Body of Report

A. Purpose

Section 216.0153, Florida Statutes, requires the Department of Environmental Protection (DEP) and the Department of Management Services (DMS) to provide a report to the Governor and Legislature by Oct. 1 of each year that lists real property disposition candidates. The annual report includes state-owned land and buildings compiled by DEP and DMS for disposition.

[October 2013 – Third Annual Report](#)

[October 2014 – Fourth Annual Report](#)

1. Disposition Process

State-owned property must go through a specific process before it can be disposed, pursuant to Section 253, F.S. and 18-2, F.A.C. The steps vary depending on the agency owning the land and whether the property is conservation land or non-conservation land.

2. Interagency Collaboration

As the statewide custodian of real property information, DEP is responsible for development and maintenance of the new comprehensive inventory system for all state-owned real property, known as the Florida State Owned Land and Records Information System (FL-SOLARIS). The Department of Environmental Protection works closely with DMS in a collaborative effort to assure that the new inventory system is able to report on all lands and facilities owned, leased or otherwise occupied by all state agencies. It also works closely with the Department of Revenue and has entered into a Memorandum of Agreement outlining the sharing of tax data essential for FL-SOLARIS inventory reconciliation. The Department of Environmental Protection and the Department of Financial Services, County Property Appraisers Associations, the Department of Education and the Department of Transportation are all represented on the FL-SOLARIS Executive Management Team to guide the successful development and implementation of the FL-SOLARIS comprehensive real property database, which became operational in February 2013.

The Department of Environmental Protection, together with DMS, maintains over 550 individual FL-SOLARIS user accounts for 77 state agencies, colleges and universities and is available to assist all agency users with updating and maintaining the inventory. In addition state agencies, state universities, Florida College System institutions, and numerous cities and counties were surveyed to determine any leased or owned land and facilities surplus to their existing needs. This yielded data, along with other properties within the Possible Surplus/TBD category, will continue to be evaluated.

3. Scope of the October 2014 Disposition Report

This annual report lists state-owned property with the potential for disposition in Attachment A in three categories:

- a. Under Contract/In Negotiations – *Contract negotiations are in process for the surplus property, or it is currently under contract for sale;*
- b. Active – *The property is in the surplus process (being noticed, value determination, available for sale, or is actively being marketed for sale);*
- c. Possible Surplus/To Be Determined (TBD) – *The surplus property has potential to become “Active,” yet is currently in a review process or has yet to be reviewed.*

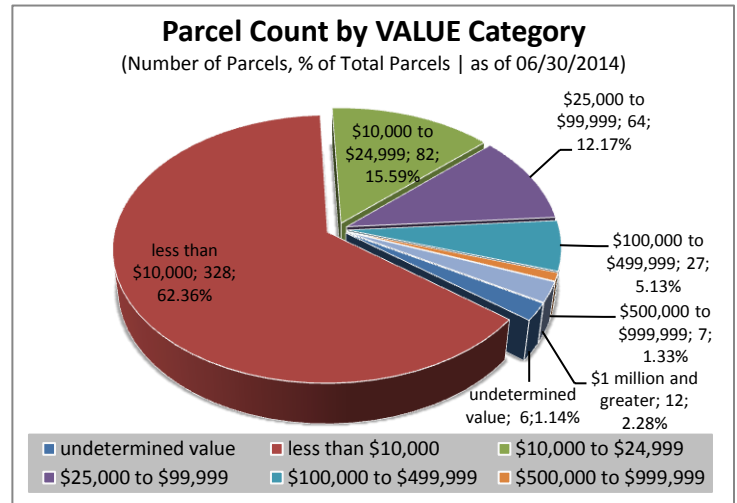

Two additional lists in this report (Attachments B and C) show transactions occurring between July 1, 2013, and June 30, 2014. The DEP Sales Report of Board of Trustees property (Attachment B) itemizes each of the properties sold, and Board of Trustees Real Property (Leases) Release Activity Report (Attachment C) is a list of properties for which the management lease has been transferred from one state agency or government entity to another or was surplus.

The Department of Management Services: For the purpose of this report, the terms “buildings” and “facilities” are used interchangeably. Chapter 2010-280, Laws of Florida, requires agencies to submit facility information to DMS by July 1 of each year. The Department of Management Services worked closely with the agencies in using the information gathered to identify additional disposition candidates. State agencies submitted facility information through the FL-SOLARIS Facility Inventory Tracking System (FITS). Agencies identified 506 facilities as candidates for disposition. (Attachment A – 2014 Facilities). The 506 facilities are situated on less than 20 different parcels of land.

B. Findings

1. Attachment A

For this report, state-owned property is categorized as either owned by the Board of Trustees of the Internal Improvement Trust Fund (Board of Trustees, or BOT as shown on Attachment A) or other state property (non-Board of Trustees). Due to the number of properties listed, this data provided in Attachment A can be found on the [DEP Disposition of State Lands and Facilities Reports Page](#).

The spreadsheet has a status column that includes the categories as discussed below. It should be noted that the size of many of the properties on the list is based on what was reported to the Department of Revenue by the county property appraisers and has not been verified with a survey. Similarly, most values shown are the result of the county property appraisers' mass valuation techniques, not appraisals on the individual properties. This should be considered in giving weight to the sizes and values reported.

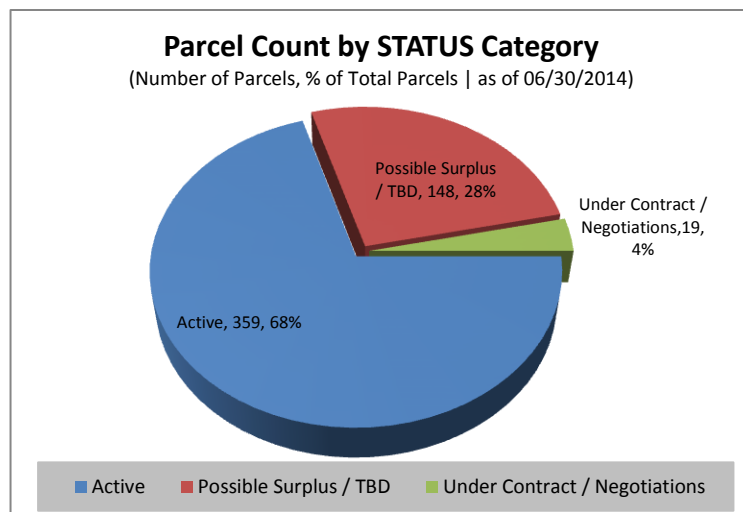

a. Board of Trustees State-Owned Land and Facility Dispositions in Process or To Be Determined

Overview: As of July 1, 2014, the report contains a total of 526 surplus or possible surplus properties, containing an estimated 5,916 acres with an estimated value of \$81.4 million. Of the 526 properties, there are approximately 19 that are improved with some sort of facility with an estimated value of \$55.2 million. These values do not reflect possible revenue, as all values are estimated or based on assessed value provided by the county property appraisers, and they may not reflect the actual appraised value of the facility if taken to market. In addition, many of the properties may be leased by state universities, Florida College System institutions, or state agencies. These numbers will constantly change due to ongoing evaluations, newly identified surplus properties, property re-leased to agencies, universities and Florida College System institutions in the noticing process, ongoing negotiations and dispositions of property.

Under Contract/In Negotiations: There are 19 properties (vacant and improved), for which potential purchasers have been identified and which are in the negotiation phase, are under contract for sale/exchange or in the closing phase. The total value of these properties is estimated at just under \$53 million. This estimated value may not reflect actual revenue to be received since it includes some exchanges in which land will be received instead of revenue.

Active: There are 359 properties available for disposition or for lease to a state university or government entity. The total estimated value of the property in this category is approximately \$14.8 million.

Possible Surplus/TBD: There are 148 properties with an estimated value of \$13.7 million in this category. This category consists of: properties that may have been identified by agencies as future candidates for disposition but are not yet available and properties with possible conservation values yet to be determined, unresolved title or ownership issues, restrictions, or dedications which hinder their marketability, inexact locations, or a variety of other conditions which need additional examination and resolution.

Due to ongoing evaluations, negotiations, and dispositions, parcels change from category to category, such as from Possible Surplus/TBD to Active. The following is a brief accounting of the status changes that occurred between July 1, 2013, and June 30, 2014:

Category	July 1, 2013	June 30, 2014
Total	611	526
Under Contract/In Negotiations	21	19
Active	430	359
Possible Surplus/TBD	160	148

b. Non-Board of Trustees State-Owned Land and Facility Dispositions in Process or To Be Determined

Each of the state’s five water management districts holds title to lands and has a process for disposing of lands determined to be no longer needed for district purposes. Their surplus lands processes are similar to the trustees’ process.

The information for this report is provided to DEP by each of the state’s water management districts. Due to ongoing evaluations, negotiations and dispositions, parcels change from category to category, such as from Possible Surplus/TBD to Active.

Other than property owned by the Department of Transportation and the various water management districts, most state land is titled to the Board of Trustees . There are some exceptions and this year’s report includes a property owned by the Department of Agriculture and Consumer Services which is listed as a candidate for disposition in the non-Board of Trustees lands data.

The following is a brief accounting of the status of non-Board of Trustees lands in Attachment A:

State Agency	July 1, 2013	June 30, 2014
NWFWMD	6	3
SFWMD	47	65
SJRWMD	64	49
SRWMD	21	19
SWFWMD	35	27
DACS	1	1
Total	174	164

Category	July 1, 2013	June 30, 2014
Total	174	164
Under Contract/In Negotiations	2	10
Active	39	36
Possible Surplus/TBD	133	118

2. Attachment B - DEP Sales Report of Board of Trustees property (July 1, 2013 - June 30, 2014):

Since July 1, 2013, 19 properties have been disposed of and are listed in Attachment B. One was transferred in accordance with Chapter 2013-40, Laws of Florida, with no consideration received, one was an exchange of property and 17 were sales. Total revenue received was \$386,624 and 0.80 acres of land valued at \$ 1,045,000 was received through the exchange.

3. Attachment C - Board of Trustees Real Property (Leases) Release Activity Report

Prior to a parcel of state-owned land being declared surplus to the state's needs, it is first offered to universities, Florida College System institutions, and state agencies for lease per Section 253.034(14) F.S. If it is placed under a management lease to one of these entities, it goes no further in the disposition process. The entity then becomes responsible for use and maintenance of the property. Management leases are used for state agencies, local governments, or other programs regardless of whether the property is a park, recreational trail, forest, wildlife conservation area or state office building. If the parcel is not needed by any one of the entities, it continues in the disposition process. The listing in Attachment C illustrates recent lease transactions that resulted in a parcel being transferred to another entity to manage or was surplus.

I. EXECUTIVE SUMMARY

The 2014 State Facilities Inventory (SFI) and Disposition of State Lands Annual Reports provide summary-level information of state-owned facilities and lands, as stipulated in sections 216.0152 and 216.0153, Florida Statutes.

Since 1985, the Department of Management Services (DMS) has maintained a program to collect information on state-owned facilities. Section 216.0152, Florida Statutes, originally required that DMS collect information on state agency facilities over 3,000 square feet. This original inventory consisted of approximately 4,000 facilities.

During the 2010 Legislative Session, extensive changes were made to sections 216.0152 and 216.0153, Florida Statutes. Section 216.0152, Florida Statutes, required agencies, the judicial branch, and the water management districts to report to DMS information on all state-owned facilities, regardless of size, increasing the scope of the report from 4,000 facilities to approximately 20,460 facilities. These changes required DMS, every three years, to submit a report to the Governor, Senate President and Speaker of the House of Representatives detailing facilities inventory. Section 216.0153, Florida Statutes, requires that the Department of Environmental Protection (DEP) and DMS submit a report annually to the Governor, Senate President and Speaker of the House of Representatives that lists the state-owned real property and facilities recommended for disposition.

Section 216.0153, Florida Statutes, also required DEP create a comprehensive database of all state-owned real property. This system, the Florida State Owned Lands and Records Information System (FL-SOLARIS), is comprised of two major components, the Facilities Inventory Tracking System (FITS) and the Land Inventory Tracking System (LITS). The FL-SOLARIS (FITS) provides the ability to use Web forms to edit and view owned facilities and allows users to extract and validate lease information. The FL-SOLARIS (FITS) went into production in October 2011; and FL-SOLARIS (LITS) went into production in February 2013.

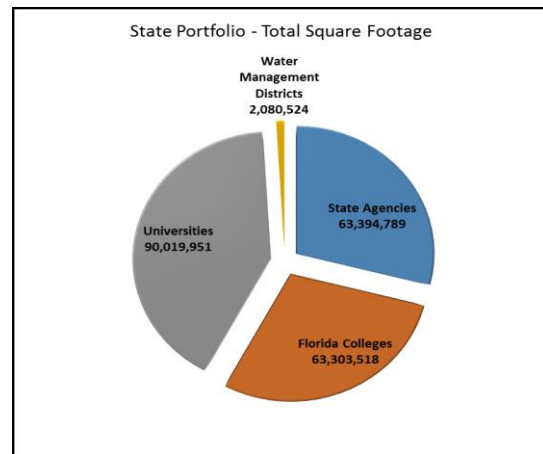

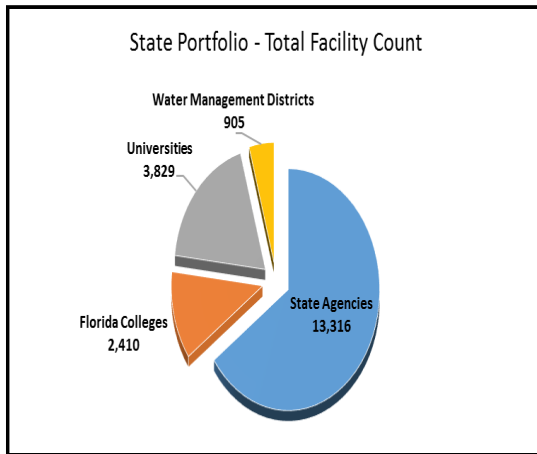

Chapter 2013-152, Laws of Florida, modified section 216.0152, Florida Statutes, and incorporated DEP's Disposition of State Lands and Facilities Report as part of the SFI. The reports are published annually by Oct. 1.

II. SUMMARY OF OWNED INVENTORY

Section 216.0152, Florida Statutes, defines a facility as “*buildings, structures, and building systems, but does not include transportation facilities of the state transportation system.*” In the 2013 SFI instructions to the agencies, DMS further defined a facility as any constructed asset with a permanent roof.

Agencies reported the following in FL-SOLARIS (FITS):

- The State of Florida owns 20,460 structures totaling 218,798,782 square feet. This portfolio includes facilities owned by state agencies, water management districts, the Florida College System, and the State University System of Florida Board of Governors (BOG).

- State agencies own 13,316 facilities, totaling 63,394,789 square feet.
 - Agencies own facilities in all 67 counties, with Alachua County having the most in count (1,619), Miami-Dade County having the most in square footage (29,478,225), and Glades County the fewest in both count (47) and square footage (39,836).
 - Agencies reported 506 candidates for disposition, totaling nearly 2.4 million square feet. Of those, only 10 were newly reported for 2014.
 - The average age of all agency-owned facilities is 31 years, and there are approximately \$794 million in identified capital improvement projects¹.
 - Agencies reported approximately \$286.5 million in operating expenses for this reporting cycle and \$117.8 million in utility expenses.

¹ Capital Improvement Projects include known needed repairs or upgrades such as building envelope, HVAC and plumbing improvements.

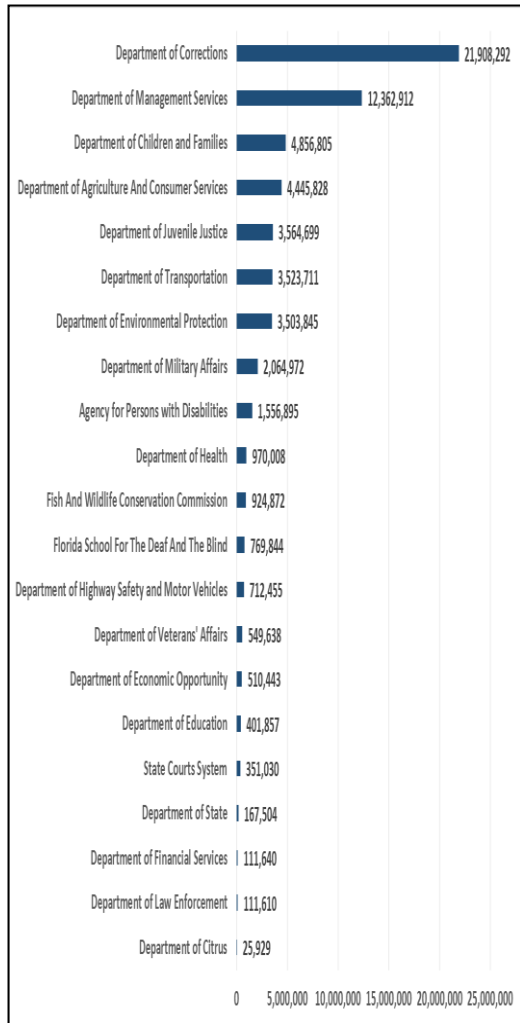

State-Owned Portfolio

The following table summarizes state government entities by total number of facilities and total square footage for all space types. It also provides the percentage of the total inventory based on the total number of facilities and the total square footage of all facilities.

State Agency	Facility Count	Facility Count as Percent of Total Inventory	Gross Square Footage	Square Footage as a Percent of Total Inventory
State Agencies	13,316	65.08%	63,394,789	28.97%

State-Owned Facility Portfolios by Size

The chart below displays each state government entity's square footage footprint as a percentage of the total inventory.

Owned Facilities by Square Footage

All Other Agencies includes:

- Agency for Persons with Disabilities
- Department of Citrus
- Department of Economic Opportunity
- Department of Education
- Department of Financial Services
- Department of Health
- Department of Highway Safety and Motor Vehicles
- Department of Law Enforcement
- Department of State
- Department of Veterans' Affairs
- Fish and Wildlife Conservation Commission
- State Courts System

State-Owned Facilities by County

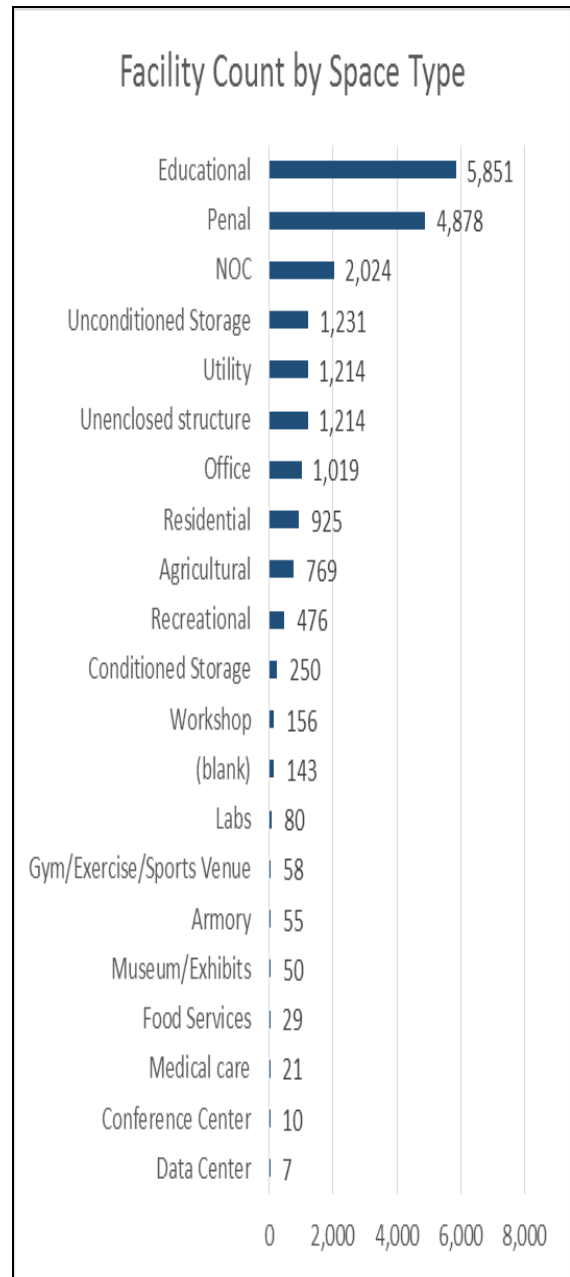

The table below lists facilities by county, facility count and total gross square footage.

County	Facility Count	Total Gross SF			
Alachua	1,619	24,240,894	Lee	451	6,248,729

State-Owned Facility Deficiency Summary

A building deficiency is any known building repair or improvement. Examples include chiller replacements or roof repairs. The table below identifies the number of agency-reported deficiencies by category and an estimated cost. Data reported includes three universities and three water management districts.

For a full list of agency-reported facility deficiencies, see **Appendix 1 - Facility Deficiencies as of June 30, 2014.**

Deficiency Category	Number of Deficiency by Category	Sum of Estimated Cost
Envelope	535	\$172,088,600
Code and Licensure	308	\$157,305,320
HVAC	583	\$114,204,994
Interior	952	\$106,426,659
Roofing	996	\$64,832,011
Electrical	329	\$47,720,696
Special	174	\$30,683,288
Site	348	\$29,261,317
General	508	\$25,179,733
Structure	221	\$24,875,621
Plumbing	300	\$21,855,582
Grand Total	5,254	\$794,433,821

State-Owned Facilities Suitable for Emergency Shelter

As identified in section 252.385, Florida Statutes, it is the intent of the Legislature that Florida not have a deficit of safe public hurricane evacuation shelter space in any region of the state. The Department of Management Services is required to compile a list of state-owned facilities, listed by county and municipality, that have unoccupied space suitable for use as an emergency shelter during a storm or catastrophic event. Suitable facilities must have at least 2,000 square feet of net floor area in a single room or in a combination of rooms having a minimum of 400 square feet in each room. This list is updated by May 31 of each year and included in the SFI.

See **Appendix 2 – State-Owned Facilities Suitable for Emergency Shelter** for the list of identified vacant space suitable for emergency shelter.

III. NEXT STEPS

The SFI has changed dramatically over the past three years with the addition of new agency-reported facilities and data elements. The FL-SOLARIS (FITS) is proving to be a valuable tool for all agencies, with data integrity improving each year. Agencies utilized the enhanced features of FL-SOLARIS (FITS) for the 2014 data validation requirement and made great progress toward providing a more accurate picture of the state-owned portfolio. The Department of Management Services continues to work cooperatively with DEP to enhance the functionality of FL-SOLARIS (FITS) and with agencies to develop better analysis of reported data to make fact-based, data-driven decisions on managing the state's valuable real property assets.
