## FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES COMMISSIONER WILTON SIMPSON

### LEGISLATIVE BUDGET REQUEST

September 15, 2023

Chris Spencer, Director Office of Policy and Budget Executive Office of the Governor 1702 Capitol Tallahassee, Florida 32399-0001

Tim Sadberry, Staff Director Senate Committee on Appropriations 201 Capitol Tallahassee, Florida 32399-1100

Eric Pridgeon, Staff Director House Appropriations Committee 221 Capitol Tallahassee, Florida 32399-1300

### Directors:

Pursuant to Chapter 216, Florida Statutes, the Legislative Budget Request for the Florida Department of Agriculture and Consumer Services is submitted in the format prescribed in the budget instructions. The information provided electronically and contained herein is a true and accurate presentation of our proposed needs for the 2024-25 Fiscal Year.

This proposal reflects our department's continued commitment to foster growth and ensure the long-term sustainability of Florida's more than \$180 billion agriculture industry, as well as serve as a good steward of the state's natural resources, help ensure the safety and wholesomeness of food, and protect consumers from fraud and deceptive business practices.

Should you have any questions about my budget proposals, please don't hesitate to call me directly at (850) 617-7700.

Wilton Simpson

Commissioner of Agriculture

## Florida Department of Agriculture and Consumer Services Fiscal Year 2023-2024 Temporary Special Duty – General Pay Additives Implementation Plan

Section 110.2035(7)(b), Florida Statutes, provides that each state agency shall include in its annual legislative budget request a proposed written plan for implementing temporary special duties—general pay additives during the next fiscal year. Pay additives are a valuable management tool which allows agencies to recognize and compensate employees for identified duties without providing a permanent pay increase. The Department of Agriculture and Consumer Services is requesting approval to implement temporary special duties - general as described below. The agency is not requesting any additional rate or appropriations for these additives.

### **Temporary Special Duties—General**

### **Description:**

These temporary pay increases are used in a variety of circumstances such as:

- An employee performing additional duties of a higher level position when the other position is vacant for any reason other than absent coworker due to Family Medical Leave Act (FMLA) or military leave.
- An employee performing additional duties of a higher level position whose incumbent has been temporarily assigned other duties.
- An employee who meets the criteria for out of title work under the AFSCME collective bargaining agreement or acting ranks under the PBA contract.
- An employee continuing to perform additional duties of an absent coworker when the coworker has exhausted FMLA leave but has not yet returned to work.
- An employee performing additional duties of a coworker who is absent in accordance with 60L-34.0051, Florida Administrative Code (F.A.C.), Family Supportive Work Program, of the Department of Management Services Personnel Rules, that does not meet the FMLA or military leave criteria.
- An employee performing additional duties of a significant nature and time regarding a special project or special assignment not normally assigned to the employee.

### Justification:

As we are not able to always anticipate when a position will become vacant, there may be project deadlines or daily work activities (inspections, payroll processing, license issuance, etc.) that must be met and fulfilled. If it is not feasible for these duties to go undone while the recruitment and selection process is being performed, it will be necessary to assign these duties to another employee until the position is filled. We also may have special projects or special assignments of a temporary nature that may necessitate the use of additional staff to perform duties not normally assigned to their position.

### Effective date of additive:

The additive will be in effect beginning the first day of the added duties or, when the temporary special duty is for an employee covered by the AFSCME contract or the PBA agreement, the additive must be effective no later than the 23<sup>rd</sup> day if the employee has been assigned duties of a higher level position for a period of more than 22 workdays within any six consecutive months.

### Length of time additive will be used:

The additive will be in effect for the length of time the position is vacant or until such time as management decides that the additional duties can be removed from the employee receiving the additive, but in either case no longer than 90 days without agency review to decide if it should be sent to the Department of Management Services for an extension.

#### **Additive Amount:**

Up to 10% of the employee's base salary (or the option to go to the minimum of the higher level pay grade, if determined appropriate).

### **Classes/Positions affected:**

Any Career Service classification could be affected by the provisions of this plan so it is not possible to predict exactly which temporary special duty additives will occur in FY 23/24. However, there were 23 temporary special duty additives (not including those for absent coworker for military/FMLA leave purposes) that were provided during the FY 22/23.

#### **Historical data:**

The provision for a temporary special duty additive has been in effect for many years dating back in the statutes to at least the year 1997. The number of persons for this type of additive for the prior fiscal year is shown in the paragraph above.

#### **Estimated annual cost:**

The last fiscal year's annual cost for temporary special duty additives (not including those for absent coworker for military/FMLA leave purposes) was \$34,613.86

#### **Collective Bargaining Units impacted:**

### AFSCME, Article 21: Compensation For Temporary Special Duty In A Higher Position

(A) Each time an employee is designated by the employee's immediate supervisor to act in a vacant established position in a higher broadband level than the employee's current broadband level, and performs a major portion of the duties of the higher level position, irrespective of whether the higher level position is funded, for more than 22 workdays within any six consecutive months, the employee shall be eligible to receive a temporary special duty additive in accordance with the Rules of the State Personnel System, beginning with the 23<sup>rd</sup> day.

(B) Employees being paid at a higher rate while temporarily acting in a position in a higher broadband level will be returned to their regular rate of pay when the period of temporary special duty in the higher broadband level is ended.

## <u>PBA-Law Enforcement Unit, Article 21: Compensation for Temporary Special Duty in a Higher Level Position</u>

### Section 1-Eligibility

Each time an employee is officially designated by the appropriate supervisor to act in an established position in a higher broadband level than the employee's current broadband level and performs a major portion of the duties of the higher level position, irrespective of whether the high level position is funded, for more than 22 workdays within any six consecutive months, the employee shall be eligible for a temporary special duty additive in accordance with Chapter 60L-32, F.A.C.

### Section 2-Method of Compensation

It is understood by the parties that, insofar as pay is concerned, employees temporarily filling a position in a higher broadband level shall be paid according to the same compensation method as promoted employees under the Rules of the State Personnel System.

### Section 3-Return to Regular Rate

Employees being paid at a higher rate while temporarily filling a position in a higher broadband level will be returned to their regular rate of pay when the period of temporary employment in the higher broadband level is ended.

| AL BUDGET FOR AGENCY (Total Activities + Pass Throughs + Reversions) - Should equal Section I above. (4)   |   |   |  |  |
| SCHEDULE XI/EXHIBIT VI: AGENCY-LEVEL UNIT COST SUMMARY   |   |   | 2,772,125,505  | 440,275,8  |

<sup>(1)</sup> Some activity unit costs may be overstated due to the allocation of double budgeted items.
(2) Expenditures associated with Executive Direction, Administrative Support and Information Technology have been allocated based on FTE. Other allocation methodologies could result in significantly different unit costs per activity.
(3) Information for FCO depicts amounts for current year appropriations only. Additional information and systems are needed to develop meaningful FCO unit costs.
(4) Final Budget for Agency and Total Budget for Agency may not equal due to rounding.

### Schedule XIV Variance from Long Range Financial Outlook

### Agency: Florida Department of Agriculture and Consumer Services

Article III, section 19(a)3 of the Florida Constitution, requires each agency Legislative Budget Request to be based upon and reflect the long range financial outlook adopted by the Joint Legislative Budget Commission or to explain any variance from the outlook.

Contact: Thomas Poucher, Director

| 1) | Does the long ra | ange financia | l outlook ad  | dopted by the Jo | oint Legislative | Budget Com | mission in Sep | tember 2023 | 3 contain | revenue or |

- 3) If your agency's Legislative Budget Request does not conform to the long range financial outlook with respect to the revenue estimates (from your Schedule I) or budget drivers, please explain the variance(s) below.
  - Rural and Family Lands request seeks additional authority to support agricultural land protection efforts.
  - Land Management request is based on identified needs of the Florida Forest Service and includes state forest facility repairs, roads and bridges repairs, reforestation and operational increases related to land management activities. LRFO includes \$93M in FCO funding.
  - Florida Forest Service Wildfire Suppression Equipment replacement needs far exceed this request.
  - The Florida Agricultural Promotion Campaign (FAPC) funding is needed to combat the negative impacts of natural disasters, diseases and foreign produce imports on Florida agricultural products. FAPC was funded as recurring in FY 2022-23.
  - Farm Share and Food Bank funding is sought directly by those organizations.
  - Aircraft Acquisition and Maintenane is based on current recurring maintenance needs.
  - Agricultural Promotion and Education Facilities funding are requested by separate entities. A ranked listing of projects is provided to the Legislature and Governor for consideration.
  - Citrus Greening research request based on current needs and funding history. Current request includes the Citrus Crop Decline Supplemental Transfer.
  - Agriculture and Natural Resources Critical Repairs request is for Code and Life Safety and Maintenance and Repairs at the State Farmers Markets. Critical repair needs far exceed the current year request.
  - The Florida State Fair has substantial maintenance and repair and code and life safety issues that far exceed this request.

Office of Policy and Budget - July, 2023

Hurricane Ian.

FY 2022-23 annual revenue of \$10,020,349 covered 99.8% (all but \$21,810) of annual expenditures. A factor

in this year's insignificant deficit was a decline in late fees resulting from the suspension of late fees pursuant to the Governor's executive orders suspending license expiration dates in FY 2022-23, due to

### **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture & Consumer Services

Regulatory Service to or Oversight of Businesses or Professions Program: Licensing – Chapter 493

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Legislation was passed in the 2002 Session to allow online training for Class D and G licenses. This process substantially decreases the costs and time of private schools and instructors to present these training courses and will allow instructors to electronically submit proof of course completion training certifications to the department. The decreased costs associated with this initiative primarily benefit the private sector and are unknown to the department.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

Pursuant to the above initiative to facilitate the online training program for Class D and G licensees, the department is currently developing information system modifications to allow Class D and G licensees to download their training certifications from the department's website. Given that the department furnished the G license firearms proficiency certificate but not the D license training certification, the cost savings to the department includes the cost to print the Certificate of Firearm Proficiency form for Class G new and renewal licensees, as well as the envelope and postage costs. An average of 7,329 and 8,137 new and renewal G licenses were issued, respectively, over the past three years and the annual cost savings to the department is estimated to be \$42,749.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the division promotes public protection through compliance and enforcement of laws, regulations, and professional standards for persons employed in the private investigative, private security and private recovery industries. As of June 30, 2023, 177,484 individual and business licenses were active, as issued by the division, under the provisions of Chapter 493, Florida Statues.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

Projections are prepared using generally accepted governmental accounting procedures, as are actual and estimated revenues and expenditures. The Revenue Estimating Conference is not involved in estimating the annual revenue generated and received by the Division of Licensing, on a regular basis.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Yes, the division analyzes the fees being assessed for licenses on a regular basis and these fees are adequate to cover the direct and indirect costs of the regulatory services provided.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

Yes, the fee schedule is based on the type of license. For example, more time and resources are required to process an agency application and regulate the licensee than are required for an individual's application and license. Therefore, the license fee for a Security Agency, Private Investigative Agency, or Recovery Agency cost significantly more than the license fee for an individual licensed as a private security officer, private investigator, or private recovery agent.

In addition, license fees cover the costs to regulate an entity after a license is issued, which include activities such as investigating public complaints concerning the service provided by a licensee, performing compliance inspections, and frequent monitoring of arrest records, domestic violence records, incarceration records and mental health records. Fees are also sufficient to cover the costs associated with providing statutorily required printed and online materials to licensees and the public.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or

b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

Not applicable as the program generates revenue sufficient to cover its operating costs, over time.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Not applicable as the program generates revenue sufficient to cover its operating costs, over time.

### Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Licensing

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No

What percent of the regulatory cost is currently subsidized? (0 to 100%) 0%

If the program is subsidized from other state funds, what is the source(s)? N/A

What is the current annual amount of the subsidy? \$0

| What is the current annual amount of the subsidy?   | ,                                   | 1                              |                                    |  |                                       | 1                       |   |

# STATE OF FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES

### DIVISION OF FOOD SAFETY INSPECTION AND ENFORCEMENT 42150200

**EXHIBITS AND SCHEDULES** 

LEGISLATIVE BUDGET REQUEST 2024 – 2025

### SCHEDULE 1A: DETAIL OF FEES AND RELATED PROGRAM COSTS

Department: 42 Agriculture and Consumer Services **Budget Period: 2024-25** 

42150200 Food Safety - Bureau of Dairy Industry Program: 1000 General Revenue, 2321 General Inspection Trust Fund Fund(s):

Specific Authority: 502.053, F.S. - Frozen Dessert License

**Purpose of Fees Collected:** To offset direct and indirect costs resulting from the administration of the Dairy Regulatory Program.

Type of Fee or Program: (Check ONE Box and answer questions as indicated.)

Regulatory services or oversight to businesses or professions (Complete Sections I, II, and III and attach Examination of Regulatory Fees Form -

Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service. (Complete Sections I, II, and III only.)

#### SECTION I - FEE COLLECTION

### **EXPLANATION of LINE C:**

Expenditures in this document represent expenditures for the Bureau of Dairy Industry which includes the Bureau's Administrative Office, the Dairy Inspection Section and the Dairy Compliance Monitoring Section. The activities of the Bureau are directly related to the regulation of the dairy industry in Florida under the requirements of Chapter 502, Florida Statutes. The primary beneficiary of these activities are the citizens of Florida (ensuring a safe and wholesome milk, milk product and frozen dessert supply) and the Florida Dairy Industry for also being able to participate in the National Conference on Interstate Milk Shipments (NCIMS) program through the direct regulation by the Bureau of Dairy Industry. Implementation of the NCIMS program, mainly the utilization of the Pasteurized Milk Ordinance (PMO), allows these facilities to be listed on the Intersate Milk Shipments list, which allows the dairy industry in Florida to move their products in interstate commerce.

Charging fees to cover the total costs in the Bureau of Dairy Industry would put the Florida dairy industry at a disadvantage, as many of the states in the Southeast Region, states that Florida competes with, are not fee funded.

Effective July 1, 2013, the funding for the Bureau of Dairy Industry was moved from GITF to GR during the 2013 Legislative Session. While self-sufficiency is not feasible, a plan to establish fees for out-of-state permit/licenses that are outlined in Chapter 502, F.S. and a per hundred weight assessment of milk processed in Florida could be further explored.

### **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture and Consumer Services

Regulatory Service to or Oversight of Businesses or Professions Program:

Dairy Regulatory Program

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

The division continues to seek the opportunity to consolidate management of its laboratories. This will provide more uniform instruction and oversight of the functions of the lab; increase quality; provide regulatory consistency; streamline operations; and improve overall customer service. This consolidation was delayed last fiscal year but should conclude this fiscal year.

The division has laid the framework for a Bureau of Quality Management and plans to seek formal approval for the bureau formation during this fiscal year. This will consolidate all training and quality assurance activities from all three of the existing bureaus. Consolidation will provide for more consistency throughout the division and across the state; produce an intense and more specialized training program; and improve the overall quality of the division's training programs leading to increased efficiency and a higher quality work product.

The Legislature has amended Chapter 502, Florida Statutes, to move select frozen dessert facilities (i.e., those that do not utilize Pasteurization) to Chapter 500, Florida Statutes, and shifted the inspection responsibility to the Bureau of Food Inspection. This will provide a more consistent and applicable inspection process for the regulated industry and allow dairy inspectors to ensure they are meeting inspection frequencies as established by the U.S. Food and Drug Administration's Pasteurized Milk Ordinance (PMO) for facilities utilizing Pasteurization.

The Legislature has amended Chapter 502, Florida Statutes, to eliminate the establishment and movement of shelf-life dates for dairy products. The move places the establishment of shelf-life dates within the market and allows the department to address any deficiencies in this regard, much like virtually all other quality and sanitation parameters under our purview.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

The division continues to refine its web portal for businesses to maintain their facility information and apply for/renew their food permits online. The portal has

reduced the time required to process a permit application and expedited the approval of successful applications. The portal was successfully deployed for the 2020 food permitting season and the division has undertaken a project to convert Bureau of Dairy Industry permitting into the portal.

The portal and continued process refinement of the portal have resulted in an approximate 96% compliance rate for food establishment permit renewal prior to June 30, 2023, resulting in a significant increase in permit funds realized earlier and more efficiently than in previous years.

The division continues to look for efficiency measures across its programs and is looking at more effective mechanisms to address facilities refusing to obtain a proper permit as well as requiring online permitting, which will streamline the permitting process across the board.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

A primary mission of the Department of Agriculture and Consumer Services is to safeguard the public health and support Florida's agricultural economy by ensuring the safety and wholesomeness of food and other consumer products through inspection and testing programs, protecting consumers from unfair and deceptive business practices, and providing consumer information. The Division of Food Safety's statutory directive to "safeguard the public health and promote the public welfare by protecting the consuming public from injury" serves that primary mission through its food safety inspection and laboratory activities.

The regulation of food safety is a basic tenet of public health principles. As the lead state agency for food safety, the Department of Agriculture and Consumer Services has a responsibility to ensure the protection of Florida's residents and guests. A comprehensive regulatory program is an appropriate function towards achieving an acceptable level of protection. With the emergence of possible threats to our food supply through "bioterrorism" and/or "agroterrorism," that responsibility has increased exponentially. As a result, the current level of responsibility is not only appropriate, but is being further expanded and developed to include more preparedness for emergency response needs. In addition, due to the Food Safety Modernization Act (FSMA) adoption by the federal government, the division plays a vital role in the continued evolution of the manufactured food program.

Also, according to the National Conference on Interstate Milk Shipments (NCIMS), a program that allows for the movement of milk across state lines, the regulatory function that the division provides is necessary for all interstate milk shipment (IMS) listed plants and farms in Florida to maintain compliance with the program. If these plants and farms are unable to maintain compliance, they would lose a significant amount of business by not being allowed by the federal

government to ship milk and milk products across state lines and would likely not be able to continue to operate.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

Revenue projections by the Division of Food Safety are developed using historical revenue data and trend analysis involving actual and estimated dairy and frozen dessert firm counts.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

There are no regulatory fees charged to support the Dairy Regulatory Program. General Revenue funds are utilized to cover the costs associated with this program. Revenues from the current fee schedule are collected for frozen dessert permit fees and are inadequate to fully cover all direct and indirect costs associated with the Dairy Program. The Dairy Regulatory Program is a public health program which benefits Florida citizens and our guests by protecting the consuming public from injury as a result of unsafe milk, milk products and frozen desserts regardless of their origin and also allows the continuing participation of Florida dairy farms and plants to ship milk across state lines, thus ensuring they are not restricted or disadvantaged compared to their interstate competitors.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

The fees were set by the Legislature and do not take into account any differences between the businesses regulated. The current fee structure is for frozen dessert permit fees only and there are no inspection or re-inspection fees enumerated. There are no permit or other fees charged to dairy facilities subject to the requirements of Chapter 502, Florida Statutes.

7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:

- a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
- b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

The Dairy Regulatory Program operates under Chapter 502, Florida Statutes, which establishes regulations for milk, milk products and frozen desserts. The purpose under Chapter 502, FS, is to ensure that milk, milk products and frozen desserts sold or offered for sale in Florida are produced under sanitary conditions, are wholesome and fit for human consumption, are correctly labeled as to grade, quality and source of production; and to facilitate the shipment and acceptance of milk and milk products of high sanitary quality in interstate and intrastate commerce. In the absence of permit fees or other associated inspection revenue (outside of frozen dessert permit fees), it is appropriate that the Dairy Regulatory Program continue to be supported by General Revenue to reflect the public health benefits of the program and its activities.

Charging fees to cover the total costs for the Bureau could put the Florida Dairy Industry at a competitive disadvantage behind the other states in the Southeast Region that Florida competes with, as not all of these states are feefunded. Florida is a member of the National Conference of Interstate Milk Shipments (NCIMS). NCIMS membership is maintained by strict adherence to the requirements of the Grade "A" Pasteurized Milk Ordinance (PMO). The PMO sets inspection and product sampling frequencies for dairy farms and processing plants as well as standards for the analyses that are conducted on the product samples collected. Adherence to the requirements of the PMO ensures that the dairy products offered for sale to Florida residents and our guests are wholesome and fit for human consumption. It also allows for dairy products processed in Florida to be sold in interstate commerce and provides the ability for Florida processing plants to bid on federal, state and county contracts.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

The division could reduce the state subsidization by implementing a "per hundred weight" (CWT) fee of \$0.05/CWT. A "per hundred weight" in North America is equal to 100 pounds.

Arkansas and Texas are two states in the south that fully fund their dairy regulatory programs through per hundred weight (CWT) fees. Arkansas assesses \$0.03 - \$0.065 CWT fees depending on the type of permit and volume. Texas assesses \$0.045 CWT to milk processors as well as \$100 - \$400 annually for a permit depending on the type of permit.

Florida is part of the FDA Southeast Region which includes AL, GA, LA, MS, NC, SC and TN. A previous poll of these states showed that AL, LA, MS, NC and TN are currently charging fees.

AL – \$250 for Milk Plant, Single Service and Frozen Dessert

LA – \$90 for Milk Producer and \$300 for Milk Plant

MS – \$300 for Milk Plant or Frozen Dessert and \$100 for Manufacturing Plant

NC – \$40 for Frozen Dessert or Manufacturing Plant (annual inspection fee)

TN – Sliding scale fee based on pounds received in plant - \$20 - \$400

FL - \$200 for Frozen Dessert initial permit fees/\$100 for said renewals.

### Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Dairy Regulatory Program

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Section 502.013(2)(a)2, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 92%

If the program is subsidized from other state funds, what is the source(s)? General Revenue

What is the current annual amount of the subsidy? \$ 1,456,706

#### SCHEDULE 1A: DETAIL OF FEES AND RELATED PROGRAM COSTS

Department: 42 Agriculture and Consumer Services Budget Period: 2024-25

Program: 42150200 Food Inspection Program/Food Lab

Fund(s): 2261 Federal Grants Trust Fund, 2321 General Inspection Trust Fund

Specific Authority: Chapters 381, 500 and 570, F.S., Chapter 5K- F.A.C.

Purpose of Fees Collected: The fees collected shall be used solely for the purpose of the recovery of costs for the services provided by

the Division as required by statute and F.A.C.

Type of Fee or Program: (Check ONE Box and answer questions as indicated.)

Regulatory services or oversight to businesses or professions (Complete Sections I, II, and III and attach Examination of Regulatory Fees Form -

Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service. (Complete Sections I. II. and III only.)

### **EXPLANATION of LINE C:**

General Inspection Trust Fund revenues for FY 2022-23 increased comparative to FY 2021-22. In FY 2023-24, revenues are anticipated to increase with an increase in projected expenditures.

It is important to note that food establishment permit fees are not inspection fees or testing fees for laboratory services, they are annual fees regardless of the number of inspections performed per location. These fees support public health protection activities including laboratory analyses of foods produced inside and outside of our state borders. In accordance with Chapter 500, F.S., food products that are manufactured or sold in Florida are regulated by this department. However, most food processors or manufacturers are located in other states or countries where the department has no permit or inspection authority. Benefits to the general public from this program include the availability of food products that are safe, wholesome, and properly labeled to prevent injury or harm, regardless of where they are produced or grown. Prevention of and response preparedness to terrorist actions which threaten the safety of the food supply is another public benefit which is becoming a significant component of this responsibility. Rapid identification and containment of contaminated food products are essential components of these efforts, and all Floridians benefit from these capabilities 178 of 303

### **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture and Consumer Services

### **Regulatory Service to or Oversight of Businesses or Professions Program: Food Inspection**

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

The division continues to seek the opportunity to consolidate management of its laboratories. This will provide more uniform instruction and oversight of the functions of the lab; increase quality; provide regulatory consistency; streamline operations; and improve overall customer service. This consolidation was delayed last fiscal year but should conclude this fiscal year.

The division has laid the framework for a Bureau of Quality Management and plans to seek formal approval for the bureau formation during this fiscal year. This will consolidate all training and quality assurance activities from all three of the existing bureaus. Consolidation will provide for more consistency throughout the division and across the state; produce an intense and more specialized training program; and improve the overall quality of the division's training programs leading to increased efficiency and a higher quality work product.

The division recently implemented a compliance-based algorithm that is being used to determine priority for inspections. This algorithm now incorporates compliance history for each food establishment. Previous approaches only incorporated food-risk and placed facilities over three different intervals. This new algorithm will allow the division to apply resources more efficiently and effectively.

The Legislature amended Chapter 500, Florida Statutes, to allow food establishments to permit for one full year from the date of issuance of the permit rather than a fixed December 31 expiration. This allows facilities to realize the full value of their permit fees regardless of date of beginning operation and minimize concerns of paying a full year permit fee for less than a full year of permitting. The change also provides efficiencies for the business office responsible for renewing the 50,000 annual permits at the turn of the calendar year. Lastly, this alleviated the burden on the department's finance and accounting section handling up to 50,000 permit fees received within a matter of a couple weeks.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

The division continues to refine its web portal for businesses to maintain their facility information and apply for/renew their food permits online. The portal has reduced the time required to process a permit application and expedited the approval of successful applications. The portal was successfully deployed for the 2020 food permitting season and the division has undertaken a project to convert Bureau of Dairy Industry permitting into the portal.

The portal and continued process refinement of the portal have resulted in an approximate 96% compliance rate for food establishment permit renewal prior to June 30, 2023, resulting in a significant increase in permit funds realized earlier and more efficiently than in previous years.

The division continues to look for efficiency measures across its programs and is looking at more effective mechanisms to address facilities refusing to obtain a proper permit as well as requiring online permitting, which will streamline the permitting process across the board.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

A primary mission of the Department of Agriculture and Consumer Services is to safeguard the public health and support Florida's agricultural economy by ensuring the safety and wholesomeness of food and other consumer products through inspection and testing programs, protecting consumers from unfair and deceptive business practices, and providing consumer information. The Division of Food Safety's statutory directive to "safeguard the public health and promote the public welfare by protecting the consuming public from injury" serves that primary mission through its food safety inspection and laboratory activities.

The regulation of food safety is a basic tenet of public health principles. As the lead state agency for food safety, the Department of Agriculture and Consumer Services has a responsibility to ensure the protection of Florida's residents and guests. A comprehensive regulatory program is an appropriate function towards achieving an acceptable level of protection. With the emergence of possible threats to our food supply through "bioterrorism" and/or "agroterrorism," that responsibility has increased exponentially. As a result, the current level of responsibility is not only appropriate, but is being further expanded and developed to include more preparedness for emergency response needs. In addition, due to the Food Safety Modernization Act (FSMA) adoption by the federal government, the division plays a vital role in the continued evolution of the manufactured food program.

With recent changes to business models within the division and recycling of resources to improve recruitment and enhance retention, the division feels that it is functioning at a sufficiently high level.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

Revenue projections by the Division of Food Safety are developed using historical revenue data, trend analysis involving actual and estimated firm counts, firm categories and associated fees, and the impact of current cooperative agreements in all bureaus, which involve participation with the federal government and private industry in generating revenues. Permit fees are adjusted to the extent practicable based on revenue projections with consideration given to maintaining equity among firm categories.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

With the recent changes to the business models within the division and recycling of resources to improve recruitment and enhance retention, the division feels that the overall fees charged, and subsequent revenue are adequate.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required conducting inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

The fees established by the division are based around the historic activities of the business. Re-inspection fees are assessed if the regulated food establishment is significantly out of compliance (i.e., that fee is assessed based on activities of the establishment and not a decision of the department). The fees are set based on food-handling risk (i.e., the more food-handling risk the higher the fees) so they are appropriate. Consolidation of the fees may likely yield a more streamlined approach, but it will also likely mean an increase (or decrease) for smaller groups within the overall food establishment base.

The division has authority to impose a re-inspection fee to compensate for the cost per service for conducting subsequent visits to firms that are not in compliance during the routine inspection. The current re-inspection fee for the Division is \$135 per re-inspection. This fee is also considered as a deterrent to poor sanitation and safety practices. Further, implementation of a compliance-based inspection frequency will cause businesses to allocate fewer resources

toward department interactions and also serve as a deterrent to poor sanitation and safety practices.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.
- 8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.
  - To shift General Revenue funding sources to General Inspection Trust Fund sources the division would have to identify (potentially federal) funding sources for portions of the laboratory's chemistry section. Alternatively, the division would be able to make such a shift with a service-based fee associated with laboratory testing.

## Schedule IA - Part II: Examination of Regulatory Fees

Department: Florida Department of Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Food Inspection Program

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Chapter 500, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 0%

If the program is subsidized from other state funds, what is the source(s)? N/A

What is the current annual amount of the subsidy? \$0

## STATE OF FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES

# DIVISION OF AGRICULTURAL ENVIRONMENTAL SERVICES 42160100

**EXHIBITS AND SCHEDULES** 

LEGISLATIVE BUDGET REQUEST 2024 - 2025

#### SCHEDULE 1A: DETAIL OF FEES AND RELATED PROGRAM COSTS

Department: 42 Agriculture and Consumer Services Budget Period: 2024-25

**Program:** 42160100 Feed Regulation

Fund(s): 1000, 2261, 2321 General Revenue, Federal Grants Trust Fund, General Inspection Trust Fund

**Specific Authority:** Sections 580.041(1) and 580.065, F.S.

Purpose of Fees Collected: To ensure that Florida consumers receive feed products that conform to the Commercial Feed Law

and to provide uniform regulation to feed producers and distributors.

Type of Fee or Program: (Check ONE Box and answer questions as indicated.)

Regulatory services or oversight to businesses or professions (Complete Sections I, II, and III and attach Examination of

Regulatory Fees Form - Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service. (Complete Sections I, II, and III only.)

### **EXPLANATION of LINE C:**

SECTION III SUMMADY

Receipts cover most direct and indirect costs for this program area.

## **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture and Consumer Services

## **Regulatory Service to or Oversight of Businesses or Professions Program**: Feed Regulation

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

The division has implemented a more efficient Laboratory Information Management System (LIMS) and web-based regulatory application, which have automated licensing, enforcement, and laboratory processes, and enabled feed registrants and other stakeholders to access and make decisions using the most current program information.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

We will continue to refine the Laboratory Information and Regulatory Management systems to further reduce data entry requirements, increase program efficiency, and enhance customer service. Additionally, the division has been re-organized into functional units (inspection, licensing, analytical, etc.). Efficiencies in licensing, inspection, and enforcement activities have steadily increased under this function-oriented structure, but have not been subjected to fiscal analysis.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

The regulation of animal feed is essential to supporting the continued economically viable production of livestock, and protection of the health of companion animals and certain wildlife. Feed regulation is necessary to ensure that products meet quality standards and are free from harmful contaminants. A critically important aspect of the program is the monitoring and evaluation of processes utilized by feed manufacturing operations, and related product surveillance sampling.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

Feed regulatory program fees are set in statute and rule.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

As a result of the most recent fee increase enacted by the 2008 Legislature, the fees collected cover the direct and indirect costs charged to the General Inspection Trust Fund portion of the program area for FY 2022-23, and we anticipate that this will continue for FY 2023-24.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

Feed program fees are set in statute and rule and are applied using a sliding scale based the volume of feed distributed by the regulated entity. Fees are reviewed routinely and are increased only when necessary and justified, in consultation with the regulated industry.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

Fees charged are currently adequate to cover all direct and indirect costs.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

The feed regulatory program is currently self-sufficient.

## Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture & Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Feed Regulation

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Chapter 580, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) Allocated GR costs total 1.51%

If the program is subsidized from other state funds, what is the source(s)? General Revenue

What is the current annual amount of the subsidy? \$ 6,377

#### SCHEDULE 1A: DETAIL OF FEES AND RELATED PROGRAM COSTS

Department: 42 Agriculture and Consumer Services Budget Period: 2024-25

**Program:** 42160100 Fertilizer Regulation

Fund(s): 1000, 2321 General Revenue, General Inspection Trust Fund

**Specific Authority:** Sections 576.021, 576.041, and 576.045, 576.051(2), F.S.

Purpose of Fees Collected: To ensure that Florida consumers receive fertilizer products that conform to the Commercial Fertilizer

Law, to provide uniform regulation to fertilizer producers and distributors and to provide environmental

protection from heavy metal contaminants in fertilizers.

Type of Fee or Program: (Check **ONE** Box and answer questions as indicated.)

Regulatory services or oversight to businesses or professions.

(Complete Sections I, II, and III and attach Examination of Regulatory Fees Form - Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service.

(Complete Sections I, II, and III only.)

#### **EXPLANATION of LINE C:**

Receipts cover most direct and indirect costs for this program area; the fertilizer rate study is funded through a special appropriation.

## **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture and Consumer Services

**Regulatory Service to or Oversight of Businesses or Professions Program**: Fertilizer Regulation

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

The division has implemented a more efficient Laboratory Information Management System (LIMS) and web-based regulatory application, which have automated licensing, enforcement, and laboratory processes, and enabled fertilizer licensees and other stakeholders to access and make decisions using the most current program information. The replacement of antiquated and inefficient analytical methods and equipment with current methodologies and modern, automated equipment have resulted in expedited sample result turnaround. In addition, we have implemented a risk-based inspection strategy that has reduced the number of samples collected, while enabling focused inspection of fertilizer products and producers identified as elevated risk based on reported violation data.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

We will continue to refine the Laboratory Information and Regulatory Management systems to further reduce data entry requirements, increase program efficiency, and enhance customer service. We will also continue to refine the risk-based regulatory program and anticipate further operational cost reductions from those incurred prior to the implementation of the risk assessment strategy. Additionally, the division has been re-organized into functional units (inspection, licensing, analytical, etc.). Efficiencies in licensing, inspection, and enforcement activities have steadily increased under this function-oriented structure but have not been subjected to fiscal analysis.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

The regulation of fertilizers is essential to the continued availability of fertilizers needed for food and fiber production and effective landscape management. Fertilizer regulation is needed to ensure that guaranteed amounts of nutrients are

present in fertilizers and that contaminants, such as heavy metals from recycled hazardous waste, are not present. The regulation of fertilizers used in urban landscapes has become increasingly important as nutrient effects on water quality in watersheds and coastal areas continue to be an area of concern.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

Fertilizer regulatory program fees are set in statute and rule.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

As a result of fee increases enacted by the 2008 and the 2009 Legislature, fees collected covered the majority of direct and indirect costs to the General Inspection Trust Fund portion of the fertilizer regulatory program area for FY 2022-23, and we anticipate that this will continue for FY 2023-24.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

Fertilizer regulatory program fees are set in statute and rule. Fees are reviewed routinely and are increased only when necessary and justified, in consultation with the regulated industry.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or

b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

The fees collected currently cover most of the direct and indirect costs charged to the General Inspection Trust Fund.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

We believe that providing General Revenue to support this program area is appropriate, since the regulation of fertilizer provides obvious and substantial public benefit.

## Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture & Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Fertilizer Regulation

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Chapter 576, F.S.

What percent of the regulatory cost is currently subsidized? **70.23%** 

If the program is subsidized from other state funds, what is the source(s)? General Revenue

What is the current annual amount of the subsidy? \$4,406,014

#### SCHEDULE 1A: DETAIL OF FEES AND RELATED PROGRAM COSTS

**Department:** 42 Agriculture and Consumer Services **Budget Period: 2024-25** 

42160100 Pest Control Program:

Fund(s): 1000, 2528 General Revenue, Pest Control Trust Fund

Sections 482.032, 482.061, 482.071, 482.155, and 482.156, F.S. Specific Authority:

**Purpose of Fees Collected:** To ensure that Florida consumers receive pest control services that conform to the Florida Structural

Pest Control Act and to provide uniform regulation to pest control licensees.

Type of Fee or Program: (Check ONE Box and answer questions as indicated.)

X Regulatory services or oversight to businesses or professions (Complete Sections I, II, and III and attach Examination of Regulatory Fees Form - Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service. (Complete Sections I, II, and III only.)

#### **EXPLANATION of LINE C:**

This regulatory activity is supported by funds collected from the industry and deposited into the Pest Control Trust Fund.

## **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture and Consumer Services

**Regulatory Service to or Oversight of Businesses or Professions Program**: Pest Control Regulation

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Efforts to increase efficiencies in this program area include:

- Completion of a document imaging program that will eliminate 1.5 million documents (120 filing cabinets).
- Movement from leased space to department owned office space.
- Implementation of electronic mail notification of licensees for legally required notices to reduce mail-out costs to save approximately \$30,000 per year.
- Implementation of an electronic notification system for notices of structural fumigation.
- 2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?
  - Implementation of an on-line license application and renewal system to automate license issuance. Once fully implemented we anticipate enhanced turn-around time for license issuance and reduced cost associated with a paper based process. Cost savings have not yet been determined.
- 3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

The regulation of pest control is absolutely essential to the continued provision of pest management services that protect public health and private property. Without effective regulation, the potential exists for fraudulent or unsafe practice of pest control that will endanger public health and private property.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

Pest Control regulatory program fees are set in statute and rule.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Fees collected covered most of the direct and indirect costs to the Pest Control Trust Fund for FY 2022-23.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

Pest Control regulatory program fees are set in statute and rule. Fees are reviewed routinely and are increased only when necessary and justified, in consultation with the regulated industry.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

The regulation of pest control provides substantial public benefits well in excess of the amount of public funds expended. These benefits include:

- Prevention of misuse of pesticides by untrained or unsupervised pest control applicators, thereby preventing harm to human health, public and private property and the environment.
- Prevention of poor performance of pest control by unlicensed or untrained and unsupervised persons.
- Prevention of misleading and deceptive practices in the conduct of pest control.
- Enforcement of requirements for protection contracts for performance of wood destroying organism pest control.
- 8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Fees collected in this program currently support the direct costs and most of the indirect costs of this program.

## **Examination of Regulatory Fees - Part II**

Department: Agriculture & Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Pest Control

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Chapter 482, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) Direct costs for this program area are fully funded by fees received into the Pest Control Trust Fund.

If the program is subsidized from other state funds, what is the source(s)? None.

What is the current annual amount of the subsidy? None

### SCHEDULE 1A: DETAIL OF FEES AND RELATED PROGRAM COSTS

Department: 42 Agriculture and Consumer Services Budget Period: 2024-25

**Program:** 42160100 Pesticide Regulation

Fund(s): 1000, 2261, 2321 General Revenue, Federal Grants Trust Fund, General Inspection Trust Fund

**Specific Authority:** Sections 487.04, 487.041, 487.045, 487.048, and 487.071, F.S.

Purpose of Fees Collected: To ensure that pesticides are distributed and used in Florida in accordance with the Florida Pesticide Law and

to provide uniform regulation to pesticide users.

Type of Fee or Program: (Check ONE Box and answer questions as indicated.)

X Regulatory services or oversight to businesses or professions (Complete Sections I, II, and III and attach Examination of Regulatory Fees Form - Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service. (Complete Sections I, II, and III only.)

## **Schedule IA - Part I: Examination of Regulatory Fees**

**Department:** Agriculture and Consumer Services

Regulatory Service to or Oversight of Businesses or Professions Program: Pesticide Regulation

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Electronic payment of registration fees has been implemented and augments the implementation of an Oracle-based, web-accessible registration system that has allowed the reduction of one staff position, while improving tracking of over 15,000 registered pesticides. A biennial registration program was implemented in January 2009 that allows registrants to pay for two years of registration at a time.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

We will continue to refine the web-accessible registration system and electronic payment system to further reduce data entry and clerical workload. We are working to image our current and archived pesticide labels and provide web access to make these documents quickly available to regulatory officials and the public, allowing registration staff to focus on other program priorities. Additionally, the division has been re-organized into functional units (inspection, licensing, analytical, etc.). Efficiencies in licensing, inspection, and enforcement activities have steadily increased under this function-oriented structure but have not been subjected to fiscal analysis.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

The regulation of pesticides and pesticide use is critical to the continued availability of pesticides needed for food and fiber production, pest management, protection of public health, prevention of aquatic weed accumulation in waterways used for flood control, and effective landscape management. Pesticide regulation is further needed to ensure that pesticides are used in ways that protect public health, agricultural workers, and environmental resources including water and air quality. Pesticide regulation is essential in supporting Florida's main industries of tourism and agriculture.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

Pesticide regulatory program fees are set in statute and rule.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Current fees are adequate to cover the direct and indirect costs of the program.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

Pesticide regulatory program fees are set in statute and rule. Fees are reviewed routinely and are increased only when necessary and justified, in consultation with the regulated industry.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs

would require so high an assessment as to damage its competitive position with similar entities in other states.

The fees collected cover most of the direct and indirect costs charged to the General Inspection Trust Fund.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

We believe that providing General Revenue to support this program area is appropriate, since the regulation of pesticides and pesticide use provide obvious and substantial public benefit.

## Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture & Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Pesticide Regulation

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Chapter 487, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 6.15%

If the program is subsidized from other state funds, what is the source(s)? General Revenue

What is the current annual amount of the subsidy? \$483,720

| What is the cultert almuar amount of the subsidy: \$\frac{1}{2}\frac{1}{2}\frac{1}{2} |                                  |                             |  |  |                                       |  |   |

#### SCHEDULE 1A: DETAIL OF FEES AND RELATED PROGRAM COSTS

**Department:** 42 Agriculture and Consumer Services **Budget Period: 2024-25** 

Program: 42160100 Seed Regulation

Fund(s): 1000, 2321 General Revenue, General Inspection Trust Fund

**Specific Authority:** Sections 578.08(1), 578.11, and 578.26(1), F.S.

Purpose of Fees Collected: To ensure that Florida consumers receive seed products that conform to the Commercial

Seed Law and to provide uniform regulation to seed producers and distributors.

Type of Fee or Program: (Check **ONE** Box and answer questions as indicated.)

Regulatory services or oversight to businesses or professions (Complete Sections I, II, and III and attach Examination of

Regulatory Fees Form - Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service. (Complete Sections I, II, and III

only.)

### **EXPLANATION of LINE C:**

Receipts cover most direct and indirect costs for this program area.

## **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture and Consumer Services

Regulatory Service to or Oversight of Businesses or Professions Program: Seed Regulation

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

The division has implemented a more efficient Laboratory Information Management System (LIMS) and web-based regulatory application, which have automated licensing, enforcement, and laboratory processes, and enabled seed dealers and other stakeholders to access and make decisions using the most current program information. The division has also implemented a risk-based inspection strategy, which enables focused inspection of seed products and producers identified as elevated risk based on reported violation data.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

We will continue to refine the current risk-based enforcement program. We anticipate continuing to operate at costs reduced from those of the program prior to the implementation of the risk assessment strategy. We will also continue to refine the Laboratory Information and Regulatory Management systems to further reduce data entry requirements, increase program efficiency, and enhance customer service. Additionally, the division has been re-organized into functional units (inspection, licensing, analytical, etc.). Efficiencies in licensing, inspection, and enforcement activities have steadily increased under this function-oriented structure, but have not been subjected to fiscal analysis.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

The regulation of seeds is essential to the continued, economically viable production of food and fiber. Seed regulation is needed to ensure that seeds purchased by consumers meet established standards for purity and germination and are not contaminated with noxious weed seeds.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

Seed regulatory program fees are set in statute and rule.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Prior to the most recent fee increase adopted by the 2009 Legislature, fees were not adequate to cover the direct and indirect costs of the program. Previously established fees were doubled in 2009 and were subsequently reduced for smaller volume seed dealers in FY 2014. Revenues for FY 2022-23 covered the direct and indirect costs to the General Inspection Trust Fund portion of the seed regulatory program area, and we anticipate that this will continue for FY 2023-24.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

Seed program fees are set in statute and rule and are applied using a sliding scale based the gross sales of seed distributed by the regulated entity. Fees are reviewed routinely and are increased only when necessary and justified, in consultation with the regulated industry.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient

justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

The regulation of seeds provides substantial public benefits well in excess of the amount of public funds expended. The approximately 2,100 licensed seed dealers in Florida reported roughly \$150 million in gross receipts for FY 2022-23. The seed regulatory program benefits the agricultural industry by ensuring the availability of high-quality seed needed to produce crops of significant economic value in the state and performs a vital role in environmental protection through monitoring for both prohibited and restricted noxious weed seed contamination. The seed program also provides for mediation of disputes between growers and seed producers and makes recommendations of settlements to affected consumers for losses incurred due to seed failing to produce as advertised. In FY 2022-23, the Seed Investigation and Conciliation Council conducted two seed complaint investigations and hearings.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

We believe that providing General Revenue to support this program area is appropriate, since the regulation of seed provides obvious and substantial public benefit.

## Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture & Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Seed Regulation

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Chapter 578, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 0.91%

If the program is subsidized from other state funds, what is the source(s)? General Revenue

What is the current annual amount of the subsidy? \$9,892 GR

## EXPLANATION of LINE C:

The surplus of revenue over expenditures is used to help defray the operating cost for other programs in the department that are funded by the Legislature from the General Inspection Trust Fund.

## **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture and Consumer Services

## Regulatory Service to or Oversight of Businesses or Professions Program: Agricultural Product Dealer's Licenses

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Program processes are continually scrutinized for ways to optimize productivity, efficiency, and application output. Integration into the database (DOCS) continues to benefit the application and reporting processes.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

Consumer Services continues to work on the automated mailing of deficiency and renewal notices, as well as scanning all incoming documents to create digital files. The division is working towards emailing most correspondence which will positively impact the department by saving both time and money.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

Yes. This program provides a valuable protection to one of the largest industries in the state, ensuring that Florida producers who conduct business with properly licensed agricultural dealers are provided security from the possibility of serious economic harm in the event that an agricultural dealer defaults on payment. This security is crucial to the Florida producer due to the perishable nature of agricultural products and the impracticality of recovering those products due to the speed with which they move through commerce. The maximum license fee is set by statute.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

The license fees collected are adequate to cover both direct and indirect costs.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

The fees charged are reasonable. The sliding scale fees are based upon the amount of surety supporting the license, which is determined by the buying volume of the business. There is no differentiation between business types.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

The fees charged are adequate to cover direct and indirect program costs.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

The program is self-sufficient.

## Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Agricultural Dealer's License

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No

What percent of the regulatory cost is currently subsidized? (0 to 100%) **0%** 

If the program is subsidized from other state funds, what is the source(s)? N/A

What is the current annual amount of the subsidy? \$ 0.00

Inspection Trust Fund.

The deficit in this program area is covered by the overall department cash balances in the General

## **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture and Consumer Services

**Regulatory Service to or Oversight of Businesses or Professions Program:** 

Fair Rides Inspection

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

The amusement ride inspection process is ever changing; rides grow in number, size, speed, and complexity. In an effort to increase efficiencies, bureau personnel are engaged with the National Association of Amusement Ride Safety Officials (NAARSO), which hosts seminars throughout the year updating inspectors on devices, codes, standards, employee safety, and other topics. Statutory changes by the 2020 Legislative session have been implemented, modernizing the registration process for the amusement ride industry while updating inspection and permitting requirements. Additional statutory changes that were initiated during the 2023 Legislative session will be implemented in the upcoming year to continue with updates to inspection, permitting, and monitoring requirements.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

Fair Rides inspectors continue to work on achieving Level II certification with NAARSO, which will increase inspection efficiency while providing better protection for Florida consumers.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the bureau provides a critical service safeguarding the public with the most comprehensive amusement ride inspection program of any state in the country.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

Fees are based on projections utilizing generally accepted governmental accounting procedures. Projections are based primarily on historic industry growth.

- 5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?
  - No, the permit and inspection fees set by statute do not cover both the direct and the indirect costs of providing this regulatory service.
- 6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

Yes, amusement rides are differentiated into three types of rides, and fees are commensurate with the complexity and the time needed to complete the inspections. Re-inspection fees are assessed when violations are found during the initial inspection. Weekend and holiday fees are also assessed to the companies that do not schedule inspections during normal work hours.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

The fees charged for this regulatory service and oversight are set by statute. Raising fees to sufficiently cover program costs would require so high an assessment that the carnival industry would be compelled to reduce either the number of events played in Florida, the number of devices played at each

event, or both. These reductions would, in turn, affect the estimates of revenue which FDACS has employed for the purpose of establishing an amusement ride inspection fee structure. In addition, a reduction or elimination of participation at festivals, carnivals, and fairs by carnival companies would ultimately impact fair associations, churches, and civic groups, as well as charities which benefit financially from the public attendance at such sponsored events which feature rides and attractions as their primary draws.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Future scheduling of events is expected to follow a more normal trend. The surplus of revenue over expenditures in the General Inspection Trust Fund is sufficient to absorb deficits in the program.

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Fair Rides Inspection

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): Yes, Section 616.242(9)(a), F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 42.035%

If the program is subsidized from other state funds, what is the source(s)? General Inspection Trust Fund

What is the current annual amount of the subsidy? \$1,105,173

### **EXPLANATION of LINE C:**

The surplus of revenues over expenditures is used to help defray the operating costs for other programs in the department that are funded by the Legislature from the General Inspection Trust Fund.

**Department**: Agriculture and Consumer Services

**Regulatory Service to or Oversight of Businesses or Professions Program**: Health Studios

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Continued streamlining of the administrative processes and cross training have increased productivity and customer services. Due to these improvements, we have been able to handle registrations and filings without additional personnel.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

E-commerce or electronic filing continues to be on the list of anticipated improvements for Health Studios. Cost savings is not determined at this time.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the regulatory activity is mandated by Florida Statutes and is appropriate to provide protection to both the consuming public and the industry being regulated.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

The Division does not use official estimates by the Revenue Estimating Conference. Our revenue projections are based on actual historical revenues and the statutorily mandated fee structure.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Fees are sufficient to cover all costs

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

The fees charged are reasonable. There is one set fee for all business types.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

Fees currently charged are adequate to cover all costs.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Health Studios

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Section 501.015, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 0%

If the program is subsidized from other state funds, what is the source(s)? N/A

What is the current annual amount of the subsidy? \$ 0.00

### **EXPLANATION of LINE C:**

The surplus of revenues over expenditures is used to help defray the operating costs for other programs in the department that are funded by the Legislature from the General Inspection Trust Fund.

**Department**: Agriculture and Consumer Services

**Regulatory Service to or Oversight of Businesses or Professions Program:** 

**Household Moving Services** 

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Continued streamlining of the administrative processes and cross training have increased productivity and customer services. Due to these improvements, we have been able to handle registrations and filings without additional personnel.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

E-commerce or electronic filing will be added as budget permits. Cost savings is not determined at this time.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the regulatory activity is mandated by Florida Statutes and is appropriate to provide protection to both the consuming public and the industry being regulated.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

The Division does not use official estimates by the Revenue Estimating Conference. Our revenue projections are based on actual historical revenues and the statutorily mandated fee structure.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Fees are adequate to cover all costs.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

The fee charged for the regulatory service and oversight is set by statute, and applies uniformly to all affected business entities.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

Fees currently charged are adequate to cover all costs.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Household Moving Services

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Section 507.03, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 0%

If the program is subsidized from other state funds, what is the source(s)? N/A

What is the current annual amount of the subsidy? \$ 0.00

### **EXPLANATION of LINE C:**

The surplus of revenues over expenditures is used to help defray the operating costs for other programs in the department that are funded by the Legislature from the General Inspection Trust Fund.

**Department**: Agriculture and Consumer Services

**Regulatory Service to or Oversight of Businesses or Professions Program**: Motor Vehicle Repair Shops

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Continued streamlining of the administrative processes and cross training have increased productivity and customer services. Due to these improvements, we have been able to handle registrations and filings without additional personnel.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

Opportunities for process improvement are constantly being reviewed. With improvement in administrative processes, registrations and filings will continue to be handled without additional personnel.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the regulatory activity is mandated by Florida Statutes and is appropriate to provide protection to both the consuming public and the industry being regulated.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

The Division does not use official estimates by the Revenue Estimating Conference. Our revenue projections are based on actual historical revenues and the statutorily mandated fee structure.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Fees are sufficient to cover all costs.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

The fees charged for the regulatory service and oversight are set by statute and apply uniformly to all affected business entities.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

Fees are adequate to cover all costs.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Motor Vehicle Repair Shops

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Section 559.901-559.9221, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 0%

If the program is subsidized from other state funds, what is the source(s)? N/A

What is the current annual amount of the subsidy? \$ 0.00

### **EXPLANATION of LINE C:**

The surplus of revenues over expenditures is used to help defray the operating costs for other programs in the department that are funded by the Legislature from the General Inspection Trust Fund.

**Department**: Agriculture and Consumer Services

Regulatory Service to or Oversight of Businesses or Professions Program:

Pawn Shops

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Continued streamlining the administrative processes and cross training have increased productivity and customer services. Due to these improvements, we have been able to handle registrations and filings without additional personnel.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

E-commerce or electronic filing will be added as budget permits. Cost savings is not determined at this time.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the regulatory activity is mandated by Florida Statutes and is appropriate to provide protection to both the consuming public and the industry being regulated.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

The Division does not use official estimates by the Revenue Estimating Conference. Our revenue projections are based on actual historical revenues and the statutorily mandated fee structure.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Fees are sufficient to cover all costs.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

The fees charged for the regulatory service and oversight are set by statute and apply uniformly to all affected business entities.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

Fees are adequate to cover all costs.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Pawn Shops

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Chapter 539, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 0%

If the program is subsidized from other state funds, what is the source(s)? N/A

What is the current annual amount of the subsidy? \$ 0.00

### **EXPLANATION of LINE C:**

Professional Surveyor and Mappers is a biennial registration with the majority of the revenues received in odd numbered years. The excess collected in these years is used to offset years with deficits.

**Department**: Agriculture and Consumer Services

Regulatory Service to or Oversight of Businesses or Professions Program:

<u>Professional Surveyors and Mappers</u>

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Streamlining the administrative processes has increased productivity and customer service. Due to these improvements, we have been able to handle registrations and filings without additional personnel.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

E-commerce or electronic filing will be added as budget permits. Cost savings is not determined at this time.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the regulatory activity is mandated by Florida Statutes and is appropriate to provide protection to both the consuming public and the industry being regulated.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

The division does not use official estimates by the Revenue Estimating Conference. Our revenue projections are based on actual historical revenues and the statutorily mandated fee structure.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Yes, but not on an annual basis. The license renewal fee is valid for a two-year period. Two-year license renewals were issued in FY 22-23 and will be issued again in FY 24-25.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

The fee charged for the regulatory service and oversight is set by statute and apply uniformly to all affected business entities.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

Fees are adequate to cover all costs in a two-year period.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Professional Surveyors and Mappers

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): Yes, Section 472.011 (11), F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 0%

If the program is subsidized from other state funds, what is the source(s)? N/A

What is the current annual amount of the subsidy? \$ 0.00

| EXPLANATION of LINE C:   |            |            |            |

The surplus of revenues over expenditures is used to help defray the operating costs for other programs in

241 of 303

the department that are funded by the Legislature from the General Inspection Trust Fund.

**Department**: Agricultural and Consumer Services

**Regulatory Service to or Oversight of Businesses or Professions Program**: Sellers of Travel

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Streamlining the administrative processes and cross training have increased productivity and customer services. Due to these improvements, we have been able to handle registrations and filings without additional personnel. Electronic filing is available.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

Continuing to streamline and improve processes.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the regulatory activity is mandated by Florida Statutes and is appropriate to provide protection to both the consuming public and the industry being regulated.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

The division does not use official estimates by the Revenue Estimating Conference. Our revenue projections are based on actual historical revenues and the statutorily mandated fee structure.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Fees are sufficient to cover all costs.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

The fees charged for the regulatory service and oversight are set by statute and apply uniformly to all affected business entities.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

Fees currently charged are adequate to cover all costs.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Sellers of Travel

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): Yes

What percent of the regulatory cost is currently subsidized? (0 to 100%) 0%

If the program is subsidized from other state funds, what is the source(s)? N/A

What is the current annual amount of the subsidy? \$ 0.00

### **EXPLANATION of LINE C:**

The surplus of revenues over expenditures is used to help defray the operating costs for other programs in the department that are funded by the Legislature from the General Inspection Trust Fund.

**Department**: Agriculture and Consumer Services

### **Regulatory Service to or Oversight of Businesses or Professions Program:**

Solicitation of Contributions

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Streamlining the administrative processes by simplifying the forms has increased productivity and customer services. Due to these improvements, we have been able to handle registrations and filings without additional personnel. Electronic filing is available.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

Updating statutes and rules to make them easier to understand while reducing the burden on charities to update our statutes to match the federal government guidelines for reporting purposes.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the regulatory activity is mandated by Florida Statutes and is appropriate to provide protection to both the consuming public and the industry being regulated.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

The division does not use official estimates by the Revenue Estimating Conference. Our revenue projections are based on actual historical revenues and the statutorily mandated fee structure.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Fees are sufficient to cover all costs.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

The fees charged are set by statute. For charities, fees are determined by the amount of contributions received by the charity. For professional solicitors and professional fundraising consultants, fees apply uniformly to all affected business entities.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

Fees are adequate to cover all costs.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Solicitation of Contributions

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Sections 496.405, 496.409, and 496.410, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 0%

If the program is subsidized from other state funds, what is the source(s)? N/A

What is the current annual amount of the subsidy? \$ 0.00

Department: 42 Agriculture and Consumer Servic Budget Period: 2024-25
Program: 42160200 Standards (Petroleum, Weights & Measures & LP Gas Inspection)

**Fund:** 2321 General Inspection Trust Fund

**Specific Authority:** Chapters 525, 526, 527, and 531, F.S.

**Purpose of Fees Collected:** To defray the expenses of inspecting, testing, calibrating, and analyzing

petroleum fuels, LP Gas, vehicular fluids, and weighing/measuring devices

Type of Fee or Program: (Check **ONE** Box and answer questions as indicated.)

Regulatory services or oversight to businesses or professions. (Complete Sections I, II, and III and attach

Examination of Regulatory Fees Form - Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service. (Complete Sections I, II, and III only.)

The surplus of revenues over expenditures is used to help defray the operating costs for other programs in

the department that are funded by the Legislature from the General Inspection Trust Fund.

Office of Policy and Budget - June 2023

**Department**: Agriculture and Consumer Services

**Regulatory Service to or Oversight of Businesses or Professions Program:** 

Standards (Petroleum, Weights and Measures, LP Gas Inspections)

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Standards Weights and Measures can now be paid online through eGov improving processes for employees and vendors. Liquefied Petroleum Gas (LP), Brake Fluids and Antifreeze programs are now integrated in the database (DOCS) creating efficiencies by not having to use multiple databases.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

The division continues to look for ways to streamline the processes without decreasing services. In addition to cross training inspectors, a statistical sampling plan has been put into place for petroleum pumps and weighing and measuring devices. This will save time and increase the geographic area that can be covered. Statistical sampling has reduced the time between inspections from 18-24 months to approximately 12 months. Improvement in the Division database (DOCS) allowing for performance-based reporting.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the regulatory activities are mandated by Florida Statute and are appropriate to provide protection to both the consuming public and the industry being regulated.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

The division does not use official estimates by the Revenue Estimating Conference. Our revenue projections are based on actual historical revenues and the statutorily mandated fee structure.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Fees are adequate to cover all related costs.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

The fee charged for the regulatory service and oversight are set by statute and apply uniformly to all affected business entities.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

Fees are adequate to cover all costs.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

### Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Standards (Petrleum, Weights and Measures, LP Gas Inspections)

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No

What percent of the regulatory cost is currently subsidized? (0 to 100%) 0%

If the program is subsidized from other state funds, what is the source(s)? N/A

What is the current annual amount of the subsidy? \$ 0.00

#### SCHEDULE 1A: DETAIL OF FEES AND RELATED PROGRAM COSTS

Department: 42 Agriculture and Consumer Servic Budget Period: 2024-25

**Program:** 42160200 Telemarketing

Fund: 2321 General Inspection Trust Fund

**Specific Authority:** Sections 501.605 and 501.607, F.S.

**Purpose of Fees Collected:** To provide regualtion and oversight to the Telemarketing Industry in the

state of Florida

Type of Fee or Program: (Check ONE Box and answer questions as indicated.)

Regulatory services or oversight to businesses or professions. (Complete Sections I, II, and III and attach Examination of Regulatory Fees Form - Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service. (Complete Sections I, II, and III only.)

**EXPLANATION of LINE C:** 

The surplus of revenue over expenditures is used to help defray the operating cost for other program in

the department that are funded by the Legislature from the General Inspection Trust Fund.

# **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture and Consumer Services

#### Regulatory Service to or Oversight of Businesses or Professions Program: Telemarketing

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Streamlining the administrative processes has increased productivity and customer services. Due to these improvements, we have been able to handle registrations and filings without additional personnel. E-commerce or electronic filing is available for consumers.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

Continue to work on areas that can be improved for better efficiency and customer service.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the regulatory activity is mandated by Florida Statutes and is appropriate to provide protection to both the consuming public and the industry being regulated.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

The division does not use official estimates by the Revenue Estimating Conference. Our revenue projections are based on actual historical revenues and the statutorily mandated fee structure.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Fees are adequate to cover all costs.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

The fee charged for the regulatory service and oversight are set by statute and apply uniformly to all affected business entities.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

Fees are adequate to cover all costs.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

N/A

### Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Telemarketing

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Sections 501.605 and 501.607, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 0%

If the program is subsidized from other state funds, what is the source(s)? N/A

What is the current annual amount of the subsidy? \$ 0.00

# EXPLANATION of LINE C: Deficits with Crop Production re

<u>Deficits with Crop Production reductions due to Citrus Greening and other diseases.</u>

Expected expenditures are less than appropriations due to the expected crop reduction.

#### SCHEDULE 1A: DETAIL OF FEES AND RELATED PROGRAM COSTS

**Department:** 42 Agriculture and Consumer Services **Budget Period: 2024-25** 

**Program:** 42170100 Fruit and Vegetable Inspection and Enforcement

**Fund:** 2321 General Inspection Trust Fund

**Specific Authority:** Section 570.481, F.S.

CECTION I FEE COLLECTION

**Purpose of Fees Collected:** Fees collected to the extent necessary to perform inspection service,

or based on set fees from USDA or by FDACS.

Type of Fee or Program: (Check **ONE** Box and answer questions as indicated.)

Regulatory services or oversight to businesses or professions. (Complete Sections I, II, and III and attach **Examination of Regulatory Fees** Form - Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service. (Complete Sections I, II, and III only.)

|-------------------------|-----|-------------|-------------|-------------|
| TOTAL SECTION II        | (B) | 5,706,402   | 5,401,620   | 5,750,451   |
| TOTAL - Surplus/Deficit | (C) | (1,708,954) | (1,519,544) | (1,513,375) |

#### **EXPLANATION of LINE C:**

Expected expenditures for future years will be less than amounts allocated due to expected decrease in the amount of fruit and vegetables requiring inspection, which also impacts future years revenue, creating deficits.

# **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture and Consumer Services

**Regulatory Service to or Oversight of Businesses or Professions Program:** 

Fruit and Vegetable Inspection and Enforcement

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Developed internal approval and documentation requirements to improve the process flow for vehicle maintenance repair requests. This was implemented near the end of the fiscal year; therefore, minimal cost reduction for the year.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

The division plans to move the Farmers' Stock Peanut Maintenance inventory and invoicing from Peach Tree into a no-code application software, QuickBase, currently in use for other applications, and develop a system that automates the process to improve inventory accuracy, reduce man hours and expedite invoicing.

- 3. Is the regulatory activity an appropriate function that the agency should continue at its current level? Yes
- 4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable? Yes
- 5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight? No
- 6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a

financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection? Yes

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

Citrus diseases (citrus greening and citrus canker) resulted in the destruction or abandonment of many citrus groves in the citrus production areas of Florida. Even citrus trees that remain viable are experiencing lower fruit yields. Citrus canker is caused by a bacterial pathogen that spreads through wind, flooding, and human transport, and results in unsightly lesions in the fruit that make it undesirable for consumption. Citrus greening is caused by a bacterium that is spread by the Asian citrus psyllid and leads to fruit drop, smaller, bitter and asymmetrical fruit, and the eventual death of the tree. There are no cures for either of these diseases, and control strategies involve heavy pesticide use and the application of nutrient supplements in the soil as well as the foliage of the trees. As these diseases have spread, the fresh fruit yield and consequently the number of cartons needing to be certified for export by the Department have gone down each year. These funds will allow the department to continue to provide services to the citrus industry which is an essential part of the state's economic health.

Without this funding, the Florida Department of Agriculture and Consumer Services Divisions of Fruit and Vegetables and Plant Industry will be forced to reduce operations, including staff, to a level where it will no longer provide the needed services to the citrus industry. Consequently, Florida citrus growers will be left without a comprehensive statistics program, sufficient

inspectors, and clean budwood from which to propagate reset trees to replace diseased ones. 8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy. The division continues to focus on process improvements, time management and efficiencies to reduce expenditures.

# Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Fruit and Vegetable Inspection and Enforcement

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): Yes, Section 601.28, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 67%

If the program is subsidized from other state funds, what is the source(s)? General Revenue

What is the current annual amount of the subsidy? \$2,000,000

# STATE OF FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES

# DIVISION OF AQUACULTURE 42170300

**EXHIBITS AND SCHEDULES** 

LEGISLATIVE BUDGET REQUEST 2024 - 2025

#### SCHEDULE 1A: DETAIL OF FEES AND RELATED PROGRAM COSTS

Department: 42 Agriculture and Consumer Services Budget Period: 2024-25

**Program:** 42170300 Aquaculture Certification

Fund: 1000, 2321 General Revenue and General Inspection Trust Fund

**Specific Authority:** Section 597.004, F.S.

Purpose of Fees Collected: To fund the Certification Program that regulates Aquaculture farms which produce

products for sale to the public.

Type of Fee or Program: (Check ONE Box and answer questions as indicated.)

Regulatory services or oversight to businesses or professions

X (Complete Sections I, II, and III and attach Examination of Regulatory Fees Form - Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service.

(Complete Sections I, II, and III only.)

#### **EXPLANATION of LINE C:**

The fees collected for this program are set in statute.

# **Schedule IA - Part I: Examination of Regulatory Fees**

**Department:** Agriculture & Consumer Services

### Regulatory Service to or Oversight of Businesses or Professions Program:

Aquaculture Certification and Best Management Practices

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Historically aquaculture regulatory onsite compliance visits have been conducted unannounced. This policy can result in visits with no access because of locked gates, locked buildings, watch dogs and other uninvited guest deterrents, in addition to the farmer/managers not being present to accompany staff on facility inspection. Routine compliance site visits for facilities with limited access are now scheduled in advance, eliminating the need for unnecessary repeat return attempts to inspect a facility.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

Improve planning, scheduling, and coordination to improve staff time efficiencies and effectiveness resulting in increased productivity per FTE, while reducing program costs per visit without having a detrimental impact on service provided to the farmer or the division's program responsibilities.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the Legislature established the regulatory function in the Department of Agriculture and Consumer Services, Division of Aquaculture because aquaculture is an agricultural commodity and the Legislature wanted aquaculture to be part of the one-stop regulatory permitting process to eliminate duplication of regulation and agency oversight, and provide a concise, effective, and efficient permitting process for Florida aquaculture farmers.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

The Florida Legislature set the original fee in FY 1997-98 and increased (doubled) the fee in FY 2008-09 from \$50 to \$100.

- 5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?
  - No, the number of field staff and the fee are set by the Florida Legislature. Reducing field staff (4 for 1,000 farms that must be inspected twice a year) would greatly diminish the protection to the state's resources.
- 6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

No, the aquaculture certification fees are established in statute and apply equally.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

The Aquaculture Certification and Best Management Practices Program benefits the general public by controlling the containment of nonnative aquatic species on farms, conserving waters of the state, and protecting, maintaining, and improving water quality for public use by providing that no effluent water be discharged from aquaculture farms into any waters of the state without first being given the degree of treatment necessary to protect Florida waters. This program also promotes the utilization of wildlife, fish,

and other aquatic life, and provides for domestic, agricultural, industrial, recreational, and other beneficial uses. Raising fees to cover program costs will put the Florida's aquaculture industry at a competitive disadvantage in both the national and international marketplace.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Any reduction of the state subsidy will require the reduction and/or elimination of legislatively directed agency responsibilities which will directly impact all Florida residents and visitors, Florida's wildlife, and Florida's natural resources.

# Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture & Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Aquaculture Certification

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, per Section 597.004, F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 74%

If the program is subsidized from other state funds, what is the source(s)? General Revenue

What is the current annual amount of the subsidy? \$396,587

Office of Policy and Budget - June 2023

The division does not collect any fees for this program due to the small number of plants inspected.

# **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture & Consumer Services

### Regulatory Service to or Oversight of Businesses or Professions Program:

Processing Plant Compliance and Inspection

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

The Department recognizes that large operational efficiencies in this program are not feasible since: (1) the required level of inspector standardization, (2) the required level of inspections, and (3) the number of required inspections are prescriptive according to the National Shellfish Sanitation Program.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

Large operational efficiencies in this program are not feasible as stated in #1 above.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, the regulatory activity is an appropriate function and the agency should continue at the current level for the molluscan shellfish public health program. The current regulatory activity and level of regulatory activity is what is mandated by the National Shellfish Sanitation Program. Should the regulatory activity fall below that prescribed by the National Shellfish Sanitation Program, the safety of Florida-produced and processed molluscan shellfish would be questioned and Florida shellfish would not be allowed to enter interstate commerce.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

No fees are charged for this molluscan shellfish public health program. The shellfish consuming public is the primary beneficiary of safe and wholesome shellfish.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

Office of Policy and Budget – June 2023

No fees are charged for this molluscan shellfish public health program. The shellfish consuming public is the primary beneficiary of safe and wholesome shellfish.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

No fees are charged for this molluscan public health program.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.
    - b). A reasonable fee cannot be charged to cover a significant part of the cost of the processing plant program. With the number of processors (104), it makes the unit cost approximately \$3,720. This fee would devastate this small industry. General Revenue is appropriated because the general public is the primary beneficiary of safe and wholesome shellfish. Consumers enjoy eating molluscan shellfish raw, whole, and alive. Because consumers choose to consume shellfish in this product form (raw), and raw oysters, clams, and mussels can be passive vectors of enteric disease which pose a potential human health hazard, stringent regulations must occur. For these reasons, molluscan shellfish must continue to be regulated to ensure a safe product and to compete with other Gulf states funded by other means.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

As stated above, there is no reasonable plan to reduce the state General Revenue funding by charging the molluscan shellfish processing industry. Because the consumer enjoys the public health benefits of this regulatory program, General Revenue funding remains the most appropriate revenue source. A possible alternative to General Revenue funding may be legislation to collect a tax at retail and food establishments for each shellfish sold to the consumer. However, such a tax may be burdensome on the Department of Revenue to collect and on food proprietors to implement.

# Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture & Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Shellfish Processing Plant Inspection

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No

What percent of the regulatory cost is currently subsidized? (0 to 100%) 100%

If the program is subsidized from other state funds, what is the source(s)? GR & GITF

What is the current annual amount of the subsidy? GR-\$301,062, GITF-\$111,637

# STATE OF FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES

# DIVISION OF ANIMAL PEST AND DISEASE CONTROL 42170500

**EXHIBITS AND SCHEDULES** 

LEGISLATIVE BUDGET REQUEST 2024 – 2025

#### SCHEDULE 1A: DETAIL OF FEES AND RELATED PROGRAM COSTS

Department: 42 Agriculture and Consumer Services Budget Period: 2024-2025

Program: 42170500 Animal Disease Control

Fund(s): 1000, 2321, 2360 General Revenue, General Inspection Trust Fund, Ag Emergency Eradication Trust Fund

**Specific Authority:** Sections 534.021, 534.031, 534.041, 534.051, 534.083(1), 585.002(5), 585.145, F.S.

Purpose of Fees Collected: To facilitate the division's ability to regulate the movement of animals into and within the state to control and or prevent dangerous,

economically devestating, and zoonotic animal diseases.

Type of Fee or Program: (Check ONE Box and answer questions as indicated.)

X Regulatory services or oversight to businesses or professions (Complete Sections I, II, and III and attach Examination of Regulatory Fees Form - Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service. (Complete Sections I, II, and III only.)

#### **EXPLANATION of LINE C:**

Expenditures in this document represent expenditures of the Bureau of Animal Disease Control. The regulatory programs are housed in this Bureau. The division is supported in its mission by the Bronson Animal Disease Diagnostic Laboratory which provides essential assistance through their animal disease testing and diagnostic programs.

The primary beneficiaries of animal disease surveillance are the citizens of animal industries of Florida. The animal disease surveillance ensures an available and safe food supply and protection from zoonotic diseases, which are diseases that can spread from animal to human. Without the cooperation of the individual animal owner, an undiagnosed zoonotic and/or foreign animal disease could be introduced into the state and destroy economic segments of the industry (Florida, nationally and internationally), and severely impact public health in the event of a zoonotic disease epidemic. Current fees are reasonable as the objective is to encourage participation in the Division's disease surveillance and animal movement activities.

# **Schedule IA - Part I: Examination of Regulatory Fees**

**Department:** Agriculture and Consumer Services

**Regulatory Service to or Oversight of Businesses or Professions Program:** 

**Division of Animal Industry** 

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

The division is continuing to monitor for animal diseases of high consequence. African Swine Fever has now been detected in the Dominican Republic and Haiti. This detection is the closest outbreak of the virus to Florida in more than 50 years. The division has increased outreach and education to livestock producers, concentrating on Florida's swine producers and the veterinarian community. The division has also conducted outreach to swine producers throughout the state to include fair and exhibition boards that cater to swine shows.

The division responded to Highly Pathogenic Avian Influenza (HPAI) in 26 non-commercial poultry flocks. The division's Emergency Support Function 17 (ESF 17) Incident Management Team (IMT) formed Unified Command with the USDA to detect, control and eradicate HPAI on those premises by rapid disease surveillance, detection, and response. In response to the nationwide HPAI outbreak, the division instituted the typing of HPAI Eurasian strain at the Bronson Animal Disease Diagnostic Laboratory to quickly determine the presence of the virus in the wild and domestic birds. This typing improved response times and allowed Florida's poultry industry to be better prepared when the disease was introduced to our state by wild birds. The division continues to monitor HPAI throughout the country, as well as within the state, and provides education and outreach to poultry producers on a continual basis in Florida to ensure proper biosecurity measures are being followed to protect their flocks.

Due to the expansion of the Asian Long-Horned Tick presence within the United States, the division has increased tick surveillance utilizing the tick submission program within the state. The tick has been detected moving down the eastern seaboard as close as northern Georgia. In response to the ticks' movement, the division has made it a priority to educate producers and veterinarians of the consequences from this tick migration and the impact to Florida's animal industry if the tick is detected within the state. The division has been providing educational resources to producers and veterinarians to assist the identification of these ticks and have been providing collection materials for tick surveillance submissions.

The division initiated multiple Incident Command Structure position specific trainings to ensure the division and the department is prepared to respond to ESF 17 related emergencies and be equipped with trained personnel to step into those roles. Instituting these position specific training roles has reenforced the Incident Command Structure and developing specialized skill sets within our team to respond to a natural disaster or a foreign animal disease introduction.

The division was activated at the State Emergency Operations Center in response to the threat of Hurricane Ian. In response, the ESF 17 activated its Florida SART to provide relief for animal and agriculture sectors impacted by the Category 4 hurricane. The Division of Animal Industry's IMT responded to 103 mission requests and deployed a 72-person IMT with representatives from the division, Forestry and USDA. The IMT completed 420 total Animal Health Assessments, received, and distributed more than 15,000 units of donated products, and deployed over 200 animal care volunteers.

In an effort to provide additional resources that assist County Emergency Managers within the state, who respond to natural disasters, the division has published the *Florida SART Disaster Preparedness Guide for Animals and Agriculture*. The Guide is available on the Florida SART website at <a href="https://www.FLSART.org">www.FLSART.org</a>.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

Due to the detection of African Swine Fever in the Dominican Republic and Haiti the division has planned to collaborate with the University of Illinois to assist with the development of an outreach campaign to target hard to reach swine producers. This collaborative initiative will include interactive videos and webinars, with accompanying education materials. University of Illinois will identify mechanisms to reach producers through extension agents, email and division personnel. This outreach initiative will also be targeted to slaughter facilities throughout the state.

The 2022-2023 HPAI nationwide outbreak has caused significant damage to the poultry industry. The current Eurasian strain is more resilient than previous strains detected within the United States and the virus could potentially reemerge during the winter months. The division has been working closely with poultry producers within the state to remain vigilant and to enact strict biosecurity measures to protect their flock during peak wild bird migration season in Florida.

Chronic Wasting Disease (CWD) has been detected in north Florida in one wild deer. Enhanced surveillance is currently being conducted in the established Management Zone in collaboration with the Florida Fish and Wildlife Conservation Commission. This is the first detection of CWD within the state. The division has planned additional outreach to captive cervid producers

throughout the state to remain vigilant, to report abnormal mortality events and to increase biosecurity measures to protect their herd from the disease.

In collaboration with the United States Department of Agriculture, the division developed specialized employee training and improved surveillance capabilities for New World Screwworm (NWS). The training and series of field exercises will test newly developed traps and prepare the division personal should an introduction ever occur again in Florida or the United States. The division also applied and received competitive cooperative agreement funding from the USDA to further expand NWS training of division employees and surveillance activities throughout the state.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

The primary beneficiaries of animal disease surveillance are the state's animal industries and citizens of Florida, ensuring an available and safe food supply and protection from zoonotic diseases (diseases that can spread between animals and humans). Our responsibilities have been expanded to include enhanced Emergency Response, including establishing a State Animal Response Team (SART), establishing partnerships with other entities to assist in emergency response efforts and coordinating county emergency response efforts as related to animal issues, responsibility for the Emergency Support Function (ESF)-17 at the State Emergency Operations Center (SEOC), and significantly increased management of cooperative agreements and grants from a variety of federal entities. The responsibilities for enhanced animal disease surveillance and monitoring of animals introduced into the state that pose a risk of introducing diseases such as African Swine Fever, Avian Influenza, Chronic Wasting Disease, Contagious Equine Metritis, Equine Herpes Virus 1 (EHV-1), Foot and Mouth Disease, Piroplasmosis, Rabbit Hemorrhagic Disease Virus, and tick surveillance have increased significantly. These issues are all tied to our regulatory mission of the prevention, control, and eradication of animal diseases of high consequence.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

No. Fees charged are set and capped by statute and/or rule. As disease surveillance is our primary objective, it is incumbent on the division to maintain fees at a reasonable level to encourage citizens, livestock owners, and veterinarians to continue to participate in our surveillance activities. This surveillance for dangerous transmissible diseases generally does not benefit the individual animal owner but enables regulatory controls to be implemented to prevent the spread of disease.

- 5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?
  - No. Fees charged are set and capped by statute and/or rule. This program is one that protects the general public and has appropriated mostly General Revenue to continue its functions. As disease surveillance and control are our primary objectives, it is incumbent on the division to maintain fees at a reasonable level to encourage citizens, livestock owners and veterinarians to continue to participate in our surveillance activities. The primary beneficiaries of animal disease surveillance are the states animal industries and citizens of Florida (ensuring an available and safe food supply and protection from zoonotic diseases – diseases that can spread between animals and humans). Without the cooperation of the individual producers, pet owners and veterinarians, an undiagnosed zoonotic and/or foreign animal disease could be introduced into the state and destroy economic segments of the industry (Florida, nationally and internationally), and severely impact animal and public health in the event of a zoonotic disease epidemic. As an example, because of worldwide concerns related to avian influenza in birds and people, our division greatly expanded laboratory testing of domestic and wild birds. This was part of a nationwide and international effort to carry out surveillance for this very serious animal and public health threat.
- 6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

Current fees are reasonable as the objective is to encourage participation in the division's disease surveillance and animal movement activities.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient

justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

State funding of animal disease surveillance and mitigation activities is paramount to early detection and management of diseases that could have devastating economic impacts, and result in significant animal and human health consequences. In addition, many of these disease surveillance activities allow Florida to meet required standards for interstate and international trade requirements. Without these functions being carried out in Florida, agricultural animal industries could not market their animals or products to other states, because of other state or federal restrictions. If producers were required to bear these additional costs, the competitive economic disadvantage would be detrimental to Florida producers. These divisions regulatory and response measures serve to safeguard not only the individual producer, but Florida's pets, livestock, wildlife, and public health.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Most of the costs of our program are either Salaries and Benefits or facilities/fuel costs and other operating expenses. The division has a plan to reduce expenses by automating processes whenever possible. Each inspector has been issued a tablet that can store electronic forms and other documents, thus reducing the cost of paper and other printed materials. Inspector schedules appointments with producers to ensure the optimal time for inspections to reduce costs of fuel and time. District supervisors have reviewed and mapped out the most efficient routes for inspectors to perform site inspections, resulting in reduced fuel and vehicle maintenance cost. Division staff also carpool when necessary to inspect a premise or facility that requires more than one inspector.

In addition, the division works to secure federal grant and cooperative agreement funds to offset state costs of performing these important safeguards for animal disease prevention, surveillance, detection, and eradication.

### Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: **Division of Animal Industry** 

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No

What percent of the regulatory cost is currently subsidized? (0 to 100%) 90%

If the program is subsidized from other state funds, what is the source(s)? General Revenue and Ag Emergency Trust Fund

What is the current annual amount of the subsidy? \$ 10,920,525

| Specific Fee Title  | Statutory<br>Authority for Fee  | Maximum<br>Fee<br>Authorized<br>(cap)  | Year of Last<br>Statutory<br>Revision to Fee | Is Fee Set by<br>Rule? # STATE OF FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES

# DIVISION OF PLANT PEST AND DISEASE CONTROL 42170600

**EXHIBITS AND SCHEDULES** 

LEGISLATIVE BUDGET REQUEST 2024 - 2025

#### SCHEDULE 1A: DETAIL OF FEES AND RELATED PROGRAM COSTS

Department: 42 Agriculture and Consumer Services Budget Period: 2024-25

**Program:** 42170600 Apiary Inspection

Fund: 1000, 2610, 2360, 2507 General Revenue, Federal Grants TF, Ag Emergency Eradication TF, Plant Industry TF

**Specific Authority:** Section 581.021.14, F.S.

Purpose of Fees Collected: To help support the inspection and certification of honey bee colonies in order to maintain a healthy

Apiary Industry.

Type of Fee or Program: (Check ONE Box and answer questions as indicated.)

Regulatory services or oversight to businesses or professions.

(Complete Sections I, II, and III and attach Examination of Regulatory Fees Form - Part I and II.)

Non-regulatory fees authorized to cover full cost of conducting a specific program or service.

(Complete Sections I, II, and III only.)

| TOTAL - Surplus/Deficit | (C) | (39,953) | 10,599 | (964,943) | 10,389  | (22,253) | 3,988  | (1,058,938) | (21,433) | (25,478) | 3,563  | (1,058,938) | (27,313) |

#### **EXPLANATION of LINE C:**

The registration and inspection fees that are collected are not sufficient to cover actual program costs. However, the actual costs incurred are insignificant in comparison to the service rendered and its impact on Florida's public and economic health. If one calculates the value of all citrus, watermelon, strawberry, blueberry, squash, cucumber, avocado, lychee, longan, and other minor crops, as well as crops grown in home gardens, this is the partial value of honey bees, as all of them require the transfer of pollen. The industry is under considerable financial pressure from imported honey, low pollination fees, and ever increasing overhead, and cannot shoulder additional costs directly. The contribution of our Africanized Honey Bee activities for all of Florida's citizens, tourists, guests, outdoor enthusiasts and others is a PUBLIC SAFETY SERVICE. Raising fees sufficiently to cover these program costs would require so high an assessment from the industry as to damage its competitive position with similar entities in other states.

# **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture and Consumer Services

Regulatory Service to or Oversight of Businesses or Professions Program:

Apiary Inspection

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

We continue to see an upward trend in the Apiary Industry. In 2006, there were an estimated 700 registered beekeepers in Florida. Today, there are 5,273 registered beekeepers with 658,814 hives. We have a team of 10 inspectors that are responsible for routine inspections, issuing certificates, responding to complaint calls, and monitoring for unwanted pests and disease. Due to the number of beekeepers and the number of services that are offered, we are unable to keep up with the current demand for our program. Our inspectors are forced to prioritize their inspections. While commercial beekeepers and complaint calls take precedent, we are unable to annually inspect a majority of beekeepers. Thus, the amount of time between inspections has increased as the demand has grown.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

We have developed a mobile app to decrease our dependency on paper, printers, and inspectors' time. The inspectors have a tablet that they can take to inspections and send all reports and certificates via email. This will continue to cut down costs associated with providing inspections and certification to the industry.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, honey bees are the foundational pollinator species for successful agricultural production of many fruits, vegetables, and berry crops in Florida. Without a healthy and vibrant apiculture industry, the production of citrus, vegetables, watermelons, strawberries, blueberries, and many other crops would suffer from lack of pollination. Without pollination, there is no crop and no agriculture business revenue. Estimates from the Division of Marketing place the value of Florida agricultural crops dependent on honey bees for pollination at \$1.4 billion. If growers lose their markets, they rarely regain them due to extreme market competition.

Africanized honey bees, the extremely defensive relative of the gentle, managed European honey bee, are increasing their presence in Florida. Florida has lost livestock, pets, and wildlife as a result of mass stinging events. Dozens of citizens have sought emergency medical attention from non-fatal stinging encounters with Africanized honey bees. In 2008, Florida experienced its first human fatality from an African swarm attack in the Kissimmee area. The Division of Plant Industry (DPI) tracks the movement and spread of these dangerous insects by monitoring and maintaining Africanized honey bee traps in the state of Florida. These same traps are used for early detection of exotic honey bee pests.

This regulatory activity should continue at its current level at a minimum. Expansion in the future is highly advised due to the industry growth we are experiencing, as well as the continued spread of the Africanized honey bee which negatively affects Florida agriculture and public safety. Additionally, the increasing population density and development is contributing to an increased number of complaints received about managed honey bees. The regulatory duties conducted by the apiary inspection section minimizes the impacts of many detrimental pests and diseases of honey bees and helps ensure a safe and healthy agriculture industry.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

The fees for registration are established and capped by Chapter 586.045 (3), F.S., at \$100 and do not cover the cost of the regulatory oversight. Special inspection fees, as established by rule, cover the cost of providing the special regulatory service. The special inspection fees also do not cover the cost to provide the service. We are in the process of restructuring our registration fees which will increase revenues.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

No, the fees for registration are established and capped by Chapter 586.045 (3), F.S., at \$100 and do not cover the cost of the regulatory oversight. Special inspection fees, as established by rule, cover the cost of providing the special regulatory service. The special inspection fees also do not cover the cost to provide the service. We are in the process of restructuring our registration fees which will increase revenues.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

Yes, they do take into account differences between the categories of apiaries that are regulated. For example, a backyard beekeeper who keeps honey bees as a hobby pays lower fees than a commercial beekeeper whose primary income comes from beekeeping. Additionally, the fees are low to aid the industry maintain compliance with state standards.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

If one calculates the value of all citrus, watermelon, strawberry, blueberry, squash, cucumber, avocado, lychee, longan, and other commercially grown agricultural crops, and crops produced by home gardeners, it would only reflect the partial value of honey bees, as these crops need pollen transferred from one flower to another in order for this pollination and fertilization to produce a marketable crop. These pollination services would not be available without the presence of healthy honey bee colonies that are the result of an active, knowledgeable, and consumer-oriented Apiary Inspection Section.

Apiary inspection is also about detecting exotic and established pests and diseases that may have detrimental effects to the apiculture industry and ultimately Florida's entire agriculture industry. Inspection is an essential tool for early detection and subsequent early response which helps keep impact costs lower.

The importance of managed honey bees to Florida agriculture is simple to substantiate. Honey bees can pollinate efficiently within an approximate 2-3 mile radius of their colony. In the process of collecting pollen, many different types and varieties of plants are pollinated allowing them to produce the fruits, nuts, berries and seeds that feed Florida wildlife such as deer, turkeys, song birds, migratory birds, and even fish. The value of these resources is immense if not priceless. The presence of healthy honey bees in Florida is essential to the safety and supply of our food as well as the safety of our people and livestock at the state and national level. Raising fees sufficiently to cover these program costs would require so high an assessment from the industry that it would damage its competitive position with similar entities in other states.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

Honey bees benefit nearly all other agriculture commodities in some capacity, largely through pollination. Without this essential component which honey bees are responsible for, many segments of Florida's agriculture would experience an irrecoverable loss in revenue related to the decrease in production. The abundances of Florida's Apiary Industry allow much of the natural environment to flourish by providing free pollination. This increases the production of fruits, nuts and berries that feed all segments of Florida wildlife. Florida has an established African Honey Bee (AHB) population. Which due to the defensive traits in AHBs, they pose a threat to humans and livestock. By regulating managed colonies and requiring beekeepers to keep European Honey Bees (EHB) we can saturate areas with more "docile traits". This ultimately minimizes the risk of AHB stinging incidents that result in severe incapacitation or death in humans and livestock.

There is no reasonable plan that can substitute for the benefits that a healthy and managed honey bee industry receives through the Apiary Inspection program. Inspectors monitor for pests and diseases that if left undetected could severely negatively impact the health of Florida's beekeeping industry, which in turn would have a profound impact on all agriculture commodities.

# Schedule IA - Part II: Examination of Regulatory Fees

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Apiary Inspection

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Sections 581.91 & 581.212 F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 83.76%

If the program is subsidized from other state funds, what is the source(s)? GR, FGTF, AEETF, PITF

What is the current annual amount of the subsidy? \$983,908

Office of Policy and Budget - July 2023

Although the fees have historically been sufficient to cover both direct and indirect costs, the recent detrimental effects of citrus greening and citrus canker on the citrus industry

has reduced fresh fruit yield significantly. This pervasive problem is affecting the revenue streams of this and other citrus-related fee programs.

# **Schedule IA - Part I: Examination of Regulatory Fees**

**Department**: Agriculture and Consumer Services

**Regulatory Service to or Oversight of Businesses or Professions Program:** 

Citrus Budwood Registration

1. What recent operational efficiencies have been achieved to either decrease costs or improve services? If costs have been reduced, how much money has been saved during the fiscal year?

Maintaining service contracts for the real-time PCR machines in the laboratory has reduced the unpredictability of repair and maintenance costs. In addition, the service has provided insurance against equipment failure which would result in serious loss of productivity. Lab supplies and horticultural chemicals are purchased in bulk when able to drive the cost down.

2. What additional operational efficiencies are planned? What are the estimated savings associated with these efficiencies during the next fiscal year?

Citrus Budwood Registration will continue to look for ways to streamline operations and increase efficiency. We routinely research new alternatives to expensive consumables and seek special pricing for bulk purchases, especially for items we use frequently. For example, we purchase some of our most costly laboratory consumables, Master Mix and Qiagen Kits, in bulk to receive discounts of up to 15%.

3. Is the regulatory activity an appropriate function that the agency should continue at its current level?

Yes, citrus industry stakeholder groups and industry task forces have expressed that clean budwood is critical to the survival of the industry in dealing with citrus greening and other endemic and exotic graft-transmissible diseases of citrus. The specialized pathogen testing provided by this agency is not available to individual growers through the private sector and distribution and preservation of clean stock has to be centralized and made available to all stakeholders. There is no other agency or program in either the governmental or private realm that provides these services.

4. Are the fees charged for the regulatory service or oversight to businesses or professions based on revenue projections that are prepared using generally

accepted governmental accounting procedures or official estimates by the Revenue Estimating Conference, if applicable?

The citrus budwood regulation fees are established and capped by Chapter 581.031.14 (d), F.S., at \$5.00. Program fees cover the registration costs of source trees, but not other program fees as the division is prohibited from charging fees above actual expenses for services rendered.

A portion of the program's budget is funded by the Citrus Health Response Program (CHRP) and transferred to the Division of Plant Industry Trust Fund to cover the major portion of our expenses. The Accelerated Budwood Initiative program, a subsidized funding through Citrus Budwood Nursery category, also contributes a major portion of funds to the program.

5. Are the fees charged for the regulatory service or oversight to businesses or professions adequate to cover both direct and indirect costs of providing the regulatory service or oversight?

No, although the Citrus Industry Trust Fund (CITF) has historically been sufficient to cover both direct and indirect costs, the recent detrimental effects of citrus greening and citrus canker on the citrus industry has reduced fresh fruit yield significantly, therefore reducing CITF. This pervasive problem is affecting the revenue streams of this and other citrus-related fee programs. The Department is requesting \$1.04 million in General Revenue for FY 2024-25 to cover the shortage. Additionally, the Department is investigating the fee structure to determine if raising the fees currently charged is feasible.

6. Are the fees charged for the regulatory service or oversight to businesses or professions reasonable and do they take into account differences between the types of professions or businesses that are regulated? For example, do fees reflect the amount of time required to conduct inspections by using a sliding scale for annual fees based on the size of the regulated business; or do fees provide a financial incentive for regulated entities to maintain compliance with state standards by assessing a re-inspection fee if violations are found at initial inspection?

Since only one type of entity or portion of the citrus industry is regulated by this citrus budwood registration fee, there is no difference between the types of customers or services that we provide, and a consistent fee is reasonable and well-received by the customers. The annual source tree registration fees reflect an amount of time and input into indexing practices for plant pathogens that require a set amount of inputs that can be applied to all end users equally as each tree is required to have the same tests; therefore, the cost of services is determined by the customer's number of trees requiring registration. Nurseries with large numbers

of source trees paid more than nurseries with a smaller number of source trees. Re-inspection is not an issue as graft-transmissible pathogen positive or negative results determine tree status and the fee covers testing costs that are required regardless of whether a pathogen is determined to be present or not.

The majority of the budwood program was historically covered by a citrus industry fruit tax that is assessed on each box of fruit harvested. This tax is assessed fairly because it is applied on each box of citrus that is harvested. The taxes collected are deposited into the Citrus Inspection Trust Fund and then appropriated to the Citrus Budwood Protection Program. The fee is considered fair and equitable as the Citrus Budwood Protection Program benefits all segments of the Florida citrus industry by providing high quality citrus propagation stock to all parties.

- 7. If the fees charged for the regulatory services or oversight to businesses or professions are **not** adequate to cover direct and indirect program costs provide either:
  - a) information regarding alternatives for realigning revenues or costs to make the regulatory service or program totally self-sufficient, including any statutory changes that are necessary to implement the alternative; or
  - b) demonstrate that the service or program provides substantial benefits to the public which justify a partial subsidy from other state funds, specifically describing the benefits to the general public (statements such as 'providing consumer benefits' or 'promoting health, safety and welfare' are not sufficient justification). For example, the program produces a range of benefits to the general public, including pollution reduction, wildlife preservation, and improved drinking water supply. Alternatively, the agency can demonstrate that requiring self-sufficiency would put the regulated entity at an unfair advantage. For example, raising fees sufficiently to cover program costs would require so high an assessment as to damage its competitive position with similar entities in other states.

While raising fees on introductions, increasing the price of budwood and aligning testing fees with actual costs would make the program self-sufficient, there are drawbacks. These increases would restrict the access to new and promising varieties that could potentially be resistant or tolerant of the HLB disease. It would also restrict access by the smaller nurseries in the industry who can't afford to keep registered scion trees and rely on Foundation material for their nursery stock and orders.

8. If the regulatory program is not self-sufficient and provides a public benefit using state subsidization, please provide a plan for reducing the state subsidy.

N/A

## **Schedule IA - Part II: Examination of Regulatory Fees**

Department: Agriculture and Consumer Services

Regulatory Service to or Oversight of Business or Profession Program: Citrus Budwood Registration

Does Florida Statutes require the regulatory program to be financially self-sufficient? (Yes or No and F.S.): No, Sections 581.191 & 581.212 F.S.

What percent of the regulatory cost is currently subsidized? (0 to 100%) 78%

If the program is subsidized from other state funds, what is the source(s)? GR, CITF, FGTF, AEETF, PITF

What is the current annual amount of the subsidy? \$2,488,884
