VII.	APPENDICES	

I. BACKGROUND

The Florida Special Disability Trust Fund (“the Fund”) was established to encourage the employment of workers with pre-existing permanent physical impairments. In particular, the Fund reimburses employers (or their carriers) for the excess in workers compensation (“WC”) benefits they have provided to an employee with a pre-existing impairment who is subsequently injured in a WC accident. As part of the reimbursement process, the Fund determines the eligibility of claims as well as audits and processes reimbursement requests.

Claims with an accident date on or after 1/1/98 are excluded from reimbursement by the Fund. Claims with an accident date before 1998 are still eligible to seek reimbursements. While most eligible claims have been reported, it is still possible for new claims to be submitted, for closed claims to be reopened, and for open but recently inactive claims to seek additional reimbursements. Therefore, the Fund is responsible for the liabilities associated with both reported and unreported eligible claims.

After a claim has been accepted, a request for reimbursement of additional expenses may be submitted annually. The Fund generates revenues to pay claims from two sources. The primary source is an assessment applied to the net written premium of Florida WC insurance carriers. The basis for determining the assessment rate is established by Florida statute. There is also a minor amount of revenue generated by flat fees for new notices and proof of claim submissions. This latter revenue has become negligible, as the cutoff accident date for eligible claims is now over sixteen years old.

Previously, the Fund established the assessment rate according to the following statutory formula, which stated, “The annual assessment shall be calculated to produce during the next calendar year an amount which, when combined with that part of the

balance anticipated to be in the fund on December 31 of the current calendar year which is in excess of \$100,000, is equal to the average of:

- a. The sum of disbursements from the fund during the immediate past 3 calendar years, and
- b. Two times the disbursements of the most recent calendar year."

Additionally, there was a cap on the assessment rate of 4.52%.

The statute was revised in 2014 to the following: "By July 1 of each year, the department shall calculate the assessment rate, which shall be based upon the net premiums written by carriers and self-insurers, the amount of premiums calculated by the department for self-insured employers, the sum of the anticipated disbursements and expenses of the Special Disability Trust Fund for the next calendar year, and the expected fund balance for the next calendar year." As such, the revised statute effectively eliminated the explicit assessment formula previously used. The revised statute also changed the assessment rate cap to 2.50%. The Fund collects assessments that are of a sufficient magnitude so that the Fund balance has an expected surplus each year.

Surplus, as used throughout this report, means that the current available fund balance exceeds expected disbursements for the current year. Surplus is not used in the traditional insurance sense which would mean that the current available fund balance would exceed all expected future obligations of the Fund as of the accounting date of this report.

II. SCOPE AND INTENDED PURPOSE

A. Scope

Milliman, Inc. (“Milliman”) has been retained by the Fund to provide independent estimates of the following:

- Liability of the Fund as of 6/30/14
- Projected number of claims and total amount of expenditure from the Fund each year for the next five years

The items listed above are all based on data evaluated as of 6/30/14 and information provided by the Fund through the date of this report.

B. Intended Purpose

The intended purpose of this report is to provide the Fund with the items listed above to provide information for internal management purposes including but not limited to financial reporting and budgeting.

III. DISCLOSURES AND LIMITATIONS

A. Disclosures

1. Basis of Presentation

Our estimates are intended as measurements of expected value over a range of reasonably possible outcomes. Such an estimate is known as an “actuarial central estimate” and is conceptually similar to a mean. Since the range of reasonably possible outcomes may not include all conceivable outcomes, an actuarial central estimate is not technically a true statistical mean. For example, the range of reasonably possible outcomes may exclude conceivable extreme events whose contribution to the true statistical mean is not reliably estimable.

In addition, please note the following regarding our estimates:

- Our estimates are presented on a discounted and an undiscounted basis with regard to the time value of money.

2. Terminology

Reserves. The use of the term “reserves” is common in the insurance industry. All references to the Milliman estimated reserves in this report indicate the Milliman estimated liability for unpaid loss and loss adjustment expense amounts on claims incurred as of 6/30/14, and should not be construed as indicating a value carried on the financial statements. The amounts carried on the financial statements are referred to herein as the “carried” or “booked” reserves.

Loss Adjustment Expenses (“LAE”). LAE are classified as allocated loss adjustment expenses (“ALAE”) and unallocated loss adjustment expenses (“ULAE”). Generally,

ALAE includes claims settlement costs directly assigned to specific claims, such as legal fees, and ULAЕ includes other claims administration expenses. Please note that we did not separately estimate ULAЕ since it is included in the administrative expenses provided by the Fund.

We estimated loss and ALAE reserves on a combined basis. Throughout the remainder of this report the terms "loss" or "losses" refer to combined loss and ALAE amounts.

3. Acknowledgment of Qualifications

Gregory T. Graves is a Principal of Milliman, a Fellow of the Casualty Actuarial Society, and a Member of the American Academy of Actuaries. Greg meets the qualification standards of the American Academy of Actuaries to provide the estimates in this report.

4. Other Disclosures

This analysis is an update of our prior analysis for the Fund that was performed based on data evaluated as of 6/30/13. We made no material changes to the assumptions and methods used to produce our estimates.

B. Limitations on Distribution and Use of Name

Milliman's work is prepared solely for the use and benefit of the Fund in accordance with its statutory and regulatory requirements. Milliman recognizes that materials it delivers to the Fund may be public records subject to disclosure to third parties pursuant to public records requests, as well as posted on the Fund's website. However, Milliman does not intend to benefit and assumes no duty or liability to any third parties who receive Milliman's work and may include disclaimer language on its work product so stating. The Fund agrees not to remove any such disclaimer language from Milliman's work. To the extent that Milliman's work is not subject to disclosure under applicable

public records laws, the Fund agrees that it shall not disclose Milliman's work product to third parties without Milliman's prior written consent; provided, however, that the Fund may distribute Milliman's work to (i) its professional service providers who are subject to a duty of confidentiality and who agree to not use Milliman's work product for any purpose other than to provide services to the Fund, or (ii) any applicable regulatory or governmental agency, as required.

Any reader of this report agrees, to the extent that Milliman's work is not subject to disclosure under applicable public records laws, not to use Milliman's name, trademarks or service marks, or to refer to Milliman directly or indirectly in any third party communication without Milliman's prior written consent for each such use or release, which consent shall be given in Milliman's sole discretion.

C. General Limitations

1. Reliance on Data

In performing this analysis, we relied on data and other information provided by the Fund. We have not audited or verified this data and information. If the underlying data or information is inaccurate or incomplete, the results of our analysis may likewise be inaccurate or incomplete. In that event, the results of our analysis may not be suitable for the intended purpose.

We performed a limited review of the data used directly in our analysis for reasonableness and consistency and have not found material defects in the data. If there are material defects in the data, it is possible that they would be uncovered by a detailed, systematic review and comparison of the data to search for data values that are questionable or relationships that are materially inconsistent. Such a review was beyond the scope of our assignment.

2. Uncertainty

Actuarial estimates are subject to uncertainty from various sources, including changes in claim reporting patterns, claim settlement patterns, judicial decisions, legislation, and economic conditions.

In estimating the Fund's reserves for unpaid losses, it is necessary to project future loss payments. Actual future losses will not develop exactly as projected and may, in fact, vary significantly from the projections. Further, the projections make no provision for future emergence of new classes or types of losses not sufficiently represented in the Fund's historical database or that are not yet quantifiable.

Our estimates are presented on a going concern basis. That is, we have not anticipated any changes in claim reporting or claim settlement patterns, practices, or costs that might occur if the Fund were to cease operating as a going concern or to become financially impaired.

Based on information we received from the Fund, the electronic database containing the Fund's approval history is incomplete for claims occurring before 1995. While complete records of these claims do exist in paper form, they have not been coded in their entirety into the Fund's electronic database. The Fund informed us that it is working to code all open, active claims into its electronic database as time permits.

3. Variability of Results

Our actuarial central estimates are intended to approximate the expected value of an inherently variable process. Actual loss experience in any given year may differ from our estimates.

We considered the sensitivity of our estimates to key variables and assumptions in the analysis. Key variables and assumptions include (but are not limited to) loss

development factors and the weights given to different actuarial methods. It is possible that reasonable alternative selections would produce materially different reserve estimates.

5. Discounting

In estimating the Fund's discounted loss reserves, we used an annual effective interest rate of 4.0%. The interest rate was selected and provided to us by the Fund. We note that a 4.0% interest rate is not reasonably achievable in the current market when purchasing suitable investments for the Fund. In addition, discounting reserves which are not backed by invested assets can result in a misleading financial assessment. We are not able to further assess the reasonableness of the selected interest rate without performing a substantial amount of additional work beyond the scope of our assignment. As such, we express no opinion on the appropriateness of the interest rate.

Future rates of return are not guaranteed and may exceed or fall below the assumed rate. Also, the actual timing of loss payments is subject to variability. Differences between actual and expected rates of return and timing of payments from those underlying our estimates may have a material effect on the amount of the discount. Further, our projections assume the existence of valid assets underlying the unpaid claim liabilities and that these assets are appropriate to meet the cash flow needs of the Fund. We have not reviewed the held assets.

IV. SUMMARY OF FINDINGS

A. Estimated Unfunded Liability as of 6/30/14

Table 1 summarizes our estimates of the Fund's unfunded liability as of 6/30/14 on both undiscounted and discounted bases. Please note that the Fund has selected an interest rate of 4.0%. Based on Table 1, the amount of discount (the difference between the undiscounted reserve estimate and the discounted reserve estimate) at the 4.0% interest rate is approximately \$319 million.

Table 1 also displays historical estimates of undiscounted and discounted unfunded liability.

Table 1 Florida Special Disability Trust Fund Historical Estimated Unfunded Liability (in millions)		
Evaluation Date	Undiscounted Unfunded Liability	Discounted Unfunded Liability at 4.0%
9/30/99	3,240	2,049
9/30/00	2,750	1,870
9/30/01	2,600	1,730
6/30/02	2,390	1,512
6/30/03	2,160	1,652
6/30/04	2,060	1,558
6/30/05	1,860	1,385
6/30/06	1,690	1,258
6/30/07	2,214	1,491
6/30/08	2,168	1,335
6/30/09	2,035	1,250
6/30/10	1,777	1,073
6/30/11*	1,670	1,010
6/30/11	1,337	843
6/30/12	1,274	815
6/30/13	1,178	773
6/30/14	973	654

Notes: * From prior Pinnacle report
6/30/10 and prior figures based on analyses
that were performed by prior actuaries
6/30/11 and subsequent from prior Milliman report
See Summary, Exhibit 1 for 6/30/14 figures

Note that (with the exception of the Milliman study entries as of 6/30/11 and subsequent), the discounted unfunded liabilities were estimated by Milliman in the analysis as of 6/30/11 (see Appendix D in the 6/30/11 report).

B. Retrospective Analysis

We compared the results of our analysis as of 6/30/14 to those from our prior analysis as of 6/30/13 in Table 2 below. For all fiscal years combined, our estimated ultimate losses decreased by approximately \$168 million (or 3.4%) relative to our prior estimated ultimate losses as of 6/30/13. Our estimated approvals are approximately \$50 million (or 1.4%) higher than our prior estimated approvals as of 6/30/13.

This results in a reserve estimate as of 6/30/14 that is approximately \$218 million (or 16.7%) lower than our prior reserve estimate as of 6/30/13.

Table 2
Florida Special Disability Trust Fund
Retrospective Analysis (in millions)

Item	Milliman Estimated as of 6/30/13	Milliman Estimated as of 6/30/14	Difference	Percent Difference
Ultimate Loss & ALAE	4,988	4,821	(168)	(3.4%)
Estimated Paid Approvals	3,683	3,733	50	1.4%
Total Reserves	1,305	1,087	(218)	(16.7%)

Notes: See Summary, Exhibit 3 for details

The decrease of approximately \$168 million in our estimated ultimate losses was due in part to actual approvals in fiscal year 2013-14 being approximately \$57 million as compared to our projected paid approvals of approximately \$73 million in our prior analysis as of 6/30/13. Furthermore, actual approvals in fiscal year 2012-13 were approximately \$58 million, as compared to our projected paid approvals of approximately \$75 million in our prior analysis as of 6/30/12. Although actual paid approvals were lower than expected in fiscal year 2013-14, the historical development data has not yet been impacted materially by these lower payments. As such, our projected paid approvals for fiscal year 2014-15 have only decreased slightly to approximately \$68 million.

Based upon our discussions with management, we understand that the backlog in paid approvals that management has been working to clear over the past few years is complete. Management believes this is one reason why actual paid approvals during fiscal years 2012-13 and 2013-14 are lower than we expected based upon our prior analyses. In addition, management expects that paid approvals for the next few fiscal years are more likely to be in the \$50-60 million range than the \$68 million range we are projecting.

If actual paid approvals continue at the \$50-60 million level, the development factors will begin to decrease in magnitude as these lower actual paid approvals become incorporated into the development data. This would in turn likely decrease our projected paid approvals in future fiscal years. As such, the difference currently observed between projected approvals (i.e., \$68 million) and those anticipated by management (i.e., \$50-60 million) would likely continue to decrease in the future.

C. Allocation of Reserves by Claim Category

We separately analyzed the paid loss development patterns of four categories of claims: open with no payments in the past five fiscal years, open with payments in the past five fiscal years, closed with no payments in the past five fiscal years, and closed with

payments in the past five fiscal years. We then allocated the total undiscounted reserves by claim category based on each claim category's paid loss development patterns. Table 3 below summarizes the results of this allocation.

Table 3 Florida Special Disability Trust Fund Summary of Reserves by Claim Category (in millions)			
Claim Category	Total Undiscounted Reserves	Selected Allocation Factor	Allocated Undiscounted Reserves
Open with Activity in Last 5 Years		86%	935
Closed with Activity in Last 5 Years		14%	152
Open no Activity in Last 5 Years		Minimal	Minimal
Closed no Activity in Last 5 Years		Minimal	Minimal
Total	1,087	100%	1,087

Total Undiscounted Reserves from Summary, Exhibit 1
Selected Allocation Factors based on an internal analysis of loss development by claim category

D. Claim Statistics as of 6/30/14

Table 4 below displays a variety of claim statistics as of 6/30/14. The number of open claims continues to decline, as there are now 4,926 open claims (compared to 5,032 open claims as of 6/30/13). The Fund determines the Average Administrative Cost per Claim by dividing the administrative costs by the number of open claims in a given fiscal year. All else equal, a decline in open claims causes the Average Administrative Cost per Claim to increase. With regard to the Average Time Required to Reimburse Accepted Claims Paid, please note that this figure includes periods of time where the

Fund is waiting for a response from the insurance carrier. Additional historical claim statistics based on information provided by the Fund are displayed below.

Table 4
Florida Special Disability Trust Fund
Summary of Historical Claims Records

	Item	FY 13-14
(1)	Number of Open Claims	4,926
(2)	Number of Notices Filed	0
(3)	Number of Newly Received Proofs of Claim Processed by the Fund	0
(4)	Fee Revenues Received from 7/1 to 6/30	\$0
(5)	Fee Revenues Refunded from 7/1 to 6/30	\$0
(6)	Fee Revenues Applied to Pay Down Liability in FY	\$0
(7)	Average Time Required to Reimburse Accepted Claims Paid (in months)	14.67
(8)	Average Administrative Cost per Claim	\$301.73

Notes:

(8): = (Administrative Costs of \$1,486,344) / (1)
Administrative costs were provided by the Fund

V. ANALYSIS

A. Data and Information

We relied on data and information provided by the Fund, which included the following:

1. Loss Data – Approvals by accident period, evaluated as of 6/30/14.
2. Claim Count Data – Closed and reported claim counts by accident period, evaluated as of 6/30/14. We also received requests and proofs evaluated as of 6/30/14.
3. Assessable Premium – Net written premium of WC insurance carriers. We received actual net written premium for calendar years 2012 and 2013. We also received estimated net written premium for calendar years 2014 and 2015.
4. Assessment Rate – The assessment rate applicable to the assessable premium for calendar years 2014 and 2015.
5. Administrative Expenses – Annual administrative expense figures for fiscal year 2012-13 and 2013-14 and projections for fiscal year 2014-15 as well as for calendar year 2015.
6. Fund Balance as of 6/30/14 – The amount of surplus in the Fund as of 6/30/14.

We also relied on data and information received during our studies for prior years and from prior actuarial analyses of the Fund as well as from other publicly available information from the Fund's website.

B. Methodology

We performed our analysis by fiscal year. As has been done in previous reports for the Fund, we separately analyzed two categories of claims: First and Final (“F&F”) and Other than First and Final (“Other than F&F”). In general, F&F claims are characterized as those where a single payment amount is established at the time of approval of a claim or is expected to be the only payment made. Payments on Other than F&F claims typically occur over a longer time horizon than F&F claims. Given the qualitatively different nature of these two types of claims, we deemed it appropriate to continue analyzing them separately as prior reports have done.

Our methodology consists of the following steps:

1. Estimated Ultimate Losses
2. Estimated Reserves and Unfunded Liability
3. Estimated Ultimate Requests
4. Projected Future Revenues and Fund Balances

1. Estimated Ultimate Losses

In order to project ultimate losses, we used a variety of estimation methods and then assigned weight to each method based on our judgment as to its relative predictive value. The following is a brief description of each method.

a. Paid Loss Development

In the Paid Loss Development method, ultimate losses are estimated by applying development factors to approvals as of the evaluation date. These loss development factors (“LDFs”) estimate future loss payments on open, unreported, and reopened claims. The selection of development factors is based on historical approval patterns

(data triangles). Development beyond the maturity of the historical data triangles is estimated by selecting a “tail” LDF.

Since the historical approval information for 1995 and prior in the electronic database is incomplete, we constructed an approval triangle based on approval data from years that are known to be complete. First, we selected LDFs based on data from fiscal years 1994-95, 1995-96, and 1996-97. From these selections, we estimated a payout pattern. We then divided the actual incremental payments observed for fiscal years 1994-95, 1995-96, and 1996-97 by the appropriate incremental payment percentages from our estimated payout pattern to obtain three estimates of ultimate losses for each fiscal year. By then multiplying these estimates of ultimate losses by the expected percent of payments made on each fiscal year through 6/30/94, we estimated cumulative approvals as of 6/30/94 for each fiscal year. This was used as our earliest diagonal in our constructed triangle. The remainder of the constructed triangle was populated using actual incremental payments. We then applied the Paid Loss Development method to this constructed triangle to estimate the ultimate losses which are shown as our paid development projections in Exhibit 2, Sheet 2, Column 5 of Appendices A and B.

b. Percent Paid

In the Percent Paid method, ultimate losses are estimated for each fiscal year by dividing actual incremental approvals by incremental percent paid factors, which come from the payout pattern mentioned in the Paid Loss Development method above. We applied this procedure for Other than F&F claims using actual incremental approvals for fiscal years 1998-99 through 2007-08. We derived three different estimates by reviewing the results of this method for the following groups of fiscal years: 1998-99 to 2007-08, 2003-04 to 2007-08, and 2005-06 to 2007-08. Our selected ultimate loss amounts for this method were based on these three estimates of ultimate approvals. See Appendix A, Exhibit 2, Sheet 3 for details.

For F&F claims, we derived three different estimates for each fiscal year using this approach on actual incremental approvals for fiscal years 1994-95, 1995-96, and 1996-97. Our selected ultimate loss amounts for F&F claims using this method were based on these three estimates of ultimate approvals. See Appendix B, Exhibit 2, Sheet 3 for details.

c. Summary

After reviewing the results of each method and assigning weights to each, the result is a selected ultimate loss amount. For the Other than F&F category, we observed that the results of the two methods were quite close for all years combined. Since we believe that both methods should receive consideration in our selections, we assigned 50% weight to both the Paid Development and Percent Paid methods.

For the F&F category, our selected development pattern suggested that very little development was expected for this category. For the older fiscal years, the results of the two methods were equal and we assigned 100% weight to the Paid Development Method. In more recent accident periods, where the indications of the two methods were not the same, we assigned 50% weight to both the Paid Development and Percent Paid methods. For the 1993-94 fiscal year, the results of the Percent Paid method were deemed unreliable and we assigned 100% weight to the Paid Development Method.

2. Estimated Reserves and Unfunded Liability

We estimated reserves by subtracting projected amounts paid through 6/30/14 from estimated ultimate loss amounts. We estimated the Fund's unfunded liability as of 6/30/14 by first subtracting the Fund's surplus as of 6/30/14 from our reserve estimate.

We discounted the loss reserves to reflect the time value of money by multiplying the reserves by an appropriate discount factor. The discount factors were calculated using an annual interest rate of 4.0% supplied by the Fund and selected loss payment

patterns. Please refer to page 10 of this report for a detailed discussion of the interest rates used. The payment patterns were selected based on a review of the historical paid loss development.

3. Estimated Ultimate Requests

We estimated ultimate claim counts using the Reported Claim Count Development method. This method is similar to the Paid Loss Development method previously described, except that requests and request count development factors are used in place of paid losses and paid loss development factors.

C. Detailed Analysis

1. Data Adjustments

Based on information we received from the Fund, we have excluded approvals for requests with the status “Void” or “Payment Refused”. We also excluded claims with no approval date in the claims database. These claims account for approximately \$10.1 million, which is approximately 0.4% of the database’s total actual approvals.
