The Honorable Jose Oliva, Speaker
Florida House of Representatives
Room 420, The Capitol
402 South Monroe Street
Tallahassee, Florida 32399-1300

Dear Governor DeSantis, President Galvano, and Speaker Oliva:

I am pleased to submit the Annual Report on the Brownfields Redevelopment Act, as required by Section 376.85, Florida Statutes.

The Florida Brownfields Program facilitates redevelopment of properties and job creation within designated brownfield areas by providing incentives for voluntary environmental cleanup and protection of public health. The enclosed report is submitted each year to describe the Florida Department of Environmental Protection's (DEP) progress and level of activity in implementing the Florida Brownfields Redevelopment Act, established in 1997.

Highlights to date include the following:

- Since 1997, 15,418 confirmed net new direct jobs can be attributed to the program.
- Thirteen brownfield sites completed cleanup in 2019 and 10 brownfield sites have completed cleanup in the first six months of 2020. On average, since 1997, approximately seven brownfield sites complete cleanup each calendar year. One

hundred and fifty-six brownfield sites have completed cleanup since the inception of the program.

- There are 509 designated Brownfield Areas statewide and as of June 30, 2020, there are 387 executed Brownfield Site Rehabilitation Agreements (BSRAs).
- DEP received 149 Voluntary Cleanup Tax Credit (VCTC) applications for 2019 calendar year expenses, and the approved tax credits totaled \$12.5 million. Of this total, \$12.2 million—approximately 97 percent—was allocated for tax credits for 138 brownfield sites.
- In calendar year 2019, 1,389 projected new direct jobs, 4,332 projected new indirect jobs and more than \$527.2 million in projected new capital investment were attributable to the program.

If you have questions regarding this report, please contact me or Tim Bahr, Director of DEP's Division of Waste Management, at (850) 245-8790 or Tim.Bahr@FloridaDEP.gov.

Sincerely,

Noah Valenstein
Secretary

Enclosure

FLORIDA BROWNFIELDS REDEVELOPMENT PROGRAM

Wisdom Village Crossing
Fort Lauderdale, Broward County

Annual Report
August 2020

FLORIDA
BROWNFIELDS
REDEVELOPMENT
PROGRAM

ANNUAL REPORT
August 2020

On the cover:

Wisdom Village Crossing. Fort Lauderdale, Broward County. Originally a warehouse and storage yard, arsenic was identified in site soils and groundwater above applicable cleanup target levels. After conducting a source removal of the impacted soils and performing over a year of groundwater monitoring, a No Further Action with Conditions Proposal has been approved, and a Declaration of Restrictive Covenant was drafted to enact groundwater use restrictions on the property. A Conditional Site Rehabilitation Completion Order was issued on November 26, 2019. Through the Voluntary Cleanup Tax Credit Program, \$68,254 in corporate income tax credit associated with site cleanup work has been granted. Construction of the Green-certified, 9-story, 105-unit affordable housing complex is complete; it also contains a business center, clubhouse, fitness center, and laundry facility. Wisdom Village Crossing is a recipient of the 2018 City of Fort Lauderdale Community Appearance Award.

EXECUTIVE SUMMARY

In accordance with Florida’s Brownfields Redevelopment Act, a “brownfield site” is real property, the expansion, redevelopment, or reuse of which may be complicated by actual or perceived environmental contamination. The Florida Department of Environmental Protection’s (DEP) Brownfields Redevelopment Program (Program), established in 1997, empowers communities, local governments, and other stakeholders to work together to assess, clean up, and reuse brownfields.

The two primary goals of the Program are contaminated site cleanup and economic redevelopment. Since inception of the Program in 1997, 156 contaminated sites have been cleaned up, approximately 70,700 confirmed and projected direct and indirect jobs have been created, and \$3.358 billion in capital investment is projected in designated Brownfield Areas.

Site Rehabilitation Completion Orders	
Calendar Year 2019	13
Calendar Year 2020 (to 6/30/20)	10
Voluntary Cleanup Tax Credits for Brownfield Sites	
Calendar Year 2019	\$12,525,086
Projected Capital Investment	
Calendar Year 2019	\$527,211,002
Calendar Year 2020 (to 6/30/20)	\$0
Projected New Direct and Indirect Jobs	
Calendar Year 2019	1,389
Calendar Year 2020 (to 6/30/20)	0

Highlights and milestones for all of calendar year 2019, and the first six months of calendar year 2020 include:

- ◆ **Brownfield Areas:** Twenty municipalities and county governments approved local resolutions that designated 24 additional Brownfield Areas in 2019, and four municipalities and county governments approved five additional Brownfield Areas in the first six months of 2020. The total number of Brownfield Areas in Florida has reached 509.
- ◆ **Brownfield Site Rehabilitation Agreements:** Thirty-six Brownfield Site Rehabilitation Agreements (BSRAs) were executed in 2019 and two BSRAs were executed in the first half of 2020, bringing the total number executed since Program inception to 387.
- ◆ **Site Rehabilitation Completion Orders:** A total of 13 Site Rehabilitation Completion Orders (SRCOs) were issued in 2019 with six being Conditional SRCOs (CSRCOs) and seven being unconditional SRCOs. Ten SRCOs have been issued during the first six months of 2020. The SRCOs were issued for sites that completed cleanup of property to standards protective of human health and the environment. As stated earlier, since the inception of the Program in 1997, the total number of SRCOs issued to date is 156, with 75 being issued as CSRCOs and 81 being unconditional SRCOs.
- ◆ **Voluntary Cleanup Tax Credits (VCTC):** DEP received 149 tax credit applications for 2019 calendar year expenses, and the approved tax credits totaled \$12.5 million. Of this

total, \$12.2 million, approximately 97 percent, was allocated for tax credits for site rehabilitation work completed at 138 brownfield sites. Between 2008 and 2013, the approved tax credits had exceeded the available authorization. The Legislature increased the annual tax credit authorization from the initial amount of \$2 million to \$5 million in 2011, and then to \$10 million in 2017. Additionally, there have been multiple one-time, supplemental authorizations to address the growing backlog of approved tax credits.

◆ **New Jobs:** From January 1 through December 31, 2019, 1,389 projected new direct jobs, 4,332 projected new indirect jobs, and more than \$527.2 million in projected new capital investment were attributable to the Program. To date in calendar year 2020, likely due to the global COVID-19 pandemic, no new projected direct jobs, projected indirect jobs, or projected capital investment are attributable to the Program. Between 1997 and end of calendar year 2018, more than \$362 million in confirmed investment and 15,418 confirmed net new direct jobs can be attributed to the Program.¹

¹ Data provided by the Florida Department of Economic Opportunity, Division of Strategic Business Development, July 15, 2020.

INTRODUCTION AND HISTORY

Many areas in Florida contain sites with actual or perceived environmental contamination that may present a significant barrier to redevelopment. The Florida Brownfields Redevelopment Act (Act), Sections 376.77 - 376.86, Florida Statutes, was adopted by the Florida Legislature in 1997 to provide incentives for local governments and individuals to voluntarily clean up and redevelop brownfield sites. Participation in the Program results in environmental cleanup, protection of public health, reuse of infrastructure, and job creation.

Florida Brownfields Redevelopment Program Objectives

- ◆ Site rehabilitation
- ◆ Job creation
- ◆ Increased capital investment
- ◆ Broadened tax base by raising property values
- ◆ Better utilization of existing infrastructure and community resources
- ◆ Improvements in quality of life and the environment

Local governments play a key role in the Program by designating Brownfield Areas by resolution. Upon designation, owners and/or responsible parties of properties within a Brownfield Area may seek eligibility for the various financial and regulatory incentives when entering into a BSRA. These financial and regulatory incentives enable local governments and state agencies to partner with the private sector to rehabilitate contaminated properties, create jobs, and promote sustainable reuse of properties within designated Brownfield Areas.

- ◆ A **Brownfield Area** is defined by statute as “...a contiguous area of one or more brownfield sites, some of which may not be contaminated, and which has been designated by a local government by resolution.”
- ◆ A **Brownfield Site** is defined by statute as “...real property, the expansion, redevelopment, or reuse of which may be complicated by actual or perceived environmental contamination.”

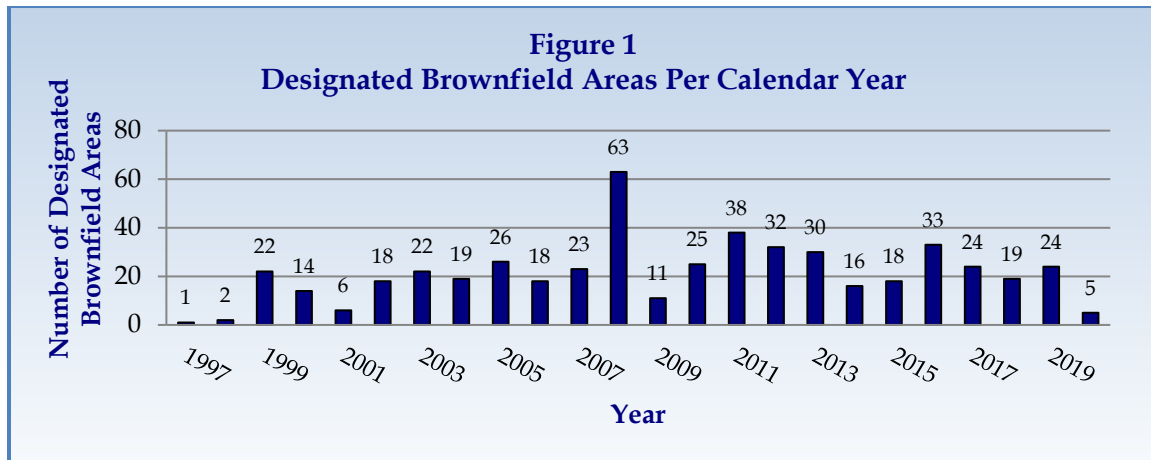

Since passage of the Act, DEP has provided education and outreach to a variety of interest groups, including communities, environmental consultants, lenders, local governments, economic redevelopment boards, community redevelopment agencies, attorneys, and real estate professionals. DEP has also provided technical assistance and streamlined regulatory services to Program participants.

Data presented in this report were collected through June 30, 2020, the end of the state fiscal year. Because most of the data for brownfields and brownfields-related programs (i.e., VCTC and the brownfields redevelopment bonus) is collected on a calendar year basis, the information herein is presented for calendar year 2019 and for calendar year 2020 to date (i.e., through June 30, 2020).

BROWNFIELDS REDEVELOPMENT PROGRAM STATUS

Florida Designated Brownfield Areas

Local governments continue to support the use of the tools and incentives provided by the Program by designating Brownfield Areas for cleanup and revitalization. Upon designation, properties within a Brownfield Area have met the first requirement for participation in the Program. These properties may participate in stand-alone economic incentives such as the State Loan Guarantee program or participate in other economic incentives that are linked to a BSRA, including the Job Bonus Tax Refund or refunds on Sales and Use Tax paid on the purchase of building materials used in a mixed-use project or housing project.² If contamination is known or suspected, the local government may designate an area and identify the *person responsible for brownfield site rehabilitation* (PRFBSR). This entitles the identified person to negotiate a BSRA with DEP.

Note: Data for 2020 represents the period from January 1 through June 30, 2020.

In 2019, 20 local governments reported approval of resolutions designating 24 Brownfield Areas. During the first half of 2020, four local governments have designated five Brownfield Areas. Since the Program’s inception, Florida has amassed 509 designated Brownfield Areas in 152 communities across the state, averaging 22 newly designated Brownfield Areas each year (Figure 1). The 509 locally designated Brownfield Areas encompass approximately 287,808 acres representing a combination of contaminated and uncontaminated properties, including residential and viable business properties. **Appendix A** contains a table titled “Brownfield Areas” that lists the name, location, approximate size (acreage), and the ‘resolution date’ of each Brownfield Area in the state. The resolution date is the date upon which the local government with jurisdiction over the area adopted its resolution designating the Brownfield Area pursuant to Section 376.80, Florida Statutes.

²Florida Department of Revenue Tax Tip Sheet TIP #13A01-10, issued June 20, 2013, at https://revenue.law.floridarevenue.com/LawLibrary/Documents/2013/07/TIP-117716_TIP%2013A01-10%20Sales%20Tax%20Refund%20for%20Building%20Materials%20-%20TIP%20FINAL.pdf

Brownfield Site Rehabilitation Agreements

Once a local government designates a Brownfield Area and a PRFBSR is identified, this entity may voluntarily execute a BSRA with DEP. The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP’s Contaminated Site Cleanup Criteria rule.³ In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed-upon schedule. Through June 30, 2020, voluntary responsible parties have executed 387 agreements with DEP since inception of the Program in 1997. Thirty-six BSRAs were executed in 2019 while two have been executed so far in 2020 (Figure 2).

Note: Data for 2020 is compiled from January 1 through June 30, 2020. Historically, the majority of BSRAs are executed during the final quarter of each calendar year.

Site Rehabilitation Completion Orders Issued

SRCOs are issued for sites that have completed cleanup of property to standards protective of human health and the environment and for which no further action (NFA) is required at that time. In 2019, 13 SRCOs were issued for brownfield sites across the state. During the first half of 2020, 10 SRCOs have been issued (Figure 3), bringing the total number of SRCOs issued since 1997 to 156.

Note: Data for 2020 is compiled from January 1 through June 30, 2020.

³ Chapter 62-780, Florida Administrative Code

Appendix B contains a table titled “Sites with Executed BSRAs” that provides the name, location, and approximate size of each brownfield site in the state with an executed BSRA. The table includes a completion date for sites that have received an unconditional SRCO or a CSRCO. A CSRCO is issued when DEP has approved *alternate cleanup target levels* (ACTLs) that are protective of human health, public safety, and the environment, for a site and/or the voluntary responsible party has agreed to use institutional controls and, if appropriate, engineering controls to eliminate exposure to contaminants.

Status of State Financial Incentives

◆ **Voluntary Cleanup Tax Credit**

In 1998, the Florida Legislature established the VCTC Program to provide an incentive for the voluntary cleanup of drycleaning solvent-contaminated sites and brownfield sites in designated Brownfield Areas (Section 376.30781, Florida Statutes). Only those brownfield sites with an executed BSRA are eligible to apply for a VCTC incentive pursuant to Section 376.30781, Florida Statutes.

At these eligible sites, a tax credit of 50 percent is allowed for the cost of voluntary cleanup activity that is integral to site rehabilitation, with a maximum of \$500,000 per site per year. Additionally, at brownfield sites with executed BSRAs in designated Brownfield Areas, a one-time 50 percent tax credit is allowed for solid waste removal, with a maximum of \$500,000 per site. Tax credits may be applied to state corporate income tax and are eligible for a one-time transfer within a five-year period. The VCTC Program has approved approximately \$120.7 million in tax credits since it began more than 20 years ago.

Note: Effective July 1, 2011, the annual authorization was increased from \$2 million to \$5 million. Effective July 1, 2015, the annual authorization was increased to \$21.6 million for one year. This amount satisfied all approved VCTCs (the current backlog as well as the VCTC applications that were approved for 2014 expenditures). On July 1, 2016, the annual VCTC authorization reverted to \$5 million and remained at that level through the year. Effective July 1, 2017, the annual authorization was increased to \$10 million. Another one-time increase (of \$8.5 million) was authorized to address the growing backlog, effective July 1, 2018.

The Brownfields and VCTC Programs have been successful in promoting and realizing the cleanup and redevelopment of contaminated, underutilized properties throughout Florida. As a result, between 2008 and 2013, the approved tax credits had exceeded the available authorization (as shown on Figure 4). The Legislature increased the annual tax credit authorization from the initial amount of \$2 million to \$5 million in 2011, and then again to \$10 million in 2017. Additionally, there have been multiple one-time, supplemental authorizations to address the growing backlog of approved tax credits.

As of July 1, 2019, there were approximately \$18.2 million in approved tax credits; after the authorization was used to issue certificates, approximately \$8.2 million was carried over as the backlog. DEP received 149 VCTC applications for 2019 calendar year expenses, and the approved tax credits totaled \$12.5 million. Of this total, \$12.2 million—approximately 97 percent—was allocated for tax credits for 138 brownfield sites.

◆ **Other State Financial Incentives – DEO and EFI**

The Act also provides other financial and economic incentives administered by the Florida Department of Economic Opportunity (DEO), which include the Brownfields Redevelopment Job Bonus Tax Refund (in conjunction with Enterprise Florida, Inc. [EFI]) and a State Loan Guarantee.

For the Brownfields Redevelopment Job Bonus Tax Refund, DEO enters into incentive agreements with eligible entities that plan to create new jobs in Florida Brownfield Areas, following their application submittal to EFI. As a result of the passage of Senate Bill 406 (Chapter No. 2013-42, Laws of Florida), effective July 1, 2013, in order to be eligible to participate in the Job Bonus Tax Refund, an entity must be creating jobs on a property that is subject to a BSRA or on a property that abuts a property that is subject to a BSRA. A certified business may be eligible to receive up to \$2,500 in tax refunds for each new job created. To qualify, the business must be a Qualified Target Industry (QTI) business as defined in Section 288.106, Florida Statutes, or make an eligible capital investment of at least \$2 million, create at least 10 jobs, and provide benefits to its employees. The term of an incentive agreement is typically four or five years, with job creation or maintenance requirements in each year of the agreement. Payment of eligible tax refunds are subject to the satisfaction of the requirements set forth in the agreement.

For this report, DEO has provided projections for job creation and capital investment associated with current agreements. In addition, DEO has provided confirmed data for job creation and capital investment for projects with an executed agreement for the Brownfields Redevelopment Job Bonus Tax Refund program and the QTI with Brownfield Bonus Tax Refund program since the inception of the Program (Table 1).

Table 1					
Brownfields Redevelopment Job Bonus Tax Refund					
Period	New Direct Jobs Projected	Indirect Jobs Projected	Investment Projected	Confirmed Net New Direct Jobs	Investment Confirmed to Date
January 1, 2019 - December 31, 2019	1,389	4,332	\$527,211,002		
January 1, 2020 - June 30, 2020	0	0	\$0		
1997 - June 30, 2020	25,462	45,239	\$3,358,678,575		
1997 - December 31, 2018**				15,418	\$362,247,614

*Note: **Claims for job bonus tax refunds are submitted in January following the year the jobs were created. Claims for 2019 jobs were received in January 2020 and are currently being evaluated and confirmed. Therefore, the most recent confirmed jobs data is for the period ending December 31, 2018.*

The Brownfields Area Loan Guarantee Council, established in Section 376.86, Florida Statutes, has approved two loan guarantees since the inception of the Program. Pursuant to Section 376.86, Florida Statutes, the state may have up to \$5 million of loan guarantees in place at a time, 15% of which are reserved for loans approved for predominately minority-owned businesses. The full \$5 million became available for other guarantees on July 1, 2012 and is currently available. These guarantees are available to primary lenders, up to 50% of the primary lender’s loan on all brownfield sites, and up to 75% of the primary lender’s loan if the property is redeveloped as affordable housing, a health care facility, or health care provider.

◆ Other State Financial Incentives -- DOR

The Florida Department of Revenue (DOR) offers a refund on sales and use tax paid on building materials used in the construction of a qualified home, affordable housing, or mixed-use affordable housing projects built on or abutting a site with a BSRA. Interested parties must complete an Application for Refund – Sales and Use Tax (Form DR-26S), along with the Florida Neighborhood Revitalization Program Application for Sales and Use Tax (Form DR-26RP). These forms, along with any required attachments, must be filed within six months after the date the local building inspector determines the qualified home, housing, or mixed-use project is substantially completed.

DEP’s Brownfields Redevelopment Program website (<https://floridadep.gov/waste/waste-cleanup/content/brownfields-program>) provides the latest Program-specific information and links to websites for DEO, EFI, DOR, local governments, the U.S. Environmental Protection Agency’s (EPA’s) Brownfields Program, and other federal agencies involved in partnering for the redevelopment of brownfields.

EPA Memorandum of Agreement

The current Memorandum of Agreement (MOA) between DEP and EPA specifies the criteria under which EPA will forego its oversight of cleanups in Florida was amended and executed on November 28, 2005. Florida is one of 25 states with an existing MOA with EPA. Through the MOA, certain sites subject to Corrective Action under federal Comprehensive Environmental Response Compensation and Liability Act (CERCLA) and Resource Conservation and Recovery Act (RCRA) authority are eligible for state brownfields incentives.

Additionally, to be eligible to receive CERCLA Section 128(a) grant funding authorized by the federal Small Business Liability Relief and Brownfields Revitalization Act of 2002, a state must be a party to a voluntary response program with EPA or demonstrate that its response program includes, or is taking steps to include, the elements of a response program. Florida receives Section 128(a) funding under the State and Tribal Response Program (SRP) Grant. In 2019, DEP received \$657,000 in SRP grant funding from EPA.

Florida's Brownfields Staff

◆ DEP Tallahassee & Six DEP Districts

The Brownfields Redevelopment Program is managed by key staff within DEP's Brownfields & CERCLA Site Screening Section—a subsection of the Division of Waste Management in Tallahassee—who work very closely with the Brownfield Coordinators in the six DEP Districts across the State as well as the three Delegated Local Programs. Funding for the administration of the Program by Tallahassee staff is provided by the annual CERCLA 128(a) SRP Grant. DEP Tallahassee and DEP District Brownfields staff contact information is provided at: <https://floridadep.gov/waste/waste-cleanup/content/state-florida-agency-and-department-brownfields-contacts>.

◆ Delegated Local Brownfield Programs

Three county governments—Broward, Hillsborough, and Miami-Dade—have received delegation from DEP to administer the Brownfields Redevelopment Program locally. The original delegation agreements with Broward and Miami-Dade counties were signed in 2000, renewed in 2010, and renewed again in 2020. The agreement with Hillsborough County was signed in 2004, renewed in 2012, and renewed again in 2020, to allow for the same timeline as Broward and Miami-Dade counties going forward. Delegated county staff contact information is provided at: <https://floridadep.gov/waste/district-business-support/content/florida-brownfields-redevelopment-program-contacts-delegated>.

The success of the Brownfields Redevelopment Program is directly attributable to the contributions by the six (6) DEP Districts (Northwest, Northeast, Central, Southwest, Southeast and South) and the three (3) Delegated Local Programs. DEP appreciates the continued support and important work they provide.

Public Outreach and Education

As an ongoing responsibility of the Program, DEP Tallahassee and District staff participates in frequent outreach and educational speaking engagements with various city and county organizations, trade shows, and industry groups, in addition to the annual conferences and workshop. The 3rd Annual Florida Brownfields Association (FBA) Environmental Justice Workshop was held August 5 and 6, 2019, and the 22nd Annual Florida Brownfields Conference, this year doubling as the 2019 Southeast Regional Brownfields Conference, was held October 27 through 30, 2019. The FBA Annual Executive Planning Session was held on February 11, 2020. Outreach highlights are below:

◆ 3rd Annual Environmental Justice Workshop, August 2019

The 3rd Annual FBA Environmental Justice Workshop – entitled “Ensuring Environmental Justice and Equitable Development in an Opportunity Zone” – was held on August 5 and 6, 2019, in DeLand. Approximately 75 participants joined state and

federal experts to learn about Environmental Justice in communities and Opportunity Zones and the benefits of Florida’s Brownfield Redevelopment Program. There was a keynote speech given by Dr. Sacoby Wilson from the University of Maryland Institute for Applied Environmental Health titled “Environmental Justice is for Everyone”, as well as additional presentations covering topics of Opportunity Zones around Florida and what other states are doing with their Opportunity Zones, Health Impact Assessments, Environmental Health and Safety Jobs, and Environmental Justice for all given by EPA Region 4, Environmental Consultants, the Florida Housing Coalition, professors and directors from around the state.

◆ **22nd Annual Florida Brownfields Conference, October 2019**

The 22nd Annual FBA Florida Brownfields Conference, this year doubling as the 2019 Regional Southeast Brownfields Conference – entitled “The Universe of Revitalization” – was held from October 27 through 30, 2019, in Orlando. Approximately 250 participants from regional government and engineering and environmental consulting firms joined state and federal experts to learn about the benefits of brownfields redevelopment as well as available assistance. Networking activities and exhibitor set-up and registration occurred on Sunday, October 27. The conference began on October 28 with welcoming keynote addresses Jerry Demings, Orange County Mayor, and Christopher Emmanuel, Florida Chamber of Commerce. Presentations were divided into plenary sessions and three separate tracks titled “Lessons Learned, Success, and Lifecycle,” “Funding and Incentives,” and “Environmental Justice” each day. On October 28, the luncheon keynote was given by Mary Walker, EPA Regional Administrator, and Jose Gonzalez, Florida East Coast Industries, and on October 29, the luncheon keynote was given by David Lloyd, EPA Director of the Office of Brownfields and Land Revitalization, and Adam Rosenfelt and Maureen Meulen, Atomic Entertainment. Some of the highlights of the conference presentations and panel discussions included: 40 years of progress, the lifecycle of the voluntary cleanup tax credit, a developer’s perspective on brownfields redevelopment, environmental justice gone wrong, and redevelopment case studies.

◆ **FBA Annual Strategic Planning Session, February 2020**

DEP’s management and Brownfields and VCTC staff were invited to participate in the FBA’s Annual Strategic Planning Session on February 11, 2020, as part of the day and a half of scheduled activities and speakers. Teresa Boeshaghi (Waste Management Division Assistant Director), Jennifer Farrell (Waste Cleanup Program Administrator), Kelly Crain (Brownfields Program Manager), Scott Sweeney (VCTC Program Manager), and Ronni Moore (Office of General Counsel) discussed questions from the audience.

As a means of facilitating public outreach and education, DEP’s Brownfields Redevelopment Program website is kept up to date with the latest Program-specific information. Not only providing links to our partners, the website also contains map images of all designated Brownfield Areas and copies of local government resolutions and executed BSRAs. Program-specific information can also be found using DEP’s CLM website (<http://prodenv.dep.state.fl.us/DepClnup/welcome.do>) and Map Direct website

(<https://ca.dep.state.fl.us/mapdirect/>). These tools allow users to locate all sites that are currently under DEP's cleanup oversight, and the CLM website enables users to subscribe to an online service that provides updates on cleanup milestones.

FEDERAL BROWNFIELDS UPDATE

Small Business Liability Relief and Brownfields Revitalization Act of 2002 & The BUILD Act of 2018

Policies that EPA developed during the 1990s were incorporated into law through passage of the Small Business Liability Relief and Brownfields Revitalization Act, 2002. The brownfields law expanded EPA's assistance to the public and private sectors by providing new tools for promoting sustainable cleanup and reuse. The Brownfields Utilization, Investment and Local Development (BUILD) Act was enacted on March 23, 2018, as part of the Consolidated Appropriations Act, 2018. The BUILD Act reauthorized EPA's Brownfields Program and made amendments to the 2002 Small Business Liability Relief and Brownfields Revitalization Act. Authorized changes affect brownfields grants, ownership and liability provisions, and state and tribal response programs. EPA began implementing the BUILD Act in 2018 and have now incorporated nearly all of the BUILD Act provisions into current policies.

Brownfields grants continue to serve as the foundation of EPA's Brownfields Program. The following grants support revitalization efforts by providing seed money for environmental assessment, cleanup, and job training:

- ◆ Site-Specific Assessment Grants provide funding for brownfield inventories, planning, environmental assessments (hazardous and/or petroleum), and community outreach at one specific site. Grant amounts can range up to \$200,000 but, with a waiver, may be as much as \$350,000. Site-Specific Assessment Grant applicants may also apply for Community-Wide Assessment Grants; however, they may not apply as a member of a Coalition.
- ◆ Community-Wide Assessment Grants provide funding for the same activities as the Site-Specific Assessment Grants but for a designated target area consisting of multiple brownfield sites. These grants are up to \$200,000 for hazardous substances OR \$200,000 for petroleum, and up to \$300,000 for hazardous and petroleum contaminants (where the total amount of either hazardous or petroleum contamination costs does not exceed \$200,000 for any individual type of grant). Communities may also apply for Site-Specific Assessment Grants; however, they may not apply as a member of a Coalition.
- ◆ Coalition Assessment Grants provide funding to a group of three or more applicants—such as municipalities, Regional Planning Councils, and counties—for assessment work related to hazardous substances and/or petroleum. The maximum grant amount is \$600,000. Coalition Grant applicants may not apply for any of the other assessment grants.

- ◆ Revolving Loan Fund Grants provide funding to capitalize loans and provide subawards that are used to clean up brownfield sites. Grant amounts can range up to \$1 million. These grants are awarded to successful new applicants every other federal fiscal year.
- ◆ Small Community Technical Assistance Grants for States provide training, technical assistance, and/or research for small communities (population of 15,000 or less) in rural or disadvantaged areas. The grant amount ranges up to \$20,000 per community. Work is conducted by the state. The first of these funding opportunities became available this federal fiscal year.
- ◆ Cleanup Grants provide direct funding for cleanup activities at an eligible brownfield site that the applicant owns. Previously limited to \$200,000, the revised grant amount is now up to \$650,000. These grants became available in federal fiscal year 2018-2019.
- ◆ Multipurpose Brownfields Grants provide funding for assessment and cleanup activities at one or more brownfield sites in the proposed area in which the multipurpose grant will be used. Grant amount ranges up to \$1 million; however, this amount may be capped at between \$600,000 and \$800,000 for the first year (federal fiscal year 2018-2019).

2020 Brownfield Competitive Grants Awarded to Florida

In May 2020, Brownfield Competitive Grants were awarded by EPA nationally. Florida had 27 grant applicants for the 2020 Brownfield Competitive Grants and unfortunately none were awarded.

EPA also provides Environmental Workforce Development and Job Training (EWDJT) grants to provide a core training program that can include instruction in disaster site work; emergency response; asbestos work; lead renovation, repair and painting; confined space entry; integrated pest management; blood-borne pathogens; OSHA construction safety; oil spill supervision; hazardous material technician; hazardous waste operator; and Florida stormwater, erosion, and sedimentation control inspection. The maximum grant amount is \$200,000. The Corporation to Develop Communities of Tampa, Inc. received this grant in 2014. The joint team from the Corporation to Develop Communities of Tampa and the University of South Florida received this grant in 2020. Florida State College in Jacksonville has maintained an EWDJT grant with EPA continuously since 2011.

In addition to the grants described above, DEP received an SRP grant under CERCLA 128(a) in the amount of \$637,000, and a Small Community Technical Assistance Grant in the amount of \$20,000 from EPA for the federal fiscal year that began on October 1, 2019. This is the 17th year in which DEP has received an SRP grant, with the amount awarded totaling over \$12.3 million.

Since inception of the SRP grant and its predecessor program, DEP has assisted 99 applicants with 118 projects on contaminated (or potentially contaminated) sites. DEP uses the grant to pay for staff and contractors that provide brownfields services at eligible sites for local governments, non-profit organizations, and other eligible applicants. These services include assessment and cleanup activities. DEP also uses the grant to fund staff in Tallahassee who lead

coordination of the Florida Brownfields Redevelopment Program. These staff produce and maintain information about the program, conduct outreach and education, coordinate with District and Delegated Brownfield Program Coordinators, review BSRAs and SRCOs, and proactively engage with the brownfield community.

In response to stakeholder input, starting in Spring 2018 DEP also used SRP grant funding to initiate a project with the goal of better understanding the impacts of SRP funding into communities through brownfields redevelopment, as well as through Targeted Brownfields Assessment/Site-Specific Assessments that may lead into future redevelopment. The DEP has contracted with the University of South Florida (USF) to lead a project that will develop an online tool that will evaluate social and economic impacts. That online tool is now known as the Brownfields Redevelopment Atlas, an interactive GIS-based tool available to the public on an online platform. Refinement and additional data are continuously being added to this tool, with new features being added, ground truthing of the spatial data analysis and modeling being done, and results being disseminated. The Brownfields Redevelopment Atlas is available at the following link:

Total Approximate Acreage:							280,061.81

¹ NR = Not Reported

Total approximate acreage includes actual contaminated and perceived contaminated properties, viable business properties, residential properties, green spaces, and parks etc. Total approximate acreage is not representative of the number of areas that may require cleanup due to contamination but properties (acres) that may be eligible for economic and regulatory incentives pursuant to the Brownfields Redevelopment Act. The determination and designation of a brownfield area is the responsibility of the municipality or county government.

APPENDIX B
Sites with Executed Brownfield Site Rehabilitation Agreements

Sites with Executed BSRAs

Florida Brownfields Redevelopment Program

Wednesday, July 01, 2020

11:09:46 AM

APPENDIX C
Brownfields Redevelopment Success Stories

FLORIDA BROWNFIELDS SUCCESS STORIES

Brownfield Success Stories

The success of the Florida Brownfields Redevelopment Program can be demonstrated by the completed projects—those that have gone through cleanup and reuse of previously underutilized properties, and/or those that have achieved NFA status. The projects highlighted below have achieved NFA status and have been issued SRCOs between the period of July 1, 2019, through June 30, 2020. Cleanup was completed in accordance with DEP’s Contaminated Site Cleanup Criteria rule (Chapter 62-780, F.A.C.). Another key way to demonstrate the success of the Florida Brownfields Redevelopment Program is to view the projects that are undergoing redevelopment, even if cleanup work is still ongoing. Additional projects highlighted below are sites where redevelopment is complete, although the site cleanup remains ongoing and NFA status has not yet been achieved.

Following the more recent successes is a historical table listing all completed projects from the Program’s inception through June 30, 2019 (**Appendix C**). Full summaries for these projects can be found at the following link:

<https://floridadep.gov/waste/waste-cleanup/content/florida-brownfields-redevelopment-program-annual-reports>

Closure Success - Completed Projects

Northwest Gardens V

Location:	Fort Lauderdale, Broward County
Historical Use:	Multi-use
Contaminants:	Arsenic and PAHs
Reuse:	Residential

Northwest Gardens V is the fifth phase of a massive rehabilitation project performed by the Fort Lauderdale Housing Authority and Atlantic Pacific Communities. The site consists of several parcels, which have been redeveloped as affordable housing. The contamination identified on the site consists of arsenic and polynuclear aromatic hydrocarbons in soil at concentrations greater than applicable DEP Direct Exposure Soil Cleanup Target Levels within (and limited to) the top two-foot interval below land surface. After completing the proper removal and closure of a long-abandoned Underground Storage Tank, source removal of contaminated soils, and groundwater monitoring, a No Further Action with Conditions was approved on December 4, 2017. A Declaration of Restrictive Covenant (DRC) was drafted to place engineering controls over portions of the site, and a CSRCO was issued on February 14, 2020. Through the VCTC Program, \$33,465 in corporate income tax credit has been granted associated with the cleanup work. As a result of the Brownfield Area designation and the executed BSRA, the development partners were able to move forward with construction confidently, breaking ground on 100 new units and 100 renovated units in

February 2016. At the time of this report, the units are at full occupancy. The project offers a number of community-enhancing and capacity building amenities, including a fully furnished clubhouse, a computer lab, library, urban gardens, and a bocce ball court.

Wisdom Village Crossing

Location: Fort Lauderdale, Broward County
Historical Use: Warehouse and storage yard
Contaminants: Arsenic
Reuse: Residential

Originally a warehouse and storage yard, arsenic was identified in site soils and groundwater above applicable cleanup target levels. After conducting a source removal of the impacted soils and performing over a year of groundwater monitoring, a No Further Action with Conditions Proposal has been approved, and a DRC was drafted to enact groundwater use restrictions on the property. A CSRCO was issued on November 26, 2019. Through the VCTC Program, \$68,254 in corporate income tax credit associated with site cleanup work has been granted. Construction of the Green-certified, 9-story, 105-unit affordable housing complex is complete; it also contains a business center, clubhouse, fitness center, and laundry facility. Wisdom Village Crossing is a recipient of the 2018 City of Fort Lauderdale Community Appearance Award.

Coral Springs Economic Revitalization Zone Two

Location: Coral Springs, Broward County
Historical Use: Gas station
Contaminants: Petroleum
Reuse: Proposed Residential

This site is located on Northwest 39th Street in Coral Springs near the Sawgrass Expressway on a closed landfill formerly operated by the City of Coral Springs. Redevelopment presents unique challenges given the property's significant elevation above grade from historical filling, the relative narrowness of its configuration, and the fact that it is currently land-locked. However, the developers have been closely collaborating with the City of Coral Springs to obtain access through a City-owned property onto a major arterial roadway, which, together with key planning and land use incentives based on brownfield status, will

make the property viable economically. The BSRA for the Coral Springs Economic Revitalization Zone Two was executed on June 12, 2019, by Sawgrass Development Partners, LLC (“Sawgrass”), which allowed Sawgrass to relieve the City of ongoing cleanup costs and accelerate the timeframe for obtaining regulatory closure. The SRCO was issued on December 19, 2019. Through the VCTC Program, approximately \$47,897 in corporate income tax credits have been awarded to offset rehabilitation costs. Current reuse scenarios are heavily influenced by the way in which the pandemic of Spring 2020 is affecting the marketplace, with warehousing and distribution facilities for e-commerce platforms and/or fleet storage for last mile deliveries of groceries and merchandise leading the way. It is anticipated that construction will begin no later than the first quarter of 2021.

1737 Jessie Street Brownfield Site

Location: Jacksonville, Duval County
Historical Use: Industrial
Contaminants: Metals and PAHs
Reuse: Industrial

The 1737 Jessie Street Brownfield Site is located in a primarily industrial area known as “Talleyrand,” just outside of downtown Jacksonville. The site has been developed since at least 1913 and utilized for various industrial operations. As part of its acquisition of the site, SteelCon Supply Company (SteelCon) entered into a BSRA with DEP on December 18, 2015. After assessment and remedial activities, limited soil and groundwater impacts remained above applicable cleanup target levels. Following completion of post-remedial groundwater monitoring, SteelCon reached regulatory closure of the environmental issues through the use of institutional controls, including a residential use restriction, groundwater use restriction, and environmental site notation under the Memorandum of Understanding between DEP and CSX. DEP issued a CSRCO for the site on January 29, 2020. SteelCon, a distributor and fabricator of rebar, is a division of a corporate group specializing in fabrication of steel projects, including supplies for the industrial, construction and mining industry. The site includes a 36,910 square-foot, single-story, warehouse building; a 2,853 square-foot office building; and an 800 square-foot shed. SteelCon staffs approximately nine full-time employees at its Jacksonville facility.

May Street Brownfield Site

Location: Jacksonville, Duval County
Historical Use: Mixed commercial and industrial
Contaminants: TRPH, PAHs, and metals
Reuse: Commercial

The May Street Brownfield Site at 54 May Street, is a two-parcel site located in a rapidly developing area of Jacksonville just off the St. John’s River. It is surrounded by numerous commercial businesses and residential apartment complexes and is located less than 2 miles from the Jacksonville Jaguar’s stadium. Historical use of both parcels indicates mixed commercial and industrial uses, with portions of the property hosting a drycleaner facility, an aluminum foundry, and a sign painting business. Many surrounding parcels were also found to have been used for the disposal of ash from the Forest Street Incinerator Site.

A Phase I was performed on the property in June 2017 and a Phase II began immediately afterward in July 2017. Further assessment was performed in August 2018. A final Site Assessment Report and Source Removal Plan were finalized in April 2019 and soil excavations began in July 2019. A SRCO was issued in March 2020.

Mitusina Brownfield Site

Location: Ruskin, Hillsborough County
Historical Use: Agriculture
Contaminants: Pesticides and metals
Reuse: Multi-use

The Mitusina Brownfield Site was used for 50 years for agriculture, with row crops, a fish farm and a single residence present at the site. Initial site screening for pesticides and metals found arsenic in fishpond sediments and surface waters, but not at concentrations that exceed the state’s cleanup target levels. Further investigation found that the arsenic was not leachable, and no arsenic exceedances remain in soils or groundwater. A clean closure, one with no conditions, was issued April 7, 2020. The site is currently in construction to create two medical manufacturing buildings, a day care center and a plant farm. One manufacturing building will house a chrome coating process for medical devices and the other will make stainless steel medical tubing. It is anticipated that these redevelopment plans will create 100 jobs.

Former Hudson Nursery

Location: Tampa, Hillsborough County
Historical Use: Plant nursery
Contaminants: Pesticides, arsenic, petroleum
Reuse: Retail and restaurants

For nearly 40 years, the former Hudson Nursery brownfield site occupied 10 acres of land at the intersection of Floyd Road and Dale Mabry Highway in Tampa. Use of the property as a nursery impacted the soils and groundwater with pesticides, arsenic and petroleum compounds. Site rehabilitation is complete, and a CSRCO from the Hillsborough County Environmental Protection Commission was issued June 26, 2019. Engineering and institutional controls at the site provide protections to prevent human exposure and environmental impact from low concentrations of contaminants remaining at the site. The site has been redeveloped into multiple restaurants and shops, bringing an estimated 100 full-time and 150 part-time jobs.

House at Tallahassee

Location: Tallahassee, Leon County
Historical Use: Bulk oil storage facility
Contaminants: Arsenic and benzo(a)pyrene
Reuse: Multi-use

The site was occupied by Gulf Oil Company and Gulf Refining Company as early as 1930, with continued use as a bulk oil storage facility until at least 1949. The site was later used for beer distributing and then a glass wholesale operation. Additionally, a portion of the property was utilized for vehicle fueling, as well as auto and truck repair starting around 1962. Environmental services conducted on the site began with the preparation of a Phase I Environmental Site Assessment report (ESA), dated March 29, 2018. The ESA identified Recognized Environmental Conditions (RECs) associated with impacts to soil and groundwater related to historic site use. A Phase II ESA and Contamination Assessment was then conducted to assess the horizontal and vertical extents of contaminants of concern (COCs) in both the soil and groundwater. Based on the review of prior assessment and initial Phase II ESA data conducted on the site, it was theorized arsenic concentrations in soil were not indicative of anthropogenic sources. As such, an emphasis was placed on assessment of arsenic in soil with the goal of proving arsenic concentrations to be indicative of natural background while also ensuring arsenic was not correlated with additional COC impacts identified on the

site. A comprehensive conceptual site model was developed, and an assessment designed to adequately assess the site while gathering data to support the arsenic as natural background assertion. The assessment incorporated data collected by Terracon on a nearby previously assessed/remediated brownfield site which used offsite and select onsite background sample locations to calculate site specific background concentrations and integrated X-ray diffraction testing, grain size sieve analysis, and laboratory data modeling, which was used to definitively prove arsenic was naturally occurring on the site. The assessment also documented various metals and low-level petroleum constituents in site soils and no groundwater impacts. A combined document; Contamination Assessment Report and Remedial Action Plan, dated December 21, 2018 was submitted to the DEP and subsequently approved on March 19, 2019. Arsenic was considered naturally occurring and consequently the remaining delineated COC impacted soil was excavated by Terracon personnel and properly disposed of. A total of 2,935-tons of impacted soil were removed from the site. The property executed a BSRA on December 20, 2018, site remediation was completed on April 23, 2019, and they received a SRCO on August 9, 2019. Under the VCTC program, House at Tallahassee was able to recover fifty percent of eligible cleanup costs combined with a 25% bonus credit for obtaining site closure, in the amount of \$306,850 in the form of state corporate income tax. In addition, tax incentives of \$2,500 per employee will be achieved. When the hotel is fully operational, approximately 30 jobs will be created. Additionally, the retail space that is part of the development will include retail businesses and a restaurant, creating another 20 jobs or more.

Former Riverside Shell Station

Location: Palmetto, Manatee County
Historical Use: Gas Station
Contaminants: PAHs
Reuse: Proposed retail

The site is the location of a former Shell Full-Service Filling Station. The site served as a filling station location from 1930 through 2010 when Circle K had the underground storage tanks removed from the site. Petroleum contamination in soil and groundwater related to the underground storage tanks was discovered in 1992. Contamination assessment activities were conducted in the 1990s and early 2000s. Additional assessment of soil and groundwater, followed by groundwater monitoring resulted in a SRCO of the site in July 2019.

Former Grower’s Hardware

Location: Palmetto, Manatee County
Historical Use: Automotive repair, manufacturing
Contaminants: TRPHs
Reuse: Proposed Farmer’s Market and retail

Currently there is an approximately 5,625 square foot corrugated metal retail building and a paved parking lot on the property. The property is currently vacant. Historical land uses included automotive repair, oil storage, plastics manufacturing, chemical vulcanizing, newspaper publication, metal shop foundry and dry cleaning. A Phase II Environmental Site Assessment (ESA), performed by Cardno, was completed in December 2018. TRPH was detected in soils above the Residential Soil Cleanup Target Level (R-SCTL) of 460 mg/kg. Dibenz(a,h)anthracene was detected in groundwater above the Groundwater Cleanup Target Level of 0.005 ug/L. A Supplemental Phase II ESA, performed by Cardno, was completed in February 2019 and no contaminants of concern were detected. PAHs were not detected in any of the groundwater samples taken. Fractionation of the TRPH samples conducted under the supplemental site assessment, completed in August/September 2019, found that none of the results exceeded Residential Soil Cleanup Target Levels (SCTLs). This site was issued a SRCO on May 5, 2020.

Medley Redevelopment Site

Location: Medley, Miami-Dade County
Historical Use: Automobile parts/repair facility
Contaminants: TRPHs and metals
Reuse: Commercial

CRUGAR Development, LLC, entered into a BSRA to rehabilitate and redevelop a vacant site located in Medley. Dumping activities were documented at the site in the late 1960s and the site formerly housed automobile parts and repair facilities. Site assessment activities documented solid waste, along with ammonia, lead, iron and aluminum groundwater contamination and arsenic and TRPH soil contamination. Groundwater monitoring in support of a No Further Action with Conditions Closure was completed in 2016 and engineering controls were implemented in early 2019. A restrictive covenant was recorded, and the site received a CSRCO in June 2019. The property was sold, and the new property owner intends to construct a 125,000 square foot commercial warehouse on the site.

Los Sueños Multifamily Apartments

Location: Miami, Miami-Dade County
Historical Use: Automobile repair facility
Contaminants: VOCs and PAHs
Reuse: Residential

A BSRA was executed with Dreamers, LLC for the property located at 500 NW 36 Street, which formerly housed an automobile repair facility with underground storage tanks. Contamination assessment identified concentrations of Volatile Organic Compounds and Polycyclic Aromatic Hydrocarbons in the groundwater above the applicable cleanup target levels. An engineering control was implemented to address petroleum-impacted soils. This property was redeveloped as Los Sueños multifamily apartments, consisting of a high-rise residential tower and parking garage. A Monitoring Only Plan was deemed complete on October 2, 2017 and a restrictive covenant with groundwater use restrictions was executed and recorded. The site was issued a CSRCO by DEP on January 16, 2020.

Miami River Marina

Location: Miami, Miami-Dade County
Historical Use: Boat yard
Contaminants: Metals
Reuse: Marina

On November 1, 2013, Miami River Marina, LLC executed a BSRA for the 8.56-acre Miami River Marina site, the former location of the Consolidated Yacht Corporation boat yard which built, repaired and renovated marine vessels and associated equipment. The contamination at the site consists of metals in soil and in limited areas of groundwater. Site assessment, source removal and groundwater monitoring activities were completed in pursuit of a No Further Action with Conditions. An Engineering Control Plan was implemented, and a restrictive covenant was executed and recorded. The site received a CSRCO on April 23, 2020. Miami River Marina, LLC plans to redevelop the site as an active boatyard and/or facility which services the marine industry.

Former Chevron

Location: Orlando, Orange County
Historical Use: Gas station
Contaminants: Petroleum
Reuse: Proposed Residential

A gas station operated at the site from the 1960's until approximately 2012. The underground storage tanks installed in the 1980's remained at the site until the current property owner purchased the property in 2015 and entered in to a BSRA. In 2016 the underground storage tanks were removed, remediation, including a biosparge system, commenced, and following a year of Natural Attenuation Monitoring, a SRCO without Conditions was issued in January 2020. A proposal to the City of Orlando in 2018 indicated that the site was to become a RaceTrac. However, it is now being considered for residential development close to downtown Orlando.

Old Fire Station Recreation Center

Location: Winter Garden, Orange County
Historical Use: City of Winter Garden Utilities
Contaminants: Petroleum and PAH
Reuse: Entertainment

This site is the former City of Winter Garden Utilities location, owned by the City of Winter Garden since the early 1900's. Petroleum contamination was detected at the site of 2 former underground storage tanks. After source removal and several years of Natural Attenuation Monitoring the site was issued a CSRCO restricting groundwater use in July 2019. The site is now part of the vibrant Historic Downtown Winter Garden Art Community and close to the very popular West Orange Trail and restaurants.

Peoples Gas System

Location: St. Petersburg, Pinellas County
Historical Use: Former TECO Complex
Contaminants: VOCs, SVOCs, TRPHs
Reuse: Church and dentist

Petroleum contamination to soil and groundwater related to underground storage tanks were discovered at the subject facility during a Phase II Environmental Site Assessment conducted by Environmental Assessments + Consulting (EAC) in 2003. After reporting the discharge, a BSRA was entered by TECO Peoples Gas Company on December 17, 2003. Site rehabilitation, which included source removal of petroleum contaminated soil and treatment of contaminated groundwater, was conducted from July 10, 2003 through April 28, 2014 when enough evidence for closure with conditions had been submitted to DEP. The proposed method of managing contaminated media included the use of institutional and engineering controls. Execution of the restrictive covenant was hampered by a change in ownership of the property. The new owner proved reluctant to sign a restrictive covenant. In 2019 TECO undertook supplementary sampling of groundwater at the site to discern if there was any remaining contamination exceeding applicable GCTLs. Laboratory analysis of groundwater samples collected in January 2019 and May 2019 did not report any concentrations of contaminants exceeding GCTLs. With no soil or groundwater contaminants exceeding applicable cleanup target levels, the site was issued a SRCO on July 10, 2019.

City Center Site

Location: Casselberry, Seminole County
Historical Use: Gas station
Contaminants: Petroleum
Reuse: Mixed use and residential

This former gas station site was located on property sold by the City of Casselberry to a private development group. The property is within the Casselberry Community Redevelopment District (CRA) and is integral to the City's overall plan for a Lake Concord Park City Center. The attached map shares a view of the area which includes the former Shell Station site parcel as well as neighboring parcels. The anticipated redevelopment of the area is intended to present a 21st century blend of residential and lifestyle development designed to transform the area to provide multifamily residential, dining, and cultural amenities. The City Center has become a vibrant public gathering place with the City hosting music, arts, and community events. The reuse of this Brownfield from an unusable site to a model location in the City is a positive example of the partnership between local communities, such as Casselberry, and DEP to both address environmental contamination and convert land to functional space. A Low-scored Site Initiative (LSSI) No Further Action Order for the site was issued on May 21, 2020.

1775 East Lake Mary Boulevard

Location: Sanford, Seminole County
Historical Use: Light industrial
Contaminants: Aluminum
Reuse: Zoned for light industrial

Background studies concluded that aluminum present in soils at the site was due to natural soil conditions and a SRCO was issued in November 2019. The property is zoned for light industrial. A few businesses are operated on surrounding parcels but future development plans for this property are unknown.

Sanford Waterfront Catalyst Site

Location: Sanford, Seminole County
Historical Use: Light industrial
Contaminants: VOAs, PAH, TRPH, metals
Reuse: Mixed use and residential

The site was a vacant gravel lot that included three parcels defined as G, F, and H. Historically these parcels were used for light industrial, auto repair, spray painting, laundry and printing. The City of Sanford had acquired these parcels and entered into a BSRA on December 18, 2017 for the Sanford Waterfront Catalyst Site. During the site assessment, contaminated soil was detected and approximately 3,081 tons of contaminated soil were removed. No groundwater contamination was detected. A SRCO was issued on November 5, 2019.

Shoppes at Sterling Creek

Location: Oviedo, Seminole County
Historical Use: Cattle Dip Vat
Contaminants: Arsenic
Reuse: Commercial

This site was historically used as a cattle dip vat site dating back to the 1940's. A BSRA was executed for this site in December 2015. Arsenic was found in elevated concentrations in both the soil and groundwater. Following cleanup, the property was purchased by Publix and developed into a commercial strip mall with Publix as the anchor store. A CSRCO was issued on June 19, 2020.

Redevelopment Success - Ongoing Projects

Gerdau Ameristeel

Location: Tampa, Hillsborough County

Historical Use: Steel mill

Contaminants: PCBs and metals

Reuse: Industrial park

The site was formerly a steel mill, Tampa Steel, 1994 and all operations on Site terminated in 1997. Between 1999 and 2000 approximately 325,000 cubic yards of soil impacted with PCBs, lead, and lesser amounts of arsenic, cadmium, chromium, and zinc was placed on-site in a double-lined and capped vault located immediately west of the site. In 2006, A BSRA was executed, and site assessment of soil and groundwater continued as the property was reconfigured into the Eastport Industrial Park. The Brownfield site now consists of multiple parcels some developed and others under development as part of the Eastport Industrial Park. Contaminants at the site consist of metals and remnant PCB contamination in soil and solvent contamination in groundwater. The site already had a parkwide restrictive covenant implemented to serve suitably as a control until all parcels are developed.

Madison Street Park

Location: Tampa, Hillsborough County

Historical Use: Petroleum equipment repair

Contaminants: Metals and TRPHs

Reuse: Community Park

The Madison Street Park brownfield site is located in downtown Tampa, surrounded by multistory apartments and condominiums. There is currently very little park space available for the people and pets who live nearby. The City of Tampa has remediated this small parcel of land that was formerly a petroleum equipment repair office and a railroad spur, and redeveloped it into a park for the residents and their dogs. The redevelopment created both large and small dog parks, as well as a playground, multi-use courts, open lawn and a shade pavillion, seating and landscaping. Soils impacted with metals and petroleum compounds were removed.

Former Tampa Jai Alai

Location: Tampa, Hillsborough County
Historical Use: Solid waste disposal
Contaminants: VOCs
Reuse: Residential

This site was used for solid waste disposal in the 1950s. Preliminary assessment reports documented soil and groundwater contamination, and landfill gas generation. Construction at the site is permitted under a Director’s Authorization from the Hillsborough County Environmental Protection Commission to address the specific environmental concerns associated with construction in former waste disposal areas. Waste has been removed from most of the site, but some remains along the edge of the property, with engineering controls present to control gas and prevent stormwater infiltration through the remaining waste. The site has been redeveloped into a multifamily community with 140 townhouses and 160 apartments. This redevelopment is expected to create 6 new property management and maintenance jobs.

Former Edenfield Property

Location: Palmetto, Manatee County
Historical Use: Railroad depot
Contaminants: Arsenic and benzo(a)pyrene
Reuse: Community Park

The City of Palmetto purchased the approximate 2.5-acre site in June 1999 and then transferred ownership to the Palmetto Community Redevelopment Agency in December 2015, with plans to turn the site into a community park. Historic documentation had shown the site was previously owned by the Tampa Southern Railroad Company and was used as part of the railroad depot, which included a railroad spur and a freight yard. An area of dumping was discovered in the center of the site, which included an unlabeled, empty, buried rusted 55-gallon drum. In addition, a City of Palmetto storm drainage system outfalls to a ditch located on the western side of the site, which has the potential to bring hazardous substances or petroleum compounds that are discharged from neighboring properties. Contamination consists of arsenic and benzo(a)pyrene and equivalents in soil. No contaminants were detected in the groundwater. Assessment is ongoing to determine the best way to manage the soil contamination.

Fluid Routing Solutions

Location: Ocala, Marion County
Historical Use: Commercial
Contaminants: VOCs
Reuse: Commercial

Dayco Commercial has operated at this location since 1979. VOC contamination of soil and groundwater was discovered by Dayco in early 1988. Dayco was purchased by Fluid Routing Solutions (FRS) in 2007 who still owns the property. After purchasing the property, FRS entered in to a BSRA in December 2009 and continued remediation activities. Some of the remediation technologies used included soil excavation and offsite disposal, Pump and treat of groundwater, In-situ chemical oxidation of groundwater, Monitored Natural Attenuation of groundwater. The site has drafted a DRC restricting groundwater and use of the property. The DRC is under review by legal counsel and a CSRCO will be issued once the DRC is approved.

Parcel U

Location: Orlando, Orange County
Historical Use: Former Amway Arena
Contaminants: Dieldrin
Reuse: Residential, office/retail

Located at the northeastern portion of the former Amway Arena, the 100-year property history includes a US Department of Agriculture facility, Police Academy, Civil Defense facility, National Guard Armory, and Orlando Recreation Complex. The “Parcel U” was sold by the City of Orlando and the PRFBSR intends to remove all soils in 2020 to below the Residential SCTLs for redevelopment purposes.

Bonnet Spring Park

Location: Lakeland, Polk County
Historical Use: CSX Railyard
Contaminants: Arsenic and aluminum
Reuse: Community Park and museum

This site is the location of the former 84 acre switching and maintenance yard in Lakeland. The railyard was decommissioned in the mid- 1980s

and the permanent structures, fueling systems, and interior service tracks were demolished. The railyard was vacant thereafter. Extensive soil and groundwater assessment was conducted at the site since the mid-1980s identifying arsenic in soil and aluminum in groundwater to be managed with institutional controls. DEP issued a CSRCO on December 4, 2015. Land use is currently restricted to commercial and/or industrial due to the residual arsenic soil contamination. Use of groundwater is restricted. Legacy petroleum contamination at the former railyard is being addressed separately by the Polk County Health Department under DEP’s Petroleum Restoration Program. In December 2017, a BSRA for the site was executed when Roundhouse Holdings, LLC purchased the site from CSX Transportation, as well as several adjacent parcels, to create the footprint of Bonnet Springs Park (BSP). BSP is approximately 153-acres of land including 84 acres in the central and eastern portion of the park that formerly served as a CSX Transportation railyard. With the development of BSP, the site’s land use changes from commercial/industrial to a recreational setting still requiring management of arsenic contaminated soil at the site. In addition, there are two engineering controls areas (Northern Hill and Southern Hill) which are capped by two-feet of fill. A small area at the base of the one hill has been excavated so than no restriction will be necessary for this portion of the site. This location is a children’s museum/teaching area. The groundwater restriction will remain unchanged. With engineering controls in place, park development has reached the point that modification of the DRC may proceed and the site close with conditions as proposed.

Former Lloyd Buick/Cadillac

Location: Daytona Beach, Volusia County
Historical Use: Auto dealership and service
Contaminants: Chlorinated hydrocarbons, petroleum, arsenic
Reuse: Brown & Brown Headquarters

A former auto dealership and auto service facility that included underground storage tanks, hydraulic lifts, floor drains, auto repair facility, and an engine/transmission shop was originally developed in the 1940’s and 1950’s. The site was nearing completion of Natural Attenuation Monitoring while undergoing redevelopment in 2019. However, during construction, a storage tank was unearthed near Beach Street and a heavy petroleum odor was encountered in a central portion of the site. The storage tank removal and an excavation to remove the impacted soils has included additional site assessment and delayed any No Further Action with Control Proposals.

Projects completed prior to July 1, 2019 are presented in the following table. Expanded summaries for each project can be found at:

www.floridadep.gov/waste/waste-cleanup/content/brownfields-annual-reports.

BROWNFIELD SITES THAT HAVE ACHIEVED NFA STATUS (1997 to June 30, 2019)

SITE	CITY	CONTAMINANTS	SUMMARY
BREVARD			
Former Steve’s Cycles	Cocoa	Petroleum Hydrocarbons	Previously, the property functioned as a transmission repair/fuel oil supply facility, then a motorcycle sales/repair shop. After cleanup, the site was redeveloped into a Family Dollar Store.
MarcT	Cocoa	Arsenic	Soil contamination was discovered, and the owner entered into a BSRA in 2012. The property was cleaned up soon afterward. The site is being developed for a company that assembles and distributes backpacks for the U.S. Department of Defense.
Casbah Properties	Melbourne	Petroleum	Previously occupied by a gas station, the new owner had the storage tanks removed. It is now home to Matt’s Restaurant, a popular dining destination in Melbourne.
Manatee Point	Melbourne	Petroleum Hydrocarbons	The Manatee Point site is a ½-acre former auto repair and gas station. Numerous previously-identified underground storage tanks were discovered and were removed. Cleanup was completed, and a Starbuck’s Coffee Shop was constructed. A SRCO was issued in 2012.
Brunson Avenue Site	Cocoa	PAHs	The property was historically used for residential, automobile storage, police and fire departments, municipal court, and a city jail. By March 2017, 947.30 tons of contaminated soil were removed. A SRCO was issued in July 2017.
BROWARD			
Harbour Cove	Hallandale	Petroleum, Ammonia, Arsenic	The property was originally a lake-fill site. An assessment was completed, and a conditional closure order was issued in May 2009. It has been redeveloped into an apartment complex, with taxable value increasing from \$290,950 to \$6.6 million.
ZOM Foxcroft, LP	Miramar	Arsenic	A former 15.16-acre golf course, the site was found to contain groundwater and soil contamination. A restrictive covenant addressing groundwater use and a soil management strategy have led to the property being developed into a multi-story apartment complex with 100 percent unit lease rate.
Pompano Beach Library and Civic Campus A	Pompano Beach	Petroleum	During 2010, the City of Pompano Beach completed a site assessment and removed source materials. Cleanup was completed and an unconditional closure issued in December 2010. Future development includes a new government campus and public library.
Pompano Beach Library and Civic Campus B	Pompano Beach	Arsenic	Having had various past uses, the property contained soil and groundwater contamination. The soils were removed, and restrictions put on groundwater use. Work was completed in spring 2012 and an unconditional closure was approved in June 2012.
Dania Motocross	Dania Beach	Metals	The Dania Motocross facility operated from 1995-2005. The developer entered into a BSRA with Broward County to address metals contamination in the groundwater. A conditional closure was issued in August 2006 and a warehouse complex is planned for the property.

SITE	CITY	CONTAMINANTS	SUMMARY
West Atlantic Blvd. Apartments	Pompano Beach	Arsenic	This site was a large golf course impacted with arsenic contamination from the use of herbicides. Soil removal was completed in 2017. A DRC was recorded in November 2017 and a CSRCO was issued the same month. A completed multi-family residential complex now sits on the site.
Wal-Mart Stores East, LP	Sunrise	Arsenic, PAHs	This site was already a Wal-Mart store, but they acquired an adjoining parcel to expand. During 2015, contaminated soils were managed, and the groundwater was monitored with an NFA with Conditions approved on May 10, 2017. A CSRCO was issued on April 12, 2018; a DRC was recorded, as well.
Former Palm Aire Golf Course Phase 2A	Pompano Beach	Arsenic	This site was a large golf course impacted with arsenic contamination in soil and groundwater. Engineering and institutional controls were coupled with on-site soil management. A DRC was recorded and a CSRCO was issued on September 20, 2018. A large multi-family residential complex now sits on the site.
Wal-Mart Stores	Pompano Beach	Arsenic, PAHs	Originally this property was used for commercial purposes. It was acquired by Wal-Mart Stores in 2011 and was found to have arsenic and PAH contamination. Soil removal was complete in 2013. A DRC was recorded in February 2018 and a CSRCO was issued on October 8, 2018.
CLAY			
GCS Downtown Phase I, Parcel A	Green Cove Springs	Petroleum Constituents	GCS Downtown Phase I, Parcel A is the first site along the Highway 17 corridor to complete site rehabilitation under the Brownfields Program. The property is planned for residential and commercial land use.
GCS Downtown Phase I, Parcel C	Green Cove Springs	Petroleum Hydrocarbons	The property is a former automobile dealership. Two underground storage tanks along with associated contamination were cleaned up under a BSRA with DEP. A SRCO was issued in June 2013 and the property is ready for reuse.
DUVAL			
Former Jacksonville Raceway	Jacksonville	Petroleum Constituents, Old Tires, Debris	More than 52,000 tons of contaminated soils, 1,176 tons of debris and approximately 52,500 tires were removed from this former motor sports complex. A CSRCO was issued in September 2010 and the site is ready for reuse.
JM Family Enterprises	Jacksonville	Petroleum	Petroleum contamination was discovered in the soil at this former bulk petroleum storage facility. Cleanup was completed and the site was closed without conditions in 2007.
Ware Family Realty, LLC	Jacksonville	Chlorinated Solvents	A drycleaner previously occupied the property until purchased by a neighboring property owner. Cleanup was completed and the redevelopment has increased the property value from \$325,000 to \$1.2 million.
Mary Eaves Canning Facility and Coal Yard	Jacksonville	Arsenic and Petroleum	Former canning facility and coal yard with a historic discharge. A CSRCO was issued on June 29, 2018. Redevelopment is complete with a four-story, 80-unit senior citizen affordable housing complex.

SITE	CITY	CONTAMINANTS	SUMMARY
Lofts at LaVilla	Jacksonville	Metals and Petroleum	This was a former vacant area that had a historic discharge related to The Great Jacksonville Fire of 1901. Using engineering and institutional controls and recording a DRC, the site was issued a CSRCO on April 5, 2018. Redevelopment is complete with a five-story, 130-unit affordable housing complex.
ESCAMBIA			
Mahogany Mill Boat Ramp	Pensacola	Benzene, PCP, TRPH, BaPs	A former saw-mill, the property was purchased by Escambia County in 2009 and was vacant until 2013. A July 2013 site assessment found soil contamination and a RAP was approved in November 2013 with a BSRA being executed December 2013. The site now contains a multi-lane public boat ramp, parking area, sidewalks, and a 2.32-acre marine park. The project was constructed using NRDA funding through DEP.
Century	Century	Volatile Organic Compounds	Groundwater and soil contamination from wood door manufacturing was discovered and site cleanup was conducted. A site closure with conditions was issued in 2009, the property is now vacant.
2500 North Palafox	Pensacola	Arsenic, Petroleum Hydrocarbons	The site has been used in a variety of ways for more than 50 years. Soil contamination was discovered and some of the soils removed. The new building and parking lot serve as engineering control for the contaminated soils left in place. It is now used as general office space.
Pensacola Main Street	Pensacola	Arsenic	Part of the Pensacola Bay waterfront area, the property was found to contain arsenic-contaminated soils. Contamination was addressed through the use of soil caps (parking lot and building). The property is now occupied by two businesses and has seen a significant increase in property value.
Sunray Enterprises, Inc.	Pensacola	Petroleum	Storage tanks were removed in the 1970s and contaminated soils were removed by the new owner. The property is currently being used as an automobile repair shop.
Weatherford McIntyre Property	Pensacola	Arsenic	The property was formerly a construction and demolition debris landfill, and under the program, approximately 500 tons of arsenic contaminated soil were removed. As a result of \$724,000 in private investment funds, the property is now a marine parts supply facility and has created 25 new jobs.
Strategic Crossing Corp., CSX Property	Pensacola	Arsenic, Semi-Volatile Organic Compounds	Redeveloped to provide much needed downtown area parking, this former industrial railroad spur was entered into the program by the City of Pensacola. The total project resulted in \$8 million of private investment and the creation of 120 jobs.
Former Runyan Shipyard, Bayou Chico	Pensacola	Benzo(a)anthracene, TRPHs, and Lead	This property was an active marina until the early 1990's. Over 13,000 tons of contaminated soil were removed from the site from October 2005 to March 2011. A DRC was recorded in July 2017 and the CSRCO was issued that same month.

Florida Brownfields Redevelopment Program, 2019-2020 – Annual Report

SITE	CITY	CONTAMINANTS	SUMMARY
GULF			
Former St. Joe Paper Mill	Port St. Joe	Polychlorinated Biphenyls, Metals, Volatile Organic Hydrocarbons	A former pulp and paper mill, Stone Container Corporation acquired and closed the mill in January 2000. Stone Container entered into a BSRA with DEP shortly after demolition began in 2002. The BSRA was transferred to St. Joe Company with final closeout being delayed due to the property transfer. A SRCO was issued in May 2013 and commercial redevelopment is planned.
Former St. Joe Surface Impoundment	Port St. Joe	Metals, Polycyclic Aromatic Hydrocarbons	This area received wastewater and waste materials from the paper-making process at the adjacent St. Joe paper mill. Contaminated soils were discovered, capped and a restrictive covenant was recorded on the deed. The area is part of a planned expansion of the Port.
HILLSBOROUGH			
Former Sun City BP	Sun City	Petroleum Hydrocarbons	This former gas station was in disrepair when purchased by the new owner. A BSRA was executed in December 2011, cleanup was completed and a SRCO issued in June 2013. The property was redeveloped and is now occupied by a bank that employs 10 full-time staff.
Tampa Tank	Tampa	Arsenic	The site had arsenic-impacted soil along with contamination from Chloride Battery, an off-site source, all addressed under the BSRA. A SRCO was issued in September 2011. The redevelopment by Padgett-Swann Machinery Company will provide 12 permanent jobs.
Avion Park at Westshore	Tampa	Petroleum	The property originally contained underground storage tanks, as well as being the site of a City of Tampa landfill. Cleanup was completed and a SRCO issued in October 2010. The 19-acre site is now home to three hotels, retail stores and 425,000 square feet of office space.
Tampa International Center - IKEA	Tampa	Petroleum Constituents, Arsenic, Aluminum, Iron	Originally developed and operated as a cannery from 1936-1981, this site was found to contain groundwater contamination. Source materials, as well as soils were removed, and engineering and institutional controls were used. The 353,000 square foot IKEA store that now occupies the property created 500 construction jobs and 400 new, in-store jobs.
Former W.T. Edwards Property	Tampa	Petroleum	The W.T. Edwards Hospital closed in 1974 and was eventually purchased by the Hillsborough Community College in 2003. Soil contamination was found and was cleaned up soon after the purchase. The college also received an EPA revolving loan to assist in asbestos removal.
Circle Tampa Ventures	Tampa	Metals, Solvents, Polychlorinated Biphenyls, Oil and Grease	The Ball Metal Plant was purchased by Circle Tampa Ventures, who soon entered the site into the Program. Cleanup was completed and a restrictive covenant prohibiting the use of groundwater was issued. The property is now home to 468 apartments and townhomes, which has increased the taxable value from \$3 million to \$45 million.
Centro Asturiano	Tampa	Petroleum, Incinerator Debris, Biohazards	The Centro Asturiano Hospital was condemned in 1996, and after site rehabilitation under the Program, is currently a seven-acre facility providing affordable housing to seniors.

SITE	CITY	CONTAMINANTS	SUMMARY
Riverfront Complex	Tampa	Metals, Petroleum Compounds, Polychlorinated Biphenyls	Low-level concentrations of contaminants were found in the soils of this former dump site and were removed after the developer entered into a BSRA with DEP. The property is currently ready for redevelopment/Heights Community Redevelopment Area.
Wal-Mart Buckley Shuler	Tampa	Volatile and Semi-Volatile Organic Compounds	Wal-Mart purchased the property, which was once used for a paint factory and dairy farm, in 2001. Cleanup was completed in 2009 by the developer Buckley Shuler. Wal-Mart and the businesses on the out parcels now provide more than 400 jobs to the area.
Robbins Manufacturing	Tampa	Wood Treating, Pole Storage	The site's past uses include treatment of lumber and electric poles, as well as, storage of treated poles. Site rehabilitation removed contaminated soils from the area planned for residential redevelopment and moved them to the planned commercial area. Engineering controls and deed restrictions were used to cap and control exposure on the commercial site.
Hydraulic Hose	Plant City	Petroleum	The site was a gas station since 1964, a hydraulic system repair shop when a discharge was reported in 1988. Petroleum storage tanks removed in 1989. The distribution lines and contaminated soils excavated/removed, the groundwater remediated from 1992-2008. A BSRA was signed for the site in June 2011. CSRCO was issued in Sept 2016.
Nebraska Avenue	Tampa	Arsenic, BaPs, Barium, Lead	This site was used as a gas station and auto repair business. Contaminated soils and an UST were removed. A SRCO was issued in November 2016. The property is currently vacant with possible future uses being a small grocery or fresh food market.
The Place at Channelside	Tampa	Chlorinated Solvents, PAHs, and Arsenic	The site is the location of the former Brulin Facility, Records Center, Inc., and CSX Transportation, Inc. right-of-way. The CSRCO was issued October 9, 2017 following 13 quarters of post-active remediation. The site is currently a high-rise residential condominium.
Liberty Tampa	Tampa	Petroleum	The property was utilized starting in the 1930s for repair of heavy equipment, and in the 1970s and 1980s as a manufacturing plant. Contaminated soils were removed after February 2017. A SRCO was issued January 16, 2018. The property is currently being redeveloped as a mixed-use multistory residential and retail area.
Spruce Street/Tampa Landfill #2	Tampa	Arsenic, chromium	The site was used by the City of Tampa for solid waste disposal prior to the mid-1960s. A CSRCO was issued on March 13, 2018, containing engineering and institutional controls for soil and groundwater conditions. The site has been redeveloped as a 5-story residential building with adjacent parking garage.
Channelside District	Tampa	Arsenic, PAHs, TRPHs	This property was former warehousing and commercial-use including chemical supply and marine fuel supply until 1980. Excavation of contaminated soils and engineering controls led to the issuance of a CSRCO on July 20, 2018.

Florida Brownfields Redevelopment Program, 2019-2020 – Annual Report

SITE	CITY	CONTAMINANTS	SUMMARY
LEE			
City of Ft. Myers Coal Gasification Site	Ft. Myers	Petroleum Constituents	The Imaginarium Hands-On Museum and Aquarium sits on the site of a former coal gasification plant. During construction, contaminants were discovered, resulting in a soil cap and groundwater use restrictions being recorded on the deed in January 2011.
2780 South St.	Ft. Myers	Petroleum Constituents	From 1962-1993, the property was used as a truck servicing facility and subsequently used by a plastics manufacturer for five years. Cleanup addressed soil and groundwater contamination, and now the site is under contract to a landscape supply company.
LEON			
Former Ro-Mac Lumber	Tallahassee	Arsenic and Petroleum Hydrocarbons	Former Ro-Mac Lumber & Supply Co., is now home to 130 student housing units and 3,500 square feet of retail space. The building foundations, paved areas and other features of the \$25 million redevelopment were designed to act as engineering controls to eliminate exposure to contaminated soil.
Former CSX Parcel 1, Gaines Street Corridor	Tallahassee	Arsenic	This area once served multiple commercial and industrial operations in the CSX railroad corridor. After finding contamination in soils, the City of Tallahassee entered into a BSRA, conducted site rehabilitation and recorded a deed restriction on the property. The area will now be used for parking in the Gaines Street Corridor redevelopment area.
Salie Property	Tallahassee	Arsenic, Polycyclic Aromatic Hydrocarbons, Chromium, Dieldrin	This 5.07 acres of land was acquired by the City of Tallahassee as part of its economic redevelopment efforts. Using EPA grant funds, DEP completed a source removal in 2006 and a BSRA was executed in 2010. An unconditional SRCO was issued in September 2012.
Tallahassee Marriott Residence Inn	Tallahassee	Petroleum, Dioxin	The property was formerly a bulk petroleum storage facility. The City of Tallahassee secured commitment for redevelopment and following cleanup and implementing registered engineering and land use controls, DEP approved conditional closure in 2007. The property, previously valued at \$588,166, is now valued at \$10 million.
Inn at Tallahassee	Tallahassee	Metals, BaPs	The properties historic uses date back to 1930 as a rail corridor, rail operation and maintenance, warehousing facilities, and an oil house. A BSRA was executed in August 2016. Excavation activities were completed in October & November 2016. An Unconditional SRCO was issued in January 2017. The site is now a Hampton Inn & Suites.
MANATEE			
Widewaters, LLC	Bradenton	Petroleum Hydrocarbons	Widewaters, LLC acquired the property in 2010 and began the cleanup and redevelopment process. Cleanup addressed underground storage tanks on the property. After a \$21 million renovation, the property was reopened as the Bradenton Hampton Inn and Suites.

SITE	CITY	CONTAMINANTS	SUMMARY
Widewaters, LLC	Bradenton	Petroleum Hydrocarbons	Widewaters, LLC acquired the property in 2010 and began the cleanup and redevelopment process. Cleanup addressed underground storage tanks on the property. After a \$21 million renovation, the property was reopened as the Bradenton Hampton Inn and Suites.
Bradenton Gas Plant	Bradenton	Metals, PAHs, SVOCs, VOCs	The property was a manufactured gas plant (MGP) from 1926 until 1952. Approximately 6,859.58 tons of MGP-impacted soil was excavated, and 52.6 gallons of free product was recovered from the groundwater from 1996 to 2014. A BSRA was executed in December 2013 and amended in May 2017. A CSRCO was issued in May 2017.
Former Wellcraft Marine	Sarasota	Acetone, isopropyl alcohol, 2-butanone, and methyl isobutyl ketone	The property was a fiberglass boat manufacturing facility from 1983 to 2007. Following an acetone release from a faulty underground transport pipe in 1993, groundwater extraction and treatment system operated from 1998 to 2015. The site closed with conditions in late 2017 following completion of natural attenuation monitoring. The site continues to be used for marine component manufacture by the former PRFBSR.
The Addison Green Reuse Area	Bradenton	Arsenic, Benzo(a)Pyrene	The property was historically used as a fruit packing facility, freight depot, oil refinery, feed mill, and fabrication shop from 1922 until approximately 1980. The property has remained vacant until present day. Contaminants were identified in soils above SCTLs. The removal of the affected soils commenced, and the site was issued a SRCO on May 9, 2018.
Riverside North	Palmetto	Mercury, BaP-EQ, PAHs	This site was formerly residential, an assisted living facility, and a motel. Groundwater exceedances were discovered in 2012 and 2016. Mercury contaminated soil was excavated in August 2017. A SRCO was issued on November 26, 2018.
MARION			
Former White's Meat Packing Facility	Ocala	Petroleum, Unknown Hazards	After the owner deeded the property to the City of Ocala, several unregistered underground storage tanks containing petroleum products and more than 30 55-gallon drums of unknown substances were removed. The property is now home to a multi-level office complex.
MIAMI-DADE			
St. Martin's Place	Miami	Polycyclic Aromatic Hydrocarbons	SRCO was issued December 2014. There are restrictions on the use of groundwater based on contamination originating from the former Biscayne Chemical facility, located to the northeast. The site is being developed into multifamily, transit-oriented, affordable housing.
Mandy's Market, LLC	Miami	Petroleum	The site had petroleum groundwater contamination from a former UST. Groundwater monitoring resulted in an NFA with Conditions in May 2016. After completion of groundwater monitoring and execution of a DRC, the site received a SRCO in September 2017. The site was redeveloped as a Family Dollar store.
NW 62 nd Street Passive Park Green Reuse	Doral	Arsenic	This was formerly a vacant site with historical evidence of dumping. Contaminated soil was removed from the site in 2016. A SRCO was issued on July 25, 2018. This site will become a stormwater retention area and community park.

Florida Brownfields Redevelopment Program, 2019-2020 – Annual Report

SITE	CITY	COMTAMINANTS	SUMMARY
Doral Legacy Parks Sports & Wellness	Doral	Arsenic	This was formerly a vacant site with naturally occurring arsenic due to muck. Contaminated soil was removed from the site in 2017. A SRCO was issued on December 10, 2018. This site is now a community center complex.
Beacon Lakes	Miami	Polycyclic Aromatic Hydrocarbons, Arsenic, Petroleum Hydrocarbons	A BSRA was executed for the site in 2003 following solid waste and source removal. A SRCO was issued in 2012. The redevelopment consists of a business park with warehouses, office buildings and retail space.
AR&J SOBE	Miami Beach	Petroleum Contaminants, Metals	The property, which previously served as a car dealership, auto repair facility and gas station is now an \$80 million, three level retail space with six levels of parking. A BSRA was executed in 2000 and a CSRCO was issued in 2012.
Siegel Gas and Oil Corp.	Miami	Petroleum Hydrocarbons, Polycyclic Aromatic Hydrocarbons, Volatile Organic Compounds	Soil and groundwater contamination were documented at the bulk storage tank facility during the removal of eight above-ground storage tanks. Approximately 2,500 tons of soil were removed, and the exposed groundwater treated. Post-active remediation was completed in 2011 and the site was closed without conditions later that year.
Wagner Square	Miami	Incinerator Ash, Metals, Dioxins/Furans	The property was purchased by Wagner Square in 2004 and a BSRA was executed later that same year. Source removal consisted of 15,863 tons of soil and ash. Redevelopment began in 2008.
ORANGE			
400 North Orange	Orlando	Benzo(a)pyrene	The land was purchased by Rida Development Corp. in 2008. From spring 2013 to fall 2014, more than 21,000 tons of soil were removed. SRCOs were issued in July 2013 (North Parcel) and December 2014 (South Parcel). The property is slated for development along the SunRail corridor.
Mills Park	Orlando	Polycyclic Aromatic Hydrocarbons, Arsenic	This former 12-acre lumber yard is now occupied by retail, restaurant, medical, general office and residential space. In 2012, more than 11,000 tons of soil were removed while a BSRA was negotiated. An unconditional SRCO was issued in December 2012.
Future Dr. Phillips Orlando Performing Arts Center	Orlando	Polycyclic Aromatic Hydrocarbons	Contamination was discovered on the 3.1-acre site in 2008. The City of Orlando entered into a BSRA in 2009 and 7,197 tons of soil were removed. An unconditional closure was approved in 2011 and the \$274 million Performing Arts Center opened in 2014.
Baratta ROCC	Apopka	88,000 Buried Tires	After discovering buried tires during the early stages of site preparation, the developer signed a BSRA in 2007 and the tires were removed by the end of the year. DEP approved closure of the site in May 2008. The developer's plans include turning the property into a brightfield.

SITE	CITY	CONTAMINANTS	SUMMARY
Former Grey Truck Line Property	Winter Garden	BTEX and PAHs	The property was the former maintenance facility for Grey Line Trucking, closing in 1990. Following a free product recovery via vacuum removal and capping of the former UST area, and 3 years of groundwater monitoring, a DRC was finalized in early 2017 and a SRCO was issued in July 2017.
Sunterra Site	Orlando	Hydraulic Oils	Sunterra Corp. purchased the property, which at one time was a retail and automotive service center. Eight hydraulic lifts were removed along with the associated contaminated soils after the company entered into a BSRA with DEP.
Toho Square	Kissimmee	Petroleum, Pesticides	The site was used as a vehicle maintenance, auto body repair facility, and fertilizer storage facility from approximately 1920 to 1971. The BSRA was executed in November 2016. A total of 10,183.57 tons of contaminated soil were removed and a SRCO was issued in April 2017. Future use of the site will be a municipal parking garage, townhomes, and flats.
Bonita Fountains	Orlando	Arsenic	The site was formerly used as a golf course and appears to have undergone development as a golf course in the late 1960s. A BSRA was executed in December 2009. Over 41,000 tons of contaminated soil were removed from the site over time. Groundwater at the site is deed restricted for the property. The CSRCO was issued in July 2016.
Maitland City Centre	Maitland	Chlorinated Solvents	The site was a former dry cleaners with a release of dry cleaning solvents. A BSRA was issued in December 2015. A CSRCO for groundwater was issued in June 2017. Future use of the site will be a 244-unit apartment complex, 35,000 square feet of shops, restaurants, and offices, and a parking garage.
Orlando City Soccer	Orlando	Petroleum and Metals	This site had approximately five former gasoline and automotive repair facilities, a City of Orlando fire station, and a retention pond. The BSRA was executed in December 2014 listing one brownfield site ID for three separate areas of concern. 17 tons of metals-contaminated soil and 4,031 tons of petroleum-impacted soil were excavated, and the petroleum groundwater contamination was remediated. The Orlando City Soccer Stadium was opened in March 2017. The SRCO was issued in April 2017.
PALM BEACH			
BrandsMart	West Palm Beach	Arsenic	Former Palm Beach Lakes Golf Course. The city of West Palm Beach designated the abandoned property as a Brownfield area in July 2001. A partial Restrictive Covenant was recorded in December 2001 to legally cap the site. The BrandsMart site was completed in 2002. The RC/IC was recorded in February 2016 and a CSRCO issued in March 2016.
DR Lakes Multifamily Northside	West Palm Beach	Arsenic	Also part of the former Palm Beach Lakes Golf Course. Developed into a 264-unit affordable housing project and was completed in 2005. After the recession, Natural Attenuation Monitoring commenced, and the site was remediated below levels to be issued a SRCO in September 2015.

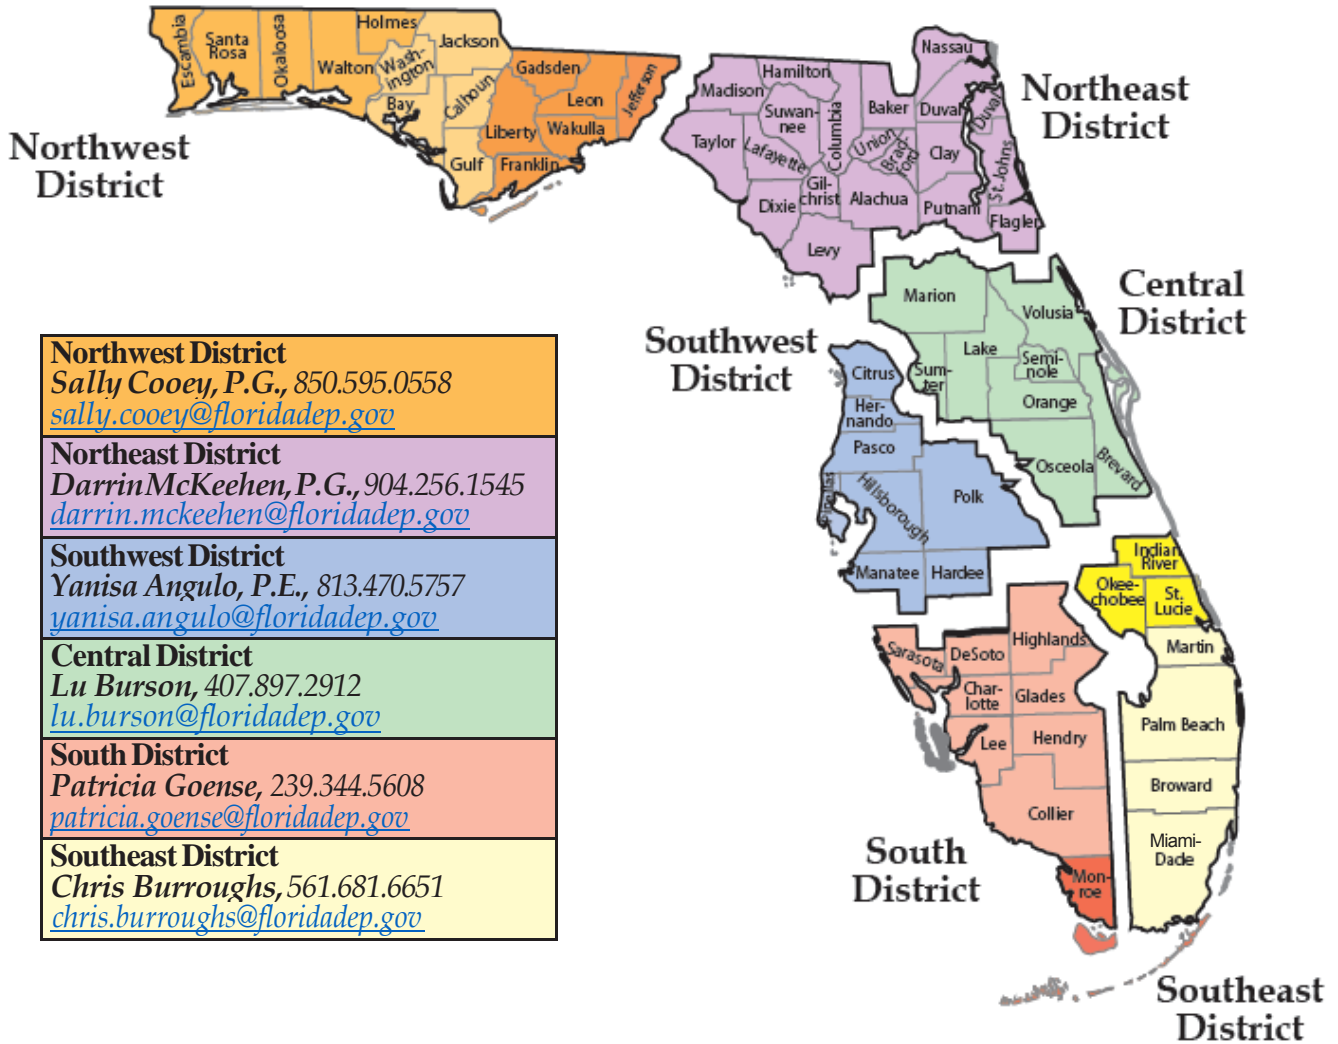

SITE	CITY	CONTAMINANTS	SUMMARY
Delray Beach CRA Site	Delray Beach	Arsenic, Metals, Pesticides, PCBs	Homes built over a former unregulated dump. Many homes experienced drastic settling in the past 20 years. Contamination was discovered in the soils and groundwater. Delray Beach Community Redevelopment Agency designated 2.4 acres a Brownfield Area in 2007 after purchasing the property. Removal of homes and source materials was completed in 2008. Unconditional SRCO issued in November 2014.
Pahokee Properties	Pahokee	Arsenic	Contamination on the property was found to be the result of agricultural operations predating the retail development of the site in the 1980s. Soils were removed from ‘hot spots’ and a deed restriction instituted. The property currently awaits development.
Former Waste Facility	Delray Beach	Petroleum and Diesel	This site was used as the County Sanitation facility and operated as an administrative center and maintenance/storage depot for vehicles and containers used in the collection and transportation of solid waste. A SRCO was issued in February 2019. Redevelopment is pending.
PINELLAS			
Dansville North	Largo	Arsenic, Polycyclic Aromatic Hydrocarbons	This property is part of a three-site (north, south, central) redevelopment in Pinellas County known as the Dansville Redevelopment. During a 1997 Phase I, various debris was found including 55-gallon drums, paint containers, household garbage, automotive fuel tanks, tires, and C&D debris. Source removal performed in 2011 and groundwater monitoring program conducted in 2012 to confirm groundwater had not been affected. A Restrictive Covenant was recorded in January 2016 along with a CSRCO. The property is currently vacant.
Dansville Central	Largo	Benzo(a)pyrene, Dieldrin	A Phase II in 2003 revealed arsenic, lead, BaPs, and dieldrin. A site assessment in June 2011 confirmed soil contaminated with dieldrin and BaPs above SCTLs, however arsenic and lead contamination was no longer present. The county chose to close the site with a CSRCO. A Restrictive Covenant was recorded and a CSRCO was issued in September 2015.
Dansville South	Largo	Arsenic and Benzo(a)pyrene	Brownfield Area Designation executed in August 2008 and a BSRA in June 2010. Over 6,600 tons of contaminated soil and debris were removed. CSRCO was issued in April 2015. Contamination remains above Residential SCTLs but below Commercial SCTLs. Institutional controls are in place and the site is ready for commercial redevelopment.
Community Waterfront Park	St. Petersburg	Petroleum, Arsenic	The City of St. Petersburg transformed a former marine construction company site into a community waterfront park. Petroleum remediation included dewatering with groundwater treatment to support soil removal. A conditional site closure was completed in Sept 2010.
Dimmit Parcel B	Clearwater	Volatile and Semi-Volatile Organic Compounds, Metals	After many years of automotive-related businesses occupying the site, the City of Clearwater purchased the property in 1999. Contaminated soils were removed, and groundwater cleanup was completed in 2009. DEP approved an unconditional closure for the property and it currently awaits development.

SITE	CITY	CONTAMINANTS	SUMMARY
Clearwater Automotive	Clearwater	Metals, Polycyclic Aromatic Hydrocarbons	After hosting a variety of businesses, this site was operated as the Clearwater Automotive salvage yard from 1981-2005. The City of Clearwater purchased the property and a BSRA was executed. Cleanup was completed in 2009 and the property is ready for development.
Former Clearwater Sun Property	Clearwater	Arsenic, Petroleum	The Clearwater Sun operated a printing and publishing facility on the property. After assessment and remediation, a conditional closure was issued in 2007. The original building was left in place and renovated. The site now contains an industrial equipment supply company.
Community Health Center	Clearwater	Petroleum	After acquiring a rundown former gas station, the City of Clearwater assembled a community group with knowledge of the Program. Along with underground storage tanks and hydraulic lifts, 450 tons of soils were removed. A community health resource center now occupies the site.
Former Countryside Executive Golf Course	Clearwater	Arsenic, Pesticides	The site was formerly operated as a golf course between the mid 1970's to 2005. Site assessment beginning in 2004 found impacts to soil and groundwater. A total of 1,626.81 tons of impacted soil were removed in July 2015. A BSRA was executed in May 2016. A CSRCO was issued in November 2016.
Ulmerton & 66 th	Largo	Nickel, Chromium	The property was a metal bumper recycling and restoration facility from the late 1960s to 1995. Excavation of 3,542 tons of impacted soil was completed in September 2016. A BSRA was executed in December 2016. A CSRCO was issued in June 2017. When complete, the commercial redevelopment will include more than 16,000 square feet of commercial space.
POLK			
Bartow Cigar Factory	Bartow	Arsenic	The building was constructed in 1925 for the Cuban American Cigar Corp. Phase I and Phase II assessments were completed in June 2011 and August 2011, respectively. A Source Completion Report in October 2015 indicated that 16.4 tons of soil were removed, and samples taken from the perimeter of the excavation identified no arsenic above laboratory detection limits. An Unconditional SRCO was issued in December 2015.
PUTNAM			
Bill Ding Avenue	Palatka	Petroleum Hydrocarbons	After contamination was discovered by the property owner and a BSRA executed, remediation began. The remediation resulted in a significant reduction of the plume size to an area measuring 0.18 acres. Redevelopment is currently being planned.
SARASOTA			
Lowe's of NE Sarasota	Sarasota	Arsenic	Lowe's purchased the former sprayfield and discovered arsenic in the soils and groundwater. Groundwater assessment and cleanup continued after development was complete. A SRCO was issued in 2013. The development created approximately 175 jobs.

SITE	CITY	CONTAMINANTS	SUMMARY
SEMINOLE			
Lowe’s of Fern Park	Fern Park	Petroleum Constituents	After the property was purchased by Lowe’s, contamination associated with the former car maintenance facility was discovered. Two above-ground storage tanks, one underground storage tank, three hydraulic lifts and 73.2 tons of soils were removed. Completion of the project resulted in 125 jobs.
Former Central Florida Drum	Winter Springs	Chlorinated solvents, pesticides, metals, BaP, and PCB	Historical discharges resulting from operations associated with drum refurbishing and a landscaping business onsite. A DRC was recorded on May 2, 2019, and a CSRCO was issued the same day. Further plans are for single family residential homes.
Sandefur Site	Sanford	Arsenic	Seminole County purchased the property for construction of the Midway Elementary School of the Arts. Contamination in site soils was discovered prior to development. The soils were excavated, and the site was closed without conditions in 2009. The school opened in 2010.
ST. LUCIE			
Former H.D. King Power Plant, Parcels 2 and 3	Ft. Pierce	Benzo(a)pyrene, Benzo(a)anthracene, Arsenic, Chromium	This former power plant was comprised of three parcels. A separate BSRA was executed for each parcel due to three separate contamination sources. Parcels 2 and 3 both contained contaminated soils but not groundwater. Each parcel received an unconditional SRCO in July 2013.
1150 South Federal Highway	Ft. Pierce	Petroleum Contaminants	Groundwater contamination was found on the property, and after ownership changed, the new owner elected to perform voluntary cleanup. Source removal and groundwater remediation were conducted. The site received an unconditional closure in November 2011.
H.D. King Power Plant, Parcel 1	Ft. Pierce	VOCs, PAHs, PCBs, and others	The site was a 131-Megawatt electric generating plant that was decommissioned prior to December 2007. The facility was demolished from May 2008 to October 2009. A DRC was recorded in March 2018 to address potential groundwater exposure scenarios. A CSRCO was issued in May 2018.
VOLUSIA			
Country Club Crossing	DeLand	Dieldrin	The approximately 105-acre site was abandoned after the golf course closed in 2012. Soil and groundwater contamination found at the site was attributed to historic turf management operations on the property. A BSRA was signed December 2013. Assessment and cleanup was completed in less than two years and DEP issued a SRCO November 2015. The site has been redeveloped into a mixed-use project featuring a Publix-anchored shopping center, a 155-unit single family home community, a proposed office and assisted living facility, and open space

SITE	CITY	CONTAMINANTS	SUMMARY
ERAU Former Bus Depot	Daytona Beach	Petroleum, Arsenic, Landfill Debris	Former bus depot and maintenance area property acquired by ERAU. A BSRA was executed in October 2014. Excavation and offsite disposal of soil and solid waste materials was completed in March 2015. SRCO without Conditions issued in July 2015. The redevelopment project, called ERAU Research Park West, is slated to include a university research facility, a state-of-the-art subsonic wind tunnel facility, multiple airplane hangars, and a runway extension from the Daytona Beach International Airport.
Former Tire Kingdom	Daytona Beach	Petroleum Hydrocarbons	A BSRA was signed and executed for the property in December 2014. A SRCO was issued for the site in December 2015. The site is now being redeveloped into a 4000-square foot Kentucky Fried Chicken restaurant with 40-45 employees.
Williams Square	Daytona Beach	Arsenic	The site consists of two parcels and both entered into a BSRA under separate owners in 2007. The soils were excavated, and the groundwater was treated to help with remediation. A SRCO was issued in 2014 and the new mixed-use development is scheduled to open in 2015.
Indian River Glass	New Smyrna Beach	Petroleum	Indian River Glass was planning a business expansion when soil and groundwater contamination was discovered. A previously unknown underground storage tank was discovered near the edge of a dry retention pond. A BSRA was executed in 2009 and an unconditional closure approved in 2010 following cleanup.
Embry-Riddle Aeronautical University	Daytona Beach	Arsenic	Groundwater contamination was discovered on the 77.6-acre property, owned by Embry-Riddle Aeronautical University, following an assessment. The University entered into a BSRA with DEP to address the contamination and the site was closed without conditions in 2010.
