thereon dated March 16, 2015.

Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the District's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we do not express an opinion on the effectiveness of the District's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the District's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Independent Auditors' Report on Compliance for Each Major State Project and Report on Internal Control over Compliance

The Members of the Governing Board Southwest Florida Water Management District:

Report on Compliance for Each Major State Project

We have audited Southwest Florida Water Management District's (the District) compliance with the types of compliance requirements described in the Florida Department of Financial Services' *State Projects Compliance Supplement* that could have a direct and material effect on each of the District's major state projects for the year ended September 30, 2014. The District's major state projects are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs.

Management's Responsibility

Management is responsible for compliance with the requirements of laws, regulations, contracts, and grants applicable to its federal programs and state projects.

Auditors' Responsibility

Our responsibility is to express an opinion on compliance for each of the District's major state projects based on our audit of the types of compliance requirements referred to above. We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States, and Chapter 10.550, *Rules of the Auditor General*. Those standards and Chapter 10.550 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major state project occurred. An audit includes examining, on a test basis, evidence about the District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe that our audit provides a reasonable basis for our opinion on compliance for each major state project. However, our audit does not provide a legal determination of the District's compliance.

Opinion on Each Major State Project

In our opinion, the District complied, in all material respects, with the types of compliance requirements referred to above that could have a direct and material effect on each of its major state projects for the year ended September 30, 2014.

Report on Internal Control over Compliance

Management of the District is responsible for establishing and maintaining effective internal control over compliance with the types of compliance requirements referred to above. In planning and performing our audit of compliance, we considered the District's internal control over compliance with the types of requirements that could have a direct and material effect on each major state project to determine the auditing procedures that are appropriate in the circumstances for the purpose of expressing an opinion on compliance for each major state project and to test and report on internal control over compliance in accordance with Chapter 10.550, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the District's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, noncompliance with a type of compliance requirement of a state project on a timely basis. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a type of compliance requirement of a state project will not be prevented, or detected and corrected, on a timely basis. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with a type of compliance requirement of a state project that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

The purpose of this report on internal control over compliance is solely to describe the scope of our testing of internal control over compliance and the results of that testing based on the requirements of Chapter 10.550. Accordingly, this report is not suitable for any other purpose.

KPMG LLP Suite 1700 100 North Tampa Street Tampa, FL 33602

Management Letter

The Members of the Governing Board Southwest Florida Water Management District:

We have audited the financial statements of the governmental activities and each major fund of the Southwest Florida Water Management District (the District), a component unit of the State of Florida, as of and for the year ended September 30, 2014, which collectively comprise the District's basic financial statements, and have issued our report thereon dated March 16, 2015.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. We have also issued our reports dated March 16, 2015, on our consideration of the District's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters, as well as our report on the District's compliance and internal control over compliance that could have a direct and material effect on each major state project, and the related schedule of findings and questioned costs. Disclosures in those reports and schedule, if any, should be considered in conjunction with this management letter.

Additionally, our audit was conducted in accordance with the provisions of Chapter 10.550, *Rules of the Auditor General*, which govern the conduct of local governmental entity audits performed in the State of Florida and require that certain items be addressed in this letter.

Prior Audit Findings

The *Rules of the Auditor General*, Section 10.554(1)(i)(1), require that we address in the management letter, if not already addressed in the auditors' report on internal control over financial reporting and compliance and other matters, whether or not corrective actions have been taken to address findings and recommendations made in the preceding annual financial audit report. There were no findings and recommendations made in the preceding annual financial audit.

Other Matters

The *Rules of the Auditor General*, Section 10.554(1)(i)(2), require that we address in the management letter, if not already addressed in the auditors' report on internal control over financial reporting and on compliance and other matters, any recommendations to improve the District's financial management. In connection with our audit, we did not have any such recommendations.

The *Rules of the Auditor General*, Section 10.554(1)(i)(3), require that we address in the management letter any violations with provisions of contracts or grant agreements, or abuse, that have occurred, or are likely to have occurred, that have an effect on the financial statements that is less than material but which warrants the attention of those charged with governance. In connection with our audit, we did not have any such findings.

Official Title and Legal Authority

The *Rules of the Auditor General*, Section 10.554(1)(i)(4), also require that the name or official title and legal authority for the primary government and each component unit of the reporting entity be disclosed in the management letter, unless disclosed in the notes to the financial statements. The disclosure of this information is included in the notes to the financial statements.

Condition of Financial Emergency

The *Rules of the Auditor General* Section 10.554(1)(i)(5)(a) require that a management letter include a statement as to whether the District has met one or more of the conditions described in Section 218.503(1), *Florida Statutes*, regarding a financial emergency.

Management of the District has determined that the District is not in a state of financial emergency as defined in Section 218.503(1), *Florida Statutes*. In connection with our audit of the financial statements, nothing came to our attention that would indicate that the District has met one or more of the conditions described in Section 218.503(1), *Florida Statutes*.

Financial Condition Assessment

As required by the *Rules of the Auditor General*, Section 10.554(1)(i)(5)(c), we applied financial condition assessment procedures pursuant to Section 10.556(8). It is management's responsibility to monitor the District's financial condition, and our financial condition assessment was based in part on representations made by management and the review of financial information provided by same.

Annual Financial Report

The *Rules of the Auditor General*, Section 10.554(1)(i)(5)(b), require that we determine whether the annual financial report for the District for the fiscal year ended September 30, 2014, to be filed with the Florida Department of Financial Services pursuant to Section 218.32(1)(a), *Florida Statutes*, is in agreement with the annual financial audit report for the fiscal year ended September 30, 2014. In connection with our audit, we determined that these reports were in agreement.

Monthly Financial Statements

The *Rules of the Auditor General*, Section 10.554(1)(i)(6)(a), require that we determine whether the District provided monthly financial statements to its governing board and made such monthly statements available for public access on its website. In connection with our audit, we determined that the District provided monthly financial statements to its governing board and made such monthly statements available for public access on its website.

Transparency

The *Rules of the Auditor General*, Section 10.554(1)(i)(6)(b), require that we report the results of our determination as to whether the District provided a link on its web site to the Florida Department of Financial Service's web site to view the District's annual financial report submitted to the Department of Financial Services. In connection with our audit, we determined that the District provided a link on its web site to the Florida Department of Financial Service's web site.

The *Rules of the Auditor General*, Section 10.554(l)(i)6(c), require that we report the results of our determination as to whether the District posted its tentative and final budgets on its web site. In connection with our audit, we determined that the District posted its tentative and final budgets on its website.

* * * * * * *

This management letter is intended solely for the information and use of the Governing Board, management, others within the organization, and the Auditor General of the State of Florida, and is not intended to be and should not be used by anyone other than these specified parties.

Independent Accountants' Report

The Members of the Governing Board Southwest Florida Water Management District:

We have examined the Southwest Florida Water Management District's (the District) compliance with Section 218.415, *Florida Statutes*, as of September 30, 2014. Management is responsible for the District's compliance with those requirements. Our responsibility is to express an opinion on the District's compliance based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and, accordingly, included examining, on a test basis, evidence about the District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. Our examination does not provide a legal determination on the District's compliance with specified requirements.

In our opinion, Southwest Florida Water Management District complied, in all material respects with the aforementioned requirements as of September 30, 2014.
