

**Florida County & Municipal
Economic Development Incentives:
Local Fiscal Year 2019-20 Report
Based on 2021 Survey Responses**

**A Summary of County and Municipal Government Responses
to the Reporting Requirements Outlined in
Sections 125.045 and 166.021, Florida Statutes**

March 2022

**The Florida Legislature's
Office of Economic and Demographic Research**

Reporting Requirements

During the 2010 Regular Session, the Florida Legislature enacted Committee Substitute for Senate Bill 1752 related to economic development, which was codified as Chapter 2010-147, Laws of Florida. The law amended sections 125.045 and 166.021, Florida Statutes, to impose new economic development reporting requirements on county and municipal governments.

The law requires the following:

- An agency or entity that receives county or municipal government funds for economic development purposes pursuant to a contract between the economic development agency/entity and the local government to submit a report on the usage of the local funds. It also requires the county or municipal government to post a copy of that report on its own website.
- County and municipal governments that grant economic development incentives in excess of \$25,000 to report the amount and types of incentives to the Florida Legislature's Office of Economic and Demographic Research by January 15 of every year.
- The Office of Economic and Demographic Research to compile the economic development incentives provided by each local government in a manner that shows the total of each class of economic development incentives provided by each local government.

This report also includes local economic development incentives granted by Community Redevelopment Districts (CRAs), which are county or municipal dependent special districts. As such, each CRA is treated as a component unit of its governing county or municipality. These governments include separate figures for their respective CRAs as part of the Annual Financial Reporting requirements. Therefore, CRAs fall within the purview of the statutes regarding local government economic development incentive reporting. However, for ease of reporting and to maintain consistency with prior reports, EDR treats them separately. EDR issues a stand-alone survey to all CRAs, using the same four categories required for counties and municipalities, thus preserving the time series from prior years as well as enabling the results to be combined for full reporting.

EDR compiled the reported LFY 2019-20 economic development data that were submitted by county and municipal governments and their dependent district CRAs. Based on those submissions, this report includes (1) the total of each class of economic development incentive granted by individual entities, and (2) the cumulative totals of each class of economic development incentives for county governments, municipal governments, and CRAs. Pursuant to law, copies of this report are provided to the President of the Senate, the Speaker of the House of Representatives, and the Department of Economic Opportunity. Additionally, this report is posted to the EDR's website.¹

Background

Population growth is typically the state's primary engine of economic growth, fueling both employment and income growth. Florida's population growth is forecast to average 1.41% annually between 2021 and 2025, which is double the average annual growth nationally. Net migration is projected to represent all of Florida's population growth through 2040 as natural increase is expected to remain negative.² Population growth in isolation naturally attracts those businesses that are market dependent. These are projects where

1. <http://edr.state.fl.us/Content/local-government/reports/index.cfm#incentives-report>

2. Office of Economic and Demographic Research, *Florida: An Economic Overview* (February 17, 2022) available at http://edr.state.fl.us/Content/presentations/economic/FIEconomicOverview_2-17-22.pdf

the principal reason for a new business to move to Florida or for an expansion of an existing business is that their expected clients will be primarily or solely based in Florida. The amplified boost to the economy that comes from exported products and services is not due to these types of businesses. For this reason, governments may seek to alter the natural path of the economy through active intervention.

The scholarly definition of economic development is much broader than generally understood in practice. It is the active government pursuit of economic growth and improvements in terms of population, gross domestic product, output, tax base, jobs, wages, per capita income, capital investments, and the overall well-being of citizens. Applying this definition, Florida's economic growth is affected by nearly everything state and local governments do—from public school funding to road-building to the regulation of a specific industry. Ideally, economic growth is boosted by key government investments in public infrastructure and resources, provision of desired public services such as quality education and publicly-accessible research at universities, development of a technologically strong workforce, promotion of community development, and general improvement of the business climate. These investments also constitute economic development.

While the array of potential strategies is broad, the approaches favored by many local governments have tended to target the expansion of capital investment and the creation of new job opportunities (preferably at above-average wages) at the business level. In this regard, the focus is on new business activity that brings new wealth, which when spent in the economy, induces the creation of additional jobs. To the extent this goal is achieved, the tax base is expanded, and governments may realize an increase in tax revenues.

Often, a cornerstone of these local strategies is the direct or indirect provision of economic development incentives to individual businesses. Incentives are public subsidies intended to induce an economic activity or capital investment by a private business in a jurisdiction in which such activity or investment would not otherwise take place. From the business perspective, economic development incentives are cash or other financial infusions that reduce capital or operating costs and may facilitate location or expansion decisions. This report analyzes all incentives of this nature that are provided by local governments in Florida.

Economic Development Incentives

To the extent granted or unrestricted by state law, counties and municipalities have authority to promote economic development in their jurisdictions through a variety of strategies.³ Since 1995, state law has provided explicit authority for counties and municipalities to “expend public funds to attract and retain business enterprises, and the use of public funds toward the achievement of such economic development goals constitutes a public purpose.”⁴ This authority also includes “making grants to private enterprises for the expansion of businesses existing in the community or the attraction of new businesses to the community.”

Part III of Chapter 163, F.S. authorizes counties and municipalities to create a Community Redevelopment Agency (CRA), a dependent special district, to carry out redevelopment of designated slum or blighted areas. Funding for CRAs is generated through Tax Increment Financing (TIF), by which the taxable value of property within the area is fixed at a certain date and the subsequent annual increment increase in tax

3. See Article VIII, Sections 1 and 2 of the State Constitution, which provides expansive home rule authority to Florida counties and municipalities. Statutory preemptions and charter limitations impose limitations on this authority. In addition, Article VII, Section 1 of the State Constitution preempts all taxing authority (with the exception of ad valorem taxes) to the state.

4. See sections 125.045, F.S., and 166.021(8), F.S.

revenue to the county and municipality from the redevelopment area is deposited in a trust fund. These diverted property tax revenues are used to fund initiatives by the CRA. Redevelopment may also be financed by revenue bonds issued by the county or municipality on behalf of the CRA.⁵

CRA funds are used to pay administrative expenses related to redevelopment efforts; to acquire property; to pay for improvements to public infrastructure; to develop affordable housing and community policing innovations; and to subsidize festivals and other community entertainment events. Some CRAs offer multi-year grants to developers of privately owned property per development agreements, typically calculated as a percentage of the increment increase in property taxes generated by improvements to the property.⁶ In addition, a number of municipalities have reported that their CRAs function as their economic development entities.

For the annual survey and report, local government economic development incentives are classified by statute into the following four general types:

- Direct financial incentives to businesses.
- Indirect financial incentives benefiting businesses.
- Tax-based and fee-based incentives to businesses.
- Below-market rate leases or deeds for real property given to businesses.

To the extent that local governments expend funds or forego revenue through these means, they qualify as economic development incentives for the purposes of this report.

5. The Florida Redevelopment Association offers this description:

Tax increment financing is a unique tool available to cities and counties for redevelopment activities. It is used to leverage public funds to promote private sector activity in the targeted area. The dollar value of all real property in the Community Redevelopment Area is determined as of a fixed date, also known as the “frozen value.” Taxing authorities, which contribute to the tax increment, continue to receive property tax revenues based on the frozen value. These frozen value revenues are available for general government purposes. However, any tax revenues from increases in real property value, referred to as “increment,” are deposited into the Community Redevelopment Agency Trust Fund and dedicated to the redevelopment area. It is important to note that property tax revenue collected by the School Board and any special district are not affected under the tax increment financing process. Further, unlike in some states, Florida taxing entities write a check to the CRA trust fund, after monies are received from the tax collector. In California, the increment is sent to the CRAs directly out of collected county tax revenues, before they are distributed to each taxing entity. The tax increment revenues can be used immediately, saved for a particular project, or can be bonded to maximize the funds available. Any funds received from a tax increment financing area must be used for specific redevelopment purposes within the targeted area, and not for general government purposes. (See <http://redevelopment.net/cra-resources/q-a-for-cras/>)

6. While these may be referred to as a property tax refund programs, the CRA “refund” is more appropriately classified as a grant for the purposes of this report. TIF-generated funds are annually appropriated to fund CRA expenditures, whether debt service on revenue bonds or any other authorized expenditure. (see *Strand v. Escambia County* 2008, in dicta. <http://caselaw.findlaw.com/fl-supreme-court/1284657.html>) CRAs do not have authority to levy property taxes, and the statutes do not authorize them to “refund” such taxes. However, they can base their long-term contractual, performance-based incentive on the amount of taxes paid.

Direct Financial Incentives

Direct financial incentives provide monetary assistance to a business from the local government or through a local government-funded economic development organization. This assistance is provided through grants, loans, equity investments, loan insurance, and loan guarantees. These programs generally address business financing needs but may also provide funding for workforce training, market development, modernization, and technology commercialization activities. Direct financial incentives are generally project specific, contingent on pre-award review and evaluation, and typically performance-based.

Direct financial incentives also include local government contributions that are combined with state economic development incentives awarded by the Florida Department of Economic Opportunity or that are made in combination with other local governments.

Indirect Financial Incentives

Indirect financial incentives include grants and loans to local government entities, nonprofits, and organizations that are used to spur business investment or development. The recipients include communities, financial institutions, universities, community colleges, training providers, venture capital investors, and business incubators. In many cases, the funds are tied to one or more specific business locations or expansion projects. Other programs are used to address the general needs of the business community, including infrastructure, technical training, new and improved highway access, airport expansions, and other facilities. Funds are provided to the intermediaries in the form of grants, loans, and loan guarantees.

This type of incentive may also be used to leverage private investment in economic development. An example is linked deposit programs, in which local government funds are deposited in a financial institution in exchange for providing capital access or subsidized interest rates to qualified business borrowers. Indirect financial incentives may or may not be contingent on pre-award review of the benefitting business or businesses, depending on the nature of the project.

While many jurisdictions do business marketing and recruitment "in-house," some contract with a private Economic Development Organization (EDO) or contribute dues to a regional EDO that provides these services to local governments across a defined region. It is arguable whether the dollars provided to EDOs for general marketing or promotional services actually qualify as indirect financial incentives to businesses; however, such second-party marketing expenditures constitute a significant portion of reported local government economic development efforts, and the law requires their inclusion. For these reasons, the funds are identified and included in the report.

Tax-Based and Fee-Based Incentives

Tax-based incentives use the tax code as the source of direct or indirect subsidy to qualified businesses. They tend to have longer lifespans and be less visible than direct financial or indirect financial incentives because they do not require an annual appropriation. In most instances, tax-based incentives are awarded upon verification of eligibility and may not be subject to pre-award review and evaluation like direct financial incentives.

Florida's counties and municipalities are limited in their ability to offer tax-based incentives, either for economic development or other purposes. With the exception of ad valorem taxes, Florida's Constitution preempts all taxing authority to the state. Local taxes authorized by the constitution or by the Legislature

may only be levied pursuant to the specifications of the governing statute. Unless specifically authorized, relief from these local taxes (credits, exemptions, or refunds) may not be granted.

Of all the local taxes, county or municipal governments are only authorized to offer relief (i.e., tax exemptions) for the following three taxes:⁷

- Economic Development Ad Valorem Tax Exemption: Article VII, Section 3 of the State Constitution and section 196.1995, F.S., authorize counties and municipalities to grant, after referendum approval and passage of an ordinance, ad valorem tax relief from its respective levy to new or expanding businesses that meet certain job-creation and other requirements. The exemption is limited to ten years and may be restricted to businesses located in an enterprise zone or brownfield area. In addition, the exemption is contingent on pre-award review and evaluation and approval by ordinance.⁸
- Local Business Tax: Chapter 205, F.S., authorizes counties and municipalities to grant exemptions from the local business tax to a variety of specified individuals or businesses.⁹
- Public Service Tax: Sections 166.231–.234, F.S., authorize municipalities and charter counties to grant exemptions from the tax on certain utilities in specific situations.¹⁰

Fee-based incentives use “Home-Rule” revenues as the source of direct or indirect subsidy to qualified businesses. Unless limited by law, county and municipal governments have broad authority to levy proprietary fees, regulatory fees, and special assessments within their jurisdictions. Further, unless restricted by law or contract (e.g., bond provisions), local governments may also grant exemptions or waivers or provide refunds or credits from these levies, either as an economic development incentive or for any other purpose. Examples include Proprietary Fees such as admissions fees, franchise fees, user fees, and utility fees, or Regulatory Fees such as include building permit fees, impact fees, inspection fees, and stormwater fees. While they may be collected like property taxes, special assessments are also included as they are “based on the special benefit accruing to such property from such improvements when the improvements funded by the special assessment provide a benefit which is different in type or degree from benefits provided to the community as a whole.”¹¹

7. Exemptions provide freedom from payment of taxes normally applied to specific business activities. Exemptions are technically distinguishable from credits (which provide a reduction in taxes due after verification that statutory or contractual terms have been met) and refunds (which typically provide a return of taxes paid after verification that statutory or contractual terms have been met).

8. The Florida Enterprise Zone program was repealed on December 31, 2015: (Section 290.016, F.S.). For purposes of the Economic Development Ad Valorem Tax Exemption, in 2016 the Legislature clarified that notwithstanding the repeal of the Enterprise Zone program, counties and cities may continue to grant exemptions enacted before the repeal to qualified businesses in the zone. (Sections 2-4, Chapter 2016-220, L.O.F.)

9. Section 205.054, F.S., authorized counties and municipalities to grant a general exemption of 50 percent for “any business, profession or occupation” with a permanent business location in an Enterprise Zone. However, this exemption was repealed on December 31, 2015, with the expiration of the Florida Enterprise Zone Act. (Sections 290.016 and Section 205.054(6), F.S.)

10. Section 166.231(8) authorized a Public Service Tax exemption for certain purchasers of electrical energy in Enterprise Zones who are also eligible for the electrical energy sales tax exemption under s. 212.08(15), F.S. Both exemptions expired upon the repeal of the Enterprise Zone program. (Sections 290.016, F.S. and 166.231(8)(c), F.S.)

11. Section 170.01(2), F.S.

Below Market Leases or Deeds for Real Property

Below market leases or deeds may be awarded to businesses as an incentive to remain, expand, or locate in a jurisdiction. These can be provided either directly by the local government or indirectly through an organization authorized by the local government.

Other Strategies

Federal and state law provide counties and municipalities with other strategies to facilitate economic or community development in their jurisdictions. Historically, the following programs have not been included in the EDR survey:

- Industrial Development Authorities (IDAs).¹²
- Community Development Districts (CDDs).¹³
- Small Business Development Centers (SBDCs).¹⁴
- Federally funded programs, such as Community Development Block Grants (CDBG),¹⁵ Small Business Innovation Research (SBIR) grants, Small Business Technology Transfer (STTR) grants, or grants funded by the U.S. Department of Housing and Urban Development (HUD).

In all prior reports, these programs were not classified as local economic development incentives. In 2017, EDR reviewed these programs to determine whether it would be appropriate to include related expenditures in the annual survey. The following summarizes EDR's conclusions:

- Industrial Development Authorities (IDAs) are dependent special districts and Community Development Districts (CDDs) are independent special districts. Unless the responding municipality or county gave local funds directly to an IDA or CDD for economic development purposes, their activities would not be included. In the cases where the IDA or CDD did receive local funding from a municipality or county for the purpose of economic development, those funds should be reported as indirect financial incentives.
- Small Business Development Centers (SBDCs) should be treated as any other recipient of local economic development funds. In all instances where the SBDC did receive local funding from a municipality or county for the purpose of economic development, those funds should be reported as indirect financial incentives.
- Federally funded programs generally do not rely on the specific economic development authority provided under section 125.045, F.S., or section 166.021(8), F.S., for the expenditure of these funds at the local level. Instead, they fall under the general authority and home rule powers

12. As authorized by Part III of Chapter 159, F.S., an Industrial Development Authority (IDA) can be created for the purpose of financing and refinancing projects for the public purposes described in, and in the manner provided by, the Florida Industrial Development Financing Act (i.e., Part II of Chapter 159, F.S.). This includes fostering a county's economic development goals. IDAs are authorized to secure the issuance and repayment of industrial development bonds by a lease, mortgage, or other security instrument, subject to the county commission's approval. According to the Florida Department of Economic Opportunity's Special District Accountability Program, there were 23 active IDAs in Florida, as of January 27, 2022. (See <http://specialdistrictreports.floridajobs.org/webreports/criteria.aspx>)

13. Chapter 190, F.S.

14. While SBDCs may provide services to expanding or relocating businesses targeted by local governments, their mission is more comprehensive - serving the general business community. (See <http://floridasbdc.org/> for additional information.)

15. The U.S. Department of Housing and Urban Development distributes CDBG funding to Florida's local governments, either directly or indirectly through the state, to fund projects that develop viable communities by providing adequate housing and suitable living environments by expanding economic opportunities, principally for persons of low and moderate income.

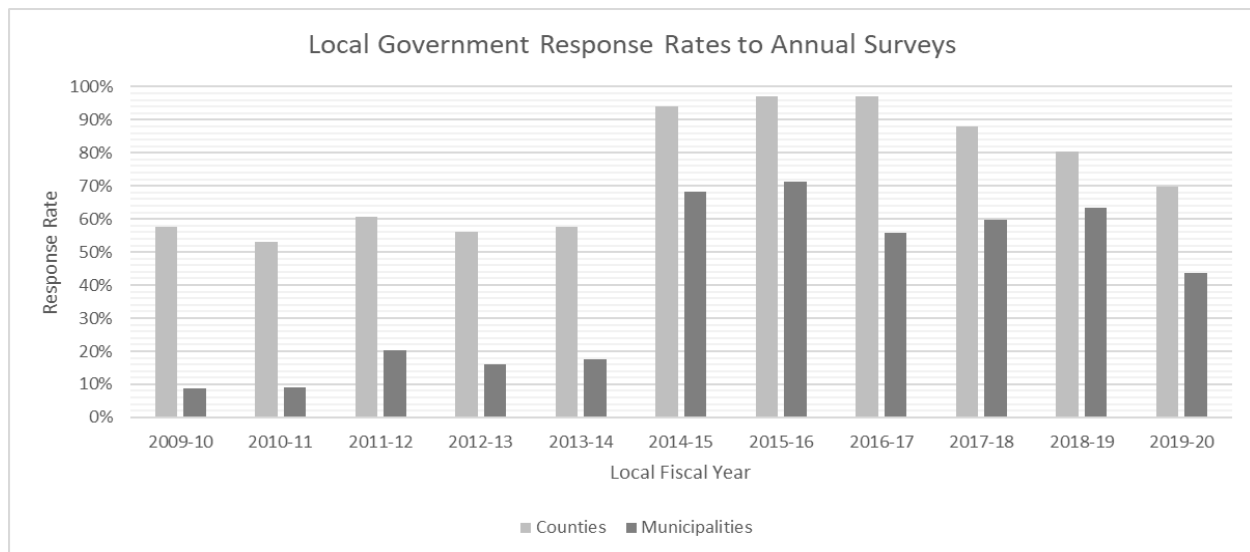

provided by the Florida Constitution and section 125.01, F.S., and section 166.021, F.S. As such, these funds should continue to be excluded from the report.

Survey Methodology and Results

This report provides an analysis of the survey responses received from county and municipal governments and CRAs. Local officials received communications from or on behalf of EDR, which provided an explanation of the statutory requirement and instructions for completing the online survey questionnaire. Additionally, a copy of the survey questionnaire in PDF was included with the email for local officials to review.

EDR provided access to the online survey through its website.¹⁶ Consequently, all of these local government entities were notified of the statutory reporting requirements and given multiple opportunities to complete and submit a survey response. Of the local entities invited to report economic development incentives granted during the 2019-20 fiscal year, a total of 295 (i.e., 46 counties, 180 municipalities, and 69 CRAs) completed the survey questionnaire.

This report marks EDR's eleventh summary of local government responses to annual economic development incentive surveys. As illustrated in the chart, the response rates have varied dramatically over time but have been declining in recent years.

County Governments

Forty-six of 67 county governments responded to this year's survey for a response rate of 69 percent. Of the 46 county governments that responded, 36 counties, or 78 percent, reported the following economic development incentives totaling \$85,425,065.

- Direct financial incentives: \$37,310,994 or 44 percent.
- Indirect financial incentives: \$22,998,733 or 27 percent.

16. <http://edr.state.fl.us/Content/local-government/economic-development-incentives/index.cfm>

- Tax-based and fee-based incentives: \$23,407,887 or 27 percent.
- Below-market rate leases or deeds for real property: \$1,707,451 or 2 percent.

Ten, or 22 percent, of the 46 responding counties reported that no incentives were granted or that incentives totaled less than the minimum reporting threshold of \$25,000. Twenty-one counties did not submit a survey response.

The following series of tables and charts summarize the reported economic development incentives by type granted by county governments during the 2019-20 fiscal year. The total number of businesses or entities receiving incentives by type are not summed since it is possible that a business or entity may receive more than one type of incentive from the same county.

County Governments - Total Incentives by Type					
Incentive Type	Number of Counties Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Direct Financial	28	\$ 37,310,994	43.7%	1,013	\$ 36,832
Indirect Financial *	24	\$ 22,998,733	26.9%		
Tax-Based and Fee-Based	18	\$ 23,407,887	27.4%	259	\$ 90,378
Below Market Rate Leases or Deeds for Real Property	3	\$ 1,707,451	2.0%	6	\$ 284,575
Total	36	\$ 85,425,065	100.0%		

* Indirect financial incentives provide monetary assistance to third parties to support business assistance, development, or recruitment. The number of businesses receiving such assistance are not recorded on this survey.

County Governments - Direct Financial Incentives					
Direct Financial Incentives	Number of Counties Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Grants	23	\$ 25,279,521	67.8%	697	\$ 36,269
Loans	3	\$ 5,690,745	15.3%	203	\$ 28,033
Equity Investments	0	\$ -	0.0%	0	\$ -
Loan Insurance	0	\$ -	0.0%	0	\$ -
Loan Guarantees	0	\$ -	0.0%	0	\$ -
Training Subsidies	1	\$ 250,000	0.7%	1	\$ 250,000
Local Match (QTI, QACF, etc.)	19	\$ 3,673,489	9.8%	98	\$ 37,485
Other	6	\$ 2,417,239	6.5%	14	\$ 172,660
Total	28	\$ 37,310,994	100.0%		

County Governments - Indirect Financial Incentives					
Indirect Financial Incentives	Number of Counties Granting Incentives	Total Amount Granted	Percent	Number of Entities Receiving Incentives	Average Incentive Per Entity
Grants	12	\$ 11,362,271	49.4%	68	\$ 167,092
Loans or Loan Guarantees	1	\$ 120,886	0.5%	1	\$ 120,886
Value of Contract With or Dues Paid to EDOs	19	\$ 9,697,069	42.2%	26	\$ 372,964
Appropriations to IDAs for Economic Development Purposes	0	\$ -	0.0%	0	\$ -
Appropriations to CDDs for Economic Development Purposes	0	\$ -	0.0%	0	\$ -
Appropriations to SBDCs for Economic Development Purposes	4	\$ 609,000	2.6%	4	\$ 152,250
Appropriations of Non TIF-generated Funds to CRAs	0	\$ -	0.0%	0	\$ -
Other	4	\$ 1,209,507	5.3%	7	\$ 172,787
Total	24	\$ 22,998,733	100.0%		

County Governments - Tax-Based and Fee-Based Incentives					
Tax-Based and Fee-Based Incentives	Number of Counties Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Property Tax Exemption for Economic Development	13	\$ 8,339,342	35.6%	88	\$ 94,765
Public Service Tax Exemption	0	\$ -	0.0%	0	\$ -
Business Tax Exemption	0	\$ -	0.0%	0	\$ -
Proprietary Fees (Credits, Refunds, Exemptions, Waivers, or Rate Differentials)	1	\$ 225,074	1.0%	1	\$ 225,074
Regulatory Fees (Credits, Refunds, Exemptions, or Waivers)	7	\$ 14,843,471	63.4%	170	\$ 87,315
Special Assessments (Credits, Refunds, Exemptions, or Waivers)	0	\$ -	0.0%	0	\$ -
Total	18	\$ 23,407,887	100.0%		

County Governments - Below-Market Rate Leases or Deeds for Real Property					
Below-Market Rate Leases or Deeds for Real Property	Number of Counties Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Below-Market Rate Leases for Real Property	3	\$ 1,707,451	100.0%	6	\$ 284,575
Below-Market Rate Deeds for Real Property	0	\$ -	0.0%	0	\$ -
Total	3	\$ 1,707,451	100.0%		

In the above chart, Other industries include aerospace, agribusiness, agriculture, applied science, aquaculture, aviation, bioscience, clean energy, defense, distribution, ecotourism, film, green industries, high tech, homeland security, life sciences, logistics, manufacturing, medical, sports and sports performance, tourism, and transportation.

County Governments Having Total Population of 100,000 or Greater

Municipal Governments

One hundred eighty of 411 municipal governments responded to the survey for a response rate of 44 percent. Of the 180 municipal governments that responded, 41 municipalities, or 23 percent, reported the following economic development incentives totaling \$19,734,338.

- Direct financial incentives: \$7,659,691 or 39 percent;
- Indirect financial incentives: \$7,106,199 or 36 percent;
- Tax-based and fee-based incentives: \$3,770,903 or 19 percent; and
- Below-market rate leases or deeds for real property: \$1,197,545 or 6 percent.

One hundred thirty-nine, or 77 percent, of the 180 responding municipalities reported that no incentives were granted or that incentives totaled less than the minimum reporting threshold of \$25,000. Two hundred thirty-one municipalities did not submit a survey response.

The following series of tables and charts summarize the economic development incentives by type granted by municipal governments during the 2019-20 fiscal year. The total number of businesses or entities receiving incentives by type are not summed since it is possible that a business or entity may receive more than one type of incentive from the same municipality.

Municipal Governments - Total Incentives by Type					
Incentive Type	Number of Municipalities Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Direct Financial	24	\$ 7,659,691	38.8%	667	\$ 11,484
Indirect Financial *	17	\$ 7,106,199	36.0%		
Tax-Based and Fee-Based	23	\$ 3,770,903	19.1%	1,595	\$ 2,364
Below Market Rate Leases or Deeds for Real Property	7	\$ 1,197,545	6.1%	15	\$ 79,836
Total	41	\$ 19,734,338	100.0%		

* Indirect financial incentives provide monetary assistance to third parties to support business assistance, development, or recruitment. The number of businesses receiving such assistance are not recorded on this survey.

Municipal Governments - Direct Financial Incentives					
Direct Financial Incentives	Number of Municipalities Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Grants	14	\$ 4,164,342	54.4%	551	\$ 7,558
Loans	3	\$ 326,928	4.3%	9	\$ 36,325
Equity Investments	1	\$ 80,323	1.0%	2	\$ 40,162
Loan Insurance	0	\$ -	0.0%	0	\$ -

Community Redevelopment Agencies (CRAs)

Of the 69 CRAs that responded to the survey, 31 of them, or 45 percent, reported the following economic development incentives totaling \$24,588,732.

- Direct financial incentives: \$16,764,595 or 68 percent.
- Indirect financial incentives: \$834,116 or 3 percent.
- Tax-based and fee-based incentives: \$332,452 or 1 percent.
- Below-market rate leases or deeds for real property: \$6,657,569 or 27 percent.

Thirty-eight, or 55 percent, of the 69 responding CRAs reported that no incentives were granted or that incentives totaled less than the minimum reporting threshold of \$25,000.

The following series of tables and charts summarize the reported economic development incentives by type granted by CRAs during the 2019-20 fiscal year. The total number of businesses or entities receiving incentives by type are not summed since it is possible that a business or entity may receive more than one type of incentive from the same CRA.

CRA - Total Incentives by Type					
Incentive Type	Number of CRAs Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Direct Financial	31	\$ 16,764,595	68.2%	369	\$ 45,433
Indirect Financial *	7	\$ 834,116	3.4%		
Tax-Based and Fee-Based	2	\$ 332,452	1.4%	2	\$ 166,226
Below Market Rate Leases or Deeds for Real Property	4	\$ 6,657,569	27.1%	30	\$ 221,919
Total	31	\$ 24,588,732	100.0%		

* Indirect financial incentives provide monetary assistance to third parties to support business assistance, development, or recruitment. The number of businesses receiving such assistance are not recorded on this survey.

CRA - Direct Financial Incentives					
Direct Financial Incentives	Number of CRAs Granting Incentives	Total Amount Granted	Percent	Number of Businesses Receiving Incentives	Average Incentive Per Business
Grants	28	\$ 9,054,936	54.0%	300	\$ 30,183

Historical Summaries

The following tables summarize the economic development incentives reported by counties and municipalities for the 2010-11 through 2019-20 fiscal years and CRAs for the 2016-17 through 2019-20 fiscal years, as reported in this and prior years' reports. Only those local entities that reported incentives in one or more fiscal years are listed. Blank cells in those tables indicate that the entity had no incentives or did not respond to the survey in that particular fiscal year.

The final table of this report summarizes the county and municipal values of business-owned properties that received the Economic Development Ad Valorem Tax Exemption for 2010 through 2021, as compiled by the Florida Department of Revenue. The value of the exemption to a qualified business is determined by applying the respective county or municipal millage rate to the exempted property.

Total Value of Economic Development Incentives Reported by Counties										
County	LFY 2010-11	LFY 2011-12	LFY 2012-13	LFY 2013-14	LFY 2014-15	LFY 2015-16	LFY 2016-17	LFY 2017-18	LFY 2018-19	LFY 2019-20
