

Five Year Water Resource Development Work Program

FY 2022-2026 | Suwannee River Water Management District

Introduction

Water Management Districts are required by section 373.709, Florida Statutes (F.S.), to evaluate their water resources to ensure that existing sources of water are adequate to supply water for all existing and future reasonable-beneficial uses and to sustain the water resources and related natural systems for a 20-year planning period. A Regional Water Supply Plan (RWSP) is developed when a District determines that there are not enough traditional water supplies to provide water for all existing and future reasonable/beneficial uses and to sustain water resources and related natural systems for the planning period. RWSPs include a technical analysis of the current and future demands, evaluation of available water sources, and identification of water resource development and water supply development project options that could be used to meet future water demands.

The District is also required to prepare a Five-Year Water Resource Development Work Program (Work Program) as a part of its annual budget reporting process, pursuant to subsection 373.536(6)(a)4., F.S. The Work Program must describe the District's implementation strategy relating to its water resource development and water supply development (including alternative water supply development) components over the next five years. Further, the Work Program must:

- Address all the elements of the water resource development component in the District's approved RWSPs, as well as the water supply projects proposed for District funding and assistance;
- Identify both anticipated available District funding and additional funding needs for the second through fifth years of the funding plan;
- Identify projects in the Work Program which will provide water;
- Explain how each water resource and water supply project will produce additional water available for consumptive uses;
- Estimate the quantity of water to be produced by each project;
- Provide an assessment of the contribution of the District's RWSPs in supporting the implementation of minimum flows and minimum water levels and water reservations; and
- Ensure sufficient water is available to timely meet the water supply needs of existing and future reasonable-beneficial uses for a 1-in-10-year drought event and to avoid the adverse effects of competition for water supplies.

This Work Program covers the period from Fiscal Year (FY) 2021-2022 through FY 2025-2026 and is consistent with the planning strategies of the District's North Florida Regional Water Supply Plan, (NFRWSP), a regional water supply plan produced and implemented jointly between this District and the SJRWMD (see Figure 1). The NFRWSP was approved by both Districts in 2017 and covers the 2015-2035 planning horizon. The next plan update is scheduled for 2022. The planning region includes all of Hamilton, Columbia, Baker, Suwannee, Union, Bradford, Gilchrist, Putnam, and Alachua Counties, as well as the remaining counties in Region 1 of the SJRWMD. For additional information about the NFRWSP, please see the Water Supply Plan located on the North Florida Regional Water Supply Partnership website.

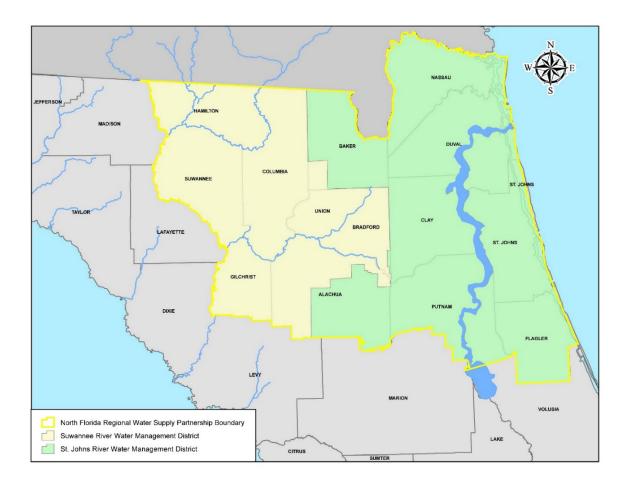

Figure 1: North Florida Regional Water Supply Plan Partnership Area

Work Program Summary

The projects listed in the Five-Year Water Resource Development Work Program demonstrate progress in implementing projects which are listed in the NFRWSP and projects which support the NFRWSP's objectives. Implementation of projects listed in the NFRWSP supports the recovery strategy for the Lower Santa Fe and Ichetucknee Rivers and Associated Priority Springs (LSFI). The District believes that this work program is adequate to further the recovery of LSFI, to ensure water is available to timely meet the water supply needs of existing and future reasonable-beneficial uses for a 1-in-10 year drought event and to avoid the adverse effects of competition for water supplies based on the District's established minimum flows and minimum water levels (MFLs).

Over the next five years, the District will continue to implement projects and support regional water management programs, including water supply planning, water resource data collection and monitoring, and establishment of MFLs to ensure the availability of adequate water supplies for all reasonable-beneficial uses and to maintain the function of natural systems. This work program illustrates the contributions of the District in support of MFLs. Establishment of MFLs will proceed

according to the District's MFL Priority List. The most current version of the District's MFL priority list, and an overview of the District's MFL program is available on the District's <u>Minimum Flows and</u> <u>Minimum Water Levels</u> page of the website.

In total, this Work Program outlines projects that, upon completion, would make available 28.14 million gallons per day (mgd) of water, including reuse and non-reuse water across the District. These projects are detailed in Appendix A. These benefits are associated with approximately \$9,411,670 budgeted for FY 2021-2022. The proposed funding for projects identified in the 5-year Work Program is approximately \$30,563,670 through FY 2025-26. The District also funds Water Resource Development Activities that are regional in nature and are therefore primarily the responsibility of the District. These activities are described in Table 1 and 2. They are also associated with approximately \$6,230,102 budgeted in FY 2021-2022.

In addition, these projects set forth a commitment to develop projects associated with implementation of MFLs. The projects benefitting MFLs are anticipated to make available 27.7 mgd of reuse and non-reuse water upon completion. Of that, up to 17.45 mgd of reuse and non-reuse water will benefit MFLs in recovery.

Water Resource and Water Supply Development Project Funding

The District funds projects that support water resource development and water supply development. Water resource development components are those that involve the "formulation and implementation of regional water resource management strategies, including the collection and evaluation of surface water and groundwater data; structural and nonstructural programs to protect and manage water resources; the development of regional water resource implementation programs; the construction, operation, and maintenance of major public works facilities to provide for flood control, surface and underground water storage, and groundwater recharge augmentation; and related technical assistance to local governments, government-owned and privately owned water utilities, and self-suppliers to the extent assistance to self-suppliers promotes the policies as set forth in section 373.016, F.S."¹ Water supply development components are those that involve "planning, design, construction, operation, and maintenance of public or private facilities for water collection, production, treatment, transmission, or distribution for sale, resale, or end use."² A list of all projects meeting these statutory definitions is provided in Appendix A. The District provides funding assistance to public supply, agriculture, and other water use permittees, including industrial and commercial users, for projects that are consistent with the District's RWSP and meet the District's directive and procedures pertaining to cost-share funding.

^{3 |} Water for Nature. Water for People.

Water Resource Development Activity Funding

The District also funds Water Resource Development Activities that are regional in nature and are therefore primarily the responsibility of the District. These Water Resource Development Activities are listed in Table 1 below; and the projected expenditures for these ongoing programs are listed in Table 2. The District has identified the need for additional Regional Water Supply Planning. These planning efforts will be ongoing for FY 2021-2022 through 2025-2026 and are reflected in the projected expenditures in Table 2.

Water Resource Development Activity	Activity Description
Water Supply Planning (1.1.1)	Long-term planning to assess and quantify existing and reasonably anticipated water supply needs and sources, and to maximize the beneficial use of those sources, for humans and natural systems. This includes water supply assessments developed pursuant to section 373.036, F.S., and regional water supply plans developed pursuant to section 373.709 F.S.
Minimum Flows and Minimum Water Levels (MFL, 1.1.2)	The establishment of minimum surface and ground water levels and surface water flow conditions required to protect water resources from significant harm, as determined by the district governing board.
Research, Data Collection, Analysis and Monitoring (1.2)	Activities that support district water management planning, restoration, and preservation efforts, including water quality monitoring, data collection and evaluation, and research. Data collection and analysis activities are a critical part of the water resource development component implemented by the District. This activity supports the District's MFL program.
Water Resource Development Projects (2.2.1)	Regional projects designed to create, from traditional or alternative sources, an identifiable, quantifiable supply of water for existing and/or future reasonable-beneficial uses. These projects do not include the construction of facilities for water supply development, as defined in section 373.019(21), F.S. Such projects may include the construction, operation, and maintenance of major public works facilities that provide for the augmentation of available surface and ground water supply or that create alternative sources of supply. Water resource development projects are to be identified in water management district regional water supply plans or district water management plans, as applicable.
Water Supply Development Assistance (2.2.2)	Financial assistance for regional or local water supply development projects. Such projects may include the construction of facilities included in the term "water supply development" as defined in section 373.019(26), F.S.
Other Cooperative Projects (2.4)	Any non-water source development cooperative effort under this program area between a water management district and another organization. This activity includes the District's Agricultural Conservation Cost-Share Program.

Table 1: District water resource development activities and descriptions

Table 2: Fiscal year 2021-2022 through Fiscal Year 2025-2026 projected expenditures (including salaries, benefits, and operating expenses) for ongoing water resource development activities. This table does not include items listed in Appendix A or B of this work program. Except as noted below, the table estimates future year expenditures based on recurring expenses.

Regional Water Activity	Fiscal Year 2021-2022	Fiscal Year 2022-2023	Fiscal Year 2023-2024	Fiscal Year 2024-2025	Fiscal Year 2025-2026	Total
Water Supply Planning (1.1.1)	\$645,234	\$645,234	\$645,234	\$645,234	\$645,234	\$3,226,170

Total	\$6,230,102	\$6,230,102	\$6,230,102	\$6,230,102	\$6,230,102	\$31,150,520

Basin Management Action Plan Appendix

Basin Management Action Plans are the "blueprint" for restoring impaired waters by reducing pollutant loadings to meet the allowable loadings established in a Total Maximum Daily Load (TMDL). In 2016, the Florida Legislature amended section 373.036, F.S., to require the identification of all specific projects that implement a Basin Management Action Plan (BMAP) or a recovery or prevention strategy in the Work Program. The District's Work Program has historically identified water resource development projects that support MFL recovery and prevention but has not included specific descriptions of projects primarily intended to implement BMAPs. Consistent with section 373.036, F.S., and in a manner that has been coordinated with DEP and all five water management Districts, the District makes available as part of this Work Program a five-year funding outlook for projects specifically identified in an adopted BMAP in Appendix B.

5470	SAFE	City of Newberry	SRWMD	NEW-02	Canterbury Fairgrounds Wastewater Extension Project	Extend central wastewater lines to Canterbury Fairgrounds site and decommission the existing OSTDS.	OSTDS Phase Out	1877	Complete	9/30/2021	354	Alachua County		\$50,000.00	\$0.00	\$200,000.00	\$0.00	\$200,000.00
2101	SAFE	SRWMD	DEP/ Dairy Producers	SRWMD-02	Improved Nutrient Application Practices in Dairy Operations - Phase 2	To date, 9 agreements with dairies to install screen separators to reduce wastewater solids. 1 agreement with a dairy in the Santa Fe Basin. DEP has allocated 52,120,000 for districtwide program. Load reduction to land estimate of 1,485 lb-N/yr.	Agricultural BMPs	7	Underway	6/30/2022	200	Basinwide	FY2019-20 through FY2021- 22	\$150,000.00	\$2,120,000.00	\$20,000.00	\$530,000.00	\$2,670,000.00
2102	SAFE	SRWMD	DEP/ Dairy Producers	SRWMD-03	Dairy Wastewater System Improvement	Cost-share projects with dairies to invest in advanced treatment technologies (bioreactors), additional wastewater storage, and advanced manure solid separation. Canceled because project location was determined to be outside the basin.	Dairy Remediation	8	Underway	10/31/2023	N/A	N/A	FY2018-19 through FY2021- 22	\$500,000.00	\$1,500,000.00	\$0.00	\$300,000.00	\$1,800,000.00
2103	SAFE	SRWMD	DEP/ Agricultural Producers/ Local Governments/ Landowners/ Private Companies	SRWMD-05	Sustainable Suwannee Springs Agriculture Pilot Program - Low Input Agriculture		Agricultural BMPs	103	Underway	6/30/2026	33,750	Basinwide	FY2018-19 through FY2021- 22	\$300,000.00	\$4,219,439.90	\$0.00	\$0.00	\$4,219,439.90
2092	SAFE	SRWMD	DEP/ Agricultural Producers/ Local Governments/ Landowners/ Private Companies	SRWMD-06	Sustainable Suwannee Springs Agriculture Pilot Program - Advanced Water Quality Improvement Technologies	Agriculture operators, landowners, local governments, private companies, other entities may submit proposals for advanced technologies that can cost- effectively reduce nitrogen in groundwater that contributes to spring flow.	Agricultural BMPs	102	Underway	3/30/2022	1,832	Basinwide		\$250,000.00	\$999,998.25	\$0.00	\$234,626.75	\$1,234,625.00
2107	SAFE	SRWMD	Agricultural Producers	SRWMD-08	Precision Agricultural Practices	Provide cost-share funds to agricultural producers to implement precision nutrient and irrigation management technology. Districtivide program benefits spilt between Santa Fe and Suwannee BMAPs. Load reduction to land estimate of 312,500 lb-N/yr.	Agricultural BMPs	89	Underway	6/30/2024	56,250	Basinwide	FY2018-19 through FY2021- 22	\$1,000,000.00	\$5,000,000.00	\$0.00	\$1,250,000.00	\$6,250,000.00
4565	SAFE	SRWMD	DEP/ Agricultural Producers	SRWMD-10	Precision Ag 2	Provide cost share funds to agricultural producers within the PFA and BMAP to reduce nutrients and conserve water.	Agricultural BMPs	89	Underway	6/30/2024	TBD	Basinwide	FY2018-19 through FY2021- 22	\$1,000,000.00	\$5,000,000.00	\$0.00	\$1,250,000.00	\$6,250,000.00
4566	SAFE	SRWMD	DEP/ Agricultural Producers	SRWMD-11	Accelerating Suwannee River Restoration and Silviculture Management	Incentivize silviculture and rural land conservation to reduce groundwater pumping and nitrogen loading in the Middle Suwannee springshed and Ichetucknee River.	Agricultural BMPs	228	Underway	9/30/2025	TBD	TBD	FY2019-20 through FY2021- 22	\$750,000.00	\$1,878,736.00	\$0.00	\$500,000.00	\$2,378,736.00
4568	SAFE	SRWMD	City of Lake City/ Columbia County	SRWMD-13	Gwen Lake	The project addresses stormwater, flooding, erosion, and sedimentation concerns that impair the water quality and water storage capacity of Gwen Lake and adjacent waterways.	Regional Stormwater Treatment	206	Complete	9/28/2021	N/A	Lake City	FY2020-21 through FY2021- 22	\$30,000.00	\$0.00	\$200,000.00	\$250,000.00	\$450,000.00
5460	SAFE	SRWMD	City of Lake City	SRWMD-14	Gwen Lake Phase 2	Installation of a drop structure behind the Parkview Baptist Church stormwater pond, regrade the conveyance, install stabilization to slow the water velocity and reduce the erosion and sedimentation contributing to the infill of Gwen Lake.	Regional Stormwater Treatment	272	Planned		TBD	Columbia County		\$100,000.00	\$0.00	\$220,000.00	\$75,000.00	\$295,000.00
5472	SAFE	SRWMD	Gilchrist County	SRWMD-15	Gilchrist NE 2nd Way Park	Stormwater improvements and bank stabilization.	Shoreline Stabilization	273	Underway	12/16/2022	TBD	Gilchrist County		\$143,970.00	\$167,974.00	\$143,970.00	\$4,500.00	\$316,444.00
5475	SAFE	SRWMD	DEP	SRWMD-18	Lake Butler AWT Upgrade Phases 1-3	Advanced wastewater treatment facility and created wetland to be constructed in three phases.	WWTF Upgrade	296	Underway	6/30/2025	2,988	Union County	FY2020-21 through FY2021- 22	\$1,420,000.00	\$3,400,000.00	\$0.00	\$0.00	\$3,400,000.00

Appendix B. Basin Management Action Plan
