

Agency Certification Legislative Budget Request Schedule I

September 15, 2023

Pursuant to the Legislative Budget Request instructions (LBR) for Fiscal Year 2024-25, I hereby certify, the revenue estimates reflected on the Schedule I of the Florida Gaming Control Commission (FGCC) are the most accurate, based on the information available at the time of the LBR technical review. The FGCC will notify the Office of Policy and Budget of any significant changes in revenue estimates that occur prior to the issuance of the Governor's Budget Recommendations.

This certification covers the 2520 Pari-Mutuel Wagering Trust Fund, as of September 15, 2023. Sincerely,

Louis Trombetta
Executive Director

The Florida Gaming Control Commission Temporary Special Duty – General Pay Additives Implementation Plan Fiscal Year 2024-2025

Section 110.2035(7)(b), Florida Statutes, provides that each state agency shall include in its annual legislative budget request a proposed written plan for implementing temporary special duties—general pay additives during the next fiscal year.

This pay additive is a valuable management tool that allows the agency to recognize and compensate employees for identified duties without providing a permanent pay increase.

The Florida Gaming Control Commission (FGCC) is requesting approval to implement temporary special duties – general pay additive as described below. The agency will use existing resources to grant the temporary special duties – general pay additive, when warranted.

Temporary Special Duties – General

Description:

This additive may be recommended for employees in career service classes for a variety of circumstances such as:

- An employee performing additional duties of a higher-level position when that position is vacant for any reason other than absent coworker due to Family Medical Leave Act (FMLA) or military leave.
- An employee performing additional duties of a higher-level position whose incumbent has been temporarily assigned other duties.
- An employee who meets the criteria for out-of-title work under the American Federation
 of State, County and Municipal Employees' (AFSCME) or Police Benevolent Association
 (PBA) collective bargaining agreement.
- An employee performing additional duties of a significant nature and time regarding a special project or special assignment not normally assigned to the employee.

Effective date of additive:

For employees covered by the AFSCME or PBA collective bargaining agreements, and who meets the requirements of Article 21, Compensation for Temporary Special Duty in a Higher Position, the additive shall be effective on the 23rd day.

For employees not covered by the AFSCME or PBA collective bargaining agreement, the additive will be effective beginning the first day of the added duties.

Length of time additive will be used:

The additive will be in effect for the length of time the position is vacant or until such time management decides that the additional duties can be removed from the employees receiving the additive. In either case, the agency will review the need for continuance of the additive at ninety (90) days to decide if an extension is necessary. Requests for extensions will be sent to the Department of Management Services for approval.

Additive Amount:

The additive will be up to 15% of the employee's base rate of pay or to the appointment rate of the higher-level position, if determined appropriate.

Classes/Positions affected:

Any employee in a career service class can potentially be affected by the provisions of this plan.

<u>Class Code</u> <u>Class Title</u> <u>Number of Positions</u>

See Class Listing See Class Listing 105

Historical data:

The provision for agencies to grant a temporary special duty pay additive has been in effect for many years and authorized in statute. The agency did not provide any temporary special duty pay additives during the 2022-2023 fiscal year.

Estimated annual cost:

This additive has the potential to impact any of our current 105 Career Service position incumbents statewide. The additive will not exceed 15% of an employee's base rate of pay.

Collective Bargaining Units Impacted:

AFSCME, Article 21: Compensation for Temporary Special Duty In A Higher Position

A. Each time an employee is designated by the employee's immediate supervisor to act in a vacant established position in a higher broadband level than the employee's current broadband level, and performs a major portion of the duties of the higher level position, irrespective of whether the higher level position is funded, for more than 22 workdays within any six consecutive months, the employee shall be eligible to receive a temporary special duty additive in accordance with the Rules of the State Personnel System, beginning with the 23rd day."

B. Employees being paid at a higher rate while temporarily acting in a position in a higher broadband level will be returned to their regular rate of pay when the period of temporary special duty in the higher broadband level is ended.

<u>PBA-Law Enforcement Unit, Article 21: Compensation for Temporary Special Duty in a Higher-Level Position</u>

Section 1 - Eligibility

Each time an employee is officially designated by the appropriate supervisor to act in an established position in a higher broadband level than the employee's current broadband level, and performs a major portion of the duties of the higher-level position, irrespective of whether the higher level position is funded, for more than 22 workdays within any six consecutive months, the employee shall be eligible for a temporary special duty additive in accordance with Chapter 60L-32, F.A.C.

Section 2 – Method of Compensation

It is understood by the parties that, insofar as pay is concerned, employees temporarily filling a position in a higher broadband level shall be paid according to the same compensation method as promoted employees under the Rules of the State Personnel System.

Section 3 – Return to Regular Rate

Employees being paid at a higher rate while temporarily filling a position in a higher broadband level will be returned to their regular rate of pay when the period of temporary special duty in the higher broadband level is ended.

These additives will be implemented within current approved salary appropriations and rate.

Any requests to revise the FGCC plan to address any additional need for pay additives which may arise will be submitted for approval through the Department of Management Services to the Executive Office of the Governor.

Court with Jurisdict	tion:	First District Court of Appeal					
Case Number:		1D21-3696					
Summary of the Complaint:		As previously reported, Christopher J. D'Arcy and D'Arcy Kennel, LLC brought an inverse condemnation claim against the Department of Business and Professional Regulation and its Secretary. The plaintiffs allege that they owned racing greyhounds and real property related to racing. Because wagering on live greyhound racing is no longer permitted in Florida, the Plaintiffs claim that they are owed compensation for the value of their racing greyhounds and real property. The Florida Gaming Control Commission has been substituted for the DBPR as a party.

SCHEDULE XII: OUTSOURCING OR PRIVATIZATION OF A SERVICE OR ACTIVITY

I.	Background Information
1.	Describe the service or activity proposed to be outsourced or privatized.
2.	How does the service or activity support the agency's core mission? What are the agency's desired
۷.	goals and objectives to be achieved through the proposed outsourcing or privatization and the rationale for such goals and objectives?
	Tot buen gouls and objectives.
3.	Provide the legal citation authorizing the agency's performance of the service or activity.
	The state the regime of the entire of the en
4.	Identify the service's or activity's major stakeholders, including customers, clients, and affected
	organizations or agencies.
<i>E</i>	Describe and analyze have the account assumently newformed the complete or activity and list the accounts
5.	Describe and analyze how the agency currently performs the service or activity and list the resources, including information technology services and personnel resources, and processes used.
	meraems mornared weeks and personner recommended with proceeds were.
6.	Provide the existing or needed legal authorization, if any, for outsourcing or privatizing the service or
0.	activity.

7.	Provide the reasons for changing the delivery or performance of the service or activity. What is the current cost of service and revenue source?
II.	Evaluation of Options
1.	Provide a description of the available options for performing the service or activity and list for each
1.	option the general resources and processes needed to perform the service or activity. If state employees are currently performing the service or activity, provide at least one option involving maintaining state provision of the service or activity.
2.	For each option, describe its current market for the service or activity under consideration for
	outsourcing or privatizing. How many vendors are currently providing the specific service or activity on a scale similar to the proposed option? How mature is this market?
	on a searce similar to the proposed option. Then mature is this manner.
3.	List the criteria used to evaluate the options. Include a cost-benefit analysis documenting the direct and indirect specific baseline costs, savings, and qualitative and quantitative benefits involved in or
	resulting from the implementation of the recommended option(s).
4	
4.	Based upon the evaluation criteria, identify and analyze the advantages and disadvantages of each option, including potential performance improvements and risks.
5.	For each option, describe the anticipated impact on the agency and the stakeholders, including impacts
J.	on other state agencies and their operations.

6.	Identify changes in cost and/or service delivery that will result from each option. Describe how the changes will be realized. Describe how benefits will be measured and provide the annual cost.
7.	List the major risks for each option and how the risks could be mitigated.
8.	Describe any relevant experience of other agencies, other states, or the private sector in implementing similar options.
III.	Information on Recommended Option
1.	Identify the proposed competitive solicitation including the anticipated number of respondents.
2.	Provide the agency's projected timeline for outsourcing or privatization of the service or activity. Include key events and milestones from the beginning of the procurement process through the expiration of a contract and key events and milestones for transitioning the service or activity from the state to the vendor. Provide a copy of the agency's transition plan for addressing changes in the number of agency personnel, affected business processes, employee transition issues including reemployment and retraining assistance plan for employees who are not retained by the agency or employed by the contractor, and communication with stakeholders such as agency clients and the public.
2.	Provide the agency's projected timeline for outsourcing or privatization of the service or activity. Include key events and milestones from the beginning of the procurement process through the expiration of a contract and key events and milestones for transitioning the service or activity from the state to the vendor. Provide a copy of the agency's transition plan for addressing changes in the number of agency personnel, affected business processes, employee transition issues including reemployment and retraining assistance plan for employees who are not retained by the agency or employed by the contractor, and communication with stakeholders such as agency clients and the

4.	Provide an analysis of the potential impact on federal, state, and local revenues, and expenditures. If federal dollars currently fund all or part of the service or activity, what has been the response of the federal funding agency(ies) to the proposed change in the service delivery method? If federal dollars currently fund all or part of the service or activity, does the change in the service delivery method meet federal requirements?
5.	What responsibilities, if any, required for the performance of the service or activity will be retained and performed by the agency? What costs, including personnel costs, will the agency continue to incur after the change in the service delivery model? Provide these cost estimations. Provide the method for monitoring progress in achieving the specified performance standards within the contract.
6.	Describe the agency's contract management process for the outsourced or privatized service or activity, including a description of the specific performance standards that must be met to ensure adequate performance and how the agency will address potential contractor nonperformance. Attach a copy of any competitive solicitation documents, requests for quote(s), service level agreements, or similar documents issued by the agency for this competitive solicitation if available.
7.	Provide the agency's contingency plan(s) that describes the tasks involved in and costs required for its implementation and how the agency will resume the in-house provision of the service or activity in the event of contract termination/non-renewal.
8.	Identify all other Legislative Budget Request issues that are related to this proposal.

9.	Explain whether or not the agency can achieve similar results by a method other than outsourcing or privatization and at what cost. Please provide the estimated expenditures by fiscal year over the expected life of the project.
10.	Identify the specific performance measures that are to be achieved or that will be impacted by changing the service's or activity's delivery method.
11.	Provide a plan to verify vendor(s) compliance with public records laws.
12.	If applicable, provide a plan to verify vender compliance with applicable federal and state law ensuring access by persons with disabilities.
13.	If applicable, provide a description of potential differences among current agency policies or processes and a plan to standardize, consolidate, or revise current policies or processes.
14.	If the cost of the outsourcing is anticipated to exceed \$10 million in any given fiscal year, provide a copy of the business case study (and cost benefit analysis if available) prepared by the agency for the activity or service to be outsourced or privatized pursuant to the requirements set forth in section 287.0571, Florida Statutes.

II. Schedule IV-B Business Case - Strategic Needs Assessment

A. Background and Strategic Needs Assessment

To meet the demands of licensure and regulation of the gambling industry and gambling related activities in the growing state of Florida, the Legislature established a new commission, the Florida Gaming Control Commission (FGCC). FGCC needs an independent licensing system that can be configured to meet its regulatory, investigatory, and enforcement needs. To do so FGCC needs to purchase a licensing system to replace limited functionality provided by DBPR's existing system VERSA REG and the integrated document management solution OnBase. The FGCC currently utilizes VERSA REG, through an MOU with the Department of Business and Professional Regulation, to conduct licensing activities for the 34 pari-mutuel license types.

Currently FGCC does not manage technology related to the VERSA REG system, leaving FGCC at risk. Application and security patching on the licensing system and components are past end of life and is not kept up to date or patched appropriately to meet industry security standards. FGCC is unable to maintain security protocols, best practices, and patching of workstations because doing so would cause the systems not to function, leaving FGCC in a poor security posture and vulnerable to attacks and exploits. The software company sustaining VERSA REG no longer offers or supports the product used by DBPR.

The consequences of not implementing its own licensing system means that FGCC is dependent on another agency to provide a licensing system and has no ability to issue and renew licenses and complete associated tasks for parimutuel license and permit holders without them. FGCC does not have access to the system or system data other than as users of the system maintained, owned, and operated by DBPR, which limits FGCC's ability to change, update, or modernize its process and limited access to its data. FGCC also is unable to provide support to staff since we have not independent systems license.

The FGCC currently maintains 34 parimutuel license types, and over 350,000 past and current licensees, facilities, and permit holders. The FGCC seeks to implement a cloud-based software as a solution that will provide regulatory, licensing, investigation and enforcement activities that support the following business processes: Application processing; Mobile inspections; License renewal; License updates; Enforcement activities including complaint intake, investigations, case management, and legal activities; Payment tracking and audit functions; Reporting; Configurable workflow solution; Interfaces to auxiliary systems such as document management, license look-up, and artificial intelligence solutions (chat bot); Batch and web service exchanges of information with other agencies; and Cyber security management.

In doing so, FGCC can streamline business processes in a secure, independent, environment using industry best practices. By selecting a modern system, the FGCC will be able to not only maintain current mission-critical licensing application processing workflows for over 350,000 past and current licensees, facilities, and permit holders but position itself for the future demands by securely and concurrently making business decisions to accommodate a growing customer base.

1. Business Need

FGCC seeks to implement a licensing and regulation system with an encrypted, role-based cloud solution. FGCC currently utilizes Versa Regulation, through an MOU with the Department of Business and Professional Regulation, to conduct licensing activities for the 34 pari-mutuel license types. The existing system being utilized has reached the end of useful life and the vendor has stopped making improvements to the product, including no longer selling the solution. The product will eventually reach end of life and the MOU with DBPR is time limited.

The business solution will address current and emerging business needs related to licensing and regulation of over 350,000 gambling licenses, facilities, and permit holders in Florida, such as:

- Inefficient workflows inhibit the ability to automate routine business processes for application processing, facility inspections and the complaint process.
- Reliance on DBPR for functional solutions to keep systems functioning in an unsupported environment.
- Additional efficiencies to reduce time from application to license are not realizable in the current system.
- Outdated technology lacks modern architecture and customizable integrations to provide real-time information to applicants and reduce deficient applications.
- Annual agreement costs to access Versa Regulation through DBPR are estimated at \$400,000.

- Current system requires Criminal Justice Information Systems (CJIS) activities to be worked outside of the licensing application database.
- Current system is susceptible to security vulnerabilities due to inability for timely enhancements and limited support.
- Current system relies on vendor-based document management, OnBase, requiring external maintenance
 and limits enhanced interoperability between the two for tighter, more robust integration. Legacy
 documents will be migrated to the new system.

2. Business Objectives

FGCC is requesting budget authority in the amount of \$9,863,603 (\$500,000 of which is for Operations and Management services) to replace the existing system and document management solution, including configuration and migration of data, and three (3) support staff. This will allow the FGCC to:

- Enable compatibility with mobile devices and interfaces to auxiliary systems.
- Enhance application processing, mobile inspections, license renewal, license updates, payment functionality and auditing, and configurable workflows.
- Enhance applicant portal to assist in reducing the number of deficient applications submitted and received by the agency, lessen call volumes, and help to provide a modern and improved customer-centric experience.
- Automate information gathering to reduce repetitive, manual, and paper-driven business processes.
- Facilitate greater data-driven capacities.
- Provide FGCC staff with an efficient, user-friendly, responsive system that improves stakeholder communication and reduces repetitive data entry and document management.

The system will be a cloud-based solution, ensuring more adaptability, and have less reliance on code customization so that the system configurable for growth and changes to laws and regulations.

This issue is in support of the following Governor's Priority 4.1 Ensure predictable legal, permitting, and other regulatory processes meet changing business needs.

B. Baseline Analysis

The following section demonstrates the functional areas and various functions of the Florida Gaming Control Commission.

1. Current Business Process(es)

- Licensing activities include, but are not limited to, providing licenses and renewals, monitoring licensure, and compliance of financial responsibility requirements associated with licensure.
- Enforcement activities may include research and tracking of reported activity from beginning to end, from receiving initial complaints to action against unlicensed activity.
- Investigative activities include collection and documentation of data to review, monitor and present to appropriate parties for action.
- Information activities include response to public records requests, required retention of records, collection, and compilation of licensure data for reporting, and ensuring the reliable access and quality control of licensure data.

See Appendix C for a high-level process flow chart.

2. Assumptions and Constraints

- The FGCC will select the best available Commercial Off-The-Shelf (COTS) or Software as a Service (SaaS) product following established procurement processes.
- The vendor selected to deliver the solution will be responsible for system configuration, data migration, integration with applicable systems and applications, developing documentation, developing training

- materials, and providing training to all appropriate staff.
- The FGCC staff will be responsible for performing a fit-gap analysis of processes and interfaces, development and execution of any identified modifications needed for existing business processes, ensuring data integrity, and validating data migration, and ensuring all required documentation for the project and operational needs is completed and delivered.
- The FGCC IT support staff will follow the Agencies policies and project management methodologies.
- Existing systems used by the FGCC through an MOU with DBPR will continue to be supported and maintained during the life of this project.
- The system needs to be able to change as business processes and governing laws and regulations change.
- The system will provide data reporting and analysis capabilities comparable, at minimum, with current capabilities.
- The vendor will migrate legacy documents to the solution within the project schedule as part of data migration.
- As the FGCC continues to refine business processes and seek technological solutions in response to customer-driven needs, resources may be dedicated to other strategic initiatives.

C. Proposed Business Process Requirements

1. Proposed Business Process Requirements

To meet the needs of parimutuel licensing in Florida, FGCC requires a modern and integrated licensure system that provides more efficient processing, consistency, and improved data integrity with supported and stable platforms. The system solution will maintain licensing application processing, auditing, investigation and complaint evaluation, and database functions currently managed through VERSA REG, as well as capturing technology advances. The solution is intended to provide FGCC staff with an efficient, user-friendly licensing system that improves workflow and reduces repetitive, manual processes.

Some basic components include:

- Administrative Tool: Licensing system used by FGCC staff to conduct business, such as application processing, auditing, and investigations. System shall be accessed through a secure login.
- Application Management: Ability to adjust the software to accommodate key business processes of licensing activities. Assimilation of historical applicant and licensee demographic data across all various license types. Data validation and integration tools.
- Case Management: The solution is intended to provide streamlined workflows for FGCC staff by licensee, permit holder and facility, increasing productivity and customer satisfaction.
- Devices: Hardware used by FGCC field staff to conduct inspections. Staff utilize hardware to conduct in person inspections and gather information and documentation. Devices have mobile data capability and touchscreen features.
- Document Management: Built-in document management component, with ability to ingest and map documents from existing document management system to records in the proposed system.
- Public Interface: Website interface that is available to the public that does not require a user to log into a secure location, such as, but not limited to, licensure verification.
- Security: Ability to meet the State of Florida Cyber Security standards as outlined in Rule 60GG-2, and found at 60GG-2: Information Technology Standards Florida Administrative Rules, Law, Code, Register FAC, FAR, eRulemaking (flrules.org), including the following areas:

Governance Area	Statute, Rule, or Policy

Data Confidentiality

Public Law (PL), 104-191, Health Insurance
 Portability and Accountability Act of 1996

Data Security and Privacy

	 45 Code of Federal Regulations (CFR), Part 164 (Security and Privacy) Florida Statute 282.318, Enterprise Security of Data and Information Technology Florida Administrative Code Rule Chapter 60GG-2: Information Technology Security
Data Center Operations	 Florida Statute 282.201, State data center Florida Administrative Code Rule Chapter 60GG-3 Data Center Operations
Cloud Policy	 Florida Statute 282.206, Cloud-first policy in state agencies Florida Administrative Code Rule Chapter 60GG-4 Cloud Computing
Project Management	 Florida Administrative Code Rule Chapter 60GG- 1: Project Management and Oversight
Enterprise Architecture	 Florida Administrative Code Rule Chapter 60GG- 5 Enterprise Architecture
Identity and Access Management	 Florida Statute 282.601, Accessibility of Electronic Information, and Information Technology Florida Administrative Code Chapter 60-8, Accessible and Electronic Information Technology
Public Records	 Florida Statute 119, General State Policy on Public Records
Criminal Justice Data	• FBI Criminal Justice Information Services (CJIS) Security Policy (CSP)

- Reporting Tool: Built-in or external reporting component that allows for the ability to build on-demand and batch reports through real-time database access, as well as the ability to integrate with and pull back more than one data source or query for each report.
- Self-Service: Online portal for customer engagement to allow for submissions of applications and supporting documentation, 24/7 access to application and license status information.
- System Management: Infrastructure, hardware, services, set-ups, and processes that allow the licensing software and affiliated systems to reliably function with high availability.

2. Business Solution Alternatives

The FGCC conducted systems requirements gathering and research of basic systems information and considered the following business solutions alternatives:

a. SaaS Vendor system solution

FGCC has conducted research of available solutions for a Software-as-a-Service (Saas). There are a number of available solutions of software geared toward governmental regulatory entities that provide licensing services.

b. COTS Solution

These solutions allow for a faster insertion of technology, reduced development time and lower initial costs.

Other Florida state agencies that engage in licensing have utilized COTS solutions.

c. In-house development

FGCC lacks the team of software architects, engineers, and developers necessary to develop a solution to meet the needs of the business. Hiring a team of highly skilled staff in a competitive marketplace could postpone the implementation of a solution and increase risk due to turnover.

3. Rationale for Selection

The FGCC is currently reliant on system access through an MOU with DBPR. The current system is nearing end of life, with no opportunity for system enhancements, creating a security risk. Additionally, the current system does not have a modernized user interface or support a customer-centric approach. To establish as an independent agency, using industry best practices, vendor support is needed to implement, migrate, and maintain a licensing solution. FGCC technical and business staff possess the knowledge to assist during the process and manage operations after deployment.

As the commission continues to grow a solution that accommodates changes to laws, statute and business demand is needed to ensure mission critical work is conducted securely and efficiently.

4. Recommended Business Solution

The FGCC recommends selecting a commercial cloud-based system. The solution would achieve the following:

- Support the licensing and maintenance of parimutuel licensees, permitholders and facilities regulated under the FGCC.
- Be configurable when changes are required.
- Support an efficient data entry environment.
- Feature a user-interface for online services that are compatible with mobile devices.
- Ensure robust security at all levels.
- Include workflow solutions to streamline business processes.
- Convert and migrate data seamlessly from the existing system to the new solution.
- Automate business processes to reduce processing times.

D. Functional and Technical Requirements

The functional requirements documentation developed by the agency is attached in Appendix D.

III. Success Criteria

		SUCCESS CRITERIA TAB	LE	
#	Description of Criteria	How will the Criteria be measured/assessed?	Who benefits?	Realization Date (MM/YY)
1	A solution that provides security and recoverability while maintaining the latest technology standards.	System outages Data backup Security incidents	FGCC Staff	Upon implementation 2025

2	A solution that will expand self- service options and on-demand availability of information.	Increase in customer satisfaction through decreased support calls Decrease in application processing times	FGCC Staff Licensees, permitholders and facilities Florida residents	Upon implementation 2025
3	A solution that will satisfy business, customer, and state reporting requirements.	Availability of reports Report accuracy Tine to produce reports	FGCC Staff External Partners	Upon implementation 2025
4	A solution that provides consistent experience for users.	Staff satisfaction Identification of training needs	FGCC Staff External Partners	Upon implementation 2025

IV. Schedule IV-B Benefits Realization and Cost Benefit Analysis

A. Benefits Realization Table

		BENEFITS REAL	IZATION TABLE		
#	Description of Benefit	Who receives the benefit?	How is benefit realized?	How is the realization of the benefit measured?	Realization Date (MM/YY)
1	Implementation of FGCC licensure system.	FGCC Staff Licensees, permitholders, facilities	FGCC licensure system is available with historical data.	System implementation is completed, data has been migrated and UAT is completed.	Upon implementation of the system
2	Greater self-service functionality for external users	FGCC Staff Licensees, permitholders, facilities Florida residents	Increased information and functions available through a self-service portal.	Improved efficiency for applicants and staff.	Upon implementation of the system.

B. Cost Benefit Analysis (CBA)

The chart below summarizes the required CBA Forms which are included as Appendix A on the Florida Fiscal Portal and must be completed and submitted with the Schedule IV-B.

	Cost Benefit Analysis								
Form	Description of Data Capt	ured							
CBA Form 1 - Net Tangible Benefits	Agency Program Cost Elements: No existing program operational costs urrently exist. This is a new system request. The cost will continue each ear based on the benefits realization table above.								
CBA Form 2 - Project Cost Analysis	and is estimated at \$19,318,015 over the next five replace the existing system and document manage	This project will be funded through the Pari-Mutuel Wagering Trust Fund and is estimated at \$19,318,015 over the next five years. This project is to eplace the existing system and document management solution with an encrypted, role-based cloud solution. Three (3) support staff are required.							
CBA Form 3 - Project Investment Summary	Payback Period (years) Breakeven Fiscal Year Net Present Value (NPV) Internal Rate of Return (IRR)	NO PAYBACK NO PAYBACK (\$36,022,554) NO IRR							

V. Schedule IV-B Major Project Risk Assessment

While the current Risks Assessment (see Appendix B) has determined an Overall Project Risk of Medium, once approvals are given to move forward, comprehensive project planning will occur. FGCC will use industry standard project management and change management methodologies and templates.

VI. Schedule IV-B Technology Planning

A. Current Information Technology Environment

1. Current System

The Florida Gaming Control Commission currently utilizes VERSA REG for licensure activities and OnBase for document management. Systems access is currently provided through an MOU with the Department of Business and Professional Regulation. VERSA is currently nearing the end of life, meaning the vendor will no longer improve functionality. FGCC does not have access to the system or system data other than as users of the system maintained, owned and operated by DBPR, which limits FGCC's ability to change, update, or modernize its process and limited access to its data. FGCC also is unable to provide support to staff since we have not independent systems license.

a. Description of Current System

The Florida Gaming Control Commission currently maintains over 350,000 past and present licensees, permit holders and facilities across 34 parimutuel license types. All license types require interaction with the systems to facilitate mandate licensure activities.

b. Current System Resource Requirements

FGCC staff evaluate licensure requirements by license type to ensure compliance with applicable laws, policies and procedures. To accomplish these activities, VERSA REG is utilized to facilitate the licensure process and record maintenance.

c. Current System Performance

VERSA REG provides access to FGCC to carry out licensure functions for 350,000 past and present licensees, permitholders and facility records across 34 license types. Access and maintenance of VERSA REG is provided by DBPR through an MOU.

2. Information Technology Standards

- Latest .Net framework
- Latest C# framework
- CJIS
- COTS/SaaS

B. Current Hardware and/or Software Inventory

The Florida Gaming Control Commission does not own hardware and/or software. Hardware and Software are being provided through the Department of Business and Professional Regulation through an MOU.

C. Proposed Technical Solution

1. Technical Solution Alternatives

The FGCC conducted systems requirements gathering and research of basic systems information and considered the following business solutions alternatives. Gartner also provided a Market Guide for Community Development, Regulation and Licensing Applications (Appendix E) which has used as a resource in evaluating the following:

a. SaaS Vendor system solution

FGCC has conducted research of available solutions for a Software-as-a-Service (Saas). There are a number of available solutions of software geared toward governmental regulatory entities that provide licensing services.

b. COTS Solution

These solutions allow for a faster insertion of technology, reduced development time and lower initial costs.

Other Florida state agencies that engage in licensing have utilized COTS solutions.

c. In-house development

FGCC lacks the team of software architects, engineers, and developers necessary to develop a solution to meet the needs of the business. Hiring a team of highly skilled staff in a competitive marketplace could postpone the implementation of a solution and increase risk due to turnover.

2. Rationale for Selection

FGCC has identified goals to provide a minimum set of capabilities to be met by a potential solution.

Establishing a minimum set of capabilities is critical to ensure all options are compared to a common standard.

This common base will allow option costs, timelines, and capabilities to be compared in a consistent manner.

The goals identified are:

- An intuitive and easy-to-use system
- A system that can provide flexibility to adapt to future process, legislative or organizational changes
- A system driven by business processes
- A system providing on-demand reporting
- A system that provides necessary security requirements and system patching
- A system that provides a complete audit trail
- A system that is accessible (ADA compliant)

3. Recommended Technical Solution

The recommended technical solution is to procure a Licensing and Enforcement system. We are recommending a SaaS vendor-managed or self-hosted cloud solution that is configurable and provides in-house staff the ability to make configuration changes as needed. The technical solution should utilize modern encryption methodologies throughout and leverage the Department's identity and access management solution for authentication and role-based access.

The application should be highly available, scalable, and load-balanced with multiple application replicas along with persistent session management stored separately from the application tier to allow for limited user experience interruptions. Our recommendation is that it requires a modern and integrated licensure system that provides more efficient transaction processing, greater consistency, and improved data integrity with supported and stable platforms.

It should maintain licensing application processing, enforcement and complaint evaluation and investigation workflows, and database functions, as well as capturing technology advances that automate repetitive workflows and tasks and providing comprehensive case management, document management and data analysis and reporting.

D. Proposed Solution Description

1. Summary Description of Proposed System

The system will provide regulatory, licensing, investigation and enforcement activities that support the following business processes:

- Application processing
- Mobile inspections
- License renewal and updates
- Enforcement activities including complaint intake
- Investigations, Reporting
- Case management and legal activities
- Payment tracking and audit functions

- Configurable workflow solution
- Interfaces to auxiliary systems such as document management, license look-up, and artificial intelligence solutions (chat bot)
- Batch and web service exchanges of information with other agencies
- Cyber security management

The system must be: Configurable and easily deployed when changes are required. User Interface (UI) for online systems should be fully compatible with mobile devices, at the minimum Apple and Android, and easily maintainable. Flexible cost-effective hosting options including public cloud options. Modern and secure web application programming interface service layer for interacting with the back-end applications. Robust security at all levels. Workflow solution that streamlines business processes by multiple groups. Extendable source code designed for future growth that allows technical staff to build extension and enhancements without impairing existing system functions. Seamless conversion of data from existing system to new system. Secure cloud-based solution that is FedRAMP compliant. Automate business processes and communication to reduce application processing times and manual review.

The document management solution must provide management of documentation related to parimutual licensing functions in conjunction to the system. Additionally, the document management solution should allow for the management of all FGCC documents, eliminating the need for other solutions for non-license-based documents.

2. Resource and Summary Level Funding Requirements for Proposed Solution (if known)

The new system will require recurring operational costs for use of the platform as well as cloud hosting. It is anticipated positions may be required for the support of the systems.

E. Capacity Planning (historical and current trends versus projected requirements)

Currently, VERSA REG access is provided to FGCC under an MOU with the Department of Business and Professional Regulation. FGCC was established as an independent commission on July 1, 2022 creating the need to procure a secure, independent system.

VII. Schedule IV-B Project Management Planning

The diagram below is a summary of anticipated project phases and key activities.

	Year 0 (FY 22-23)	Year 1 (FY23-24)	Year 2 (FY 24-25 pending funding)
Phase	Requirements Gathering	Planning and Contracting	Development and Transition
Key Activity	 Kick-off meeting Requirements gathering and analysis Documentation development 	ITNContract developmentContract procurementGap analysis	 System design Data Migration mapping Test Plan development Migration UAT Go-Live
Deliverables	Milestones: • Business workflows • Requirements documentation	Milestones: • Vendor/ solution selection • Contract execution • D1 – Gap analysis	Milestones: • D2 – Design documentation • D3 – Test plan • D4 – Demonstrations • D5 – UAT Scripts • D6 – Go-Live acceptance • D7 – Transition plan

VIII. Appendices

Number and include all required spreadsheets along with any other tools, diagrams, charts, etc. chosen to accompany and support the narrative data provided by the agency within the Schedule IV-B.

Market Guide for Community Development, Regulation and Licensing Applications

Published 6 June 2022 - ID G00763127 - 16 min read

By Analyst(s): Alia Mendonsa, John Kastrinos

Initiatives: Government Technology Optimization and Modernization

Modern CDR applications have a rich set of features and seamless workflow, and increasingly leverage emerging technologies.

Government CIOs should leverage this guide to identify the key functionalities and approaches to support application modernization and enable digital government services.

Overview

Key Findings

- SaaS delivery models have become the predominant delivery model for new community development and regulation (CDR) system implementations. This is a result of governments' growing receptivity toward cloud solutions and vendor community SaaS-first marketing strategies.
- Government pandemic response and the resulting economic recovery and resilience plans have fueled digital government momentum and increased investment in CDR modernization to increase remote and self-service capabilities.
- Capabilities such as geospatial analytics, robotic process automation and predictive modeling are application differentiators for governments.

Recommendations

Government CIOs modernizing legacy CDR solutions must:

- Work with executives and decision makers to balance a focus on delivering against business requirements against the organization's application strategy and IT principles.
- Include as a part of selection criteria the solution's alignment with the existing application portfolio, planned migrations or modernizations, and longer-term regulatory requirements.

- Select solutions with differentiating capabilities, such as geospatial analytics, robotic process automation and predictive modeling, while also assessing the vendor offerings' strength of security, extensibility, interoperability, scalability, modularity and configurability.
- Confirm that proposed solutions will meet mission requirements by articulating to providers use cases and desired outcomes, and by requiring demonstrations of how the proposed solution will meet those needs.

Strategic Planning Assumptions

By 2025, 95% of new IT investments made by government agencies will be made in as-a-service solutions.

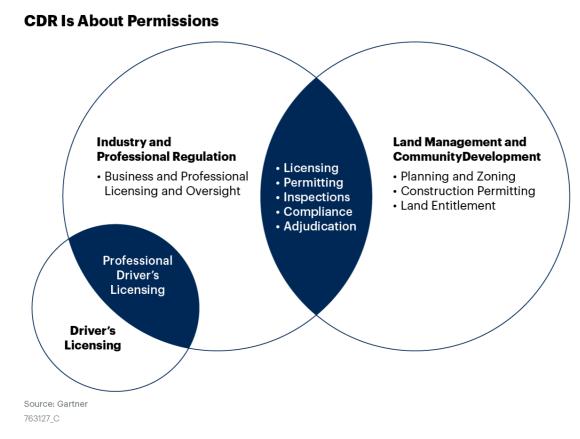

By 2025, over 75% of governments will operate more than half of workloads using hyperscale cloud service providers.

Market Definition

Gartner defines the market for community development and regulation applications as those in support of a vast list of government permissions and oversight activities, such as land management and community development. The solutions also support industry and professional regulatory functions typically found within state and local governments. CDR applications designed for community planning often include planning and zoning, construction permitting, plan review, and land management capabilities. They typically rely heavily on geographical information systems for visualizations of data.

CDR applications for industry and professional regulation support numerous types of licenses, such as professional, business, driver's, hunting and fishing, and animal licensing. They also handle more-complex regulatory processes, such as environmental protection, and oversight of controlled substances and financial, mining, manufacturing and other heavily regulated industries. At their intersection, most applications support licensing, permitting, inspections, compliance and adjudication capabilities. Driver's licensing and vehicle titling and registration for professionals and citizens represent a subset of this market (see Figure 1).

Figure 1: CDR Is About Permissions

Gartner

Market Description

CDR-type agencies provide oversight and regulation to various industries and processes to ensure the health and safety of the communities that they serve. Gartner has identified 13 primary domains and processes.

Driver's licensing and vehicle registration:

- Driver's licensing Applications for, assessment and issuance of driver's licenses, including commercial drivers
- Motor vehicle registration Registration of ownership (titling) of motor vehicles

Industry and professional regulation:

 Business licensing — Application for, and issuance of, a license to operate a business

- Occupational licensing Certification to practice in a given field
- Animal licensing Registration of domesticated animals to a named owner
- Recreational licensing and permitting Application for, and issuance of, a license to hunt, fish or use a public facility, such as a park, campground, preserve, sports field, boating dock or street closure
- Health licensing and permitting Health permits, typically for restaurants and healthcare delivery organizations or other businesses subject to health and safety inspections and licenses to operate
- Industry regulation Authority to operate a business subject to heavy regulation, such as alcohol, tobacco and cannabis sales, and gaming, and businesses regulated by environmental health regulatory bodies, such as water and wastewater treatment, mining, and manufacturing

Land management and community development:

- Land management Processes and reporting that support the granting of land permissions, such as for construction, parcel allocation, zoning or planning
- Land development permitting Land use and construction permitting processes
- Plan review Blueprint and architectural plan review and markup processes associated with land development permitting

Compliance:

- Inspection and code enforcement Module that supports compliance with regulations and codes, including inspections and site visits and related documentation, violation notification, ticketing, and public reports and notices
- Adjudication Case management module that manages complaints, investigations, adjudications and sanctions

Application capabilities that support these processes can include:

- Identity verification
- Workflow, prioritization and enumeration of assignments

- Correspondence management
- Document storage, retrieval and version control
- Mobile access
- Payment engines
- Business intelligence (BI), analytics and reporting tools

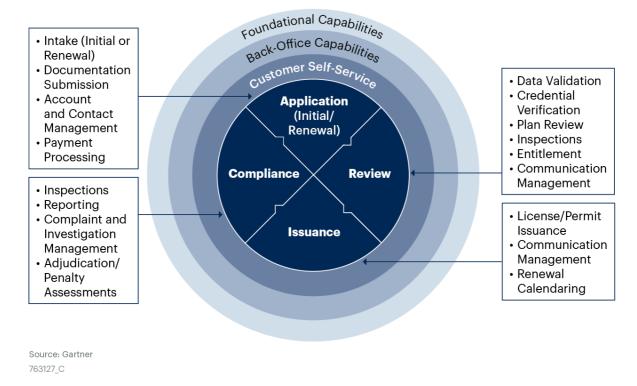

CDR solutions will typically integrate with a number of additional applications and tools, including:

- End-user calendaring
- Email
- Operations management
- Asset management
- Financial management
- Electronic plan review (if not native to the application)
- License and credential validation and verification
- Assessment tools
- Digital signature services
- Agenda management
- Laboratory management information systems
- Human resources
- Timekeeping and payroll
- Document management (if not native to the application)

Each regulatory agency has unique requirements. However, Gartner has observed that the process by which a license or permit is applied for, processed, issued and enforced generally follows a similar workflow (see Figure 2) and requires similar business capabilities of its solutions.

Figure 2: CDR Permission Life Cycles Share Capability Requirements

CDR Permission Life Cycles Share Capability Requirements

Gartner

Market Direction

CDR solutions have historically been built-for-purpose applications that were heavily customized according to specific customer needs. These implementations frequently resulted in complex applications that did not fully meet the expectations of the organizations that commissioned them, and were difficult to maintain, upgrade and evolve with changing business needs.

The predominant model for existing CDR solutions is commercial off-the-shelf (COTS) applications managed on-premises and often heavily customized. Economic recovery and growth is a key political platform for many local and state government politicians, which has placed pressure on departments to reduce turnaround times for licensing and permitting processes to accelerate local development and generate revenue. This further accelerated the adoption of COTS applications due to increased speed of implementation.

SaaS Delivery Models Have Become the Standard

Jurisdictions are increasingly implementing SaaS as part of an overarching cloud strategy. Today, most COTS vendors offer a SaaS delivery model as the default model for new CDR implementations. In fact, many vendors that previously supported on-premises delivery are now requiring clients to migrate to SaaS delivery by no longer supporting on-premises implementations. Gartner expects the adoption of SaaS delivery models for CDR applications to steadily increase over the next five years, as postpandemic economic recovery continues to spur legacy modernization investments.

Based on Gartner review of market solutions, COTS products (delivered on-premises or via a SaaS delivery model) offer approximately 80% of base functionality out of the box. Workflows and data fields can be configured to align with an organization's business processes and regulatory requirements, with no custom coding required. As a result, the time frames for implementation can be significantly reduced, and time to value in achieving desired business outcomes can be accelerated substantially. However, while COTS solutions are highly configurable, it is not advisable to customize them, and in a SaaS delivery model customization is not an option. A COTS implementation inevitably requires business process changes, which can negatively impact system acceptance and satisfaction.

A number of system integrators and software developers have leveraged low-code application platforms (LCAPs) to develop and productize CDR applications. Also, delivered in the cloud as a service, these solutions offer more-modern platforms and user interfaces, while also enabling an organization to build workflows that more closely align with existing business processes. Once implemented, LCAPs offer the flexibility to automate additional workflows outside of the core of CDR. They are commonly selected by organizations with complex regulatory environments where stakeholders believe a COTS solution cannot meet business needs.

However, implementations of CDR on an LCAP platform can run similar risks and complexities of custom development. Organizations may skip the opportunities to evaluate and streamline processes and instead focus on duplicating existing workflows on a more modern platform. This approach eliminates process efficiencies that can be gained by aligning with the out-of-the-box workflows of a COTS or SaaS product.

More recently, some LCAP vendors are directly offering COTS modules on their platforms and delivering them in a SaaS model to accelerate development and delivery of CDR capability on their platforms, while retaining the increased flexibility of an LCAP.

Market Analysis

The state and local government CDR market can be viewed across multiple evaluation lenses — by jurisdiction size and level of government.

CDR Market by Jurisdiction Size

Gartner believes this criterion provides an important level of segmentation for government solutions and may indicate the appropriateness of a vendor's offering to that jurisdiction. Many vendors have developed CDR products that cater to the business needs and complexities of particular sizes of governments and so are actively pursuing market share in specific government tiers. However, many vendors in the market today offer pricing models that are accessible to both small and very large jurisdictions. Given the sheer magnitude of organizations, Gartner has divided the market into five user tiers of similar size, technology complexity and budgetary bandwidth (see Table 1).

Table 1: Jurisdiction Sizing Tiers

Tiər 🕠	Jurisdiction Description 🕠
Tier 1	Organizations with operating budgets of greater than \$1 billion
Tier 2	Organizations with operating budgets of \$500 million to \$1 billion
Tier 3	Organizations with operating budgets of \$100 million to \$500 million
Tier 4	Organizations with operating budgets of \$20 million to \$100 million
Tier 5	Organizations with operating budgets of less than \$20 million

Source: Gartner (June 2022)

CDR Market by Level of Government

Given the discrete functions of CDR applications, another appropriate way to examine the market is to understand the orientation of specific products to state, regional and municipal organizations. Each government entity has specific business requirements and context that affect the scope of the CDR modernization effort and the criteria for right-fit analysis of solutions in the market.

Some vendors in the market cater their solutions to especially complex industry regulation, such as environmental and industry oversight and regulation. The functions needed include more-linear requirements for licensing applications, evaluations and permitting, as well as require automation for more-recursive oversight, reporting and compliance activities.

Municipal governments and state personal property revenue agencies often desire robust geospatial analysis capabilities for planning, zoning, entitlements and integrations to tax assessment. Motor vehicle departments require more-niche capabilities for driver's licensing, vehicle titling and registration, and dealer licensing, with integrations to external license and plate printing and issuance, for example.

In addition to business functionality, a discussion is necessary of the software approach in the context of the organization's broader enterprise architecture and application strategy.

Deciding Between COTS and LCAP

Neither a COTS and SaaS nor an LCAP is a "silver bullet" solution. Both generally offer a speedier time to value than a custom-developed solution. Each approach has its benefits and pitfalls.

Several factors may indicate a COTS or LCAP approach, including:

- Urgency of modernization
- Scope of the solution
- Maturity of the organization
- Alignment to the information and technology (I&T) strategy
- Existing investment in an LCAP

- I&T skill sets
- Technological and stakeholder resource availability

CIOs and their teams should carefully consider approaches to CDR application modernization across these factors to help determine which approach is most appropriate for the organization.

Approach to Execution

Organizations that are acquiring a CDR application commonly focus on product selection, with a lot of emphasis on functional requirements. However, the implementation approach and the competencies that the vendor brings to the implementation can be pivotal to project success.

The software companies in this market often have mixed reputations for their ability to execute. It is, therefore, critical to scrutinize the vendor's approach to achieving the desired outcomes of the organization. Business process change is almost inevitable and likely desirable for legacy modernization. Despite aspirations for business transformation, this is also the most likely domain for contention about solution approach and often leads to stakeholder dissatisfaction.

Organizations should develop business outcome scenarios and use cases and require demonstrations of how a proposed solution will achieve these outcomes to gain a tangible understanding of the capabilities and limitations of any solution being considered. The most successful implementation teams integrate a comprehensive business process reengineering (BPR) and organizational change management strategy into their implementation plans. Whether a system integrator or software vendor is supporting implementation, it should illustrate BPR and organizational change management competency, with both reflected in its proposal.

Differentiating Capabilities of CDR Solutions

Vendors are increasingly competing in the crowded CDR market with the incorporation of cutting-edge technologies. Embedding technologies like robotic process automation (RPA) and artificial intelligence (AI) can greatly increase the value proposition offered through intuitive functionality, enhanced user experience and increased efficiency.

For example, some vendors differentiate with mobile capabilities that incorporate AI. Oracle has implemented natural language technologies and AI capabilities to help citizens navigate the process of applying for various types of licenses and building permits. A citizen can speak or type in natural language, and the chatbot will initiate the process of applying for a given license or permit, as well as enable the user to navigate to supporting material.

Cityworks, a Trimble company, has leveraged its integrations with Esri for geospatial information to deliver robust visualizations of data and analysis via customized reporting capabilities. This gives data meaningful interpretations that help administrators make better decisions. Accela has integrated a robust BI capability to provide more comprehensive and interactive analysis of data to enhance capacity planning and work assignment.

Companies like OpenGov, Selectron Systems, Camino Technologies and Tyler Technologies are using technology to improve the experience of inspectors. OpenGov's code enforcement module combines site location data, inspector expertise and zone data, and calendar information to schedule inspections in the most efficient routes. Selectron has developed a robust rule engine that comprehensively supports inspectors in the field with next-best-action prompts to ensure no code evaluations are overlooked on-site. Companies such as Tyler and Camino Technologies have developed a virtual meeting capability native to their solutions. This tool can be used for a wide variety of use cases, including virtual inspections, application assistance and plan review.

Future of CDR Applications

As emerging technologies mature, CDR application vendors will increasingly offer hyperautomated processes end to end, suggesting the next best actions for both citizens and employees. Digital twins may offer more-robust scenario planning and data analysis. Immersive technology may allow for impressive virtualization of proposed construction for planning, zoning and plan review. As citizen ID technologies such as decentralized identity, identity wallets and authenticated provenance advance, both ID issuance for driver's licensing and identity validation capabilities across all CDR solutions will mature. Machine-readable legislation applied to the complex business rules in regulatory organizations could transform the visibility and compliance with code.

These capabilities are not predominantly native to CDR applications today. However, some of these capabilities will be offered native to CDR applications in the future, as both COTS and SaaS and LCAP evolve toward intelligent applications. Other capabilities will be integrated with an organization's CDR application in composable business capabilities. CIOs evaluating CDR solutions must make interoperability, extensibility and composability of CDR solutions crucial attributes to CDR product selection criteria today to incorporate these capabilities as they mature tomorrow.

Representative Vendors

The vendors listed in this Market Guide do not imply an exhaustive list. This section is intended to provide more understanding of the market and its offerings.

Market Introduction

Products that support at least three major process streams (modules) in CDR organizations and have demonstrated market presence in their target geographies were considered for inclusion in this Market Guide. The following list is derived from publicly available information (see Note 1 and Note 2).

Table 2: Representative Vendors in Community Development, Regulation and Licensing Applications

(Enlarged table in Appendix)

Vendor ↓	Solution ψ
Accela	Civic Platform
Appian	Low Code Platform
Avolve Software	OAS, ProjectDox, DigEplan, and PlansAnywhere
Autocene	Autocene Enterprise Automation Platform
Brightly Software (Dude Solutions)	SmartGov
Camino Technologies	Camino Platform
CentralSquare Technologies	Public Administration
CGI	Advantage Regulatory Management
citizenserve	citizenserve portal and solutions
Civica	Cx Regulatory Services and Licensing Management
CivicPlus	CivicGov
Clariti (formerly BasicGov)	Community Development
Computronix	POSSE
datb	Local Government Platform (LGP)/kinodb
Deloitte	GovConnect
FAST Enterprises	Fast DS-VS
GovPilot	GovPilot
Granicus (Calytera)	Amanda Editions
Harris Computer	CityView
Hyland	OnBase and Plan Review
ldox	Planning, Building Control, Land Charges and Gazetteer Management
Infor	CloudSuite Public Sector
KPMG	Regulate 365
Kyra Solutions	CLIPA and ATMOS
Microsoft	License and permit solution
Objective	Objective RegWorks
OpenCounter	Special Events Portal and ZoningCheck
OpenGov	Citizen Services
Oracle	Permitting and Licensing
PayIt	PayItGov
Quisitive Mazik Global	MazikCity
Salesforce	Salesforce Licensing, Permitting and Inspections Solutions for Public Sector
SAP	SAP for Public Sector
Selectron	Atlas and Relay
System Automation	MyLicense
TechOne	OneGovernment and OneCouncil
Thentia Cloud	Thentia Cloud for Government
Trimble (Cityworks)	Cityworks
Tyler Technologies	Enterprise Permitting and Compliance and State Regulator
Ungork	Ungork for Government

Market Recommendations

When evaluating CDR solutions, focus on differentiating requirements. That is because a large proportion of "commodity requirements" are common across jurisdictions and can be met by many CDR products to provide basic functionality. Data analytics, including geospatial analytics; mobile capabilities; and the use of RPA, AI and chatbots are particularly varied in solution maturity. Create a shortlist of solutions that provide innovative and mature native functionalities, or can leverage functionalities available in other platforms to deliver richer, more integrated capabilities that will improve and streamline internal and external services.

Evaluate the alignment of solution delivery models with your organization's application strategy and overarching IT principles. Consider existing platforms, planned migrations or modernizations, and their impact on short-term and long-term CDR solution architecture requirements. Moreover, consider the solution's interoperability with existing enterprise solutions, including financial management, document management and CRM solutions, as well as point solutions, such as plan review and markup applications, inspections, and billing or payment engines. Is the solution extensible to other similar workflows across the jurisdiction and to ecosystem partners? Can you leverage platform BI and analytics, AI, or machine learning (ML) capabilities through integration with the application, or are these capabilities native to the application?

Clearly communicate business and functional priorities to the market through use cases and related methods to describe process requirements. In particular, focus on business outcomes, not existing processes, to ensure a selected solution does not simply "check the boxes" on detailed product capabilities, but provides quantifiable value realized in efficiencies and effectiveness metrics.

CIOs procuring CDR applications:

- Identify the end-to-end business process scope that could be optimized (for example, through automation, integration or extension across agencies), with a focus on outcomes and use cases.
- Create a shortlist of CDR vendors, as well as system integrators, that address needed capabilities.
- Consult with similarly sized and functionally analogous organizations for their perspectives. Request references from vendors under consideration to gain a concrete understanding of a solution's capabilities and the level of effort required to implement them.
- Develop use cases and define desired outcomes and then require demonstrations of prospective vendor's approaches to fulfilling them.
- Require proposers to articulate how they will approach and test required integrations during the implementation and subsequent upgrades.
- Evaluate the alignment of solutions with your organization's application strategy. Is the solution secure, interoperable, scalable, modular, extensible and configurable?

Require integration of BPR and organizational change management strategies into proposed implementation plans. This helps to evaluate a prospective partner's ability to facilitate a successful implementation that meets organizational objectives.

Note 1 Representative Vendor Selection

Vendors were selected among scores of viable solutions in this market, based on the geographical diversity, application approach and support of at least three process automations.

2. EXH	HBIT A (EADR, EXA)					
2.1	Is the budget entity authority and description consistent with the agency's LRPP					
	and does it conform to the directives provided on page 57 of the LBR		'] '	1 '	
l	Instructions?	Yes	Yes	Yes	Yes	
2.2	Are the statewide issues generated systematically (estimated expenditures,					
	nonrecurring expenditures, etc.) included?	Yes	Yes	Yes	Yes	
2.3	Are the issue codes and titles consistent with Section 3 of the LBR Instructions		·		<u> </u>	
<u></u>	(pages 15 through 28)? Do they clearly describe the issue?	Yes	Yes	Yes	Yes	

3. EXHIBIT B (EXBR, EXB)

3.1	Is it apparent that there is a fund shift where an appropriation category's funding					
	source is different between A02 and A03? Were the issues entered into					
	LAS/PBS correctly? Check D-3A funding shift issue 340XXX0 - a unique					
	deduct and unique add back issue should be used to ensure fund shifts display					
	correctly on the LBR exhibits.	NA	NA	NA	NA	
AUDITS						
3.2	Negative Appropriation Category Audit for Agency Request (Columns A03 and					
	A04): Are all appropriation categories positive by budget entity and program					
	component at the FSI level? Are all nonrecurring amounts less than requested					
	amounts? (NACR, NAC - Report should print "No Negative Appropriation	*7	3 7	*7	*7	
2.2	Categories Found")	Yes	Yes	Yes	Yes	
3.3	Current Year Estimated Verification Comparison Report: Is Column A02 equal					
	to Column B07? (EXBR, EXBC - Report should print "Records Selected	* 7	**	* 7	* 7	
	Net To Zero")	Yes	Yes	Yes	Yes	
TIP	Generally look for and be able to fully explain significant differences between					
	A02 and A03.					
TIP	Exhibit B - A02 equal to B07: Compares Current Year Estimated column to a					
	backup of A02. This audit is necessary to ensure that the historical detail					
	records have not been adjusted. Records selected should net to zero.					
TID						
TIP	Requests for appropriations which require advance payment authority must use					
	the sub-title "Grants and Aids". For advance payment authority to local units of					
	government, the Aid to Local Government appropriation category (05XXXX)					
	should be used. For advance payment authority to non-profit organizations or					
	other units of state government, a Special Categories appropriation category					
4	(10XXXX) should be used.					
	(BIT D (EADR, EXD)					
4.1	Is the program component objective statement consistent with the agency LRPP,					
	and does it conform to the directives provided on page 60 of the LBR					
	Instructions?	Yes	Yes	Yes	Yes	
4.2	Is the program component code and title used correct?	Yes	Yes	Yes	Yes	
TIP	Fund shifts or transfers of services or activities between program components					
	will be displayed on an Exhibit D whereas it may not be visible on an Exhibit A.					
5. EXH	BIT D-1 (ED1R, EXD1)					
5.1	Are all object of expenditures positive amounts? (This is a manual check.)	Yes	Yes	Yes	Yes	
AUDITS	v					
5.2	Do the fund totals agree with the object category totals within each					
	appropriation category? (ED1R, XD1A - Report should print "No					
	Differences Found For This Report")	**	**	**	**	
	•	Yes	Yes	Yes	Yes	
5.3	FLAIR Expenditure/Appropriation Ledger Comparison Report: Is Column A01					
	less than Column B04? (EXBR, EXBB - Negative differences [with a \$5,000					
	allowance] need to be corrected in Column A01.)	Yes	Yes	Yes	Yes	
5.4	A01/State Accounts Disbursements and Carry Forward Comparison Report:					
	Does Column A01 equal Column B08? (EXBR, EXBD - Differences [with a					
	\$5,000 allowance at the department level] need to be corrected in Column					
	A01.)	Vaa	Vac	Vac	Vaa	
		Yes	Yes	Yes	Yes	

A01 to correct the object amounts. In addition, the fund totals must be adjusted to reflect the adjustment made to the object data. TIP If fund totals and object totals do not agree or negative object amounts exist, the agency must adjust Column A01. TIP Exhibit B - A01 less than B04: This audit is to ensure that the disbursements and carry/certifications forward in A01 are less than FY 2022-23 approved budget. Amounts should be positive. The \$5,000 allowance is necessary for rounding. TIP If B08 is not equal to A01, check the following: 1) the initial FLAIR disbursements and carry/certifications forward data load was corrected appropriately in A01; 2) the disbursement data from departmental FLAIR was reconciled to State Accounts; and 3) the FLAIR disbursements did not change after Column B08 was created. Note that there is a \$5,000 allowance at the department level. 6. EXHIBIT D-3 (ED3R, ED3) (Not required in the LBR - for analytical purposes only.) 6. I Arie sissues appropriately aligned with appropriation categories? Yes Yes Yes Yes Yes Yes Yes Yes Stabibit D-3 is not required in the budget submission but may be needed for this particular appropriation category/issue sort. Exhibit D-3 is also a useful report when identifying negative appropriation category problems. 7. 7 10	, , , , , , , , , , , , , , , , , , ,	108	INA	INA	INA	
7.18	Are the issues relating to <i>major audit findings and recommendations</i> properly	NTA	NIA	NIA	NIA	
7.10	coded (4A0XXX0, 4B0XXX0)?	NA	NA	NA	NA	
7.19	Does the issue narrative identify the strategy or strategies in the Five Year					
	Statewide Strategic Plan for Economic Development?	Yes	Yes	Yes	Yes	
AUDIT:						
7.20	Does the General Revenue for 160XXXX (Adjustments to Current Year					
	Expenditures) issues net to zero? (GENR, LBR1)	NA	NA	NA	NA	
7.21	Does the General Revenue for 180XXXX (Intra-Agency Reorganizations) issues					
	net to zero? (GENR, LBR2)	Yes	Yes	Yes	Yes	
7.22	Does the General Revenue for 200XXXX (Estimated Expenditures	103	168	168	108	
1.44	Realignment) issues net to zero? (GENR, LBR3)	NT A	».T. A	NT A	NT A	
7.00		NA	NA	NA	NA	
7.23	Have FCO appropriations been entered into the nonrecurring column (A04)?					
	(GENR, LBR4 - Report should print "No Records Selected For Reporting"					
	or a listing of D-3A issue(s) assigned to Debt Service (IOE N) or in some					
	cases State Capital Outlay - Public Education Capital Outlay (IOE L))	NA	NA	NA	NA	
7.24	Has narrative been entered for all issues requested by the agency? Agencies do					
	not need to include narrative for startup issues (1001000, 2103XXX, etc.) that					
	were not input by the agency. (NAAR, BSNR)					
	1 ··· · J · · · · · · J · · · · · · · ·	Yes	Yes	Yes	Yes	

- a						1
7.25	Has the agency entered annualization issues (260XXX0) for any issue that was					
	partially funded in Fiscal Year 2023-24? Review Column G66 to determine					
	whether any incremental amounts are needed to fully fund an issue that was					
	initially appropriated in Fiscal Year 2023-24. Do not add annualization issues					
	for pay and benefit distribution issues, as those annualization issues					
	(26AXXXX) have already been added to A03.	NT A	NT A	NT A	NT A	
	· · · · · · · · · · · · · · · · · · ·	NA	NA	NA	NA	l
TIP	Salaries and Benefits amounts entered using the OADA/C transactions must be					
	thoroughly justified in the D-3A issue narrative. Agencies can run					
	OADA/OADR from STAM to identify the amounts entered into OAD and					
	ensure these entries have been thoroughly explained in the D-3A issue narrative.					
TIP	The issue narrative must completely and thoroughly explain and justify each D-					
	3A issue. Agencies must ensure it provides the information necessary for the					
	OPB and legislative analysts to have a complete understanding of the issue					
	submitted. Thoroughly review pages 63 through 70 of the LBR Instructions.					
TIP	Check BAPS to verify status of budget amendments. Check for reapprovals not					
	picked up in the General Appropriations Act. Verify that Lump Sum					
	appropriations in Column A02 do not appear in Column A03. Review budget					
	amendments to verify that 160XXX0 issue amounts correspond accurately and					
	net to zero for General Revenue funds.					
TIP	If an agency is receiving federal funds from another agency the FSI should = 9					
111	(Transfer - Recipient of Federal Funds). The agency that originally receives the					
	funds directly from the federal agency should use FSI = 3 (Federal Funds).					
TIP	If an appropriation made in the FY 2023-24 General Appropriations Act					
	duplicates an appropriation made in substantive legislation, the agency must					
	create a unique deduct nonrecurring issue to eliminate the duplicated					
	appropriation. Normally this is taken care of through line item veto.

0.27		NTA	NT A	NT A	NT A	
	properly accounted for in the appropriate column(s) in Section III?	NA	NA	NA	NA	
8.28	Does Column A01 of the Schedule I accurately represent the actual prior year					
	accounting data as reflected in the agency accounting records, and is it provided					
	in sufficient detail for analysis?	Yes	Yes	Yes	Yes	
8.29	Does Line I of Column A01 (Schedule I) equal Line K of the Schedule IC?	Yes	Yes	Yes	Yes	
AUDITS						
8.30	Is Line I a positive number? (If not, the agency must adjust the budget request to					
0.00	eliminate the deficit).					
	eminiate the deficity.	Yes	Yes	Yes	Yes	
8.31	Is the June 30 Adjusted Unreserved Fund Balance (Line I) equal to the July 1					
	Unreserved Fund Balance (Line A) of the following year? If a Schedule IB was					
	prepared, do the totals agree with the Schedule I, Line I? (SC1R, SC1A -					
	Report should print "No Discrepancies Exist For This Report")	Yes	Yes	Yes	Yes	
0.22	Has a Department Level Reconciliation been provided for each trust fund and	103	103	103	103	
8.32	1					
	does Line A of the Schedule I equal the CFO amount? If not, the agency must					
	correct Line A. (SC1R, DEPT)	Yes	Yes	Yes	Yes	
8.33	Has a Schedule IB been provided for ALL trust funds having an unreserved fund					
0.00	balance in columns A01, A02 and/or A03, and if so, does each column's total					
	agree with line I of the Schedule I?					
	agree with thie 1 of the Schedule 1?	Yes	Yes	Yes	Yes	
8.34	Have A/R been properly analyzed and any allowances for doubtful accounts					
0.51	been properly recorded on the Schedule IC?					
		NA	NA	NA	NA	
TIP	The Schedule I is the most reliable source of data concerning the trust funds. It					
	is very important that this schedule is as accurate as possible!					
TIP	Determine if the agency is scheduled for trust fund review. (See pages 121					
	through 126 of the LBR Instructions.) Transaction DFTR in LAS/PBS is also					
	available and provides an LBR review date for each trust fund.					
TIP	Review the unreserved fund balances and compare revenue totals to expenditure					
111	totals to determine and understand the trust fund status.					
TID						
TIP	Typically nonoperating expenditures and revenues should not be a negative					
	number. Any negative numbers must be fully justified.					
9. SCHI	EDULE II (PSCR, SC2)					
AUDIT:						
			ı			
9.1	Is the pay grade minimum for salary rate utilized for positions in segments 2 and					
	3? (BRAR, BRAA - Report should print "No Records Selected For This					
	Request") Note: Amounts other than the pay grade minimum should be fully					
	justified in the D-3A issue narrative. (See <i>Base Rate Audit</i> on page 156 of the					
	LBR Instructions.)	Yes	NA	Yes	Yes	
10. SCH	EDULE III (PSCR, SC3)		•			
10.1	Is the appropriate lapse amount applied? (See page 91 of the LBR Instructions.)					
10.1	is the appropriate tapse amount applied: (See page 31 of the LDK institutions.)	Yes	Yes	Yes	Yes	
10.2	Are amounts in <i>Other Salary Amount</i> appropriate and fully justified? (See	100	100	100	100	
10.2						
	pages 94 and 95 of the LBR Instructions for appropriate use of the OAD		_			
	transaction.) Use OADI or OADR to identify agency other salary amounts	Yes	Yes	Yes	Yes	

11. SCH	IEDULE IV (EADR, SC4)					
11.1	Are the correct Information Technology (IT) issue codes used?	Yes	NA	NA	NA	
TIP	If IT issues are not coded (with "C" in 6th position or within a program		,			
	component of 1603000000), they will not appear in the Schedule IV.					
12. SCH	IEDULE VIIIA (EADR, SC8A)					
12.1	Is there only one #1 priority, one #2 priority, one #3 priority, etc. reported on the					
	Schedule VIII-A? Are the priority narrative explanations adequate? Note: FCO					
	issues can be included in the priority listing.	Yes	Yes	Yes	Yes	
13. SCH	IEDULE VIIIB-1 (EADR, S8B1)					
13.1	NOT REQUIRED FOR THIS YEAR	NA	NA	NA	NA	
TIP	If all or a portion of an issue is intended to be reduced on a nonrecurring					
	basis, include the total reduction amount in Column A91 and the					
	nonrecurring portion in Column A92.					
14 SCH	IEDULE VIIIB-2 (EADR, S8B2) (Required to be posted to the Florida Fiscal 1	Portol)				
14.1	Do the reductions comply with the instructions provided on pages 100 through	or tar)				
14.1	103 of the LBR Instructions regarding a 10% reduction in General Revenue and					
	Trust Funds, including the verification that the 33BXXX0 issue has NOT been					
	used? Verify that excluded appropriation categories and funds were not used					
	(e.g. funds with FSI 3 and 9, etc.)	NA	NA	Yes	Yes	
TIP	Compare the debt service amount requested (IOE N or other IOE used for debt					
	service) with the debt service need included in the Schedule VI: Detail of Debt					
	Service, to determine whether any debt has been retired and may be reduced.					
TIP	If all or a portion of an issue is intended to be reduced on a nonrecurring basis,					
	in the absence of a nonrecurring column, include that intent in narrative.					
15. SCH	IEDULE VIIIC (EADR, S8C) (NO LONGER REQUIRED)
