2010-11 Legislative Budget Request

Schedule I Narrative

5% Reserves

The Department of Citrus recommends an exclusion from the reserve requirement. The Department of Citrus is a 100% trust fund, supported by assessments on each box of citrus as they enter channels of trade. Collections are cyclical in nature, based on the timing and quantity of fruit entering markets. Our internal operating procedures require an overall reserve of 3% of our operating budget at the beginning of each year. In addition, each program director is required to "reserve" 10% of their program funds until the danger of a freeze (potential crop reduction) passes. These funds may be released to program activity in February.

Management and Administrative Costs

The Department of Citrus' goal is to maintain administrative costs within 5% of our internal operating budget. As the Citrus Advertising Trust Fund is our only fund, all administrative costs are included here.

STATE OF FLORIDA DEPARTMENT OF CITRUS SUPPLEMENT TO SCHEDULE I FEDERAL FOREIGN AGRICULTURAL SERVICE PROGRAM

The federal Targeted Export Assistance (TEA) program was created in the 1985 Farm Bill. By authorizing export promotional assistance, TEA was intended to provide economic relief to U.S. commodities and directly counteract unfair practices overseas. The Food, Agriculture, Conservation and Trade Act of 1990 established a Market Access Program (MAP), as a replacement of the TEA Program, to encourage the development, maintenance and expansion of commercial export markets for U.S. agricultural commodities through cost-share assistance to eligible trade organizations that implement market promotion activities. These two programs have become one of U.S. agriculture's most effective weapons against unfair competition.

The Foreign Agricultural Service (FAS) administers the Market Access Program, as they previously did the TEA program. FAS authorizes both branded and generic export promotion, and the vast majority of U.S. agriculture in virtually all fifty states now participates in the program. By stimulating foreign interest in products of U.S. origin, FAS is enlarging overall world demand in ways that will endure and assist U.S. agriculture well into the future.

The Florida Department of Citrus (on behalf of the Florida citrus industry) is eligible to participate in the Foreign Agricultural Service Program in order to counter or offset the adverse effect of unfair trading practices of foreign countries on the export of citrus and citrus products. The Department of Citrus budget for international marketing relies heavily on funding from the Foreign Agricultural Service Program.

Activity plans are developed at the Florida Department of Citrus with input from overseas advertising and promotion staff, exporters, importers and government agricultural officials. Execution of these plans is performed by these professional agencies in the countries in which FDOC/FAS programs operate.

Florida has shown revenue increases in all FAS activity countries since initial participation in the FAS program began in 1986-87. The schedule attached identifies the number of cartons of Florida grapefruit shipped, F.O.B. prices, and FAS funding.

Schedule I Narrative

5% Reserves

The Department of Citrus recommends an exclusion from the reserve requirement. The Department of Citrus is a 100% trust fund, supported by assessments on each box of citrus as they enter channels of trade. Collections are cyclical in nature, based on the timing and quantity of fruit entering markets. Our internal operating procedures require an overall reserve of 3% of our operating budget at the beginning of each year. In addition, each program director is required to "reserve" 10% of their program funds until the danger of a freeze (potential crop reduction) passes. These funds may be released to program activity in February.

Management and Administrative Costs

The Department of Citrus' goal is to maintain administrative costs within 5% of our internal operating budget. As the Citrus Advertising Trust Fund is our only fund, all administrative costs are included here.

STATE OF FLORIDA DEPARTMENT OF CITRUS SUPPLEMENT TO SCHEDULE I FEDERAL FOREIGN AGRICULTURAL SERVICE PROGRAM

The federal Targeted Export Assistance (TEA) program was created in the 1985 Farm Bill. By authorizing export promotional assistance, TEA was intended to provide economic relief to U.S. commodities and directly counteract unfair practices overseas. The Food, Agriculture, Conservation and Trade Act of 1990 established a Market Access Program (MAP), as a replacement of the TEA Program, to encourage the development, maintenance and expansion of commercial export markets for U.S. agricultural commodities through cost-share assistance to eligible trade organizations that implement market promotion activities. These two programs have become one of U.S. agriculture's most effective weapons against unfair competition.

The Foreign Agricultural Service (FAS) administers the Market Access Program, as they previously did the TEA program. FAS authorizes both branded and generic export promotion, and the vast majority of U.S. agriculture in virtually all fifty states now participates in the program. By stimulating foreign interest in products of U.S. origin, FAS is enlarging overall world demand in ways that will endure and assist U.S. agriculture well into the future.

The Florida Department of Citrus (on behalf of the Florida citrus industry) is eligible to participate in the Foreign Agricultural Service Program in order to counter or offset the adverse effect of unfair trading practices of foreign countries on the export of citrus and citrus products. The Department of Citrus budget for international marketing relies heavily on funding from the Foreign Agricultural Service Program.

Activity plans are developed at the Florida Department of Citrus with input from overseas advertising and promotion staff, exporters, importers and government agricultural officials. Execution of these plans is performed by these professional agencies in the countries in which FDOC/FAS programs operate.

Florida has shown revenue increases in all FAS activity countries since initial participation in the FAS program began in 1986-87. The schedule attached identifies the number of cartons of Florida grapefruit shipped, F.O.B. prices, and FAS funding.
