Florida Communities Trust
Letter from the Chair

Dear Floridians,

For more than a quarter century, the Florida Communities Trust (FCT) has established a rich legacy of partnership and preservation marked by a diverse array of parks, greenways, urban green spaces, public beach access points, wildlife habitats and working waterfronts. As perpetual stewards of over 500 project sites throughout Florida, FCT works to continually enhance local communities and recreational access for Floridians.

Over the past two years, FCT worked with local partners to acquire nine additional project sites throughout Florida. These projects leveraged \$6 million in FCT grant awards with \$8.2 million in local match to protect over 1,540 acres across the state. These projects will safeguard Florida's fragile ecosystems while promoting access to outdoor recreational opportunities for persons with unique abilities. As a result of \$10 million awarded in Florida Forever funding for Fiscal Year 2018-2019, six more projects sites will be acquired for the preservation of Florida's unique and irreplaceable natural resources.

Florida Communities Trust complements many grant programs administered by the Florida Department of Environmental Protection, including the Florida Recreation Development Assistance Program, Land and Water Conservation Fund Program and Recreational Trails Program. These grant programs help local communities leverage their resources and build interconnected community parks, trails and preserves to better serve our citizens.

Please take a few moments to review this report and learn how FCT continues to strengthen our communities.

Sincerely,

Barbara Goodman
Chair, Florida Communities Trust Governing Board
Deputy Secretary, Land & Recreation

FCT PARKS AND OPEN SPACE PROGRAM 1990-2019 PROJECTS

FLORIDA COMMUNITIES TRUST

WHAT IS FLORIDA COMMUNITIES TRUST?

Florida Communities Trust (FCT) is a multi-faceted program housed within the Florida Department of Environmental Protection. FCT was first funded in 1991 under Preservation 2000 as a funding source for local communities to buy land for the protection of natural and cultural resources and public access for recreational opportunities.

Today, FCT administers the Parks and Open Space and Stan Mayfield Working Waterfronts (SMWW) programs, two competitive grant programs that provide funding to local governments and non-profit environmental organizations to assist local land conservation efforts. The Parks and Open Space program helps local communities meet the challenges of growth, supporting viable community development and protecting natural resources and open space. The SMWW program acknowledges the importance of the traditional seafood harvesting and aquaculture industries in Florida.

Lafayette Heritage Trail Park
City of Tallahassee

Projects funded by FCT have fostered cultural and historical preservation, trail system development and public access to water. FCT also furthers the outdoor recreation, natural resource protection and working waterfront needs identified in local government comprehensive plans.

FY 2018-2019 SMWW Applicant
Brevard County

FCT is governed by a five-member board that includes the Secretary of the Department of Environmental Protection or designee and four members of the public appointed by the Governor. Appointees to the Board include a former elected official of a metropolitan municipality, a former elected official of a county, a representative of an environmental non-profit organization and a representative of the development industry.

MISSION AND ACCOMPLISHMENTS

FCT is dedicated to working with communities across the state to acquire lands for recreation, open space and working waterfronts. FCT works with grant recipients to foster responsible stewardship of those lands once acquired. The quality of life, environmental quality, as well as the viability and vitality of the urban areas of this state are directly linked to urban open space and greenways. The preservation of unique natural spaces in the urban areas of this state are necessary to link local populations with Florida's natural heritage.

PROMOTING COMMUNITY

FCT helps local communities further the goals of their land use plans through land acquisition and innovative, non-regulatory solutions to the challenges inherent in the land-planning process. After a project has been acquired by the grant recipient, FCT stewardship continues in perpetuity through a formal agreement to provide guidance on park development and management oversight. This is accomplished through annual stewardship reporting and site visits.

Funding for FCT is currently provided through the Florida Forever program. Once lands have been acquired, the grant recipient, not the State of Florida, holds title to the lands. Each recipient is then responsible for land stewardship and implementing a formal management plan that must be approved by FCT. All FCT properties include a Board of Trustees 'reverter' or 'spring' clause to protect the State's interests in perpetuity.

Leon County

LINKING URBAN POPULATIONS WITH NATURAL AREAS

FCT is dedicated to working with communities across the state to acquire lands for recreation, open spaces, working waterfronts and fostering responsible stewardship of those lands once acquired. The quality of life, environmental quality, as well as the viability and vitality of the urban areas of this state are directly linked to urban open space and greenways. The creation of greenways and restoration of urban lakes, rivers, and watersheds in the urban areas of this state are necessary to link populated areas with natural areas.

The Naples Preserve, City of Naples FCT #01-040-FF1

The Naples Preserve is a 9.58-acre parcel of land that was approved for purchase by a referendum vote of the citizens of Naples and acquired by the City on April 11, 2000.

The Preserve is one of the remaining parcels of land located within the built-up area of Naples that still retains most of its original plant and vegetative cover. The Naples Preserve site contains an older structure that is believed to have been designed by students of Frank Lloyd Wright. The building

The Visitor Center at the Naples Preserve

was originally utilized by the Chamber of Commerce as its administrative office and visitor information center during the 1960s and 1970s. This building has particular significance because it is among the few remaining commercial structures that survived Hurricane Donna in 1960.

The use of the visitor center as the Chamber of Commerce administrative office was discontinued in the mid-seventies. The City restored this structure for use as a visitor and education center in conjunction with the operation of the Nature Preserve. These improvements allow the site to serve as an outdoor laboratory to enhance environmental education.

The Naples Preserve
City of Naples

EXPANSION OF GREEN SPACES AND ENHANCEMENT OF RECREATION AREAS

Projects funded by FCT provide land for recreational opportunities to enhance the health and well-being of the residents of this state.

Cypress Creek Natural Area, Palm Beach County FCT #11-001-FF11

The 2,083.1-acre Cypress Creek Natural Area is located in an unincorporated portion of northeastern Palm Beach County. Palm Beach County originally acquired 367.1 acres of the site in December 1995 with funds from the Palm Beach County Environmentally Sensitive Lands Bond Referendum of March 12, 1991. The natural area was expanded with additional purchases between 2003 and 2009. Funding for the additional purchases came from the Palm Beach County Lands for Conservation Purposes Bond Issue Referendum of March 9, 1999 and from matching funds from the Florida Communities Trust.

Cypress Creek Natural Area
Palm Beach County

The primary purposes for the acquisition of the Cypress Creek Natural Area were to help protect the federally-designated Wild and Scenic Loxahatchee River, and preserve the site's ecological and historical resources.

Cypress Creek Natural Area
Palm Beach County

The park is managed to conserve, protect and restore/enhance the existing natural resource values. The site also is managed in a manner that will protect the existing historical resources. Scientific research, environmental education, and public outdoor recreational uses are encouraged as long as they do not jeopardize the conservation, protection, and restoration/enhancement of the natural resources or the protection of existing historical resources.

Passive, resource-based outdoor recreational uses, such as nature appreciation and study, hiking and photography are allowed throughout the site. Additional recreational uses such as canoeing/kayaking, biking, horseback riding and fishing are permitted in designated portions of the natural area.

PRESERVING FLORIDA'S UNIQUE HERITAGE

The majority of FCT's projects protect precious natural resources, but many of them also provide historical and cultural value. Special emphasis is placed on preserving historical resources and has helped Florida's communities save dozens of sites with significance at the local, state and national levels.

Newton Beach Park, Town of Fort Myers Beach FCT # 02-0968-FF2

Newton Beach Park
Town of Fort Myers Beach

Newton Beach Park is located in the Town of Fort Myers Beach. The park contains approximately 0.8 acres of land, and provides 196 feet of beach frontage on the Gulf of Mexico. The park provides a needed public recreational and cultural site and museum for the residents and tourist visitors to this densely populated beach community, with interpretation of the Newton family, local history, resource management activities occurring on site, and other cultural and environmental education opportunities.

An important aspect of the park is its commemoration of the lives and contributions of Jim and Ellie Newton. The Newtons had been prominent residents of Estero Island, recognized for important contributions to society, and for their close friendships with famous figures of 20th Century American history. The Newtons built a wood frame house circa 1950. Once the Newton's primary residence, "The Seven Seas Cottage" presently serves as public space for community and social events.

Jim Newton's book *Uncommon Friends*, chronicles the long friendships between the Newtons and Thomas Edison, Harvey Firestone, Henry Ford, Charles Lindberg and Alex Carrel. More importantly, this park celebrates the strong spiritual, moral and ethical foundation for personal action that was the basis of the Newtons' lifetime successes in business and in personal accomplishments. These qualities of friendship and high ethical standards, which are so valuable to the health of society, can be very effectively displayed and discussed through the setting and proposed facilities of Newton Beach Park.

Newton Beach Park
Town of Fort Myers Beach

PROMOTING EDUCATION

Education is an important part of resource conservation. To that end, FCT places a priority on projects with educational aspects, awarding points during competitive selection to those projects providing for onsite interpretive signs, educational classes and even environmental education centers.

Camp Chowenwaw, Clay County FCT# 04-078-FF4

Educational Kiosk at "Camp Chow"

Clay County acquired the historic Camp Chowenwaw (Cho'-wen-waw), which means "Camp of the Little Sisters" in 2004 to protect this unique parcel. The 153-acre site is at the mouth of Black Creek, at its confluence with the St. Johns River. The Girl Scouts operated the camp for over 70 years, which began with a gift of one of the parcels from the Prime Osborne family of Jacksonville. Today, it is a regional center for environmental and outdoor recreational learning with remarkably intact floodplain ecosystems.

This relatively unblemished site is rare in an area of rapid growth brought on by the encroaching urban development of Jacksonville. Directly across from the site is the Black Creek Preserve, a Development of Regional Impact donation for the County, which runs four miles along the Creek. Purchase of the camp helped

to protect this valuable view shed.

Another goal of this project was to preserve several historic structures, including the rustic "Big Cabin," a 1930s log structure constructed by the Civilian Conservation Corps. The County has made this oasis of natural resources available to the public in a way that continues the legacy of stewardship partly reflected in the Girl Scouts ethic of "leaving a place cleaner than one finds it."

Camp Chowenwaw is managed as a mostly passive outdoor recreation area providing public access to Black Creek while ensuring protection of the site's unique natural features. A trail system, along with the interpretive signs and kiosks are provided. The unique combination of the camp's natural and cultural features offer outstanding environmental education opportunities to residents and visitors.

"Camp Chow" Educational Display

Fiscal Year 2018-2019 Stan Mayfield Working Waterfronts Grant Application Cycle

The SMWW Florida Forever grant program was created by the 2008 Legislature in Section 380.5105, Florida Statutes. A total of \$4,268,238 was available for the 2018-2019 grant application submission period, which was held August 27 through September 10, 2018.

SMWW funds are for the acquisition of land directly used for the purposes of the commercial harvest of marine organisms or saltwater products by state licensed commercial fishermen, aquaculturists, or business entities. Facilities may include piers, wharves, docks, or others operated to provide waterfront access to qualified entities. The acquisition of land used for recreational waterfront activities is not considered within the SMWW program.

SMWW funds may also be used for the acquisition of land used for exhibitions, demonstrations, educational venues, civic events, and other purposes that promote and educate the public about economic, cultural, and historic heritage of Florida's traditional working waterfronts, including the marketing of the seafood and aquaculture industries.

Two projects were approved for funding in the 2018-2019 cycle; the Homosassa Heritage Park & Working Waterfront in Homosassa and Blue Crab Cove, Phase II in Brevard County. The remaining funds from this cycle will be made available to eligible applicants during the 2019-2020 fiscal year.

Blue Crab Cove
Brevard County

“Preserve the Preserve” Barefoot Beach Preserve Outparcel, Lee County (FCT # 03-073-FF3)

Memorials are a common sight in many parks. FCT parks are no exception. FCT staff came across this touching tribute while on a site visit. “Unser Lieblingsplatz” translates as “Our Special Place.” Pictured below is the view from this memorial bench. A special place indeed.

CLOSINGS AND REIMBURSEMENTS

During fiscal year 2018-2019, the following FCT grant projects closed and the grant recipients were reimbursed. All of these projects were awarded funding in the 2016-17 “Unique Abilities” grant cycle.

City Center Barrier Free Park, City of Freeport FCT # 16-015-UA17

4.02 Acres

Project Cost \$ 296,808

Grant Award \$ 296,808

Local Match \$ 0

The City Center Barrier Free Park is located in the City of Freeport, Walton County. The site is west of and adjacent to the Freeport City Hall, Veterans Park and Casey Park, two city owned parks. The property is approximately 4.02 acres of which approximately 2.7 acres is upland hardwood forest, approximately 0.73 acres is seepage slope wetland and approximately 0.60 acres is disturbed. The disturbed area appears to have been previously cleared for a single-family home. The disturbed uplands contain one active and one inactive gopher tortoise burrow.

City Center Barrier-Free Park
City of Freeport

The proposed park will be managed only for the conservation, protection, and enhancement of the existing natural resources, for public outdoor recreation compatible with conservation and education of conservation, and the protection and enhancement of the natural resources on the site. More than ½ mile of nature path will be provided for recreational use and environmental education.

A future 500-ft barrier-free boardwalk will extend further to the northwestern portion of the site providing serene lookout stations among the wetlands, while limiting the environmental impacts associated with foot traffic

and aiding in protecting the native wildlife and vegetation.

Walking and exercise trails will wind through the property. Exercise stations along the trail will have equipment designed for the outdoors and for use by people of varying abilities. Accessibility is to be considered in each element of the park’s design to include the play areas, trails, picnic areas, and exercise and sensory stations. A multifunctional pavilion will be provided along the nature walk for a place to gather, picnic and socialize as well as for an area for outdoor educational classes, demonstrations, special events and activities.

Cypress Creek Preserve, St. Lucie County FCT # 16-013-UA17

783.41 Acres

Project Cost \$ 3,367,970

Grant Award \$ 1,683,985

Local Match \$ 1,683,985

Cypress Creek Preserve is located approximately 20 miles southwest of Ft. Pierce, Florida. The site consists of a variety of upland and wetland habitats including: depression marsh, baygall, floodplain forest, hydric hammock, mesic flatwoods, improved pasture depression marsh, and wet prairie. Much of the property has existed as a cattle ranch. Other past uses include agriculture, hunting, and timbering. Cypress Creek Preserve is located near several other public conservation lands. Adjacent lands are primarily used for agricultural uses, including ranching, hunting, and citrus.

The project site will be managed only for the conservation, protection and enhancement of natural resources, and for public outdoor recreation that is compatible with the conservation, protection and enhancement of the site. The site will be open to the public for passive recreation and will include accessible amenities for people with unique abilities. This project is an integral part of the Cypress Creek Greenway Corridor which connects neighbors and multi-use trail users to greenways and trails. A ten (10) foot existing sidewalk in the SR70 right-of-way connects trail users to many other conservation areas, as well as the equestrian center at the St. Lucie County fairgrounds and downtown Ft. Pierce.

Future amenity highlights will include ADA boardwalks, parking, and picnic facilities, as well as observation tower(s), wildlife blinds, hiking, biking, equestrian trails, and a campground. The campground will provide ADA compatible RV and primitive campsites, as well as multiple ADA accessible ecofriendly cabins with restrooms. Trails will incorporate interpretive signs and kiosks with braille and QR codes for the visually impaired. QR codes will link to auditory support via smartphone and/or YouTube videos to describe the visual surroundings.

Improvements and development will be limited to areas of disturbance. Hiking and equestrian trails will utilize semi-improved grassed roadways wherever possible. Future amenities may also include an ADA/adaptive archery range once partnerships have been secured. Free nature programming will be provided seasonally. Annual programming will be designed for wounded warriors, veterans, and people with unique abilities including autism, PTSD, and special needs to encourage experiencing therapy time with nature. Outside of nature programming, eco-cabins and camping will be open periodically free of charge to people with unique abilities.

Hampton Lane, Village of Key Biscayne FCT # 16-006-UA17

0.19 Acres

Project Cost \$ 2,090,000

Grant Award \$ 828,000

Local Match \$ 1,262,000

Hampton Lane Park is located in southern Miami-Dade County on the island that is home to the Village of Key Biscayne. The project site which is situated in an urbanized residential area is 0.19 acres in size. The Village of Key Biscayne is an island community located between Biscayne Bay and the Atlantic Ocean. The small community of 12,000 is primarily residential homes with hotels, shops and restaurants located along the main thoroughfare, Crandon Boulevard. Over the last several years the Village has made the acquisition of open space a top priority.

With limited land available, the Village has formed a Land Acquisition Advisory Committee that works with Village staff and the Village Council to identify and pursue the acquisition of property for park development. Further demonstrating the Village's commitment to providing needed open space, the recently completed Vision 2020 plan identified a major weakness for the community which is the lack of open space. The recommendation of the plan was to aggressively move forward with acquisition of small neighborhood parks to provide easy access for all users.

The proposed project was one of the few undeveloped lots available on the island. Located in a residential neighborhood the site is bordered on its southern and eastern boundary by single family homes and roadways to the north and south. An existing fence line separates the property from the residences and a sidewalk is present on the northern portion of the site. The sidewalk provides a connection to the Village's pathway system providing access to parks, schools, cultural facilities and the commercial corridor along Crandon Boulevard.

The Village has constructed a passive park on the project site. The park has been developed with a climbing mound, picnic facility, nature trail and bocce ball court. In addition, sidewalks will surround the site and provide pedestrian connections for users. An interpretive kiosk will also be installed educating visitors about the history of the site and the community.

Losner Park, City of Homestead FCT # 16-007-UA17

0.88 Acres

Project Cost \$ 830,453

Grant Award \$ 332,181

Local Match \$ 498,272

Losner Park is a 1-acre city park located in Homestead. The City of Homestead purchased an additional 4 acres adjacent to the park. The FCT grant helped purchase 0.88 acres of the 4-acre acquisition. The property will be incorporated into the existing Losner Park to create a unique urban park facility.

Incorporated in 1913, the City of Homestead is the second oldest city in Miami-Dade County. The City and its downtown core were developed along the rail line that would eventually be extended to the Florida Keys and Key West. Losner Park is the major open space for the City's historic downtown district. This is one of the City's most centrally located parks and is adjacent to the historic Seminole Theatre and recently constructed Homestead Police Station. Losner Park occupies approximately an acre of land within the built up commercial and residential district. The park provides a central gathering space for the community. An existing amphitheater provides a year-round facility for outdoor concerts and events for the whole community. The City of Homestead runs a series of programs within the park, including concerts, classes and events. However, the venue is limited due to its location and size. There are no restrooms within the park and parking at the site is limited to on-street parking within the downtown area.

The project site will also be a trailhead for the Biscayne Everglades Greenway Trail. The trail project is being completed with the help of several governmental agencies including Miami-Dade County and the National Park Service. A large portion of the project will be dedicated to increasing community awareness of the importance of protecting the environment. The Everglades wetland exhibit will include signage that educates visitors to the many aspects of the native eco-system including the importance of improving water quality impacted by human development. These important issues will also become part of the educational programming that will occur at the site. All these facilities will be accessible to users of all abilities.

The site will be developed with a fully accessible playground, a performance area, rock climbing wall, a trailhead structure, recreation trails, concessions and restroom building, along with support facilities such as benches and trash receptacles. A wooden boardwalk will be constructed within the Everglades exhibit being developed on the northern part of the site. The boardwalk will be fully accessible and allow users to make their way through a recreation of an Everglades wetland habitat. The element will also have interpretive

signage. The boardwalk will be an important part of the environmental education programming. Also, in an effort to promote alternative modes of transportation, the City will develop connections that will become part of the City's sidewalk and larger trail system through a connected bike path.

Myers Stickel Property, St. Lucie County FCT # 16-012-UA17

24.25 Acres

Project Cost \$ 458,322

Grant Award \$ 228,766

Local Match \$ 229,556

The Myers Stickel property is located within the North Fork St. Lucie Aquatic Preserve. The North Fork was designated in 1972 as an Aquatic Preserve and is part of the “Save Our Rivers” program. The river supports a variety of federally and state-protected species such as American alligators, manatees, river otters, nesting wood storks, little blue herons, brown pelicans, five species of snook, and opossum pipefish. Rare tropical peripheral fish species, such as gobies, sleepers, and pipefish, are also found in the upper reaches of the North Fork and the two headwaters, Five-mile and Ten-mile creeks. The river is an especially important habitat for the juvenile phases of commercially important species such as blue crab, snook, snapper, drum, and shrimp. The southern preserve boundary extends from Coconut Point in Stuart to Jenkins Point in Palm City just west of the Roosevelt Bridge in Martin County. The eastern and western boundaries encompass the state-owned sovereign submerged lands occurring below the mean high-water line to which the state holds title. The aquatic preserve is approximately 16 miles long through the natural riverbends. As a state aquatic preserve, the North Fork St. Lucie River is designated as an Outstanding Florida Water (pursuant to Chapter 62-302, F.A.C.).

The site will be open for public recreation and will include accessible amenities for people with unique abilities. Amenity highlights include ADA and wilderness hiking trails, a wildlife observation platform, ADA kayak launch/stop-over, nature playground, 20ft x 40ft “Chickee-style” outdoor classroom, ADA and wilderness boardwalks, bike rack, benches along the ADA trails, an ADA compliant parking area, educational kiosks and interpretive brochures. Trails will incorporate interpretive signs, kiosks with braille and QR codes for the visually impaired. QR codes will link visitors to auditory support via smartphones and/or YouTube videos to describe the site features. The ADA kayak launch will connect to the North Fork Paddle Trail.

Free nature programming will be provided seasonally, and programs will be developed for wounded warriors, PTSD victims, veterans, and youth with exceptional abilities including autism and special needs. Outside scheduled programming in the outdoor classroom will be used by local groups and the nature playground will provide a unique sensory experience to all youth that visit the site.

Ocean Hammock Park, City of St. Augustine Beach FCT # 16-014-UA17

10.61 Acres

Project Cost \$ 4,506,939

Grant Award \$ 1,500,000

Local Match \$ 3,006,939

Ocean Hammock Park comprises the last vacant ocean-front tract of land in St. Augustine Beach. It is located between the City's main street, A1A Beach Boulevard, and the beach. The park is bordered on its north and south sides by residential subdivisions, and across Beach Boulevard to the west by a small, 18-unit condominium and another residential subdivision.

Ocean Hammock Park is accessible by an existing sidewalk. This sidewalk runs north to south and provides access to the park for residents and visitors. The sidewalk is part of a City-wide network of sidewalk/bike paths that link various residential neighborhoods to the A1A Scenic and Historic Coastal Byway, the beach, Anastasia State Park to the north and other major recreation and park areas located in the City, such as the County Pier Park and Ron Parker Park. Additionally, the sidewalk is connected to the City of St. Augustine Beach's 1,600-foot-long raised dune walkover for direct access from the A1A Scenic and Historic Coastal Byway to the beach. The project site is on the "calm water" route for the Florida Circumnavigation Paddling Trail. The project site will provide restrooms, canoe/kayak storage facilities, and paddling trail information.

The project site is also located on the East Coast Greenway, an urban trail running from Calais, Maine to Key West, Florida. The project site is located on the East Coast Greenway Scenic Route in St. Johns County and provides one of the few areas of the East Coast Greenway where the beach route surface is firm and wide enough to support a safe and separated bike riding lane.

Recreational facilities to be developed include a children's playground, bike racks, canoe/kayak storage, picnic pavilion and grills, and a nature trail a quarter to half mile in length. The site will also include an education center, educational kiosk, wildlife observation deck, parking and restrooms.

Round Lake Park Addition, City of Oviedo

FCT # 16-008-UA17

0.50 Acres

Project Cost \$ 69,094

Grant Award \$ 51,091

Local Match \$ 18,003

The City of Oviedo is located in Seminole County and within the Metro-Orlando area. The City has seen a tremendous period of growth beginning in 1990 and continuing through 2016. The City is located directly on State Road 417 and is adjacent to the University of Central Florida. The City, with a population of over 35,000, has begun acquiring land to meet the needs of its growing population. As the size of the City grows, existing parks are in need of expansion and renovation. Round Lake Park is the latest recreational facility to be expanded.

Round Lake Park is located on State Road 419 and in the northern part of the City. The existing park is a multi-purpose recreational facility with both active and passive elements including water access. The site is located in a mixed-use area with both adjacent commercial and residential areas. The park is accessible by a major thoroughfare (SR 419) and by pedestrians and bicyclists by the Oviedo Trail System. The FCT project that the City has acquired sits directly on the Cross-Seminole Trail which is part of the Florida National Scenic Trail Corridor.

The project includes the acquisition of a parcel that added approximately 0.5 acres of the overall boundary of Round Lake Park. The site area is undeveloped and undisturbed and consists of upland forest, wetlands and grassy areas. Its location directly on Round Lake enhances public access to the waterbody. Completion of the trail facilities will enhance access to the Oviedo Trail System, Park to Park Connector and provide connection to the Cross-Seminole Trail.

Site development will include recreational trails, a fishing/observation platform, interpretive kiosks, a stormwater facility and several support facilities such as benches, tables and trash cans where needed. The fishing/observation platform will be ADA accessible by the trail and will be located directly on the lake to enhance the public access to the water. The trail will also be completely accessible to all users.

The acquisition of the project site is the last parcel needed to gain complete public access to Round Lake. The project will allow users to fully utilize the lake and associated recreational elements.

Upper Santa Fe River Corridor, The Alachua Conservation Trust FCT # 16-016-UA17

713.93 Acres

Project Cost \$ 2,416,870

Grant Award \$ 1,010,000

Local Match \$ 1,406,870

The Upper Santa Fe River Corridor project is located in northern Alachua County on the Santa Fe River and lies approximately two miles south of the town of Worthington Springs on State Road 121. The property will be owned and managed by Alachua Conservation Trust, a local land trust located in Gainesville. This project will be managed together with 186 acres previously acquired in 2012 and 2013 as the Santa Fe River Preserve. The mission of Alachua Conservation Trust (ACT) is to protect the natural, historic, scenic, and recreational resources in and around Alachua County.

The Upper Santa Fe River Corridor project is part of a much larger effort to protect the entire Santa Fe River and keep it a complete and viable conservation corridor. Protecting the Santa Fe River has been a top priority for government agencies and nonprofit organizations for decades, and today, due to efforts by the Suwannee River Water Management District and Alachua County, nearly half of the river's length is in conservation on one or both sides. The Upper Santa Fe River Corridor project acquires lands with both outstanding environmental and recreational resources that are valuable to the local and regional communities.

This project will protect 3.6 miles of scenic banks of the Santa Fe River in Alachua County, a DEP designated Outstanding Florida Waterway. It falls within a relatively undeveloped but unprotected thirty-mile corridor of natural habitat between the headwaters of the Santa Fe River and O'Leno State Park, twelve miles downstream. Much of the upper reaches of the Santa Fe River receives water in the form of surface runoff from pine flatwoods and wetlands.

This hydrological pattern produces a tannin-rich blackwater stream – a natural community important to specialized species of mussels and fish not found in most other rivers and streams in Florida. It is an ecosystem dependent upon very clean water free from dissolved minerals found in seepage, spring-fed streams, and disturbance from development. The recreational opportunities on the Santa Fe River Preserve will be of great value to the community.

Within the project site, 5.5 miles of trails are planned for hiking and off-road cycling and include 1.25 miles that provide access to wheelchairs. The trails will wind through sandhill, mixed hardwood forest, and bottomland hardwood forest. It will be a beautiful place to hike, bike, ride horses, or just relax by the river. Other amenities to be developed are a wildlife viewing platform/scenic overlook, picnic pavilion, canoe launch area and geo-caching stations. Protecting the project site will prevent future land use conflicts that could adversely affect water quality and will further a shared vision to keep this watershed wild and scenic.

West Lake Wetlands, City of Clermont FCT # 16-005-UA17

2.32 Acres

Project Cost \$ 268,960

Grant Award \$ 161,376

Local Match \$ 107,584

The West Lake Wetlands project represents a multi-parcel acquisition located in downtown Clermont along Lake Minneola. The City acquired two parcels that will further its adopted Downtown Waterfront Master Plan.

The parcels represent 2.3 acres of important open space that will enhance public access to the water, urban recreational opportunities and further the City's redevelopment efforts in the downtown area. The FCT acquisition sites are part of the larger effort to further develop the public waterfront recreation corridor along Lake Minneola. The corridor runs along the lakefront and provides permanent public access for all users.

The first parcel, known as the CSX parcel, is an irregular shaped, 1.48± acre site located on the north side of West Osceola Street, east of 8th Street in Clermont, Florida. The site includes a portion of the South Lake Trail and is adjacent to Lake Minneola, an Outstanding Florida Water. This project is known as "Meet in Middle" referring to its location at virtually the middle C2C Trail and the middle of downtown Clermont.

The second site, known as the Sutton parcel, is a .88-acre site located on the south side of Victory Way, and north of Minneola Avenue. This site was undeveloped at the time of acquisition but has now been developed as part of the multi-million-dollar Victory Pointe project. The project site is an important part of the unique stormwater park that will increase recreational opportunities while providing significant drainage and water quality enhancements for the downtown area. The South Lake Trail will also run through portions of the site.

The project consists of a nature/observation boardwalk, hiking trails, picnic facilities, beach access and canoe/kayak facilities. Both parcels will also include the installation of educational kiosk and support facilities such as benches, sidewalks, water fountains and native vegetation. The eastern parcel will be part of a stormwater feature that uses retention and filter marsh with native vegetation to treat surface water before it enters the lake.

The recreational trails, boardwalks and picnic facilities are fully accessible and meet ADA standards. This universal access will further all users' access to destinations along the regional South Lake Trail and access all the facilities within the Clermont waterfront corridor. Many of the elements will include dedicated design features for disabled users such as boardwalks with segments of lower railing to allow for wheelchair users to view the natural environment. In addition, the education facilities and signage as well as the event space will all be designed to be accessible by all.

ACQUIRED PROJECTS: 1991-2019

SUMMARY OF FINANCIAL ACTIVITIES

Florida Communities Trust

FLORIDA COMMUNITIES TRUST FLORIDA FOREVER PROGRAM FIXED CAPITAL OUTLAY BUDGET

06/30/2018 YEAR END BALANCE	\$ 14,940,746.08
<u>FY 2018-2019 Appropriations:</u>	
FY18/19 Parks and Open Space	\$ 10,000,000.00
FY18/19 Stan Mayfield Working Waterfronts	\$ 2,000,000.00
Total Appropriation, including fiscal year-end balance	\$ 26,940,746.08
<u>Expenditures During FY 2018-2019</u>	
Expenditures for Land Acquisition Activities (Parks and Open Space)	\$ (8,746,339.46)
Expenditures for Land Acquisition Activities (Stan Mayfield Working Waterfronts)	\$ (550.00)
LESS 2018-2019 EXPENDITURES	\$ (8,746,889.46)
6/30/2019 YEAR END BALANCE	\$ 18,193,856.62

FLORIDA COMMUNITIES TRUST PROGRAM (FCT) OPERATING BUDGET

FCT was funded from the Land and Recreation Program within DEP.

Total Cost of FCT Operations during FY18/19

Salaries and Benefits	\$ 321,609.08
Other Personal Services/Contracted Services (temporary staff/services)	\$ 39,088.18
Expenses	\$ 11,960.32
**Indirect Costs	\$ 147,747.21
TOTAL	\$ 520,404.79

** The Indirect Cost amount is calculated by taking FCT's total salaries and benefits multiplied by the indirect cost rate (45.94%) assigned to Land and Recreation for FY18/19. This calculation provides an estimate of the indirect costs (overhead, administrative costs) associated with the program.

FLORIDA COMMUNITIES TRUST BOARD MEMBERS

Barbara Goodman

Barbara Goodman, Deputy Secretary for Land and Recreation, has an extensive leadership career with national and international park agencies. Prior to coming to the Department of Environmental Protection, she served as an international consultant for park planning and tourism in Colombia and Peru.

She also served on the Board of Directors of the Timucuan Trail Parks Foundation, including two years as chair. The nonprofit organization supports city, state and national parks in the Jacksonville area.

Goodman is a 33-year veteran of the U.S. National Park Service, where, among other duties, she managed two national parks and ensured tourism development and resource protection through partnerships.

Lynda Bell

Lynda Bell served on the Miami-Dade County Commission from 2010-2014 where she was the Vice Chair from 2012-2014. She has chaired the Finance Committee, the Value Adjustment Board, the Sports Commission and the Port of Miami Committee. Lynda was also active on both Florida Association of Counties and National Association of Counties.

Prior to serving on the County Commission, Lynda served as a Councilwoman, Vice Mayor and the first and only female Mayor of the City of Homestead. She has been recognized for her many accomplishments, including the “In the Company of Women” award in the governmental category. She received the “I am Blessed” award, was recognized by the Association of Public Administrators with the “Woman of Distinction” award, won the Chamber of Commerce “Athena” award, and was given the Miami-Dade Farm Bureau Advocacy award.

Serving FCT as the Former Elected Official of a County Government, Lynda earned a Bachelor of Science degree in Supervision and Management from Miami-Dade College School of Business and has been married to Mark Bell for 34 years. They have three daughters and 12 grandchildren. After residing in Homestead for more than 39 years, they have recently relocated to the Lake Talquin area in Gadsden County.

VACANT

Former Elected Official of a Metropolitan Municipal Government

Greg Jones

Gregory Jones has over 19 years of experience in resort development and management in the State of Florida. He is currently the Senior Project Manager for WCI Communities Inc., a Lennar Company. During the last decade, he has been actively involved in developing a balance between sustainable growth in his community while establishing a healthy environment to ensure a long-term habitat plan for the endangered Perdido Key Beach Mouse. In addition, Gregory has been an active participant of local community efforts by currently residing on the Tourism Development Council and West

End Advisory Boards for Escambia County in addition to serving as a current board member on six community residential boards. Gregory serves on the FCT Board as Representative of the Development Industry.

Erick Lindblad

Erick Lindblad has served as the Executive Director of the Sanibel-Captiva Conservation Foundation (SCCF) since 1986. He has been instrumental in SCCF's acquisition of over 2,000 acres of Wildlife Preserve areas on and around Sanibel and Captiva. In 2002, he oversaw the establishment of SCCF's Marine Laboratory.

Erick has coordinated and actively participated in land management activities including invasive non-native plant control, prescribed burning (Division of Forestry Burn Manager Certification), gopher tortoise management and surface water management projects. Land acquisition has been accomplished by a variety of means, including fee simple, bargain sale, development agreement and donation.

As part of his commitment to the sustainable development of Southwest Florida, Erick served on Conservation 20/20, Lee County's Conservation Land Acquisition and Stewardship Advisory Council and the Land Management Subcommittee. He also was appointed by the Lee County Board of County Commissioners to serve as the county's representative on the first Babcock Ranch Inc. Board, which worked to develop the initial management plan for the state's 71,000-acre Babcock Ranch Preserve in Lee and Charlotte Counties.

He served on the Board of the International Osprey Foundation, the Caloosahatchee River Citizens Association and the Charlotte Harbor National Estuary Program Technical Advisory Committee.

Erick has served on various City of Sanibel committees over the years including the Budget Review Committee, Wildlife Committee, Interior Wetlands Study Committee, and the Algae Task force. He was awarded the Walter Klie Lifetime Achievement Award from the Sanibel-Captiva Islands Chamber of Commerce and Citizen of the Year by The Committee of the Islands. In 2014 SCCF was awarded Florida Conservation Organization of the Year by the Florida Wildlife Federation.

Prior to his tenure at SCCF, he served as Director of Newfound Harbor Marine Institute at Seacamp on Big Pine Key, FL from 1979 to 1986. He graduated in 1974 from Millikin University in Illinois with a B.A. in Biology.

He and his wife Ellen have two children and 5 grandsons.

CONCLUSION

Florida Communities Trust will continue working with Florida's communities to strengthen relationships, encourage appropriate land management practices and assure all community responsibilities are met at each FCT funded project site, helping to preserve more land for Florida's future parks, open spaces and working waterfronts.
