FY 2011-12 Schedule IV-C: Information Technology (IT) Costs & Service Requirements IT Service Requirements Worksheet: Portal/Web Management Service

Dept/Agency: State Courts System

Submitted by: Maria Arnold, Information Systems Services Manager

Phone: 850-487-7074

Date submitted: September 22, 2010

Portal/Web Management Service

The Portal/Web Management service enables the publishing of the agency's standard, mission-critical information with its employees and the public. Please consult the Guidelines for Schedule IV-C: IT Costs and Service Requirements for the complete definition of this IT Service and specific direction on how to complete this document.

| Identify the major hardware and commercial software associated with this service: | | | | | | | | | | |
|---|------------------------------|---|--|----------------------------------|--|--|--|--|--|--|
| 1 | Thunderstone Search Software | 5 | | | | | | | | |
| 2 | Webtrends Software | 6 | | | | | | | | |
| 3 | Sharepoint Portal | 7 | | | | | | | | |
| 4 | 2 Webservers (Virtualized) | 8 | | | | | | | | |
| | | | | | | | | | | |
| 1. IT Service Definition | | | | | | | | | | |
| 1.1. Who is the service provider? (Indicate all that apply) | | | | | | | | | | |
| | X Central IT staff | | | Northwood Shared Resource Center | | | | | | |

□ Other External Service Provider (specify) ___

□ Other state agency (non-primary data center)

1.2. Who uses the service? (Indicate all that apply)

- X Agency staff (state employees or contractors)
- X Employees or contractors from one or more additional state agencies
- External service providers

Program staff

- □ Public (please explain in Question 5.3)
- 1.3. Please identify the number of Internet users of this service.

Southwood Shared Resource Center

Northwest Regional Data Center

1.4. Please identify the number of intranet users of this service.

4,212*

8,334*

1.5. How many locations currently host IT assets and resources used to provide this service?

' <u>1</u>

2. Service Unique to Agency

- 2.1. Is a similar or identical IT service provided by another agency or external service provider?

 (Identical, Very Similar, No)

 Similar
- 2.2. If the same level of service could be provided through another agency or source for less than the current cost of the IT service, could your agency change to another service provider?

☐ Yes X No

- 2.2.1. If yes, what must happen for your agency to use another IT service provider?
- 2.2.2. If not, why does your agency need to maintain the current provider for this IT service?

IT Service Requirements Worksheet: Portal/Web Management Service

The Judicial Branch has confidential/privacy constraints on the transmission of case sensitive data for the court system.

| IT Service Levels Required to Support Business Functions |
|--|
| 3.1. Has the agency specified the service level requirements for this IT Service? |
| Yes; formal Service Level Agreement(s) |
| X Yes; informal agreement(s) |
| □ No; specific requirements have not been determined and approved by the department |
| If you answered "Yes," identify major (formal or informal) service level requirements: |
| Informal 24 hour restoration of service with no agreements. |
| 3.2. Timing and Service Delivery Requirements |
| 3.2.1. Hours/Days that service is required (e.g., 0600-2100 M-F, 24/7): 24X7 |
| 3.2.2. What is the agency's tolerance for down time during peak periods, i.e., time before management-level intervention occurs (e.g., 5 min, 15 min, 60 min)? 60 minutes |
| 3.2.2.1. What are the impacts on the agency's business if this down-time standard is exceeded? |
| Down time has minimal effects on business process but, effects would be felt on the courts primary mission statements related to access to the courts and court information. |
| 3.2.3. Are there any agency-unique service requirements? X Yes D No |
| If yes, specify (include any applicable constitutional, statutory, or rule requirements) |
| The Judicial Branch has confidential/privacy constraints on the transmission of case sensitive data for the court system. |
| 3.2.4. What are security requirements for this IT service? (Indicate all that apply) |
| X User ID/Password X Access through Internet or external network |
| X Access through internal network only X Access through Internet with secure encryption |
| □ Other |
| 3.2.5. Are there any federal, state, or agency privacy policies or restrictions applicable to this IT Service? |
| X Yes □ No |
| 3.2.5.1. If yes, please specify and describe: |
| Specific to Judicial Inquiry System (JIS) and time & attendance applications. |
| User/customer satisfaction |
| 4.1. Are service level metrics reported to business stakeholders or agency management? |
| ☐ Yes X No |
| 4.1.1. If yes, briefly describe the frequency of reports and how they are provided: |

Dept/Agency: State Courts System

Submitted by: Maria Arnold, Information Systems Services Manager

Phone: 850-487-7074

Date submitted: September 22, 2010

Data Center Service

This service provides the centralized operation and management of data center services through (a) data centers and computing facilities as defined in s. 282.0041, F.S., and (b) single logical-server installations. It includes all resources required to perform data center functions identified in s. 282.201(2)(d)1.e., F.S. for agency strategic and non-strategic IT services.

Statutory definitions from s. 282.0041, F.S., are provided here for convenience:

- "Primary data center" means a state or non-state agency data center that is a recipient entity for consolidation of non-primary data centers and computing facilities. A primary data center may be authorized in law or designated by the Agency for Enterprise Information Technology pursuant to s. 282.201.
- "Data center" means agency space containing 10 or more physical or logical servers any of which supports a strategic or nonstrategic information technology service, as described in budget instructions developed pursuant to s. 216.023.
- "Computing facility" means agency space containing fewer than a total of 10 physical or logical servers, any of which
 supports a strategic or nonstrategic information technology service, as described in budget instructions developed pursuant
 to s. 216.023, but excluding single, logical-server installations that exclusively perform a utility function such as file and print
 servers.

Please consult the *Guidelines for Schedule IV-C: IT Costs and Service Requirements* for the complete definition of this IT Service and specific direction on how to complete this document.

| | Identify the non-strategic <i>and strategic</i> IT services that are supported (in whole or part) by data center services offered at the following data centers and computing facilities. | | | | | | | | | |
|---|---|--|--|--|--|--|--|--|--|--|
| 1 | Northwood Shared Resource Center | | | | | | | | | |
| 2 | Southwood Shared Resource Center | | | | | | | | | |

IT Service Requirements Worksheet: Strategic Service #1 - Florida Appellate Court -**Court Records and Case Flow Management**

| 4. | User/customer | satisfaction |
|----|---------------|--------------|
| | | |

- 4.1. Are service level metrics reported to business stakeholders or agency management Yes Χ 4.1.1. If yes, briefly describe the frequency of reports and how they are provided: 4.2. Are currently defined IT service levels adequate to support the business needs? X Yes No 4.2.1. If no, what changes need to be made to the current IT service? (Briefly explain)
 - 4.2.2. List any significant projects that are underway or planned to upgrade or enhance any system, resource, or process associated with this IT service. Please indicate the D3-A issue number in the Description for any projects that require funds in a legislative budget request for FY 2011-12.

| Project Name | Description | Start Date | End Date | Estimated Total Cost to Complete |
|--------------|--|------------|----------|-------------------------------------|
| FACTS | Consolidation of the Florida Appellate Courts Technology Solution (FACTS) project and the appellate CMS inclusive of electronic document management and workflow | 05/10 | 06/12 | \$47,500 * |
| | * no D3-A associated with this service | | | |
| | | | | |

5. Additional Information

5.1. Please describe the funding source(s), i.e., general revenue, trust fund, federal grant, or other, that is used to provide this service, and describe any anticipated adjustments to the funding source(s) or funding level for FY 2011-12

State Courts Revenue Trust Fund

- 5.2. Please indicate whether there is a cost recovery or cost allocation plan for this service, and describe any anticipated adjustments or needed changes in the service funding model (e.g., charge-back, cost allocation, fee-per-transaction, etc.)
- 5.3. Other pertinent information related to this service

Since portions of this service (public court dockets) are accessible by the public there is no way to determine the number of users - court system users would total approximately 4,212.

IT Service Requirements Worksheet: Strategic Service #3 - OSCA - State Court **Administrative Support of Judicial Functions**

State Courts System Dept/Agency:

Maria Arnold, Information Systems Services Manager Submitted by:

850-487-7074 Phone: October 13, 2010 Date submitted:

OSCA - State Court Administrative Support of Judicial Functions

Please consult the Guidelines for Schedule IV-C: IT Costs and Service Requirements for specific direction on how to complete this document.

| | Identify all major IT application systems (custom developed or commercial software) that are included (in whole or part) in this IT Service: | | | | | | |
|---|--|---|---|--|--|--|--|
| 1 | Senior Judge Application | 5 | On-line Job Law Clerk Resume Repository | | | | |
| | Business & Contract Cases Jury | | | | | | |
| 2 | Instructions | 6 | Uniform Data Reporting | | | | |
| 3 | Certified Attorney | 7 | Trial Court Statistics | | | | |
| 4 | Civil Jury Instructions | 8 | Subscriptions | | | | |
| | | 9 | Grand Jury System | | | | |

1. IT Service Definition

1.1.1. Provide the definition of this service as identified on Form SC2 (Strategic IT Service Catalog).

This service supports various systems which enable the OSCA to provide administrative support to assist the Judicial Branch in carrying out its constitutional and statutory responsibilities.

| 1.2. | .2. Who is the service provider? (Indicate all that apply) | | | | | | |
|------|---|---|--|-------------------------------|-------|--|--|
| | X | Central IT staff | | Northwood Shared Resource Ce | enter | | |
| | | Program staff | | Southwood Shared Resource Ce | enter | | |
| | | Other state agency (non-primary data center) | | Northwest Regional Data Cente | r | | |
| | | Other External Service Provider (specify) | | | | | |
| | 1.3. Who uses the service? (Indicate all that apply) X Agency staff (state employees or contractors) Employees or contractors from one or more additional state agencies External service providers X Public (please explain in Question 5.3) * | | | | | | |
| 1.4. | Plea | ase identify the number of users of this service. | | | * | | |
| 1.5. | 1.5. How many locations currently host this service? | | | | | | |
| Serv | Service Unique to Agency | | | | | | |

2.

2.1. Is a similar or identical IT service provided by another agency or external service provider? (Identical, Very Similar, No)

2.2. If the same level of service could be provided through another agency or source for less than the current cost of the IT service, could your agency change to another service provider?

Yes No

current cost of the IT service, could your agency change to another service provider?

IT Service Requirements Worksheet: Strategic Service #4 – Judicial Inquiry System (JIS)

| 2.2.1. If yes, what must happen for your agency to use another IT service provider? |
|---|
| |
| 2.2.2. If not, why does your agency need to maintain the current provider for this IT service? |
| The Judicial Branch must maintain confidentiality and privacy constraints on court and other agency data. |
| IT Service Levels Required to Support Business Functions |
| 3.1. Has the agency specified the service level requirements for this IT Service? |
| X Yes; formal Service Level Agreement(s) * |
| Yes; informal agreement(s) |
| □ No; specific requirements have not been determined and approved by the department |
| If you answered "Yes," identify major (formal or informal) service level requirements: |
| * "Memorandum of Understanding" documents are executed with both agencies and system users. |
| 3.2. Timing and Service Delivery Requirements |
| 3.2.1. Hours/Days that service is required (e.g., 0700-1800 M-F, 24/7) for: |
| 3.2.1.1. User-facing components of this IT service (online) <u>24/7</u> |
| 3.2.1.2. Back-office-facing components of this IT service (batch and maintenance) 24/7 |
| 3.2.2. What is the agency's tolerance for down time during peak periods, i.e., time before management-level intervention occurs (e.g., 15 min, 30 min, 60 min)? 60 minutes |
| 3.2.2.1. What are the impacts on the agency's business if this down-time standard is exceeded? |
| Workflow interruption would result in a significant impact in the daily workload of the court system, law enforcement, and other system stakeholders. Also loss of the system impacts public safety with regard to sexual offenders, warrants, etc. |
| 3.2.3. Are there any agency-unique service requirements? X Yes □ No |
| If yes, specify (include any applicable constitutional, statutory, or rule requirements) |
| This service supports constitutional and statutory responsibilities required for court event activities. |
| 3.2.4. What are security requirements for this IT service? (Indicate all that apply) |
| X User ID/Password □ Access through Internet or external network |
| X Access through internal network only X Access through Internet with secure encryption |
| Other |
| 3.2.5. Are there any federal, state, or agency privacy policies or restrictions applicable to this IT Service |
| X Yes □ No |
| 3.2.5.1. If yes, please specify and describe: |
| Judicial Branch, FBI, and FDLE certification confidentiality and privacy policy protocols. |

4. User/customer satisfaction

Dept/Agency: State Courts System (SCS)

Prepared by: Maria Arnold Phone: 487-7074

Date Completed: (insert completion date)

| # | Name of IT System | Description of IT System | Agency Program or Function Supported | Notes |
|---|--|---|---|--|
| 1 | Florida Appellate Courts Technology Solution (FACTS) | Florida appellate courts electronic document management and workflow solution to replace several appellate systems by mid- 2011/2012 fiscal year. | Supreme Court and district courts of appeal | |
| 2 | Appellate Case Management System | In-house developed (OSCA - ISS staff) Case Management System which serves the Supreme Court and five district courts of appeal. | Supreme Court and district courts of appeal | System includes three additional modules related to the overall CMS. E-vote is an electronic voting module used by the Supreme Court Justices to circulate and vote on opinions and other court documents. Death Case Module is an application that tracks every event associated with a death penalty case. File Tracking which is used by all five District Courts assists the courts in tracking and identifying the current location of a file. |

| # | Name of IT System | Description of IT System | Agency Program or Function Supported | Notes |
|---|--|--|--|--|
| 3 | Supreme Court Justice Information System (JIS) | In-house developed (OSCA - ISS staff) The system is used within a justices suite to track cases assigned to the justice. | Supreme Court justices, Supreme Court central staff | |
| 4 | Court Web Reports | Browser based reporting system that provides a wide range of reports to assist the courts in managing cases and case load | Supreme Court and district courts of appeal | |
| 5 | Court Online Performance and Accountability Reports | A browse based set of reports used by the court P&A committee to review and manage statewide case intake and timeliness of disposition load | district courts of appeal | |
| 6 | Senior Judge Application | Browser based application to track senior judge hours allotted and used during a certain period of time | Court Administrators and Senior Judges | |
| 7 | Dispute Resolution Application | Track certified mediators available in the state. | OSCA Dispute Resolution Office and Certified Mediators | |
| 8 | Death Penalty Quarterly report | Browser base system for reporting on the quarterly status of death cases | Supreme Court, circuit courts | Each circuit that has an active death penalty case in their jurisdiction must report the status of the case to the supreme court each quarter. |
| 9 | Business and Contract Cases Jury Instructions | SharePoint site to all collaboration between the members of the committee; RE:Standard Jury Instructions for Business and Contract Cases. | OSCA, circuit courts, Business and Contracts Instruction Committee | |

| # | Name of IT System | Description of IT System | Agency Program or Function Supported | Notes |
|----|----------------------------------|--|--|---|
| 10 | Judicial Inquiry System (JIS) | Browser based inquiry system that connects to 13 databases to provide pertinent information for judicial users and stakeholders. System enhanced in 2005 in support of the Jessica Lunsford Act and in 2007 in support of Anti-murder legislation. | district courts of appeal, circuit courts, public defenders, state attorneys, law enforcement, probation, pre-trial, FBI, Home Land Security, etc. | The JIS consists of 3 systems: JIS – provides primary manual search capabilities. AWACS – Active Warrant Alert Calendar System. Limited use of Active Warrant System module in Lee and Collier Counties. 1st Appearance Calendar – used during the 1st appearance court event. |
| 11 | Certified Attorney | Tracking Attorney information; demographic, education, etc. to allow them to be certified by SC. Emails, Printing letters, Reports. | Supreme Court | |
| 12 | Civil Jury Instructions | SharePoint site to all collaboration between the members of the committee. | circuit courts | Used by Jury Management Committee. Generally, there is only activity immediately before and after the meetings (currently held 3 times a year in February, July and November). |

| # | Name of IT System | Description of IT System | Agency Program or Function Supported | Notes |
|----|--|--|---|-------|
| 13 | Court Education | Used by OSCA Court Education staff to plan programs which contain tracks/courses/sessions/facilities/teachers, etc. | Judges and OSCA Court Education Unit staff | |
| 14 | On-line Docket | Internet access for public on district court of appeal docket. | Supreme Court, district courts of appeal, public, | |
| 15 | DCMS – Death Case Management System | Used by Supreme Court to manage data submitted by Capital Collateral Agency on Death Penalty Cases. | Supreme Court | |
| 16 | FDCIS – Florida Dependency Case Information System | Case Management System developed by OSCA Office of Court Improvement (OCI). Used by circuit court judges and case managers to manage dependency cases. | OSCA OCI, circuit courts | |
| 17 | Grand Jury System | Used whenever Jurors are needed by Circuits/Counties. Counties provide data on potential Grand Jurors. | circuit courts | |
| 18 | Justice Teaching System | Used for tracking attorney volunteers in schools. Program initiated by Justice Lewis | Supreme Court | |
| 19 | JT Judge Reports | Reporting of Justice Teaching data to Judges in Circuits, Counties and Appellate Courts | District courts of appeal, circuit courts | |
| 20 | Mediation Courts - 5th DCA | System used to track mediation cases in the 5 th district court of appeal | 5 th district court of appeal | |

| # | Name of IT System | Description of IT System | Agency Program or Function Supported | Notes |
|----|--|---|--|-------|
| 21 | On-line Job - Law Clerk Resume Repository (with retrieval capability) | Browser accessible Law clerk resume repository. Provides search capability for judges/circuits to retrieve resumes. | Supreme Court, district courts of appeal, circuit courts | |
| 22 | Subscription | An online Web application that can be used by divisions in OSCA to communicate with their clients in circuits. | OSCA, public | |
| 23 | Court Education – Susan Morley | On line collaboration system for court education services | Circuit courts, OSCA | |
| 24 | Trial Court Statistics | Trial Court Statistics is part of Court Services Statistics on the web. Court Services has several statistic pages on our flcourts.org web page. This is a part of their statistics on the web. | Supreme Court, district courts of appeal, OSCA, public | |
| 25 | Uniform Data Reporting | System created for Trial Court Performance and Accountability committee Court Services. | OSCA Court Services, circuit courts | |
| 26 | Virtual Court | Provides Judge training modules and tracks usage. | OSCA Office of Court Improvement, circuit courts | |
| 27 | FDCCMS – Drug Court | Florida Drug Court Case Mgmt. System used for data collection and client tracking for circuits participation in the Drug Court Expansion program | OSCA Office of Court Improvement, circuit courts | |
| 28 | | | | |
| 29 | | | | |

Listing of Strategic IT Services

(FY 2011-12 Schedule IV-C Worksheet SC-2)

Dept/Agency: State Courts System (SCS)

Prepared by: Maria Arnold Phone: 487-7074

Date Completed: (insert completion date)

1. Florida Appellate Court – Court Records and Case Flow Management (Supreme Court Justices/district court of appeal judges/staff)

This strategic IT service provides application development and support services specifically for the Supreme Court and district courts of appeal. This service supports various case management system processes, the creation of associated reports, and on-line web services. It also supports other constitutionally mandated supervisory and administrative responsibilities of the Court, such as those related to Florida Bar disciplinary cases and Death Penalty cases.

The following IT Systems are constituent elements of this Strategic IT Service.

- **1.a.** Florida Appellate Courts Technology Solution (FACTS) Florida appellate courts (Supreme Court and district courts of appeal) electronic document management and workflow solution to replace several appellate systems by mid- 2011/2012 fiscal year. This solution includes:
 - the tracking and processing of cases,
 - tracking and storage of case and document related metadata,
 - storage of electronic documents,
 - electronic workflows to support case processing and handling,
 - the ability for Justices to electronically circulate and vote on opinions and other court documents,
 - acceptance of cases from and integration with the Florida Association of Clerks and Comptrollers (FACC) ePortal eFiling application,
 - tracking and support for non-case related issues such as rule making,
 - secured remote access to solution functionalities by Justices and the Clerks' Office,

Last Saved: 10/13/2010 9:44:00 AM Page 1 of 6

- exposure of certain case information to the public via a public docket,
- Death Penalty case tracking,
- secured remote access to case information by attorney's for a case, and
- reporting.
- **1.b.** Appellate Case Management System In-house developed (OSCA ISS staff) Case Management System which serves the Supreme Court and five district courts of appeal. The system includes the following Modules or Subsystems, which are supported by the primary CMS:
 - **E-vote** (Supreme Court only) is an electronic voting module used by the Supreme Court Justices to circulate and vote on opinions and other court documents.
 - **Death Case Module** (Supreme Court only) is an application that tracks every event associated with a death penalty case.
 - Supreme Court Justice Information System (JIS) (Supreme Court only) In-house developed (OSCA ISS staff) used within a justices suite to track cases assigned to the justice.
 - Death Penalty Quarterly Report (Supreme Court only) Browser based system for reporting on the quarterly status of death penalty cases. Each circuit that has an active death penalty case in their jurisdiction must report the status of the case to the Supreme Court each quarter.
 - Death Case Management System (Supreme Court only) Used by Supreme Court to manage data submitted by Capital Collateral Agency on Death Penalty Cases.
 - **File Tracking** (five district courts of appeal only) used to assist the courts in tracking and identifying the current location of a file.
 - Mediation Courts (used by the 5th district court of appeal only) system used to track mediation cases.
 - Court Web Reports (used by all courts) browser based reporting system that provides a wide range of reports to assist the courts in managing cases and case load.

File: Strategic FY2011-12-IV-C--SrvcListingSC2final

Last Saved: 10/13/2010 9:44:00 AM Page 2 of 6

- Court Online Performance and Accountability Reports (used by all courts) browser based set of reports used by the court P&A committee to review and manage statewide case intake and timeliness of disposition load.
- **On-line Docket** Internet public access to Supreme Court and district court of appeal dockets.

2. Office of the State Courts Administrator (OSCA) Court Education

This strategic IT service provides application development and support services specifically for court education purposes. These activities are in support of the constitutional and statutory responsibilities required for continuing judicial education.

The following IT Systems are constituent elements of this Strategic IT Service.

- **2.a.** Court Education Internal system used by OSCA Court Education staff to plan programs that contain tracks/courses/sessions/facilities/teachers, etc.
- **2.b.** Justice Teaching (JT) System used for tracking attorney volunteers in schools. This educational program is coordinated by the Supreme Court and is used to manage those participating in the program. The system is also used to generate **JT Reports**, which provides the Justice Teaching data to judges in the appellate courts, circuits, and counties.
- **2.c.** Court Education/Susan Morley System SharePoint site used to support collaboration for Court Education services, managed by OSCA court education attorney. The system provides for document sharing, calendar sharing, video presentations, etc.
- **2.d.** Virtual Court Provides judge training modules and tracks usage.

3. OSCA- State Court Administrative Support of Judicial Functions

This strategic IT service provides application development and support services required for the OSCA to provide administrative support to assist the Supreme Court in carrying out its constitutional and statutory responsibilities.

The following IT Systems are constituent elements of this Strategic IT Service.

3.a. Senior Judge Application – Browser based application to track senior judge hours allotted and used during a certain time period.

File: Strategic FY2011-12-IV-C--SrvcListingSC2final

Last Saved: 10/13/2010 9:44:00 AM Page 3 of 6

- **3.b.** Business & Contract Cases Jury Instructions SharePoint site used to support all collaboration between the members of the committee; RE: Standard Jury Instructions for Business and Contract Cases.
- **3.c.** Certified Attorney Tracking Attorney information; demographic, education, etc. to provide for Supreme Court certification. System functionality supports e-mail communications, generation of correspondence, generation of report requirements.
- **3.d.** Civil Jury Instructions Sharepoint site used to support all collaboration between members of the Jury Management Committee.
- **3.e.** On-line Job Law clerk Resume Repository (with retrieval capability) Browser accessible Law clerk resume repository. Provides search capability for judges/circuits to retrieve resumes for potential Law Clerks.
- **3.f.** Uniform Data Reporting System created for Trial Court Performance & Accountability Committee and Court Services staff. Used to collect data from the trial courts for statistical and reporting purposes in order determine the achievement of defined performance levels.
- **3.g.** Trial Court Statistics Browser based search that provides trial court statistical information to the circuit courts and the public.
- **3.h.** Subscriptions On-line Web application that can be used by multiple divisions within the OSCA to communicate with circuit court staff and other court affiliated stakeholders.
- **3.i.** Grand Jury System Used whenever Jurors are needed by circuits/counties. Counties provide data on potential grand jurors.

4. OSCA ISS – Judicial Inquiry System (JIS)

This strategic IT service provides application development and support services specifically related to the Judicial Inquiry System (JIS) for the Office of the State Courts Administrator's Information Systems Services Division and various other entities; i.e. district courts of appeal, circuit courts, public defenders, state attorneys, law enforcement, probation, pre-trial, FBI, Home Land Security, etc.

4.a. Judicial Inquiry System (JIS) - Browser based inquiry system that connects to 13 databases to provide pertinent information for judicial users and stakeholders. The core system was enhanced (through legislative appropriation) in 2005 in support of the Jessica Lunsford Act and in 2007 in support of Anti-murder legislation:

File: Strategic FY2011-12-IV-C--SrvcListingSC2final

Last Saved: 10/13/2010 9:44:00 AM Page 4 of 6

The JIS was augmented to accommodate the demands of the Jessica Lunsford Act (JLA), signed into law in May 2005. The expanded JIS includes a "JLA First Appearance Calendar"—a function that provides judges, state attorney, public defenders and other criminal justice officials automatic access to information essential for the appropriate treatment of the recently-arrested during their first appearance hearing. Among other things, it has a risk status alert section that immediately identifies high risk sexual offenders, sexual predators, outstanding warrant(s) and those who are on supervised release status. The system also has the capability to identify those individuals that are Career/Habitual Offenders.

In March 2007, The "Anti-Murder Act" was signed by Governor Crist which creates s. 903.0351, F.S, which calls for special handling of offenders on probation who are designated as Violent Felony Offenders of Special Concern (VFOSC). The "Anti-Murder Act" provides the courts, state attorneys, public defenders, and the booking agency with a means of readily identifying when an arrested person meets certain criteria.

The JIS consists of 3 sub-systems:

JIS – provides primary manual search capabilities.

AWACS – Active Warrant Alert Calendar System. Currently there is limited use of the Active Warrant System module in Lee and Collier Counties.

1st Appearance Calendar – used during the 1st appearance court event.

5. OSCA - Office of Court Improvement - Circuit Courts

This strategic IT service provides application development and support services specifically for the Office of the State Courts Administrator's Office of Court Improvement (OCI) and the circuit courts. Both of the systems in this service are supported with Federal grant funding.

The following IT Systems are constituent elements of this Strategic IT Service.

- **5.a.** FDCIS/Florida Dependency Case Information System Case management system developed by OSCA OCI and used by circuit court judges and case managers to manage dependency cases.
- **5.b.** FDCCMS/Drug Court Florida Drug Court Case Management System used for data collection and client tracking for circuit and county drug court participation in the Drug Court Expansion program.

6. OSCA Dispute Resolution Office and Certified Mediators

This strategic IT service provides application development and support services specifically for the Office of the State Courts Administrator's Dispute Resolution Office and certified mediators.

The following IT Systems are constituent elements of this Strategic IT Service.

6.a. Dispute Resolution Application – Tracks certified mediators available statewide.

⁽¹⁾ Some activity unit costs may be overstated due to the allocation of double budgeted items.

SCHEDULE XI/EXHIBIT VI: AGENCY-LEVEL UNIT COST SUMMARY

⁽²⁾ Expenditures associated with Executive Direction, Administrative Support and Information Technology have been allocated based on FTE. Other allocation methodologies could result in significantly different

⁽³⁾ Information for FCO depicts amounts for current year appropriations only. Additional information and systems are needed to develop meaningful FCO unit costs.

⁽⁴⁾ Final Budget for Agency and Total Budget for Agency may not equal due to rounding.

Schedule XIV Variance from Long Range Financial Outlook

STATE COURTS SYSTEM CONTACT: Dorothy Wilson

Article III, Section 19(a)3, Florida Constitution, requires each agency Legislative Budget Request to be based upon and reflect the long range financial outlook adopted by the Joint Legislative Budget Commission or to explain any variance from the outlook.

| 1) | Does the long range financial outlook adopted by the Joint Legislative Budget Commission in September 2010 contain revenue or |
|----|---|
| | expenditure estimates related to your agency? |
| | Yes X No No |
| | |

2) If yes, please list the estimates for revenues and budget drivers that reflect an estimate for your agency for Fiscal Year 2011-2012 and list the amount projected in the long range financial outlook and the amounts projected in your Schedule I or budget request.

| | Issue (Revenue or Budget Driver) | | FY 2011-2012 Estimate/Request Amount | | |
|---|--|---|--------------------------------------|--------------------|--|
| | | | Long Range | Legislative Budget | |
| | | | Financial Outlook | Request | |
| а | Court System Funding Required to Offset Decline in Court Fee Revenue | В | 0 | 54,892,937 | |
| b | Fund Shift Cost Sharing from SCRTF to GR | В | 0 | 3,695,347 | |
| С | Fixed Capital Outlay - Supreme Court and District Courts of Appeal | В | 1,600,000 | 340,312 | |
| d | Total | | 1,600,000 | 58,928,596 | |

- 3) If your agency's Legislative Budget Request does not conform to the long range financial outlook with respect to the revenue estimates (from your Schedule I) or budget drivers, please explain the variance(s) below.
 - a) In order to maintain a 5% reserve in the State Courts Revenue Trust Fund (SCRTF), \$17,781,176 is needed in the cash balance for FY 2011-12 year end. Therefore, operating budget for the SCRTF needs to be fund-shifted by that amount to General Revenue. Additionally, all new FY 11-12 Legislative Budget Request issues, with the exception of the Dispute Resolution Center Workload and Innocence Commission issues, needed to be requested from General Revenue in the amount of \$37,111,761. Also, see line c.
 - b) In order to eliminate the transfer of funds from the Public Defenders, State Attorneys and the Justice Administrative Commission, this issue is to fund shift the cost sharing appropriations directly into the State Courts System budget in General Revenue.
 - c) Judicial Branch LBR request for General Revenue for FY 2011-2012 FCO includes only one project for the 2nd District Court of Appeal in the amount of \$340,312.

II. Schedule IV-B Business Case

- A. Background and Strategic Needs Assessment
 - 1. Agency Program(s)/Service(s) Environment

Overview. Court reporting¹ is the process which creates and preserves a record of words spoken in court, and when necessary, provides their timely and accurate transcription in the event that an appeal is filed.

In FY 2008-09 there were approximately 1.4 million trial court filings with associated proceedings that were required to be recorded at public expense (state funded). This includes filings for felonies, misdemeanors, criminal traffic, DUI, domestic violence, guardianship, Baker Act (mental health), Marchman Act (substance abuse), Jimmy Ryce, juvenile delinquency, juvenile dependency, and termination of parental rights. Civil non-due process cases are not required to be recorded using state funded court reporting services.

Associated State Costs. As of July 1, 2004, Revision 7 to Article V of the Florida Constitution became fully implemented and certain court costs, traditionally borne by the counties, became a state responsibility. Court reporting is one such cost. For FY 2010-11, an estimated \$30 million will be spent for recurring court reporting costs.

Prior to Revision 7 implementation, funding levels and services for court reporting varied significantly from county to county. No judicial circuit was alike in its delivery of court reporting services. Specifically, variations in service delivery models, staffing models, local market conditions, and geographic dispersion have provided significant challenges in managing court reporting services at the state level post-Revision 7.

Since the implementation of Revision 7, the judicial branch has made significant headway in establishing a more uniform, effective, and efficient delivery of court reporting services across all judicial circuits. Recently, two major supporting work products have been issued by Supreme Court to provide state-level guidance and support to the judicial circuits. On July 16, 2009, the Supreme Court issued an opinion (SC08-1658) and adopted several changes to the Rules of Judicial Administration and Florida Rules of Appellate Procedure to address certain technical issues related to the use of digital court reporting technology. The opinion may be found at: http://www.floridasupremecourt.org/decisions/2009/sc08-1658.pdf. On January 7, 2010, the Supreme Court issued AOSC10-1 which adopted several standards of operation and best practices proposed by the Commission on Trial Court Performance and Accountability on the overall effective and efficient management of court reporting services. The administrative order may be found at: (http://www.floridasupremecourt.org/clerk/adminorders/2010/AOSC10-1.pdf).

Customers. Court reporting serves a critical function in our judicial system because meaningful appellate review relies on an accurate record of what transpired at the trial court level. The transcript of the words spoken in open court is essential for the preparation of appeals by attorneys and is equally important for the court in reviewing

¹The function of "court reporting" is frequently discussed in its two major components: the contemporaneous recording of words and events in a courtroom is referred to as "recording" and the subsequent conversion of the record into written text is referred to as "transcription." The overall process is referred to as "court reporting."

the grounds for appeal. Transcripts or other media are used by attorneys, litigants, judges, court staff and the public to review events in court proceedings. This provides public accountability and facilitates due process through appellate review, affording the broader legal community, as well as litigants, the press, and the general public an important tool that assists with the independent evaluation of court proceedings.

Legal Necessity. In order to advance an appeal of a decision made in a court proceeding a party generally must provide to the appellate court relevant portions of the transcript. In most civil cases, it is the responsibility of the party making the appeal to have secured court reporting services. However, court reporting services are frequently provided at public expense pursuant to requirements that emanate from several sources, including state and federal constitutions, statutes, and court rules.

The United States Constitution and the Constitution of the State of Florida both provide rights to due process and equal protection. Court reporting is implicated in each of these protections in two distinct ways. First, due process in the federal system requires that appellate review be meaningful and complete when a state provides an appeal as a matter of right. The state system contains this same requirement of appellate review in Article V, Sections 3 and 4 of the Florida Constitution. Delap v. State, 350 So.2d 462 (Fla. 1977). Second, due process requires that when a state provides an indigent defendant with a lawyer on appeal, the lawyer must have the ability to fully represent his or her client. Hoffman v. Haddock, 695 So.2d 682 (Fla. 1997). If the lawyer needs a complete transcript to fully represent the indigent client on appeal, then a full transcript becomes an element of due process. Jones v. State, 780 So.2d 218 (Fla. 2d DCA 2001). In Florida, the Legislature has acknowledged that interests under litigation in some cases are so important that indigent litigants must be provided with court reporting and transcription on appeal to protect constitutionally afforded rights.

Service Delivery Models. The technology of what is today called court reporting has evolved through time and continues to change. Throughout most of the 20th century court reporting was conducted by reporters using stenographic machines. Today court reporting in Florida is provided through a combination of technologies. The following is a brief description of court reporting methods.

<u>Stenography</u> - The stenograph machine, introduced in 1913, essentially mechanized shorthand, or manual stenography. Using a stenograph machine, a stenographer presses a system of keys, which in turn creates a series of codes on a scrolling paper tape.

<u>Computer-Aided Transcription</u> - The emergence of small computers in the late 1970s and 1980s added new capabilities to stenography. Computer-aided transcription, or CAT, became possible when small computers were added to stenograph machines, allowing the keystrokes to be recorded on a disk or in the internal memory of the computer, as well as on the paper tape. This digitized file may then be translated into unedited text by the computer.

Real-Time Court Reporting - As computers became faster and more powerful, CAT systems became capable of translating digitized text contemporaneously, producing an unedited written document even as the proceeding occurs. The unedited text can be viewed immediately, and later corrected by the stenographer. The speed and

quality of this type of system, is familiar to anyone who has followed the closed caption text of a live television program.

Analog Audio/Video Recording - The development of audio recording technology in the 20th century made it possible to directly capture and preserve the actual sounds of spoken words. By the 1960s, some courts were using tape recorders. The best technology at the time was magnetic/analog cassette recording. Cassette tape recorders are still used in Florida's trial courts today, most commonly in proceedings in which it is unlikely that a transcript will be requested. For analog cassette recording, the courtroom must be equipped with a cassette recorder and suitable microphones. Another more recent method for capturing the proceeding is analog video recording (i.e., VHS). For analog video recording, the courtroom may be equipped with microphones, cameras, and be wired for video recording either within the courtroom or from another location. Both forms of analog recording do not require the presence of a trained court reporter. While someone must operate the machine, including reloading, marking, and storing the tapes; the skills required are far less than those expected for a stenographer or digital court reporter. Analog recorders are often operated by personnel who have other duties in the courtroom, such as clerk staff, a bailiff, or even a judge or magistrate.

<u>Voice Writing</u> - Voice writing involves a court reporter speaking directly into a voice silencer, which is a hand-held mask containing a microphone. The court reporter repeats the words spoken in a proceeding into the mask which prevents the reporter from being heard. Voice writers record everything verbalized by judges, witnesses, attorneys, and other parties in a proceeding and may also record gestures and emotional reactions.

<u>Digital Audio/Video Recording</u> - The current state of the art technology for audio recording employs digital recording instead of analog tape. Digital court recording is the audio, and often video, recording of a court proceeding using digital technology that may be saved to a CD, DVD, network drive, or server. With most digital court recording technology, microphones are strategically placed in areas of a courtroom where judges, attorneys, parties, witnesses, and juries are located. Video cameras may also be placed in order to visually capture proceedings.

There are three basic types of digital audio/video recording technology. The first type is a portable device such as a lap-top or hand-held device (MP3 player). These devices allow for recording in one location at a time and are typically operated by a digital court reporter, judge, or magistrate. The next type is a stand-alone system or workstation that is permanently located directly in a courtroom or hearing room. These systems are typically operated by a digital court reporter. The third type is a remote system in which the audio/video is recorded to a server and monitored by a digital court reporter from another room (control room) located on or off-site.

Digital court reporters perform several critical tasks when monitoring proceedings. They "tag" the case number, participant names, and key events of the proceeding. These "tags" are digitally saved with the recording and act as an index for playback and for creating the transcript. The digital court reporter also provides playback during a proceeding when directed to do so by the judge.

Every circuit in Florida currently uses both stenographic and digital court reporting service delivery models. Two circuits also use analog (cassette) recording. In FY

2009-10, 130,063 proceeding hours were recorded by stenography, 21,902 proceedings hours were recorded by real-time court reporting, 419,076 proceeding hours were recorded by digital court reporting, and 3,226 proceeding hours were recorded using analog recording in Florida's trial courts at state expense.

Staffing Models. Three types of staffing models exist for court reporting services: employee, contract, or hybrid.

<u>Contract Model</u> – Under this model, court reporters, whether employed by a firm or working individually, provide services on a fee basis. Hiring, firing, supervision, terms and conditions of employment and compensation are determined by contract and/or circuit administrative order. Contracts may be used for all court reporting service delivery models. The majority of circuits in Florida currently use contractual funding to cover a significant portion of court reporting services.

<u>Employee Model</u> – Under an entirely employee-operated system, all services are provided by court personnel. Such a model may be used for all service delivery models. Currently, no circuits in Florida use a pure employee model to provide court reporting services.

<u>Hybrid Model</u> – All judicial circuits combine features of the contract model and the employee model to provide services. For instance, a circuit may use employees for digital court reporting in some divisions of the court and contract with stenographers to record proceedings in other divisions. Alternatively, a circuit may use contract digital court reporters and employee stenographers.

It should be noted that in some counties, clerk of court staff are performing court reporting functions. The functions performed by clerk staff range from monitoring proceedings recorded using cassette tapes to operating digital recording equipment and tagging recordings. One circuit contracts for these services from the clerk's office, whereas in other circuits, clerks provide services free of charge.

Statement of Need. Appropriately applied, additional funds for court reporting technology and staffing will benefit the court system and the people of Florida in several ways.

<u>Promoting Efficiency</u> – Court reporting technology promotes efficiency by enabling court reporters to digitally access recordings from a court network and/or media disc for quick and easy review. This significantly reduces the time and cost of retrieving a copy of a court recording.

For stenography, CAT and real-time technology allows for stenographic codes to be translated into digitized text. This greatly improves efficiencies in creating transcripts which are necessary for purposes of appeal. Although, there are only a small percentage of cases appealed each year. For FY 2008-09, approximately 0.6% of trial court cases were appealed. Given this small percentage, those requesting a transcript for reasons other than appeal may receive a digital audio copy of a proceeding instead. Doing so, requestors will not have to wait for a written document to be prepared before it is provided. Thus, access of digital audio court recordings reduces the need for written transcripts to be produced and improves the timeliness in which recordings may be accessed. Further, given the inexpensiveness of digital media,

costs are further reduced for the consumer (who is charged per page for a transcript) as well as the State of Florida in producing transcripts.

In addition to lowering costs for transcript production, digital audio/video court reporting technology reduces staffing costs related to monitoring. Digital audio/video technology allows multiple courtrooms and courthouses to be monitored by digital court reporters from a central control room. In a central location, one digital court reporter is capable of monitoring up to four courtrooms simultaneously via a local or wide area network (using microphones and video cameras mounted in each courtroom). Digital court reporters are also less expensive and are becoming more widely available than stenographers. A digital court reporter minimum salary/benefits is approximately \$13,652 less annually than a lower level stenographer (Court Reporter I) and \$18,834 less than a higher level stenographer (Court Reporter II).

<u>Improving Accessibility</u> – Court reporting technology improves accessibility by increasing timeliness and providing ease in reviewing the events of a proceeding.

Transcripts produced from digitally stored stenographic notes are more readily available than those produced from traditional stenography. Digital audio/video recordings are saved and are almost immediately available for judicial officers and court staff. For attorneys, parties, the media and the public, copies of these recordings are available after they have been reviewed and redacted by trained personnel to remove confidential information (e.g., social security numbers). Overall, the availability of digital copies reduces the lengthy wait time for receiving information about what transpired in a court proceeding. Digital audio/video recordings of a proceeding are also searchable using "tags" created by a digital court reporter while monitoring a proceeding. These tags often include the case number, participant names, and key events of the proceeding. A tag index is automatically copied with the recording to give the user search capability.

Ensuring Quality – Court reporting digital technology ensures quality by allowing court proceedings to be securely recorded and stored. Currently, all circuits have incorporated digital technology as part of their service delivery model. However, two circuits are still using analog (cassette) recording to capture court proceedings. The Commission on Trial Court Performance and Accountability recommended both in 2005 and 2007 that analog (cassette) technology be replaced with digital recording technology. Digital audio quality is superior to analog in the same way music on a CD is clearer and crisper than a cassette tape. With analog tape, audio quality frequently suffers when there is excessive background noise or a witness or defendant does not speak clearly and loudly. Second, analog tapes, often reused a number of times, deteriorate in quality to a point where they may become practically inaudible. Third, digital systems use higher quality microphones and employ sound-enhancing techniques such as speaker-isolation, which allow the court reporter to screen out superfluous sounds, and utilize clean-up processes to filter out background noise. Fourth, digital recordings may be inexpensively stored to a server where the quality of the recording does not deteriorate, while analog tapes consume considerable storage space and are easily damaged. Perhaps most importantly, analog recording does not allow for tagging and thus does not provide the same benefits for playback and transcription.

Since Revision 7, the twenty judicial circuits have been working to accomplish four major goals as set forth by the TCP&A and as approved by the Florida Supreme Court. These goals are:

- o Implement strategies designed to effectively and efficiently operate court reporting services.
- Operate as a full-service court by providing services using only state court system resources for all proceedings required to be recorded at public expense.
- Operate with digital technology that has the necessary components to accurately capture, maintain, and preserve the electronic record (per the *Standards for Integrated Digital Court Recording Technology* as updated by the TCBC's Court Reporting Technology Workgroup in October 2008 provided in Appendix A).
- o Operate within a reasonable and comparable cost.

In FY 2005-06, the Legislature appropriated 25 new court reporting FTE (out of the 50 FTE requested) in order to support the integration of digital technology. Further, because of significant need, the Legislature approved the release of 11 FTE from the due process contingency fund. This was done not only to standardize and equalize the level of services provided across Florida, but in an effort to institute a cost-effective method for delivering these services.

In FY 2006-07, the Legislature appropriated 10 new court reporting FTE (out of the 22 FTE requested). New OCO funds were also appropriated to purchase and implement new digital technology in the amount of \$714,903.

In FY 2007-08, the Legislature did not fund additional FTE (33 FTE were requested). However, the Legislature fully funded the request for \$1,669,274 in new contractual funding. These funds were appropriated for direct service needs as well as equipment maintenance needs.

For FY 2008-09, the Legislature did not fund the trial court's request for 49 FTE, \$346,399 for direct services contractual funding, \$2,299,219 in non-recurring OCO funding for equipment purchases, \$240,290 in recurring funding for software purchases, and \$570,269 in recurring funding for equipment maintenance. In fact, during FY 2007-08 and FY 2008-09, due to budget reductions, a statewide total of 15.5 FTE and over \$1 million in contractual services and expense funding were eliminated.

In FY 2009-10, the Legislature did not fund the trial court's request for 33 FTE, \$364,780 for direct services contractual funding, \$2,949,607 in non-recurring OCO funding for equipment purchases, \$74,842 in non-recurring contracted services, \$150,000 in recurring (two years) contracted services, and \$332,426 in contractual funding for equipment maintenance.

In FY 2010-11, the Legislature did not fund the trial court's request for 64.5 FTE; \$6,909,583 in direct services contractual funding; \$4,312,305 in non-recurring OCO; \$743,436 in non-recurring expense; and \$218,280 in recurring maintenance contractual funding.

For FY 2011-12, there is a need for additional funding for staffing resources and court reporting equipment to ensure the equitable, effective and efficient delivery of court reporting services across Florida's trial court system. Although, in consideration of Florida's current economic situation, the State Court System determined not to file a LBR for staffing resources a LBR is being submitted for equipment as much of the digital equipment installed over the last several years is in need of replacement. Furthermore, it is the intent of the judicial branch to contain the costs associated with court reporting services not only at the present time, but also in the long-term.

For FY 2011-12, the trial courts have a statewide need of:

Court Reporting Expansion

\$862,803 OCO

\$407,119 Expense Non-Recurring

Recurring contractual maintenance funding of \$115,225 is also needed for FY 2012-13 associated with the purchase of expansion technology.

Court Reporting Maintenance/Refresh of Existing Equipment

\$241,622 Maintenance Recurring FY 11-12

\$3,172,874 OCO (Refresh)

\$406,556 Expense Non-Recurring (Refresh)

Business Objectives

The major business objectives for integrating court reporting technology in Florida's trial courts are provided below along with associated effectiveness measures.

| Objectives | Effectiveness Measures |
|---|---|
| Contain the overall cost of providing | -Funding Ceiling (standard cost per |
| court reporting services (i.e., staffing, | proceeding, transcript page, and media copy). |
| contractual, and transcript production | -Number of transcripts/pages requested verses |
| costs) | total proceedings recorded |
| | -Number of media requested verses total |
| | proceedings recorded |
| Improve the efficiency with which | -Number of proceedings/hours recorded by |
| court proceedings are recorded | stenographers |
| | -Number of proceedings/hours recorded by |
| | digital court reporters |
| | -Ratio of court reporting staff to applicable |
| | proceedings* |
| Improve the timeliness of providing | -Time from court proceeding to copy of record |
| access to the record of court | available to stakeholders* |
| proceedings | -Time from copy of record requested to record |
| | provided to stakeholders* |
| Improve the quality of audio | -Number of proceedings/hours covered with |
| recordings of court proceedings | digital technology verses analog tape recording |

^{*} Currently, the State Courts System does not have necessary data to evaluate these measures.

B. Baseline Analysis

1. Current Business Process Requirements

The integration of digital court reporting technology in the trial courts will have a variable impact on business processes depending on the service delivery and staffing models currently in use by a circuit. Provided below is a general description of the *current* court reporting process requirements from a statewide perspective. It should be noted, the integration of digital technology in the trial court system began as early as ten years ago.

- a. <u>Inputs</u> The major input of court reporting services are the proceedings that are required to be recorded. The resources expended are: court employees, contracted service providers, court reporting equipment, wiring and other accessories required to operate the equipment, and space within facilities in which to operate the equipment. The source of funding for all of these resources is the State Courts System via the State of Florida with the exception of certain county obligated items such as wiring and other facility related resources. Court proceedings are recorded using stenographic machines operated by stenographers; tape recorders operated by various types of personnel; or digital technology operated by digital court reporters. Stakeholders of court proceedings that are recorded include judges, magistrates, court personnel, attorneys, and the parties of a case. With the accessibility of digital records via court networks there is a need for certain security measures to protect data integrity, right of access, and individual confidentiality when appropriate.
- b. Processing When a recording of a proceeding is taken, it may never again need to be accessed unless a copy of the recording or a transcript is requested. However, all recordings must be stored. When stenographers record the events of a proceeding, the party responsible for storing the notes (whether the notes are on paper tape or other format) depends on whether the stenographer is a contracted service provider or an employee of the court. If the stenographer is an employee of the court, the notes are stored by the court. If the stenographer is contracted, the stenographer or firm employing the stenographer may maintain the notes. If a proceeding is recorded with a tape recorder or with digital technology, the recording is usually maintained by the court. It should be noted that regardless of who maintains the notes or recordings, the chief judge, in his or her official capacity, is the owner of all court reporting records produced at public expense pursuant to rule 2.535(d), Florida Rules of Judicial Administration.

When a proceeding has been recorded by a stenographer, an official hard-copy transcript is produced and edited before it may be provided to the requesting party. When a proceeding is audio/video recorded, a copy of the recording is provided through a cassette, CD, or DVD after review, as an alternative to the transcript. For FY 2009-10, approximately 1,050,897 transcript pages and 18,237 media copies were produced statewide.

It is critical that all proceedings that must be recorded by law are covered in the most efficient manner possible. Thus, those proceedings with a high probability of a hard-copy transcript being requested (e.g., Capital Murder cases) are better suited to stenographic court reporting. However, most other case types do not have a high probability of needing a hard-copy transcript and are thus better suited to digital court reporting (which costs less operationally). As previously mentioned, the use of digital audio/video technology is preferable to analog tape recording. Further, the time between the court proceeding and a copy of record becoming available to stakeholders and the time between a copy of the record

being requested and the record actually being provided to stakeholders is greatly reduced for digitally recorded proceedings. Overall, court reporting services are considered to be successfully provided if all proceedings that are legally required to be recorded are covered; if access to the record is provided in the most timely manner possible; if the record is of the highest quality possible, and if all court reporting services are provided in the most efficient manner possible.

Over the last several years, court reporting services in Florida's trial courts have evolved in light of the technological advancements in the court reporting industry. Most circuits have now incorporated CAT and/or real-time stenography as a part of stenography service delivery model. As early as ten years ago, circuits began integrating digital audio/video technology as part of a blended service delivery model. Today, all twenty judicial circuits have incorporated digital audio/video equipment into their process. Usually, digital audio/video court reporting is implemented in one division of court in order to allow time for educating and training stakeholders such as judges, court personnel, state attorneys and public defenders and for testing the process. Once the process is perfected in one division of court, the use of digital audio/video technology is expanded to other divisions. Today, all twenty judicial circuits have implemented digital court reporting technology to varying degrees.

Outputs- The outputs for court reporting services are: 1) the coverage provided to record proceedings and 2) the record of the proceeding whether in the form of a hard-copy transcript or audio/video recording stored on a server, network drive, cassette, CD, or DVD. Stakeholders of the court reporting process are judges, magistrates, court personnel, attorneys, the parties of a case, and the public at large. Judges or magistrates presiding over a case may need to review the record of a proceeding when deliberating a ruling. Court personnel need access in order to manage and maintain court records. State attorneys, public defenders, private attorneys and the parties to a case need access to the record in order to review the proceeding for purposes of appeal.

- c. <u>Business Process Interfaces</u>- Another business process that interfaces with the court reporting process is the docketing or scheduling of proceedings. To ensure necessary coverage for the proceedings that are required to be recorded, court reporting managers coordinate with clerk of court staff, judicial assistants, and case managers who are responsible for scheduling hearings.
- d. <u>Business Process Participants</u>- Florida has 322 county court judges, 599 circuit court judges, 61 district court of appeal judges, and 7 Supreme Court justices who regularly use transcripts from in-court proceedings. In addition, there are potentially tens of thousands of other users such as court personnel, attorneys, parties to a case, the media, and others who regularly use transcripts or recordings of in-court proceedings. In Fiscal Year 2009-10 there were 26,473 total cases filed in the district courts of appeal. Most of these cases required a transcript in order to file the appeal. The balance of cases filed with the Supreme Court come with a transcript from the lower tribunal.

The roles and responsibilities of court reporting stakeholders vary. Trial court judges examine the record to review witness testimony and appeals from county to circuit court. Intermediate appellate judges review the record from lower tribunals. Supreme Court justices review the record in many types of appellate

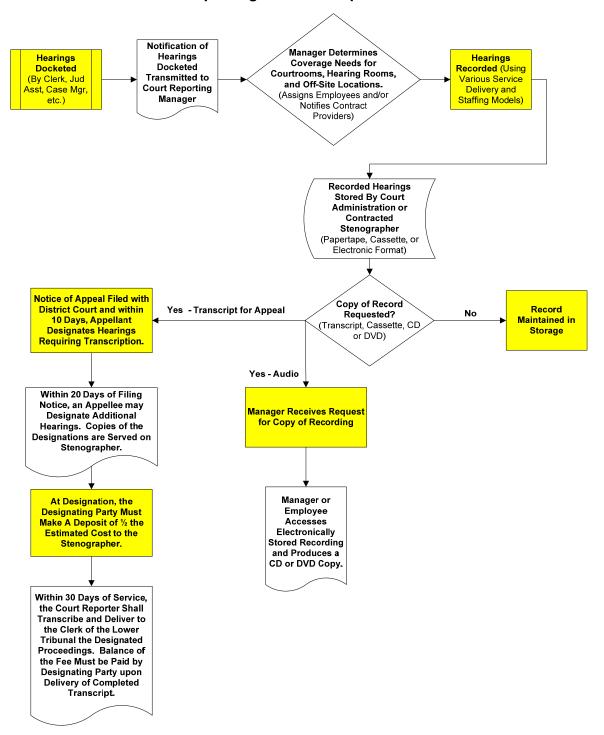

cases including death penalty cases. Appellate lawyers use the record to review witness testimony, judicial decisions from lower courts, and to prepare appellate briefs. The media and public use the record to review witness testimony and judicial decisions made by trial court judges, particularly in high-profile cases.

Court reporting managers, regardless of the model employed, monitor in-court time spent by reporters versus demands for copies of the record. They are obligated to ensure coverage and the timely production of transcripts or copies of recordings. Managers must ensure that when court reporters are not in-court, they are producing transcripts or copies of recordings.

Stakeholder participants can initiate change to the system by conferring with the court reporting manager, trial court administrator, or chief judge. However, the need for coverage of all in-court proceedings required to be recorded at public expense cannot be compromised. Change may occur with respect to the type of service delivery or staffing model employed, the individual(s) assigned, the transcription method, and determinations of when court reporters should be monitoring proceedings versus producing transcripts or copies of recordings.

e. Process Mapping-

Circuit Level Court Reporting Process Map

2. Assumptions and Constraints

Digital court reporting technology is now institutionalized after garnering an increasing level of judicial branch support over the last decade. This includes the state level support of Supreme Court appointed commissions such as the Commission on Trial Court Performance and Accountability, the Trial Court Budget Commission, and the Florida Courts Technology Commission.

While the trial courts maintain a certain level of flexibility locally in utilizing various types of court reporting service delivery and staffing models, it appears that digital audio/video technology, in particular, is now at the forefront of the court reporting industry. Several major governmental entities throughout the United States use this technology including the majority of other state court systems and even the Federal District Courts in Washington D.C. The Florida Senate and House of Representatives have also used this technology for several years. Furthermore, there are a diminishing number of stenographers and stenographic firms willing to contract with Florida courts. This has coincided with the evolution of more technologically advanced and less expensive court reporting methods. While stenography will continue to play an important role in Florida's trial courts, that role is also likely to become limited to those cases with a high probability of a written transcript being requested.

With the onset of digital recording technology, Supreme Court appointed commissions along with the Office of the State Courts Administrator are working with the trial courts and other stakeholders to provide assistance in utilizing digital technology. The Florida Courts Technology Commission created Technical and Functional Standards for Digital Court Recording which was recently updated in October 2008 (see Appendix A) and the Commission on Trial Court Performance and Accountability developed a Statewide Plan for the Effective Use and Management of Court Reporting Services in February 2005. As circuits began to purchase and install new digital systems, each judicial circuit was asked by the Trial Court Budget Commission to complete and maintain a *Due Process Technology Inventory*. This inventory captures data elements such as equipment type, equipment location, purchase date and total cost so as to obtain information on court reporting technology components used in each courtroom and hearing room across the state. The information collected is then reviewed by the Trial Court Budget Commission to assist in making decisions regarding court reporting equipment funding allocations. Additionally, outputs from these inventories are tabulated by the Office of the State Courts Administrator under the direction of the Commission on Trial Court Performance and Accountability to the develop resource tools such as the *Court* Reporting Services Circuit Profiles, February 2008 (see Appendix E). Due to the varying local court reporting service delivery and staffing models, these profiles provide court managers and decision-makers with up-to-date information on court reporting services across the state. As a result, interested parties are able to have convenient access to circuits' fiscal allotments, staffing models, service delivery models, digital logistics, measurable workload outputs, contractual rates as well as information on digital central/remote monitoring networks.

In October 2007, the Commission on Trial Court Performance and Accountability submitted the final report, *Recommendations for the Provision of Court Reporting Services in Florida's Trial Courts* to the Supreme Court. The report includes proposed changes to court rules and statutes as well as new operational best practices

and standards. On July 16, 2009, the Supreme Court issued an opinion (SC08-1658) approving amendments to the Rules of Judicial Administration and the Rules of Appellate Procedure in response to the recommendations of the Commission on Trial Court Performance and Accountability.

The opinion may be found at:

http://www.floridasupremecourt.org/decisions/2009/sc08-1658.pdf.

Rule changes included the following:

- Added or modified definitions for approved court reporter, approved transcriptionist, civil court reporter, court reporting, electronic record, and official record;
- Provided clarification on the "ownership of records;"
- Provided clarification as to who qualifies as "officers of the court;"
- Provided clarification of court reporting services delivered at public expense;
- Added a new section on safeguarding confidential communications when electronic recording equipment is used in the courtroom; and
- Clarified the definition of the "official record."

It is also important to note that the Supreme Court recognized that digital recordings of court proceedings are now widely used throughout the state by those involved in the court system and have proven to be useful, reliable, and cost effective. They noted that access to these recordings should not be denied.

With the release of the Supreme Court's opinion (SC08-1658), the TCP&A issued a supplemental report recommending modifications to some of the standards of operation and best practices originally submitted in October 2007. This was completed in an effort to ensure consistency with the new rules and to also take into consideration input received from the Trial Court Budget Commission over the last few years. On January 7, 2010, the Supreme Court issued AOSC10-1 which adopted the standards of operation and best practices proposed by the TCP&A in both the October 2007 report and as revised in the November 2009 report. The administrative order may be found at:

(http://www.floridasupremecourt.org/clerk/adminorders/2010/AOSC10-1.pdf).

In December 2008, the Trial Court Budget Commission approved several technical and budgetary policy recommendations on court reporting technology (see Appendix B). These policy recommendations were developed by the Trial Court Budget Commission's court reporting technology workgroup to assist the trial courts in the establishment of a long-term plan for continued court reporting equipment expansion. Recommendations included: establishing a reasonable standard cost per courtroom/hearing room; the most cost effective use of court reporting technology; the most cost effective and operationally sound method for maintaining court reporting systems; approving an expanded list of qualified vendors; establishment of criteria and a procedural process for changing vendors; establishing a process for hardware and software transfers; replacement of analog tape recorders; contingency planning and funding; and a life-cycle management plan for court reporting technology which includes time standards aimed at defining refresh parameters.

C. Proposed Business Process Requirements

1. Proposed Business Process

As previously detailed in the Statement of Need (see page 10), the integration of digital court reporting technology in the trial courts must promote efficiency, improve accessibility, and ensure the quality of court reporting services.

2. Business Solution Alternatives

There are two major options available to the State Courts System for court reporting services in the trial courts: (1) halt both continued enhancement and refresh of the existing court reporting system or (2) continue enhancement and refresh of the existing system in line with local circuit court reporting plans. These options are discussed below.

Option One – Currently, all twenty judicial circuits utilize digital court reporting technology. They have already invested a great deal of time and effort to accomplish the previously mentioned four major goals as set forth by the Commission on Trial Court Performance and Accountability. They have also invested a significant amount of funding towards these goals. However, variations still exist across the circuits in regard to the extent that digital technology is used.

If the existing system is not properly maintained or if future enhancements are not implemented, this will equate to a system that is only partially capable of realizing the benefits discussed previously. Also, system failures of existing installed digital components could impair the trial courts in their ability to provide court reporting services. In such cases, the trial courts may be forced to delay court proceedings and/or hire additional stenographic court reporters to provide court reporting coverage. Aside from allowing the inherent inequities in the level of service provided across circuits to continue, halting the integration and maintenance/refresh of this technology could cause court reporting costs to escalate at a much greater rate for the State of Florida than if digital technology was integrated and maintained at its optimal functionality.

Option Two – Continuing with the enhancement and refresh of the existing system builds upon the vast amount of time and funding already invested by the trial courts. When this technology is fully implemented and maintained as set forth by the Florida Courts Technology Commission, Commission on Trial Court Performance and Accountability, the Trial Court Budget Commission, and the Supreme Court, the trial court system as a whole will be better able to contain court reporting costs (staffing, contractual, and transcript production); the efficiency of the court reporting process will be improved; the record of the court proceeding will be more accessible and provided in a more timely manner; and the quality of recordings will be greatly improved.

3. Rationale for Selection

The criteria used to compare the options are the same as the effectiveness measures for the project (see page 10). Consideration was given to the option that best promotes efficiency, improves accessibility, and ensures quality for court reporting services in the trial courts. These criteria are in line with policy decisions of the

Florida Courts Technology Commission, Commission on Trial Court Performance and Accountability and the Trial Court Budget Commission.

4. Recommended Business Solution

Continuing enhancement and refresh of digital court reporting technology was selected as the recommended option. As already discussed, a significant amount of time and funding has already been invested in this business solution by the trial courts. When this technology is fully implemented per each circuit's court reporting plan, the trial court system as a whole will be better able to contain court reporting costs (staffing, contractual, and transcript production); the efficiency of the court reporting process will be improved; the record of the court proceeding will be more accessible and provided in a more timely manner; and the quality of audio recordings will be greatly improved.

III. Schedule IV-B Cost Benefit Analysis

A. Description of Cost-Benefit Analysis Forms

| Cost Benefit Analysis | | |
|--|---|--|
| Form | Description of Data Captured | |
| Benefits Realization Table - Microsoft Word Template in Appendix C | A detailed description of all benefits identified for the project, including both tangible and intangible benefits. Each benefit identifies the recipient of the benefit, how and when it is realized, how the realization will be measured, and estimates of tangible benefit amounts. | |
| CBA Form 1 - Net Tangible Benefits | Agency Program Cost Elements: Existing program operational costs versus the expected program operational costs resulting from this project. The agency needs to identify the expected changes in operational costs for the program (s) that will be impacted by the proposed project. Tangible Benefits: Estimates for tangible benefits resulting from implementation of the proposed IT project, which correspond to the benefits identified in the <i>Benefits Realization Table</i> . These estimates appear in the year the benefits will be realized. | |
| CBA Form 2 - Project Cost Analysis | Project Cost Elements: Estimated project costs for personnel, hardware software, consultants and other contracted services through project design, development, and implementation. Project Funding Sources: Identifies the planned sources of project funds, e.g., General Revenue, Trust Fund, Grants. | |
| CBA Form 3 - Project Investment Summary | Investment Summary Calculations: Summarizes total project costs and net tangible benefits and automatically calculates: Return on Investment Payback Period Breakeven Fiscal Year Net Present Value Internal Rate of Return | |

B. Completed CBA Forms

1. Benefits Realization Table

| | Benefit Description | Tangible or Intangible | Who receives benefit? | How is benefit realized? | How will the realization of the benefit be assessed/measured? ¹ | Realization Date ² |
|---|--|------------------------------|---|---|--|----------------------------------|
| | | | Cos | t Containment | | |
| 1 | Expands coverage of proceedings | Tangible | public at large, taxpayers, trial courts | Multiple courtrooms, courthouses, and counties may be monitored from a central control room. | Examining the # of proceedings/hours recorded digitally by case type. | Varies by Circuit |
| 2 | Reduces staffing and contractual costs | Tangible | public at large, taxpayers, trial courts | Digital court reporters are capable of monitoring multiple proceedings simultaneously and are less expensive than stenographers. | Examining funding ceiling, staffing and contractual costs, and the ratio of staff to applicable proceedings. | Varies by Circuit |
| 3 | Reduces the need for transcription | Tangible | public at large, taxpayers, trial courts | Increased availability of digital recordings reduces need for written transcripts. | Examining # of transcripts/pages and electronic media requested. Examining staffing costs for transcript production. | Varies by Circuit |
| 4 | Reduces cost of record storage | Tangible | public at large, taxpayers, trial courts | Digital recordings are stored electronically verses hard-copy documents stored in a physical file. | Examining cost and amount of space for storage of records. | Varies by Circuit |
| | | | Improves Ac | cessibility to the Record | d | |
| 5 | Increases timeliness in providing copies of the record | Intangible | public at large, parties to a case, attorneys, media, court staff, judges | Copies of digital audio/video recordings are available in a more timely manner versus waiting for a written transcript to be produced. | Examining time from court proceeding to copy of record available and time from copy requested until provided. | Varies by Circuit |
| 6 | Improves accessibility to copies of the record | Intangible | public at large, parties to a case, attorneys, media, court staff, judges | Digital recordings may be saved electronically on a secure network that is easily searchable and allows files to be easily copied to CD or DVD. | Examining the # of proceedings/hours recorded digitally verses other methods. | Varies by Circuit |

| 7 | Gives the user automated search capability | Intangible | public at large, parties to a case, attorneys, media, court staff, judges | Copies of digital audio/video recordings are searchable using "tags" created by the digital court reporter. | Examining the # of proceedings/hours recorded digitally verses other methods. | Varies by Circuit |
|---|--|------------|---|--|---|----------------------|
| | | | Ensures the | Quality of the Record | | |
| 8 | Provides superior recording and sound quality | Intangible | public at large, parties to a case, attorneys, media, court staff, judges | Digital audio/video technology records more clearly than analog through sound enhancement, speaker isolation, and noise screening capabilities. | Examining the # of proceedings/hours recorded digitally verses other methods. | Varies by Circuit |
| 9 | Greatly reduces deterioration of the record in storage | Intangible | public at large, parties to a case, attorneys, media, court staff, judges | Digital recordings are electronically stored verses cassette tapes or hard-copy documents. | Examining the # of proceedings/hours recorded digitally verses other methods. | Varies by Circuit |

¹Currently, the State Courts System does not have necessary data to evaluate all of these measures.

 - a) CBA Table 1-A Net Tangible Benefits Operational Cost Changes
 - b) CBA Table 1-B Character of Program Benefit Estimate
- 3. CBA Form 2 Project Cost Analysis
 - a) CBA Table 2-A Project Cost Table
 - b) CBA Form 2-B Character of Project Costs Estimate
- C. Cost-Benefit Analysis Results
 - 1. CBA Form 3 Project Investment Summary (auto generated)
 - a) CBA Form 3-A Cost Benefit Analysis
 - b) CBA Form 3-B Return on Investment Analysis
 - c) CBA Form 3-C Treasurer's Investment Interest Earning Yield

As depicted in Appendix C, a cost-benefit analysis (CBA) was performed on the trial court's FY 2011-12 total funding request of \$5,090,974 for court reporting technology.

²Many of the benefits of digital technology are already being realized as this technology has been implemented to some degree in every judicial circuit. The realization date will vary by circuit depending on when new digital equipment is installed.

Results from this analysis indicate the net present value (see CBA Form 3) of \$27,434,695. The payback period is estimated to be less than 1 year with a cumulative return on investment over the next five years of \$32,686,555.

These tangible cost benefits are attributed to avoiding costs associated with higher staffing levels necessary to provide court reporting services should the \$5,090,974 in court reporting technology <u>not</u> be funded. Although, the State Courts System did not file a FY 2011-12 legislative budget request (LBR) for staffing resources (in consideration of the continued fiscal crisis resulting from the economic downturn), the cost benefit analysis contemplated *previous* year's unfunded staffing needs as filed in the FY 2010-11 LBR. For the FY 2010-11 LBR, 64.5 FTE were requested statewide (20.0 FTE stenographers; 31.5 FTE digital court reporters; and 13.0 FTE managerial/administrative support positions).

It is estimated that *with* the purchase of \$5,090,974 in court reporting technology during FY 2011-12 (\$1,269,922 for the expanded use of digital technology and \$3,821,052 to maintain/refresh existing digital technology), the State Courts System will avoid certain staffing costs related to hiring 63.0 FTE stenographers and reclassifying an existing 246.0 FTE digital court reporters to stenographers.

Cost avoidance estimates are based on the following:

- A ratio of two stenographer positions for every one digital court reporter requested in FY 2010-11 would be needed if the \$1,269,922 expansion technology request is <u>not</u> funded. Therefore, funding of the expansion request would equate to a cost avoidance of \$2,768,314 associated with the hiring of 63.0 FTE stenographers (as 31.5 FTE digital court reporters were requested in FY 2010-11). This ratio is a conservative estimate as digital court reporters may monitor up to four courtrooms/hearing rooms simultaneously while a stenographer is only able to cover one courtroom/hearing room at a time.
- A ratio of one stenographer position would be needed for every one courtroom/hearing room impacted should the \$3,821,052 *refresh* technology request <u>not</u> be funded. There are an estimated total of 369 rooms in need of *refresh* technology. Without this *refresh* funding, existing digital technology in these rooms could fail resulting in the need for stenographers to cover these rooms. Using a conservative estimate, 2/3 of these rooms (or 246 rooms) would be in use at any one time. Based on a ratio of one stenographer needed for each room, 246.0 FTE existing digital court reporter positions would need to be reclassified to stenographers in order to cover these rooms. This equates to a cost avoidance of \$4,395,282 in recurring salaries/benefits/expenses.

{Note: The cost of the positions in this analysis is based on estimated recurring salaries, benefits, and expenses of \$52,149 per digital court reporter position versus \$67,166 per court reporter I position and \$72,866 per court reporter II position. Also, a 3% cost of living adjustment was added consecutively each fiscal year.}

In conclusion, the State Courts System believes the expansion of digital technology will contain future court reporting costs for the State of Florida. Further, refresh of digital technology will continue to protect the investment previously made by the State of Florida. As depicted in the cost benefit analysis, the purchase of court reporting technology enables the trial courts to avoid certain staffing costs. Digital court reporters,

as opposed to stenographers, are able to monitor multiple proceedings simultaneously, increasing the ability to cover proceedings. Thus, as the number of proceedings increase, the State Courts System will be in a better position to absorb the additional workload.

In addition to these tangible benefits, there are also several intangible benefits associated with all court reporting digital technology (CAT, real-time stenography, and digital audio/video) that improve the provision of court reporting services. These are provided in the benefits realization table (see page 20).

IV. Schedule IV-B Risk Assessment

A. Risk Assessment Tool

See attached spreadsheets in Appendix D.

B. Risk Assessment Summary

See attached spreadsheets in Appendix D.

V. Schedule IV-B Technology Planning

A. Current Information Technology Environment

1. Current System

a. Description of Current System

As mentioned previously, court reporting technology includes both stenographic and digital audio/video court recording services.

With stenography, there are two major types of technology deployments used in the twenty judicial circuits. The first type involves CAT (Computer-Aided Transcription). This service delivery model type requires a digital computer device such as a desktop, lap-top, or digital stenography machine to enable the stenographer to record and store notes directly to a network drive or digital media disc. The digitized file may then be translated to readable text for transcription purposes. The second type of stenographic technology involves real-time transcription. This model requires two or more networked digital computer devices such as desktops and/or lap-tops to enable multiple participants of a court proceeding to view (live) an unedited version of the transcript as the stenographer records a court proceeding.

With digital audio/video recording services, there are three major dominant types of digital technology deployments in use in each of the twenty judicial circuits. The first type is a portable device such as a lap-top or hand-held device (MP3 player). Portable devices allow for recording in one location at a time and are typically operated by a digital court reporter, judge, or magistrate. The next type of digital audio/video recording technology is stationary to a particular location and operates as a stand-alone system or workstation. Generally, standalone recording systems are permanently located in a courtroom or hearing room and are typically operated by a digital court reporter. The third type is a more complex arrangement of network based technology components in which the audio/video is recorded to a collection of integrated servers and monitored by a digital court reporter from a central control room located on or off-site.

Portable and desktop based systems involve local monitoring from a direct connection in a courtroom (stand-alone system). Stand-alone systems may be portable, such as a lap-top or hand-held device (MP3 player), or they may be stationary such as a desk-top computer. A digital court reporter may be required in the courtroom to operate the system. The reporter tags the recording, logs speakers, makes notations of who is present, and notes certain non-verbal events. The reporter also oversees sound quality and provides playback when directed to do so by the judge. In settings such as hearing rooms, judges' chambers, or off-site locations, a digital court reporter may not be required as the judge or magistrate may operate the system on their own.

Integrated digital audio/video court recording solutions are comprised of network-enabled devices that may be centrally monitored from any network-enabled device that is located within a local or remote courthouse location. Typically, control rooms are found in larger courthouses. In a control room, one digital court reporter monitors several courtrooms at one time. The reporter, most often,

views the proceedings via video cameras mounted in each courtroom and the judge may give directions to the control room over a microphone or by telephone. This method may involve the remote monitoring several different courtrooms in several different courthouses from an off-site location.

b. Current System Resource Requirements

Digital court recording technology is comprised of many different configurations and types, including analog and digital components. The components can be grouped into four discrete categories to clearly delineate complex funding obligations. Listed below is a reference that can be used to budget technology specific to each circuit's needs.

- 1) Software. The software category provides coverage for all software that operates on both server and client workstation devices that is responsible for managing the capture, process and storage of the spoken word and video image of a court proceeding.
 - a. Digital Court Recording Software
 - b. Word Processing Software
 - c. Microsoft Windows Operating System
 - d. Anti-virus Protection
 - e. Archive Storage
 - f. Utility Tools
- 2) Digital Computer Hardware. The digital computer hardware category provides coverage of all digital component technologies necessary to operate and maintain the digital court recording software. Primary emphasis is placed on software driven devices including servers for encoding and archiving the record and monitoring workstations dedicated to operate digital court recording technology.
 - a. Encoding Servers
 - b. Archive Servers
 - c. Monitoring Workstations
 - d. Digital Audio Adapters
 - e. Tape Backup Units
- 3) Media Related Hardware and Embedded Devices. This category provides coverage of all equipment necessary to adapt the audible and visual analog proceeding with modern digital recording technology. This includes peripherals representing a wide range of technology equipment. Some equipment may include embedded digital technology.
 - a. Condensing Microphones and Bases
 - b. Audio and Video Mixers
 - c. High Resolution Video Cameras
 - d. Bench Control Pads
 - e. Splitters, Filters and other Line Level Equipment
 - f. Visual and Audible Monitoring Devices
 - g. Printers
 - h. Video Appliances

- i. Steno Machines
- j. Tape Recorders
- 4) Infrastructure. The infrastructure category contains elements necessary to interconnect and operate an integrated digital court recording system. Elements commonly found are data and telecommunications equipment, wiring for audio, video and data networks, and equipment racks.
 - a. Any Communications Equipment Supporting Monitoring of Court Proceedings
 - b. Uninterruptible Power Supply and Power Conditioning
 - c. Furniture and Equipment Racks
 - d. Cable for Capturing Audio and Monitoring of Court Proceeding

c. Current System Performance

As described by the *Technical and Functional Standards for Digital Court Recording* (See Appendix A), the application of court recording technology is required to provide a minimum level of functionality necessary to successfully operate and manage the capture of court proceedings.

2. Strategic Information Technology Direction

Digital court recording technology is perfectly aligned with the State Courts System's technology objectives. The Supreme Court's Commission on Trial Court Performance and Accountability and the Florida Court Technology Commission continue to identify and establish judicial and technological needs. During 2001, the Trial Court Technology Committee, a subcommittee of the Technology Commission, was charged with conducting a Trial Court Technology Needs Assessment to determine the needs of judges. This assessment addressed the functional, informational, technological (infrastructure, interoperability, integration), financial, and strategic goals of the trial courts.

Based on the outcomes of the Trial Court Technology Needs Assessment, a Judicial Information Strategic Plan was developed to document the initiatives, strategies, and milestones for achieving long-term goals and visions for the judicial branch. The core vision of the plan is to integrate data sources both within and outside the judicial and court information systems in Florida. Endorsed by the Florida Courts Technology Commission and sanctioned by Florida Supreme Court Administrative Order AOSC03-16, the Strategic Plan is now part of an annual review process that works to assess the court's posture in regards to the current information technology direction.

Additionally, as set forth by unanimous consensus within the Trial Court Technology Committee in May 2004, the Technical and Functional standards for Integrated Digital Court Recording solutions was established (and subsequently updated in 2008). Through automation, digital court recording will continue to enhance antiquated court processes and create a comprehensive electronic court record that is consistent with the State Courts System's strategic direction.

3. Information Technology Standards

The technical requirements that describe the use of integrated technology throughout the state courts system are recognized in a standards and guidelines format known as the *Integration and Interoperability Document*. To ensure a uniform baseline for adequate coverage of court proceedings throughout the judicial branch, each of these documents was developed by consensus and maintained by active participation in the trial courts and approved by the Florida Courts Technology Commission.

The Integration and Interoperability Document is a living document, last updated March 2008. A copy of the document can be located at the Florida Supreme Court Web Site using the following URL:

 $\underline{http://www.floridasupremecourt.org/clerk/adminorders/2003/forms/IntegrationDocument.pdf}$

B. Proposed Solution(s) Description

Over the past several years, circuit courts have used digital court reporting technology to contain increasing costs of court reporting. As directed in the recent amendment of Article V, Revision 7 of the Florida Constitution, the State Courts System has embarked on a review of major expenses of the state trial courts, including court reporting.

To help contain the costs of court reporting expenses, specifications for an integrated digital audio/video court recording system were adopted to meet the State Courts System's needs for operating and managing the capture of court proceedings. As a result, the Office of the State Courts Administrator has established technical and functional standards to demonstrate a minimum level of proficiency of the utilization of technology to remotely operate and monitor the capture of the audio/ video record of court proceedings.

Integrated digital audio/video court recording solutions are designed to introduce distributed recording technology to courtrooms among each of the twenty judicial circuits and integrate each of the digital audio/video court recording systems seamlessly into the State Courts System's wide area network. At a minimum, the business requirements for supporting the audio/video court recording solution include the ability to:

- 1. Produce a quality recording.
- 2. Automate processes of digital court recording.
- 3. Preserve the integrity of the record.
- 4. Provide attachment support.
- 5. Provide search and access for recordings.

In order to fulfill the requirements of the integrated digital audio/video court recording solutions; the necessary business objectives, description of participating courtrooms, and technical vision for the courts strategic plan is considered. This will ensure the best allocation of current resources and maximize court participation.

1. Summary Description of Proposed System(s)

The primary intent of court reporting technology solutions is to accurately capture

court proceedings using stenography or a distributed digital audio/video court recording system.

The integrated digital audio/video recording system is set up in a series of repositories encompassing many courtrooms that are accessible from the State Courts System's network. This configuration will provide for ease of administration and disaster recovery preparations which can be managed from a centralized or remote location.

There are two basic models for the operation of the audio/video recording systems. The courtroom model requires a digital court reporter in the courtroom to operate the system. The digital court reporter logs speakers, makes notations of who is present and notes certain non-verbal events, monitors sound quality, and provides playback when directed to do so by the judge.

The second model is a control-room model, in which the court reporting function is performed in a central control-room. In a control-room model, one digital court reporter monitors several courtrooms at one time. The digital court reporter views the courtrooms via video cameras mounted in each courtroom. The judge can give directions to the control room over a microphone or by telephone. The control-room model requires more equipment, specifically video cameras and monitors, and requires greater awareness by the judge and coordination between the judge and the digital court reporter.

2. Resource and Summary Level Funding Requirements for Proposed System (if known)

The projected budget is identified in the Statement of Need section on page 10.

As noted previously, a Court Reporting Technology Workgroup was established by the Trial Court Budget Commission to develop budgetary policies on the future expansion of court reporting technology. As approved by the Trial Court Budget Commission in December 2008, the workgroup developed five expansion cost models to assist the trial courts as they continue to expand court reporting technology. The details and cost breakdowns for each court reporting technology model are as follows:

Integrated Digital Audio/Video Courtroom Large/Ceremonial (maximum room capacity of 100 persons or more): \$26,055

| State Costs | | |
|--|---|----------|
| Software Licenses – Server & Client | 6-8 channels of recording | \$12,000 |
| Video Camera for central room monitoring/and video recording | 4 cameras IP based | \$4,800 |
| UPS for recording equipment – recording room | Battery backup and line conditioning | \$600 |
| Digital encoding | Video and audio encoders | \$3,400 |
| Prorated backend server storage and services | Dedicated primary and secondary server | \$3,655 |
| Ratio 1 server for 6 rooms ¹ | costs at 17% | \$3,033 |
| Monitoring Workstation | May be local or centralized | \$1,600 |
| Subtotal | | \$26,055 |
| County Costs | | |
| Microphones | 10 microphones: judge, witness, sidebar, podium/table 1, podium/table 2, jury, clerk, well area | \$6,800 |
| Audio Mixer | Modular style matrix mixer | \$7,000 |

| Wiring | Audio/network/power (13 drops at \$200 each) | \$2,600 |
|--|--|----------|
| Installation and Configuration of a/v equipment and software | Contract dollars | \$2,000 |
| Amplifier | | \$1,200 |
| Subtotal | | \$19,600 |
| Total Cost | | \$45,655 |

Prorated server costs are based on the total estimated cost of \$21,500 multiplied by .17 (approximate 1:6 ratio). Total estimated cost (\$21,500) is based on the following setup: Primary Server, Secondary Backup Server, Video Server, and Archiving Server.

Integrated Digital Audio/Video Courtroom Small to Midsize (maximum room capacity of less than 100 persons): \$19,955

| State Costs | | |
|--|--|----------|
| Software Licenses – Server & Client | 4 channels of recording | \$9,000 |
| Video Camera for central room monitoring/and video recording | 2 cameras IP based | \$2,400 |
| UPS for recording equipment – recording room | Battery backup and line conditioning | \$300 |
| Digital encoding | Video and audio encoders | \$3,000 |
| Prorated backend server storage and services Ratio 1 server for 6 rooms ¹ | Dedicated primary and secondary server costs at 17% | \$3,655 |
| Monitoring Workstation | May be local or centralized | \$1,600 |
| Subtotal | | \$19,955 |
| County Costs | | |
| Microphones | 8 microphones: judge, witness, sidebar, podium/table 1, podium/table 2, jury | \$3,800 |
| Audio Mixer | Modular style matrix mixer with bench control | \$7,000 |
| Wiring | Audio/network/power (10 drops at \$200 each) | \$2,000 |
| Installation and Configuration of a/v equipment and software | Contract dollars | \$1,500 |
| Amplifier | | \$1,200 |
| Subtotal | | \$15,500 |
| Total Cost | | \$35,455 |

¹ Prorated server costs are based on the total estimated cost of \$21,500 multiplied by .17 (approximate 1:6 ratio). Total estimated cost (\$21,500) is based on the following setup: Primary Server, Secondary Backup Server, Video Server, and Archiving Server.

Integrated Digital Audio/Video Hearing Room (room may be part of a centralized system directly recording to a server, or have a networked PC or laptop that automatically uploads the recordings to a central repository): **\$16,705**

| State Costs | | |
|--|---|----------|
| 2 channel recording software | | \$9,000 |
| 2 channel mixer | | \$1,000 |
| 2 microphones | | \$850 |
| 1 Video camera | | \$1,200 |
| Installation Costs | | \$1,000 |
| Prorated backend server storage and services Ratio 1 server for 6 rooms ¹ | Dedicated primary and secondary server costs at 17% | \$3,655 |
| Subtotal | | \$16,705 |
| County Costs | | |
| Wiring | A/V, Network drops | \$600 |
| Subtotal | | \$600 |
| Total | | \$17,305 |

Prorated server costs are based on the total estimated cost of \$21,500 multiplied by .17 (approximate 1:6 ratio). Total estimated cost (\$21,500) is based on the following setup: Primary Server, Secondary Backup Server, Video Server, and Archiving Server.

Standalone Digital Audio/Video Hearing Room (room records locally with a PC or laptop that may or may not be attached to the network for upload of data at a designated time interval): \$14,750

| State Costs | | · |
|------------------------------|-----------------------|----------|
| 2 channel recording software | | \$9,000 |
| Recording PC or laptop | | \$3,400 |
| 2 channel mixer | | \$1,000 |
| 2 microphones | | \$850 |
| Installation/setup | | \$500 |
| Subtotal | | \$14,750 |
| County Costs | | |
| Wiring | Optional network drop | \$200 |
| Subtotal | | \$200 |
| Total | | \$14,950 |

Stenography Equipment – Per Stenographer: \$13,400

| State Costs (100%) | |
|-------------------------------|----------|
| Steno machine | \$5,500 |
| Laptop Computer | \$2,200 |
| Steno Software | \$3,500 |
| Portable backup recorder | \$1,100 |
| Transcribe key | \$500 |
| Transcriber software | \$300 |
| Wireless transmitter/receiver | \$300 |
| Total | \$13,400 |

Note: Other county obligated items/costs should be determined locally.

In order to maintain these systems once they are purchased and installed, circuits may contract with the original vendor for the on-going hardware/software maintenance needs and/or perform some of the hardware maintenance functions in-house. In December 2008, the Trial Court Budget Commission approved budgetary policies for associated hardware/software maintenance needs. First, to ensure appropriate maintenance funding levels, the Trial Court Budget Commission approved each circuit's total annual state maintenance funding need not to exceed 13% of initial (state funded) hardware and software costs.

As for the lifecycle replacement (refresh) of court reporting hardware items, in December 2008, the Trial Court Budget Commission also approved specific timeframes (see Appendix B) for hardware refresh in support of an on-going lifecycle management plan, as follows:

| Hardware Replacement Schedule | |
|--|-----------|
| ITEM | SCHEDULE |
| Servers | |
| Primary Server – centralized model | 3 years |
| Secondary Server – centralized model | 3 years |
| Primary Server – decentralized model | 4-5 years |
| Secondary Server – decentralized model | 4-5 years |
| Video Server | 4 years |
| Digital A/V | |
| Digital matrix mixers | 6 years |
| Cameras | 5 years |
| Encoders | 6 years |
| Bench Control Panel | 5 years |

| Handheld Digital Recorder | 3 years |
|--------------------------------------|----------|
| Analog A/V | |
| Microphone | 5 years |
| Tape machine | 7 years |
| Amplifier | 7 years |
| Bench Control Box | 7 years |
| Speakers (sound system) | 10 years |
| Cameras | 5 years |
| Workstations | |
| Networked Monitoring Workstation | 4 years |
| Transcription Workstations | 4 years |
| Standalone workstation or laptop | 3 years |
| Computer monitors | 5 years |
| Stenograph Equipment | |
| Stenograph Machine | 5 years |
| Stenograph Laptop | 3 years |
| Stenograph secondary recorder system | 3 years |
| Other Computer Hardware | |
| UPS (uninterruptible power supply) | 3 years |
| Headsets | 2 years |
| Foot Pedals | 4 years |

C. Capacity Planning

Careful planning is key to the success for a project of this magnitude. Judges, state attorneys, public defenders, private counsel, court administrators, clerks of court, bailiffs, court technology officers and others must be regularly consulted. An implementation plan for each courthouse, courtroom, and hearing room must be developed. Employees must be hired and trained. To help assist with the allocation of resources including requests for funding, Office of the State Courts Administrator staff review implementation plans of each judicial circuit to ensure local objectives meet state operational and technical obligations.

D. Analysis of Alternatives

1. Assessment of Alternatives

Court reporting technology (stenography and digital audio/video recording) is the only proven technical alternative available to meet the needs of the judicial branch. These technical solutions are in place in all circuits. Digital audio/video court recording technology has reduced operational and personnel costs. More advanced stenographic technology has enabled timely transcripts, timely appellate proceedings and resulted in a high level of customer satisfaction.

2. Assessment Process

The Office of the State Courts Administrator awards purchasing contracts to qualified vendors who make their digital audio/video court recording systems available to the courts for purchase. Courts may only purchase audio/video recording solutions from qualified vendors who have: (1) met technical and functional standards established by the Supreme Court and (2) who have been selected through the Invitation to Negotiate process.

To be eligible for consideration for an award, vendors must meet technical and functional obligations as described in; section 1.c., Current System Performance.

Vendors must include in the Invitation to Negotiate submissions, a statement in writing indicating whether: (a) the proposed technology solution meets the standards and is therefore eligible for consideration or (b) the vendor intends its solution to be compliant with the standards by the designated deadline listed in the Invitation to Negotiate.

The qualification process consists of two components including a letter of compliance and a demonstration of proficiency. The written letter of compliance must be signed by a responsible person able to legally bind the commitment from the manufacturer of digital court recording software. The second component consists of a working demonstration of proficiency with each of the court functional and technological standards. Evaluation of proficiency can be in the form of a working presentation or a visit to a production environment by authorized court staff.

3. Technology Recommendation

The State Courts System has determined that court reporting technology will support the plans and objectives of the State Courts System. By integrating digital audio/video recording solutions as part of an overall blended service delivery model, the State Courts System will be in a better position to contain court reporting costs statewide while also improving quality and accessibility.

VI. Schedule IV-B Project Management Planning

A. Project Charter

The Judicial Branch has several components in managing the court system. The key decision makers in the trial court system include commissions and committees appointed by the Supreme Court, the chief judges of each circuit, and court administration at both the state and circuit level. Prior to Revision 7 implementation, the trial courts operated mainly as unique and separate systems. This was due to the wide variations in funding provided by individual counties and local environmental conditions. Now that Revision 7 has been implemented and funding is provided by the state for essential court system elements, the trial courts have been attempting to operate more as a unified system. However, local environmental conditions still impact the delivery of services, meaning that variations in the circuits will never completely dissipate. Consequently, the Florida Courts Technology Commission, Commission on Trial Court Performance and Accountability and the Trial Court Budget Commission recognize that each judicial circuit must maintain a level of flexibility in managing their own operations.

Four primary stakeholder groups have been instrumental in planning the integration of court reporting technology: the Commission on Trial Court Performance and Accountability, the Trial Court Budget Commission, the Florida Courts Technology Commission, and the chief judges and trial court administrators of Florida's twenty judicial circuits. Three reports have been released or drafted by the Commission on Trial Court Performance and Accountability. The first, in December 2002, defined the court reporting element and provided recommendations for the provision of this service. The report stated that:

The existence of aging systems in the midst of rapid changes in technological and market conditions has created an environment of urgency bordering on crisis for some courts. Some circuit courts are unable to ensure that accurate and timely transcripts can be produced for appellate purposes.

The Commission on Trial Court Performance and Accountability also recommended that the State Courts System "seek funding to support the purchase and installation of electronic court reporting technological hardware and software..." To begin the purchase of this technology, in 2003, technology standards were created by the Trial Court Technology Committee and ratified by the Florida Courts Technology Commission to establish a working statewide model for the successful utilization of technology to remotely capture audio and/or video recordings of court proceedings. The five main standards for introducing digital court reporting to courtrooms are: (1) produce a quality recording; (2) automate processes of digital court recording; (3) preserve the integrity of the record; (4) provide attachment support; and (5) provide electronic search and access for recordings. All products supplied by vendors of digital court reporting technology were required to be compliant with the standards by July 1, 2005.

The second report released, in February 2005, provided a *Statewide Plan for the Effective Use and Management of Court Reporting Services* to be implemented by the trial courts post-Revision 7. Several goals and objectives were laid out for the trial courts including that digital recording capacity will exist in all courtrooms utilized for cases in which recording is required at public expense and that all digital recording systems will comply with the *Technical and Functional Standards for Digital Court Recording* (see Appendix A) which was last updated by the Court Reporting Technology Workgroup in October

2008.

The third report, submitted to the Supreme Court in October 2007, provides *Recommendations for the Provision of Court Reporting Services in Florida's Trial Courts.* These recommendations address the entire court reporting process from the qualifications of employees or contractors who perform these services to regulations regarding the production of transcripts. Additionally, as existing court rules and Florida Statutes allow for the use of digital audio/video court recording technology but do not sufficiently address the legal and operational issues arising from the use of digital technology, recommendations also include new rule and statutory revisions to define digital recordings; determine accessibility to digital recordings; prevent the unintentional recording of confidential information; and identify persons permitted to produce transcripts from digital recordings. As circuits have continued to implement digital audio/video technology in their courts based on the strategies outlined in previous reports, this report provides specific standards of operation and best practices regarding the use of this technology.

On July 16, 2009, the Supreme Court adopted changes to the Rules of Judicial Administration and Florida Rules of Appellate Procedure in response to the October 2007 recommendations of the Commission of Trial Court Performance and Accountability. The opinion may be found at: http://www.floridasupremecourt.org/decisions/2009/sc08-1658.pdf. The Supreme Court recognized that digital recordings of court proceedings are now widely used throughout the state by those involved in the court system and have proven to be useful, reliable, and cost effective. They noted that access to these recordings should not be denied. On January 7, 2010, the Supreme Court issued AOSC10-1 which adopted the standards of operation and best practices proposed by the TCP&A in both the October 2007 report and as revised in a November 2009 supplemental report. The administrative order may be found at: http://www.floridasupremecourt.org/clerk/adminorders/2010/AOSC10-1.pdf).

In determining crucial budget policies for the State Courts System, the Trial Court Budget Commission has reviewed the above strategies laid out by both the Commission on Trial Court Performance and Accountability and the Florida Courts Technology Commission as they relate to the provision of court reporting services. In doing so, the Trial Court Budget Commission has recently approved supporting budgetary policies on the long-term management of court reporting equipment. These policies can be found in the report titled, *Recommendations of the Court Reporting Technology Workgroup* (see Appendix B). This report includes both refresh timeframes and a long-term plan for continued integration of digital technology.

B. Work Breakdown Structure

In developing the FY 2011-12 court reporting budget request, the Trial Court Budget Commission reviewed individual circuit requests in line with the above state level strategies and budgetary policies. The Office of the State Courts Administrator provides support and guidance to the circuits, directs the Invitation to Negotiate (ITN) process, assists with vendor coordination, and assists with technology installation. The chief judge and trial court administrator are directly responsible for developing circuit-level work structures for the continued implementation of digital technology.

Additionally, the Office of the State Courts Administrator updated its qualified vendor list in 2008 via the Invitation to Negotiate process. Each prospective vendor was evaluated and required to demonstrate proficiency with these updated standards. As a result, four additional vendors have been added to the qualified list for an overall total of eight. In addition, the *Technical and Functional Standards for Digital Court Recording* (see Appendix A) have been updated effective October 2008. Qualified vendors are also on a state contract and are thus available for use by the circuits.

C. Resource Loaded Project Schedule

Digital audio/video court recording hardware and software components must be purchased by each circuit from approved vendors by June 2012. Installation of purchased components must occur per contract by the circuits no later than September 30, 2012. Circuits are individually responsible for establishing the local terms of the vendor contracts.

D. Project Budget

For FY 2011-12, the trial courts have a statewide need of:

Court Reporting Expansion

\$862,803 OCO

\$407,119 Expense Non-Recurring

Recurring contractual maintenance funding of \$115,225 is also needed for FY 2012-13 associated with the purchase of expansion technology.

Court Reporting Maintenance/Refresh of Existing Equipment

\$241,622 Maintenance Recurring FY 11-12

\$3,172,874 OCO (Refresh)

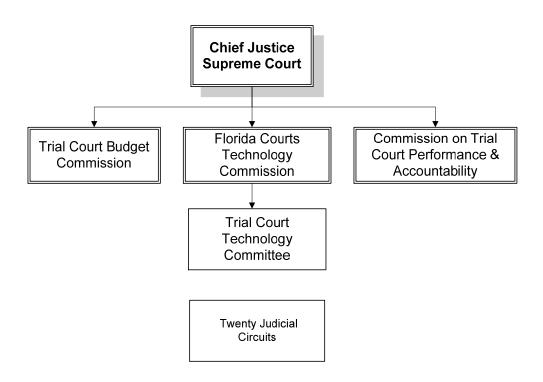

\$406,556 Expense Non-Recurring (Refresh)

{Note: Project Budget Worksheet 1 and 2 are not applicable as all development, implementation, and transition costs related to this project have been accounted for on the Cost Benefit Analysis Forms in Appendix C}

E. Project Organization

The integration of court reporting technology is carried out directly by each judicial circuit. However, Supreme Court appointed commissions such as the Commission on Trial Court Performance and Accountability, Trial Court Budget Commission, and the Florida Courts Technology Commission provide high level oversight over the process. Further, the Office of the State Courts Administrator provides support as needed. The project governance structure is graphically represented below.

Court Reporting Services – Digital Technology Governance Structure

F. Project Quality Control

Overall, each circuit conducts the following quality control measures:

- 1. Unit Testing is conducted on all components.
- 2. Software Acceptance Testing is completed by circuit court technology staff to validate each software revision to be installed within a production environment. The digital recording software including the operating system and other necessary components, built and configured, are verified and tested to be operationally acceptable before deployment. Validation of digital recording system and other relevant software is tested according to the criteria as defined by software manufacture and court staff.
- 3. Integration Testing is conducted by the circuit court technology staff to verify that each element of the digital system interacts with each other one as designed, and performs in compliance with the system specifications and design of each digital court recording model. Integration Testing is conducted in a live courtroom environment suited to reflect and duplicate as closely as possible, a typical operational environment within the State Courts System.
- 4. Functional Testing (testing against functional specifications, which exercise the system from the end-user stand point) is performed in order to ensure that the functional specification is met for correctness, procedural accuracy, user friendliness, and consistency. Functional Testing includes, but is not limited to:

- System security functionality is tested against State requirements, to ensure protection from improper penetration.
- Login security is tested to verify access to authorized functions.
- Security of workstation data is tested per the State requirements.
- Audio recording is tested to verify the accurate capture of spoken word.
- CD-Rom and DVD systems are tested to verify archive of audio recordings using portable medium.
- Server interaction is tested to verify interoperability of integrated systems.
- System reliability is tested to verify high availability of audio recording.
- Verification of operations and reference manuals.
- Usability testing is conducted with the main objective to verify that the system will be easy to learn and easy to use.
- Usability testing to include:
 - > Consistency between screens is tested for the look and feel to be consistent through out the system
 - > Labels and Titles to accurately reflect the actions to be performed.
 - > Accessibility and ease of use of all functions in user interfaces.
 - > Mouse and keyboard support for all functions
 - > Error message clarity, meaningfulness, and helpfulness in troubleshooting
 - > Efficiency of the interface to ensure that a minimum amount of steps and time are required to complete a task.

5. Operational Testing

- Volume testing to validate maximum number of integrated rooms and number of users, and concurrent user requests which a system can tolerate and handle appropriately.
- Performance testing to achieve loads that mimic realistic business usage and to validate that the systems can meet acceptable service levels.
- Stress testing to validate the stability of the integrated DCR server and database
 under overload and abnormal conditions, when the system is required to handle
 resource demands in excessive quantity, frequency or volume; for example, when
 a number of clients simultaneously request playback of multiple audio recordings
 which exceed system requirements.
- Resource usage testing to verify that resource consumption does not exceed the required level and that the system is not particularly sensitive to certain input values.
- Database recovery testing to validate system availability and recover ability requirements.
- Network-related failure recovery will be verified.
- Compatibility testing to verify that the Digital Court Recording system interacts with other State Court automation systems as required.
- Startup/Shutdown tests to meet end user performance and usability requirements.
- Validation of hardware setup and configuration procedures against the documented instructions.
- Installation testing to validate installation procedures as appropriate. This includes software distribution, verification of dates, versions, presence of files and folders as well as all necessary drivers and 3rd party software.
- Configuration testing to validate all required hardware and software configurations and their combinations.

- Reliability testing to validate the entire system as well as all system components and wiring targeting specific reliability requirements.
- 6. Pre-Acceptance Testing is conducted on-site by vendor and circuit court technology staff. Pre-Acceptance Testing is a full system test executed at the court site within each courtroom or hearing room environment that mimics the realistic business environment as closely as possible, and ensures that the system's functional and software environmental issues are resolved before acceptance testing begins. Pre-Acceptance testing demonstrates the complete system compliance to each and every identified system requirement. Hardware, software, and infrastructure are validated to ensure the success of the acceptance test. Validation results are reviewed and approved by the Chief Judge and Court Administrator of the Circuit.
- 7. Acceptance Testing is performed by circuit court technology staff. Acceptance testing will be performed against system requirements captured in the Acceptance Test Specification and will include all elements of the system testing, such as functional and operational testing including business case scenarios and creation of removable media as identified in the Program Overview. The Acceptance Test Specification identifies at least one test case for each and every requirement in order to ensure full compliance.

All hardware and software system components are installed and the installation is verified using actual documented installation procedures. Software un-install procedures are also validated if applicable.

The Court Technology Officer of each circuit monitors and registers/reports on all the issues found during Acceptance testing and tracks them to closure. The Court Technology Officer maintains metrics for reporting test progress and issue tracking. At a minimum, weekly meetings are held to review outstanding issues and test progress. Technical discussions and additional status reviews are held as required. All records of statuses, reviews, and metrics are maintained in the Vendors repositories. A Quality Assessment Report is generated at the end of acceptance testing and provided for court review and approval.

Acceptance Testing includes, but is not limited to:

- > Validation of the produced removable media.
- > Verification of hardware and software components and their functionality.
- > Overall DCR solution functionality and expected outputs.
- Walkthrough demonstration of all hardware, software, and documentation deliverables.

Vendor personnel remain on site for effective support during equipment installation acceptance testing. Vendor provides hardware, software, and QA specialists that have worked on the DCR system development until the system is accepted by the Court.

8. Removable Media Quality Control Program is deployed to ensure the uniformity and consistency of the captured audio recording and the use of CD-ROM and DVD storage systems statewide. Vendor generates a Removable Media Design Specification to identify detailed requirements for the media, including audio quality, graphic design and layout, security features, and portability.

In order to detect removable media quality problems as early as possible, the Court Technology Officer, during each and every sub-phase (System testing, Pre-Acceptance and Acceptance) of the validation phase, executes the Test Specification and create recordings to validate their compliance to the Removable Media Design Specification.

Vendor tests each and every CD-ROM and DVD writer before it is installed at each court site. Test media are created and evaluated against applicable standards and requirements.

To ensure that all removable media meets specified Court requirements and all identified technical issues are tracked to closure, the following Media Verification Process is enforced by Program Management and strongly supported by Vendor.

- Obtain court approval of the removable media design specification and media design samples for all State approved audio recordings.
- Generate the Test Specification for media quality testing and obtain its approval from the customer.
- Generate a sample audio recording for each media type. To address the privacy concerns and avoid usage of personal data, test data are established. It also includes the entire range of possible captured audio.
- Execute the Test Specification, create all media types, inspect and verify against approved samples and the Test Specification's expected results. All features and design items are verified.

The verification of the following items includes:

- > Audio quality of captured recording
- > Playback against Redbook and DVD standards
- > Security features
- > Labeling of media including font size and bold level of text
- Specify any non-compliant issue and enter it into Vendor issue tracking system.
- Identify appropriate fix for specified issue and implement it.
- Re-build software and/or hardware and re-test specified issue.
- All exceptions and/or deviations from agreed upon and approved samples and requirements are documented, reviewed, and approved by Court.

In order to ensure consistent performance of all recording subsystems, vendors train court personnel in the following areas:

- Physical conditions of the audio capturing, such as background noise, microphone placement, subject positioning, distance between microphones, etc.
- Equipment calibration
- Peripheral equipment driver setups
- Startup and Shutdown procedures
- Failure recovery, trouble shooting, backup and restore procedure
- Inspection of the supply materials from inconsistencies and/or defects, which may require placement
- Evaluation of the recorded media quality.

• Vendor support process which is designed to address any court issue and track it to closure in a timely manner.

G. External Project Oversight

Not Applicable.

H. Risk Management

| Project Risk and Risk Mitigation | | | | | |
|--|--|------------------------------|--------------------|---|--|
| Risk Description | Impact of Risk | Probability of Occurrence | Tolerance Level | Mitigation Strategy | Comments |
| 1. Infrastructure Change | The technological infrastructure for court reporting services will be modified in varying degrees around the state depending on the level of digital technology already in place. | Low | High | Planning, Communication, and Training. | Responsibility lies with the chief judges and court administrators. |
| 2. Business Process Change | Business process changes will have a positive impact on funding needs, but will cause some circuits to adjust staffing models to achieve cost efficiency, including the reclassification of stenographic staff to digital court reporters. | Medium | High | Planning, Communication, and Training. | Responsibility lies with the TCBC, TCP&A, chief judges and court administrators. |
| 3. Stakeholder Support for Project | The majority of stakeholder groups are in support of digital technology. | Low | High | Planning, Communication, and Training. | Responsibility lies with the TCBC, TCP&A, and chief judges and court administrators. |
| 4. Decentralized implementation of Technology/ Complexity of Project | Due to the multi-component management structure of the Judicial Branch and the significant variations across the trial courts, each judicial circuit is individually responsible for the local success of digital technology. | Low | High | Planning, Communication, Training, and Support and Guidance from the TCP&A, TCBC, and OSCA. | Responsibility lies with the chief judges and court administrators. |

I. Organizational Change Management

The integration of digital technology and the associated management of this change are carried out directly by each judicial circuit. However, Supreme Court appointed commissions such as the Commission on Trial Court Performance and Accountability, Trial Court Budget Commission, and the Florida Courts Technology Commission provide high level oversight over the process. Further, the Office of the State Courts Administrator provides systemic support as needed.

Generally, the organizational change impact on each major stakeholder group is as follows:

Stenography Firms and Stenographers. Court reporting firms and stenographers have expressed concerns regarding the introduction of digital audio/video technology as it may impact their future earnings. However, stenographic reporters will be retained for cases

in which there is a high probability of a transcript request. As digital audio/video technology is implemented, stenographers employed by the court system may also be given the opportunity to apply or be cross-trained as digital court reporters. Lastly, many stenographic firms and privately employed stenographers are refocusing their efforts to civil proceedings in which they are contracted by private parties such as law firms to provide court reporting services.

Judges. Judicial resistance to the deployment of digital audio/video court reporting has varied over the years. Those judges that have been accustomed to more traditional court reporting methods do not necessarily wish to change the way they control and manage their courtrooms. However, resistance is currently almost nonexistent across the state. It is now common practice in the trial courts for judges to play an integral role in communicating and training all stakeholders on the benefits of this technology.

State Attorneys and Public Defenders, Conflict Counsel, Members of the Private Bar. Like judges, attorneys who have practiced in the courts for many years are accustomed to traditional stenographic reporters. With digital audio/video technology, some in-court attorney behaviors are required to change. Thus, there has been a level of discomfort on the part of some attorneys with the use of this technology in certain areas of the state. Concerns have been expressed regarding whether microphones are muted before having private conversations with clients in the courtroom. Currently, signs are placed inside and outside of courtrooms (and often at the attorney's tables) informing all those in attendance at a proceeding of the digital audio/video recording. In several courtrooms around the state, microphones with mute buttons are placed at the attorney's tables so that they can control what is recorded. The Supreme Court has also recently adopted changes to the Rules of Judicial Administration that address safeguarding confidential information when digital recording is in use as well as several standards of operations and best practices pertaining to the protection of confidential information on digital recordings.

Chief Judges, Trial Court Administrators, and Court Staff. The integration of digital court reporting technology is championed by trial court administrators and their staff with support from the chief judge. As messengers, they bear the responsibility for planning, communicating, and conducting the necessary training with stakeholders. Their leadership is instrumental in effectuating the implementation of the technology.

Court Technology Officers. The State Courts System relies heavily on the expertise of its twenty court technology officers. Court technology officers work in concert with the judges, court administrators, and court reporting managers to ensure smooth transition to digital court reporting technology. They are also thoroughly trained by the vendor on the tagging, monitoring, and other operational features of the digital technology.

Clerks of Court. Clerk staff still provide court reporting services in some circuits. The integration of digital audio/video technology will assist circuits in transitioning away from their reliance on clerk staff for this function.

J. Project Communication

The Commission on Trial Court Performance and Accountability, Trial Court Budget Commission, Florida Courts Technology Commission, and the Office of the State Courts Administrator have been in regular communication with the trial court administrators and chief judges of all twenty circuits regarding this issue over the last several years (as

discussed in previous sections). This request is being submitted on their behalf and with the knowledge that they retain the experience and responsibility for successfully integrating this technology in their local arenas (similar to the past 7 years).

K. Special Authorization Requirements

Not applicable.

VII. Appendices

Technical and Functional Standards for Digital Court Recording

As of October 2008

Overview

This document provides detailed specifications for Digital Court Recording (DCR) systems which meet the court's needs for operating and managing the recording of court proceedings and hearings for the purpose of providing transcripts of court proceedings as mandated by Florida Statutes. These specifications will be updated on a regular basis and will be applied progressively to future purchases as of the date approved by the Florida Courts Technology Commission.

The initial focus of these standards is to record the audio and in some cases the video of court proceedings using a digital court recording system. The system is setup in a series of repositories encompassing many recorded rooms that may be accessible within a networked environment. This configuration shall provide for ease of administration and disaster recovery preparations as defined in this document.

DCR Technical and Functional Requirements

1). Produce a Quality Recording

The integrated DCR system must be able to produce high quality digital masters for archival preservation of the recording of a court proceeding. It is essential that the system playback feature accurately represents the recording of court proceedings. The quality of the digital recording must be clear and distinct, and accurate for use by the legal and judicial community for transcription. The system must have the ability to record on multiple channels determined by the room size, number of microphones, type of proceeding and other engineering requirements.

Base Configuration Requirements

- Audio recordings will be recorded at a minimum sampling rate of 44.1KHz at 16 bits
- Playback capability to the recorded room must be supported
- Remote monitoring over a WAN requires bandwidth management to ensure overall operation of the LAN/WAN is not negatively impacted.
 - o Remote monitoring over a LAN, the bandwidth usage should not exceed 500Kbps per recorded room.
 - Remote monitoring over the WAN, whether one court room or multiple, the bandwidth utilization shall not exceed 500Kbps. The recommended standard is 384Kbps.
 - For remote monitoring over the WAN, the quality expectation should be not more than 15 frames per second. For capturing the video on the LAN, the quality expectation is at least 30 frames per second. Mpeg4 Layer 10, H.264 is preferred.
 - o To retrieve a recording from a remote server over the WAN, the bandwidth usage should not exceed 384Kbps. File transfers can utilize higher percentages of

- available line speed if done after hours. If file transfers are done during normal business hours, they should not exceed 384Kbps and should not impact regular business.
- o Changes to bandwidth requirements are allowed with local court approval in consideration of available local resources.
- o The voice traffic shall be QOS prioritized.
- o Recommended QOS tag should be DSCP AF41 (this makes DCR in compliance with video teleconference standards).
- Standard Courtroom minimum 4 Channel recording.
- Hearing Room minimum 2 Channel recording.
- Backup, fault-tolerant recording at a minimum a 1 Channel mixed recording.
- Portable laptop/self contained units 2 Channel recording with a minimum of two microphones with the ability to archive back to the main system.
- Handheld Recorder single channel recording on a portable recorder

All system configurations must have the ability to verify the status of the recorded audio for the primary and backup recording systems as the system is recording. At a minimum, the DCR system must be able to record and provide playback of the recording.

Microphones are assigned to specific channels for higher quality recording and isolation of audio on the channel for clarity purposes.

2). Automate Processes of Digital Court Recording

Automatic Record Operation

The DCR system shall include an automated record activation feature to allow for unattended operation using a user configurable scheduler. When enabled, the DCR system should record the spoken word automatically, unattended, without operator involvement. Scheduled activation shall allow for multiple recording events to be programmed using varied scheduled dates, including starting times and duration of recordings, and VOX. These scheduled events will be on a per court proceedings basis, and shall be flexible to allow varied events at different times. For maximum effectiveness, recorded conversation should be comprehensive, without loss of spoken word or phrase.

Storage and Archiving

The DCR system shall organize recordings using an indexed data structure that can be easily backed up and recovered by the user. The purpose of the data structure is for organizing the recordings in a manner that allows for easy search and location of requested recordings for review or transcription. Data structures should have the ability to accommodate a web based interface for ease of access for limited use such as search and listen, if required for local court needs.

The DCR Application shall utilize a centralized and distributed index which is redundant for failsafe operation. Archiving methods should utilize industry standard technologies and methods

for backup, storage, recovery, and organization of archival digital recordings. The backups should be flexible enough to allow for offsite storage of the records. Archives should be indexed using an automatic numbering scheme for labeling and easy identification for retrieval.

All recording servers used in support of the central recording model must have archival systems that operate mutually exclusive of each other. Primary and secondary recordings shall archive to different archival systems to preserve a redundant copy of the record in separate locations. The software must maintain a searchable index of archived recordings detailing time and date stamps as well as labeling that would allow for immediate identification of needed records. Vendor provided archive servers must have enough storage capacity to maintain on-line storage of digital recordings for a minimum period of six months.

Centralized Monitoring Over Distributed Network

An integrated DCR system enables operators to hear, see, and record audio and video in real time. By leveraging network based systems to listen to and observe court proceedings activity, operators can efficiently monitor several rooms simultaneously from a remote location over the court's local or wide area network if required.

In order to effectively monitor a court proceeding, the DCR system must allow an operator to view sound level indicators of each audio channel with ease. The operator must be able to clearly and distinctly listen to the recorded audio or channels of sound to determine and monitor the quality of the recording. Separate audio channels allow the listener the ability to isolate the microphone/speaker on an individual channel allowing for greater clarity. Closed circuit or network based video cameras are also an important component of the system that allows for centralized monitoring and identification of speakers and events in the court proceedings as well as the option of capturing video with the record.

However, the DCR system should provide an operator with the capability to centrally monitor at least four integrated court proceedings remotely in a LAN environment, using a business class desktop computer or workstation.

The DCR system must provide for a comprehensive graphical user interface to enable a DCR operator to:

- 1. View a list of monitored court proceedings.
- 2. Read status indicator(s) of court recording activity.
- 3. View live images of at least four court proceedings on a single display.
- 4. Display on screen messaging including status, time and date stamp, and allow for input of the case identifier(s).
- 5. Room switching must be an integrated part of the software.

User Interface

The DCR system must provide a visual user interface for court personnel to monitor, record, and playback recordings of court proceedings. User profiles should allow for customized levels of

access and administrative control of the system to prevent unauthorized use and/or damage to the system. Rule based security must be part of the application, and at a minimum events shall be logged by user name with date and time stamps.

Operators must have the ability to perform basic recording control features such as start, stop, pause recording, and playback of audio to a sound reinforcement system in a recording room either locally or remotely.

The DCR software should provide methods to assist with identifying an active speaker during recording. Monitors and operators should have the ability to input relevant annotations that are attached to the recording using a standard computer keyboard.

3). Preserve Integrity of the Record

It is important that the DCR system preserve the integrity of the electronic record after a court proceeding has been recorded through appropriate system configuration or storage medium, whether on fixed disk or removable media. The recordings must be tamper resistant with provisions to ensure that the record cannot be tampered with after it is recorded into the system. The archive and redundancy systems must have "record over" protection. The DCR System must offer backup methodologies consistent with the court's requirements for the protection and recovery of its records. At a minimum the system must allow for the offsite backup of the data structure and recordings.

Provisions must be made to provide for fail-safe operation and maximum uptime. Although fixed disks are reliable, all server equipment responsible for recording should have no single point of failure. System power considerations should be planned during the installation phase to allow for 15 minutes of continued operations at all levels of the system to allow for controlled shutdown during extended power outages, and to reduce loss of recording of proceedings and system damage. Power considerations should include at a minimum the server bank, switches, routers, and workstations associated with monitoring and recording.

In complex configurations where equipment is responsible for recording multiple recording rooms using one or more servers, the DCR system must have a secondary/backup method. The backup method must operate independent of the primary recording server to provide for redundant, fault tolerant operations. It is expected that all participating recorded rooms provide an independent composite audio channel to the secondary/backup system. All primary servers must be configured to provide and support RAID Level 5 for all fixed disks and secondary servers RAID 1.

The DCR system must be able to copy recorded content immediately following the end of the proceeding to portable media such as CD-ROM or DVD. The system must also allow for full backup of recordings and data structures using industry standard backup software and methods. The DCR system must allow for network and user profile based security to control levels of access and prevent unauthorized access and potential damage, which shall be incorporated into the application. The system should allow for stronger security if it is deemed necessary. The

system must support the ability to seal all or portions of the recordings utilizing user authorization, encryption, and seal keys.

The DCR system must be protected by anti-virus and anti-spam technologies to avoid loss of data. Remote access by vendors for purposes of working or maintaining systems shall be done in a secure manner in alignment with the court's security standards and expectations both at the state and local level. The system shall not allow for access without court approval. DCR systems shall be designed in a manner that would not preclude it from being updated to work with new releases of Operating Systems. It must also accept regular security and software patches to the Operating System.

4). File Association

The DCR system must be able to associate all related content with the recorded event such as audio, video, annotations and machine understandable data (metadata) to be viewed as a single digital record.

5). Provide Search and Access for Recordings

It is expected that all DCR technology must be accessible for operation over a networked environment. Systems must be capable of streaming live or pre-recorded audio to select users over court network. The system should be capable of delivering this feature to a Web server over the Internet using appropriate security. Additionally, the DCR system must be capable of serving audio and/or video "on demand" to court personnel over network or made available to Internet users through secure Web servers.

Each recording shall be labeled in a logical sequence where it can be identified and accessed in the event the data structure/index fails. At a minimum, each recording shall be labeled with the date, time, and recording room when placed in the data structure. Random labeling of recordings will seriously impair the ability of the recording to be identified in the event of an index corruption or failure. If the data structure has to be rebuilt, the logical labeling of recordings offers a built in structure that can be easily integrated into a new index. All recorded information must be indexed and searchable through a common interface. Recordings must be searchable using a case identifier, filenames, date and time stamps, and annotations as well as any associated metadata captured during and after the recording.

All recordings must be accessible through a common index and made available for searching immediately after it has been recorded.

The DCR system must provide meaningful reports to assist in management of common and relevant analytical and operational information including recording utilization, recording storage capacity, audit logs and security access information.

DCR Technical Constraints

Quality of DCR System Software

The Appellate and Circuit Courts utilize standardized operating systems, and are continually upgrading to new releases. The DCR system should be compatible with all major platforms and should not use proprietary hardware or software. The system should support open standards including but not limited to HTML, ODBC/JDBC, TCP/IP, and XML that can be utilized to facilitate search requests, data retrievals, electronic submission and transport of all digital data. Stable open source server platforms that are OS independent are acceptable. Software installation

Installation routines that feature both text-mode and graphical user interfaces including the use of W3C HTML 3.0 compliant web browsers, supporting a wide variety of video hardware at reasonable color depths and resolutions. In cases where the graphical interface is not desired or supported, a text mode interface must be made available to provide the user with the same functionality. The text mode installation should spare the novice the intimidation of a command prompt. The text interface should provide a friendly script driven interface to the text mode installer. The DCR software application should be independent of the operating system version.

Driver support

The system shall utilize an automatic hardware detection system to discover hardware, OS kernel version and server drivers to use with devices such as Firewire, PCI, AGP, USB, and PCMCIA devices. The vendor must provide timely support for driver support, updates, and functionality.

Version control

All packages, including drivers, audio applications, and servers related to multimedia, operating system and kernel patches, will be provided in their latest version, to be fully tested by the systems integrators and court staff. System upgrades should be equally applied to avoid having multiple versions of an application running in the DCR environment that could frustrate future troubleshooting processes.

Sound architecture support

The DCR software should fully support standard sound interfaces and APIs on workstations and servers. It is expected that all audio software interfaces are certified by the manufacturer for operation within the intended environment, including consumer sound cards to professional multichannel audio interfaces. The DCR software should be fully modular including support for symmetrical multi processors and have thread safe design. The audio file structure shall be exportable open source formats such as .wav, .mp3, .avi, .au or similar industry standard playable by any open source playback software. Server environments shall provide the same level of 3rd party vendor support, functionality, and ease of integration into the DCR

environment.

Usability considerations

The Court supports standardized browsers and all court staff are able to access Web based services using these browsers. The user interface must be optimized for use with the screen size of 1024 x768 pixels. However, only features supported by the browser that are aligned with W3C standards should be used for core functionality. In addition to the W3C markup and style sheet standards, all user interfaces that are developed, procured, or otherwise acquired on or after July 1, 2006, must comply with the requirements of the Florida Accessibility of Information and Technology Act (see sections 282.601-282.606, Florida Statutes) and the Standards Applicable to Electronic and Information Technology as set forth in Rule 60EE-1.002, Florida Administrative Code.

DCR Standards and Functions Summary

Required

- 1. Must be able to produce high quality digital masters for archival preservation of the recording in a court proceeding.
- 2. Recording must be clear and distinct and accurate for use by legal and judicial community for transcription.
- 3. Must have the ability to record on multiple channels.
- 4. Audio recordings will be recorded at a minimum sampling rate of 44.1KHz at 16 bits.
- 5. Playback capability to the recorded room must be supported.
- 6. For remote monitoring over the LAN, bandwidth should not exceed 128 Kbps and shall not exceed 512Kbps per recorded room.
- 7. For remote monitoring the WAN, bandwidth usage should not exceed 384Kbps and shall not exceed 512Kbps.
- 8. For retrieving recordings over the WAN, bandwidth should not exceed 384Kbps and shall not exceed 512Kbps.
- 9. Voice traffic shall be QOS prioritized.
- 10. Standard Courtrooms shall have a minimum of 4 channels.
- 11. Hearing rooms shall have a minimum of 2 channels.
- 12. Backup fault tolerant recording shall have a minimum of 1 channel mixed recording.
- 13. Laptops or standalone units shall have a minimum of 2 channels of recording with the ability to archive back to the main system.
- 14. Handheld recorder shall have a single channel recorder.
- 15. All system configurations must have the ability to verify the status of the recorded audio for the primary and backup recording systems as the system is recording. The system must be able to record and provide playback of the recording.
- 16. System shall include an automated record activation feature to allow for unattended operation using a user configurable scheduler.
- 17. Scheduled activation shall allow for multiple recording events to be programmed using varied scheduled dates, including starting times and duration of recordings, and VOX.
- 18. Scheduled events will be on a per court proceedings basis, and shall be flexible to allow varied events at different times.
- 19. The DCR system shall organize recordings using an indexed data structure that can be easily backed up and recovered by the user.
- 20. The DCR system must utilize a centralized and distributed index which is redundant for failsafe operation.
- 21. All recording servers used in support of the central recording model must have archival systems that operate mutually exclusive of each other.
- 22. Primary and secondary recordings shall archive to different archival systems to preserve a redundant copy of the record in separate locations.

- 23. The software must maintain a searchable index of archived recordings detailing time and date stamps as well as labeling that would allow for immediate identification of needed records.
- 24. Vendor provided archive servers must have enough storage capacity to maintain on-line storage of digital recordings for a minimum of six months.
- 25. The DCR system must allow an operator to view sound level indicators of each audio channel with ease.
- 26. The operator must be able to clearly and distinctly listen to the recorded audio or channels of sound to determine and monitor the quality of the recording.
- 27. The DCR system must provide for a comprehensive graphical user interface to enable a DCR operator to:
 - a. view a list of monitored court proceedings
 - b. Read status indicator(s) of court recording activity
 - c. view live images of at least four court proceedings
 - d. display on screen messaging including status, time and date stamp, an allow for input of the case identifier(s)
 - e. Room switching must be an integrated part of the software
- 28. The DCR system must provide a visual user interface for court personnel to monitor, record, and playback recordings of court proceedings.
- 29. Rule based security must be part of the application, and at a minimum events shall be logged by user name with date and time stamps.
- 30. Operators must have the ability to perform basic recording control features such as start, stop, pause recording, and playback of audio to a sound reinforcement system in a recording room either locally or remotely.
- 31. The recordings must be tamper resistant with provisions to ensure that the record cannot be tampered with after it is recorded into the system.
- 32. The archive and redundancy system must have "record over" protection.
- 33. The DCR System must offer backup methodologies consistent with the court's requirements for the protection and recovery of its records (I&I).
- 34. At a minimum, the system allow for the offsite backup of the data and recordings.
- 35. Provisions must be made to provide for fail safe operation and maximum uptime.
- 36. In complex configurations where equipment is responsible for recording multiple recording rooms using one or more servers, the DCR system must have a secondary/backup method. The backup method must operate independent of the primary recording server to provide for redundant, fault tolerant operations.
- 37. All primary servers must be configured to provide and support RAID Level 5 for all fixed disks and secondary servers RAID 1.
- 38. The DCR system must be able to copy recorded content immediately following the end of the proceeding to portable media such as CD-ROM or DVD.
- 39. The system must also allow for full backup of recordings and data structures using industry standard backup software and methods.

- 40. The DCR system must allow for network and user profile based security to control levels of access and prevent unauthorized access and potential damage, which shall be incorporated into the application.
- 41. The system must support the ability to seal all or portions of the recordings utilizing user authorization, encryption, and seal keys.
- 42. The DCR system must be protected by anti-virus and anti-spam technologies to avoid loss of data
- 43. Remote access by vendors for the purposes of working or maintaining systems, shall be done in a secure manner in alignment with the court's security standards and expectations both at the state and local level.
- 44. The system shall not allow for access without court approval.
- 45. DCR systems shall be designed in a manner that would not preclude it from being updated to work with new releases of operating systems, and must accept regular security and software patches to the operating system.
- 46. The DCR System must be able to associate all related content with the recorded event such as audio, video, annotations and machine understandable data (metadata) to be viewed as a single digital record.
- 47. DCR technology must be accessible for operation over a network environment.
- 48. Systems must be capable of streaming live or pre-recorded audio to select users over the court network.
- 49. The DCR system must be capable of serving audio and/or video on demand to court personnel over network or made available to the Internet users through secure Web servers.
- 50. Each recording shall be labeled in a logical sequence where it can be identified and accessed in the event the data structure/index fails. At a minimum each recording shall be labeled with the date, time, and recording room when placed in the data structure.
- 51. All recorded information must be indexed and searchable through a common interface
- 52. Recordings must be searchable using a case identifier, filenames, data and time stamps, and annotations as well as any associated metadata captured during and after the recording
- 53. All recordings must be accessible through a common index made available for searching immediately after it has been recorded.
- 54. The DCR system must provide meaningful reports to assist in management of common and relevant analytical and operational information including recording utilization, recording storage capacity, audit logs and security access information.
- 55. The system shall utilize an automatic hardware detection system to discover hardware, OS kernel version and server drives to use with devices such as Firewire, PCI, AGP, USB and PCMCIA devices
- 56. The vendor must provide timely support for driver support, updates, and functionality.
- 57. In cases where the graphical interface is not desired or supported, a text mode interface must be made available to provide the user with the same functionality.

- 58. All packages, including drivers, audio applications, and servers related to multimedia, operating system, and kernel patches will be provided in their latest version, to be fully tested by the systems integrators and court staff.
- 59. Audio file structure shall be exportable to open source formats such as .wav, .mp3, .avi, .au or similar industry standard playable by any open source playback software.
- 60. Server environments shall provide the same level of 3rd party vendor support, functionality, and ease of integration into the DCR environment.
- 61. The user interface must be optimized for use with the screen size of 1024X768 pixels.
- 62. The system must comply with the requirement of the Florida Accessibility of Information and Technology Act (see sections 282.601-282.606, Florida Statutes) and the Standards Applicable to Electronic and Information Technology as set forth in Rule 60EE-1.002, Florida Administrative Code.

Recommended

- 1. Data structures should have the ability to accommodate a web based interface for ease of access for limited use such as search and listen, if required for local court needs.
- 2. For monitoring, the quality expectation should be at least 30 frames per second for video. For capturing video.
- 3. For capturing video, the quality expectation should be at least 15 frames per second.
- 4. Mpeg4 Layer 10 and H.264 for video is preferred.
- 5. Higher bandwidth allowed after hours, should not impact regular business, and bandwidth requirements can be changed with local court approval based on availability of local resources.
- 6. The DCR system should record the spoken word automatically, unattended, without operator involvement when the scheduler is enabled.
- 7. When the scheduler is enabled, the recorded conversation should be comprehensive, without loss of spoken word or phrase.
- 8. Data structures should have the ability to accommodate a web based interface for ease of access for limited use such as search and listen, if required for local court needs.
- 9. Archiving methods should utilize industry standard technologies and methods for backup, storage, recovery, and organization of archival digital recordings.
- 10. Backups should be flexible enough to allow for offsite storage of records.
- 11. Archives should be indexed using an automatic numbering scheme for labeling and easy identification for retrieval.
- 12. The DCR system should provide the operator with the capability to centrally monitor at least four integrated court proceedings remotely in a LAN environment, using a business class desktop computer or workstation.
- 13. User profiles should allow for customized levels of access and administrative control of the system to prevent unauthorized use and/or damage to the system.
- 14. DCR software should provide methods to assist with identifying the active speaker during recording.
- 15. Monitors should have the ability to input relevant annotations that are attached to the recording using a standard computer keyboard.
- 16. All server equipment responsible for recording should have no single point of failure.
- 17. System power considerations should be planned during the installation phase to allow for 15 minutes of continued operations at all levels of the system to allow for controlled shutdown during extended power outages, and to reduce the loss of recording of proceedings and system damage.
- 18. The system should allow for stronger security if it is deemed necessary.
- 19. The system should be capable of delivering streaming live or pre recorded audio to select users through a web server over the Internet with appropriate security.
- 20. The DCR system should be compatible with all major platforms and should not use proprietary hardware or software.

- 21. The system should support open standards including but not limited to HTML, ODBC/JDBC, TCP/IP, and XML that can be utilized to facilitate search requests, data retrievals, electronic submission and transport of all digital data.
- 22. Stable open source server platforms that are OS independent are acceptable.
- 23. If a text mode interface is used, the installation should spare the novice the intimidation of a command prompt and provide a friendly script driven interface to the text mode installer.
- 24. System upgrades should be equally applied to avoid having multiple versions of an application running in the DCR environment that could frustrate future troubleshooting processes.
- 25. DCR software should fully support standard sound interfaces and APIs on workstation and servers.
- 26. DCR software should be fully modular including support for symmetrical multi processors and have thread safe design.

Trial Court Budget Commission Recommendations of the Court Reporting Technology Workgroup November 2008

Overview

On February 2008, the Trial Court Budget Commission (TCBC) established a Court Reporting Technology Workgroup for the purpose of developing technology standards that will assist the TCBC in formulating a budgetary framework for the future course of digital court recording technology (DCR). The need for this workgroup was spurred by the lack of statewide policies concerning the continued acquisition, maintenance, and refresh of all court reporting technology. The workgroup was charged with developing policy recommendations on: a long-term plan for continued court reporting technology expansion including recommending a reasonable standard cost per courtroom/hearing room; a revised Invitation to Negotiate (ITN) process for vendor state contracts; the most cost effective use of court reporting technology including whether circuits should be able to migrate between DCR vendors, transfer equipment to other circuits, or develop their own software; the most cost effective and operationally sound method for maintaining court reporting systems with consideration to whether circuits should perform in-house maintenance or contract with different vendors (a la carte); and a lifecycle management plan for court reporting technology, including time standards aimed at defining refresh parameters.

Members of the Court Reporting Technology Workgroup were chosen in consideration of the following criteria: 1) the workgroup will be comprised of trial court managers who are knowledgeable of the administrative, operational, and technical issues related to court reporting, and 2) the workgroup will reflect the diversity of the twenty judicial circuits. As such, members include:

Doug Smith, Court Technology Officer, 2nd Circuit
Jon Lin, Court Technology Officer, 5th Circuit
Ken Nelson, Court Technology Officer, 6th Circuit
Mark Weinberg, Trial Court Administrator, 7th Circuit
Jannet Lewis, Court Technology Officer, 10th Circuit
Dennis Menendez, Court Technology Officer, 12th Circuit
Gary Hagan, Court Technology Officer, 14th Circuit
Barbara Dawicke, Trial Court Administrator, 15th Circuit
Sunny Nemade, Court Technology Officer, 17th Circuit
Steve Shaw, Court Technology Officer, 19th Circuit
Matt Benefiel, Trial Court Administrator, 9th Circuit

Over the course of 6-8 months, the workgroup members held several meetings via video-/tele-conference to discuss key issues surrounding the utilization of court reporting technology in support of the direct delivery of court reporting services. As a result, the workgroup members have developed the following policy recommendations related to court reporting technology for the TCBC's consideration.

Recommendations

I. Standardized Expansion Costs

Issue: Reasonable standardized costs for court reporting technology must be determined in order to estimate future costs and evaluate circuit funding requests.

Recommendation 1A - Standard Costs - The following standard cost estimates for courtrooms, hearing rooms, standalone recording (laptop or PC based), and stenography are recommended for estimating future costs and for the evaluation of circuit funding requests.

Courtroom Large/Ceremonial (maximum room capacity of 100 persons or more):

| State Costs | | |
|--|---|----------|
| Software Licenses – Server & Client | 6-8 channels of recording | \$12,000 |
| Video Camera for central room monitoring/and video recording | 4 cameras IP based | \$4,800 |
| UPS for recording equipment – recording room | Battery backup and line conditioning | \$600 |
| Digital encoding | Video and audio encoders | \$3,400 |
| Prorated backend server storage and services Ratio 1 server for 6 rooms ¹ | Dedicated primary and secondary server costs at 17% | \$3,655 |
| Monitoring Workstation | May be local or centralized | \$1,600 |
| Subtotal | | \$26,055 |
| County Costs | | |
| Microphones | 10 microphones: judge, witness, sidebar, podium/table 1, podium/table 2, jury, clerk, well area | \$6,800 |
| Audio Mixer | Modular style matrix mixer | \$7,000 |
| Wiring | Audio/network/power (13 drops at \$200 each) | \$2,600 |
| Installation and Configuration of a/v equipment and software | Contract dollars | \$2,000 |
| Amplifier | | \$1,200 |
| Subtotal | | \$19,600 |
| Total Cost | | \$45,655 |

¹ Prorated server costs are based on the total estimated cost of \$21,500 multiplied by .17 (approximate 1:6 ratio). Total estimated cost (\$21,500) is based on the following setup: Primary Server, Secondary Backup Server, Video Server, and Archiving Server.

Courtroom Small to Midsize (maximum room capacity of less than 100 persons):

| State Costs | | |
|--|--|----------|
| Software Licenses – Server & Client | 4 channels of recording | \$9,000 |
| Video Camera for central room monitoring/and video recording | 2 cameras IP based | \$2,400 |
| UPS for recording equipment – recording room | Battery backup and line conditioning | \$300 |
| Digital encoding | Video and audio encoders | \$3,000 |
| Prorated backend server storage and services Ratio 1 server for 6 rooms ¹ | Dedicated primary and secondary server costs at 17% | \$3,655 |
| Monitoring Workstation | May be local or centralized | \$1,600 |
| Subtotal | | \$19,955 |
| County Costs | | |
| Microphones | 8 microphones: judge, witness, sidebar, podium/table 1, podium/table 2, jury | \$3,800 |
| Audio Mixer | Modular style matrix mixer with bench control | \$7,000 |
| Wiring | Audio/network/power (10 drops at \$200 each) | \$2,000 |
| Installation and Configuration of a/v equipment and software | Contract dollars | \$1,500 |
| Amplifier | | \$1,200 |
| Subtotal | | \$15,500 |
| Total Cost | | \$35,455 |

¹ Prorated server costs are based on the total estimated cost of \$21,500 multiplied by .17 (approximate 1:6 ratio). Total estimated cost (\$21,500) is based on the following setup: Primary Server, Secondary Backup Server, Video Server, and Archiving Server.

Hearing Room – Networked (room may be part of a centralized system directly recording to a server, or have a networked PC or laptop that automatically uploads the recordings to a central repository)

| State Costs | | |
|--|---|----------|
| 2 channel recording software | | \$9,000 |
| 2 channel mixer | | \$1,000 |
| 2 microphones | | \$850 |
| 1 Video camera | | \$1,200 |
| Installation Costs | | \$1,000 |
| Prorated backend server storage and services Ratio 1 server for 6 rooms ¹ | Dedicated primary and secondary server costs at 17% | \$3,655 |
| Subtotal | | \$16,705 |
| County Costs | | |
| Wiring | A/V, Network drops | \$600 |
| Subtotal | | \$600 |
| Total | | \$17,305 |

¹ Prorated server costs are based on the total estimated cost of \$21,500 multiplied by .17 (approximate 1:6 ratio). Total estimated cost (\$21,500) is based on the following setup: Primary Server, Secondary Backup Server, Video Server, and Archiving Server.

Hearing Room – Standalone (room records locally with a PC or laptop that may or may not be attached to the network for upload of data at a designated time interval)

| State Costs | | |
|------------------------------|-----------------------|----------|
| 2 channel recording software | | \$9,000 |
| Recording PC or laptop | | \$3,400 |
| 2 channel mixer | | \$1,000 |
| 2 microphones | | \$850 |
| Installation/setup | | \$500 |
| Subtotal | | \$14,750 |
| County Costs | | |
| Wiring | Optional network drop | \$200 |
| Subtotal | | \$200 |
| Total | | \$14,950 |

Stenography Equipment – Per Stenographer

| State Costs (100%) | |
|-------------------------------|----------|
| Steno machine | \$5,500 |
| Laptop Computer | \$2,200 |
| Steno Software | \$3,500 |
| Portable backup recorder | \$1,100 |
| Transcribe key | \$500 |
| Transcriber software | \$300 |
| Wireless transmitter/receiver | \$300 |
| Total | \$13,400 |

^{*} Other county obligated items/costs should be determined locally.

Constraints

Due to the variances in room size and vendor approach, these prices were based on specific configurations and may vary slightly from the actual install. Standards cost estimates were determined using current market costs for hardware and software as outlined in the current (2005) ITN. Software costs were estimated using a weighted average for current costs of software. Prices may change based on subsequent ITNs and negotiation of new contracts in the future.

County related technology costs are specified in **Florida Statutes 29.008**. In order to have a viable digital recording system, funding must be available at both county and state levels due to the separation of responsibilities. The sound reinforcement system, and ADA considerations are a county responsibility. Software and equipment dedicated for the purpose of digital recording of court proceedings is a state responsibility. A deficiency in the funding source at the state or county level, may impact the court's ability to purchase and maintain its digital court recording system.

Recommendation 1B – State and County Obligations – It is recommended that a document be created outlining due process technology funding obligations as defined per Florida Statutes 29.008 so as to clearly delineate between discrete level state and county obligations for planning, budgeting, and auditing purposes. This document should be updated each year to reflect statutory/rule changes.

II. Continued Digital Court Reporting Expansion Plan

Issue: A long term plan for continued digital court reporting technology expansion is needed to guide the trial courts in determining the extent of future expansion of digital court reporting technology.

Recommendation 2A – Future Digital Expansion - For purposes of expanding DCR functionality consistent with the goals and objectives outlined in the Trial Court Performance and Accountability Commission's February 2005 report, it is recommended the trial courts seek funding to support the purchase and installation of digital court reporting equipment for those courtrooms and hearing rooms that hold proceedings that are required to be recorded at state expense.

Results of a September 2008 trial court survey indicate the trial courts have a remaining statewide total of 133 courtrooms and 39 hearing rooms without digital court reporting capacity. These room figures are reflected in the following table and exclude new construction projects beyond those set for completion during FY 2009-10.

| Circuit | Courtrooms | Hearing Rooms | Circuit | Courtrooms | Hearing Rooms |
|---------|------------|------------------|-------------|------------|------------------|
| 1 | 3 | I | П | 29 | 0 |
| 2 | П | 0 | 12 | 0 | 0 |
| 3 | 3 0 | | 13 | 11 | 0 |
| 4 | 12 | 0 | 14 | 0 | 0 |
| 5 | 8 | 10 | 15 | 12 | 3 |
| 6 | 8 | 4 | 16 | 0 | 0 |
| 7 | 2 | 0 | 17 | 27 | 0 |
| 8 | 0 | 0 | 18 | 0 | 0 |
| 9 | 0 | 0 | 19 | 4 | 2 |
| 10 | 0 | 14 | 20 | 6 | 0 |
| | | | State Total | 133 | 39 |

Recommendation 2B – 3 Year Phase In Plan - It is recommended that funding for an additional 133 courtrooms and 39 hearing rooms be requested/allocated using a 3 year phased in approach. This will provide ease for circuits as they deal with budget, staffing, and planning constraints associated with installation. Annual circuit distribution should be based upon circuit requests. If circuit requests exceed the total annual appropriation, allocations should be prioritized based on level of impact to each circuit court's operation.

| | | Courtroom Est. | Hearing | Hearing Room | Total Est. Annual |
|-------|------------|----------------|---------|--------------|-----------------------|
| Year | Courtrooms | Costs | Rooms | Est. Costs | Expansion Cost |
| 1 | 45 | \$1,035,225 | 13 | \$204,464 | \$1,239,689 |
| 2 | 44 | \$1,012,220 | 13 | \$204,464 | \$1,216,684 |
| 3 | 44 | \$1,012,220 | 13 | \$204,464 | \$1,216,684 |
| Total | 133 | \$3,059,665 | 39 | \$613,392 | \$3,673,057 |

Note: Costs were estimated based on average standard costs (listed under Recommendation 1). Average standard costs for courtrooms/hearing rooms are: Courtroom \$23,005; Hearing Room \$15,728. These estimates do not include on-going staffing, maintenance or refresh costs.

III. Change Management

Issue: It should be determined when it is reasonable to change vendors, and how hardware and software may be tracked and transferred for another circuit's use.

DCR Vendors. There are circumstances in which circuits have requested to change vendors. Based on the results of an October 2008 survey, we can summarize the main reasons circuits may request to change vendors:

- 1. <u>Cost effectiveness</u> current vendor is not as cost effective as other vendor choices.
- 2. <u>Technical support</u> current vendor does not provide timely/adequate support resulting in continuous downtime for court proceedings.
- 3. <u>Budget and pricing</u> current vendor costs exceed available budget amounts requiring other options to be considered.
- 4. <u>Software research and development</u> as continued development of a product is important to long term success, vendors that do not put efforts into improving their software can result in: software becoming static and dated; software being unable to fully engage the benefits of new hardware and peripheral software; and increased costs since legacy parts and support for related software may be expensive or unavailable.
- 5. <u>Company dissolve</u> current vendor becomes defunct and the court is now vulnerable due to lack of continued support.

Hardware used from vendor to vendor is fairly consistent. Due to this, as circuits change vendors, investments to purchase hardware are minimally impacted. The majority of costs associated with changing vendors are due to the need to purchase new software licensing. Although, hardware investments may be needed if a circuit is changing from a distributed to a centralized model.

When a vendor has little market competition and already has a sizeable portion of the market, they have little motivation to continue the development of their product, reduce costs, or provide excellent services. Mediocrity is thwarted through competition. Therefore, the ITN should function as the main tool for 1) negotiating reasonable market prices for software licensing and services, 2) providing a mechanism to ensure vendors meet the standards set by the Florida Courts Technology Commission (FCTC) 3) provide a service oriented relationship with the vendor that motivates the vendor to provide excellent services through accountable reporting and review of services, 4) provide means to sanction vendors that are not providing services according to set service levels and associated response times, and 5) provide a mechanism for new vendors and technologies to be introduced to the Florida Court System. As long as the vendor has met the requirements outlined through the ITN process, the circuits will be in the best position to evaluate and match their needs to vendors and the services they provide.

Recommendation 3A – Approved DCR Vendors - Vendors that provide court reporting technology and services must meet the technical and functional standards established by the FCTC. Approved vendors must have been awarded a state contract through the ITN or other official Office of the State Courts Administrator (OSCA) process.

Given the importance of the ITN and Technical and Functional Standards, 1) the OSCA should reevaluate the ITN every 3 years, and 2) the FCTC should set a schedule to update the Court Reporting Technical and Functional Standards.

Recommendation 3B – Changing DCR Vendors - If a circuit wishes to change vendors, it is recommended that the circuit file a special issue request for the TCBC's consideration/approval.

Software and Hardware Transfers. Software purchased with state funds should be made available (as needed) for usage anywhere in the state. Presently, serial tracking numbers are not being assigned to licenses. Rather, invoices are being relied upon to track purchased licenses. It is recommended that OSCA track purchased licenses and current assignments. As the needs of the circuits change, the licenses may be redistributed accordingly. This will avoid the undue expense of purchasing unnecessary additional licenses, and will allow for the improved utility of licenses already purchased.

There are already procedures in place to document hardware purchases and to request transfer, disposal, or donation of hardware equipment. The transfer of hardware within the state is already tracked with documentation consistent with state property requirements. As state equipment may be used anywhere in the state, location assignments of state purchased hardware should be maintained/updated. County purchased hardware must follow the local county procedures for general assets. For state transfers, the OSCA/ISS should review court reporting equipment related transfers to monitor/ensure equipment is utilized until it reaches the end of its useful life, and that transfers are not conducted as a means to circumvent replacement schedules.

Recommendation 3C – Hardware and Software Transfers – A formal procedure for tracking both state purchased court reporting hardware and software licenses is recommended for purposes of properly managing equipment usage and possible reassignment within the Florida Judicial Branch. Hardware transfers should be monitored by the OSCA/ISS. The OSCA/ASD (Administrative Services Division) should also be notified of transfers so as to make the appropriate adjustments to State property records. Software license transfers should be tracked per the Software Transfer Recommended Methodology outlined in this report (below).

Software Transfer Recommended Methodology:

- 1. OSCA/ISS must maintain a statewide repository that contains a software license inventory.
- 2. OSCA/ISS must assign a unique software identification number to each license for tracking purposes. This unique identification will be provided by vendors. Vendors must assign a unique serial number for each license purchased by the Florida Court System.
- 3. As each circuit frees up licenses that are no longer in use, they must notify OSCA/ISS to identify and release the licenses for redistribution.
- 4. OSCA/ISS will list the number of licenses available for redistribution on an established web page.
- 5. Circuits may submit requests for licenses to OSCA/ISS, and requests will be considered on a first come/first serve basis.
- 6. OSCA will create a process for advanced reservation of available licenses to be reviewed and considered on a case by case basis.

IV. Life Cycle Management

Issue: A guideline for when equipment should be regularly replaced shall be determined, so this cost may be estimated for budgeting purposes.

Hardware Replacement Schedule. After reviewing input from circuits, the following recommended refresh schedule for hardware replacement is provided in the table below. This table contains both state and county obligations related to the overall functionality of a court reporting system.

Recommendation 4A – Hardware Replacement Schedule – A hardware replacement schedule is recommended for the projection of future costs and for the evaluation of circuit funding requests (below).

| Hardware Replacement Schedule | |
|--|-----------|
| ITEM | SCHEDULE |
| Servers | |
| Primary Server – centralized model | 3 years |
| Secondary Server – centralized model | 3 years |
| Primary Server – decentralized model | 4-5 years |
| Secondary Server – decentralized model | 4-5 years |
| Video Server | 4 years |
| Digital A/V | |
| Digital matrix mixers | 6 years |
| Cameras | 5 years |
| Encoders | 6 years |
| Bench Control Panel | 5 years |
| Handheld Digital Recorder | 3 years |
| Analog A/V | |
| Microphone | 5 years |
| Tape machine | 7 years |
| Amplifier | 7 years |
| Bench Control Box | 7 years |
| Speakers (sound system) | 10 years |
| Cameras | 5 years |
| Workstations | |
| Networked Monitoring Workstation | 4 years |
| Transcription Workstations | 4 years |
| Standalone workstation or laptop | 3 years |
| Computer monitors | 5 years |
| Stenograph Equipment | |
| Stenograph Machine | 5 years |
| Stenograph Laptop | 3 years |
| Stenograph secondary recorder system | 3 years |
| Other Computer Hardware | |
| UPS (uninterruptible power supply) | 3 years |
| Headsets | 2 years |
| Foot Pedals | 4 years |

Equipment requests that do not fall within the replacement schedule table should be considered a contingency, and funded through the contingency fund process outlined in the contingency section.

To determine if a recurring statewide fund could be established per the recommended refresh schedule, an analysis of the current technology inventory was performed to try to determine a statewide annual average refresh percentage. Unfortunately, results from this analysis indicate significant disparity in the annual statewide funding needs as per the recommended refresh schedule. Therefore, a recurring statewide fund could not be determined at this time.

Further, since hardware will be refreshed at unbundled rates, it is necessary to obtain inventory and ITN data at discrete levels (comparable to the refresh schedule). Once this information is available, a percentage of initial costs may then be determined to adequately estimate funding for refresh (per annual basis). Funding should be distributed to the circuits based on analysis of the inventory and replacement schedule.

Recommendation 4B – Hardware Replacement Costs – It is recommended that inventory and ITN costs be reported at discrete levels comparable to the refresh schedule (unbundled) so as to better determine refresh costs. Refresh should be based on current industry pricing and as such, a percentage applied to initial costs should be determined. Until such time a percentage can be determined, circuit requests for refresh will be evaluated based on initial hardware costs and the hardware replacement schedule as outlined in this report (above).

Recommendation 4C – Replacement of Analog Tape Recorders – For purposes of refreshing existing equipment consistent with the recommendations as outlined in the TCP&A's October 2007 report, it is recommended analog tape recorders utilized for the primary recording of proceedings required to be recorded at state expense (upon needing replacement) be replaced by digital recorders.

Software Lifecycles. Software lifecycles are managed through various methods:

- 1. <u>Software assurance/maintenance</u> an agreement where software fixes, patches, and upgrades are included for a defined period of time.
- 2. <u>Enterprise Agreements</u> similar to software assurance but also allows for alpha and beta testing, and may have other features such as training vouchers, knowledge base for troubleshooting, and a special vendor assistance features.
- 3. <u>Purchases</u> purchase of new software licensing to replace existing license

Much of the software used is covered by county software purchases and agreements. The primary state obligated costs for software are specific to digital court recording related licenses.

V. Maintenance

Issue: The approach in which circuits maintain court reporting systems varies across the state depending on the availability of local resources and chosen vendor. A review of each circuit's court reporting maintenance model should be conducted to determine if opportunities exist to reduce costs.

Maintenance, for purposes of this document, refer to the recurring cost to provide contractual services in order to maintain, repair, patch, and upgrade hardware and software that is used for court reporting After reviewing historical expenditures it appears on-going maintenance costs are approximately 12% to 15% of initial hardware and software costs. This takes into account circuits who more heavily utilize in-house employees (county funded) to offset some of the state costs for maintenance and others who rely more heavily on contracted services (state funded) due to lack of county funded staff. Overall, the use and availability of in-house staff to provide direct or supportive maintenance to hardware and software reduces the recurring costs and improves response time. Inhouse employees are limited in their capacity to support and maintain proprietary software purchased from a vendor due to intellectual property limitations. Agreements with the vendor are necessary when addressing software related issues. Levels of agreements range from time and materials type maintenance to full service level support contracts with automatic software patches and upgrades. Having disparate maintenance approaches is necessary due to the different levels of local technology support, various types and sizes of court reporting technology systems, and expectations from the local circuit that may be above and beyond the minimum requirements set forth by the court reporting technical and functional standards.

Recommendation 5 – Maintenance - A simple 13% funding formula applied to initial hardware and software costs (excluding installation/training costs) is recommended to assess the required budgetary amount needed to support the maintenance of court reporting technology hardware and software.

VI. Contingency Planning and Funding

Issue: There needs to be a method to deal with unplanned failures or other major events that arise unexpectedly and may not have been adequately budgeted for, which may impact court reporting operations.

Set replacement schedules are a good predictor of future costs, however, they do not cover unexpected contingencies. A funding source should be established to cover contingencies related to power issues, unexpected equipment failures, software failures, or other disrupted event that was unforeseen. If a remaining balance exists towards the end of the fiscal year, these funds may be allocated for expansion purposes, open source development, or other needs identified by the circuits as determined by the TCBC.

The need for contingency funds will increase if proper replacement schedules are not funded.

Recommendation 6 – Contingency Planning and Funding - A break-fix contingency fund of \$100,000 should be obtained (pooled) for all circuits for emergency/unforeseen failures of court reporting technology. To receive an allocation from this fund, circuits will need to file a special issue request for the TCBC's consideration. Allocations should be approved based on similar current operating procedures/TCBC budget policies.

VII. Data Collection and Analysis

Issue: Presently, the method of collecting data on court reporting hardware and software resources has been dependent upon the completion of an excel spreadsheet by each circuit. Upon completion, circuits submit an annual asset inventory in the form of excel spreadsheet to the OSCA for compilation and analysis. OSCA maintains the inventory spreadsheets using SAS (Statistical Analytical Software).

With the development of new technical and budgetary policies as outlined in this document, the methods of data collection will need to be improved so as to create a more conducive platform in which to collect data and conduct more rigorous analyses. Further, with the growing usage of court interpreting technology, the data collection platform should be expanded to capture and maintain data for all due process related technology.

Recommendation 7A – Data Collection and Analysis - It is recommended that a more robust database platform be developed/utilized to collect data related to all due process technology. This platform should allow each circuit to maintain data throughout the year (as dynamic) with an annual certification (data freeze) completed in the spring, so the most current information may be used for the development of the LBR. Data collected should provide the functionality as outlined in this report (below).

Database Functionality:

- 1. Provide state-wide access for updating and viewing. Access may be controlled by assigning user profiles and access codes.
- 2. Maintain levels of data that allow for budgetary analysis and assessment of current assets based on age and other factors.
- 3. Data should include an asset inventory a basic inventory of hardware and software that may include serial numbers, property numbers, age of equipment, and any related purchasing history that may be used to conduct analysis to estimate the budget for the refresh schedules.
- 4. Data should include details related to software licenses, so use and assignment of that license may be tracked.
- 5. Functionality should include standard reports for use by OSCA and the trial courts as well as the ability to provide ad hoc reports as needed.

Issue: Currently, inventory data collection efforts and ITN vendor negotiation processes are being conducted in the fall, which is after the LBR has been submitted.

Recommendation 7B – Timeline for Data Collection and ITN - It is recommended that the annual court reporting technology data certification and ITN processes be conducted (during spring) to correspond with the legislative budget cycle.

VIII. Future Considerations for Cost Efficiencies

Regional Support Staff. As needs for due process technology grow, the issue of state funded technical support may need further examination. Although technology is funded primarily by the counties, there is a distinction in due process areas. Regional technical support to support court reporting systems may be an opportunity to provide specialized skills to a broader

geographic area, and reduce recurring costs. Having regional support may offer faster response times than DCR vendor support contracts, and reduce DCR vendor annual maintenance costs.

Recommendation 8A – State Funded Technical Staff for Due Process Technology Support - If funding becomes available, it is recommended that the TCBC consider approving requests for additional funding in support of regional technical support staff.

Open Source Software. There are many advantages to open source software. The primary benefit is lower costs for licensing. The only costs associated with open systems include software change management and may involve some contracted services to maintain and improve the software code. Another benefit is that the application may be shared with other states, which may in turn also share in the cost and effort towards maintaining the software.

Cost Benefit Analysis (778 Courtrooms; 214 Hearing Rooms)

| | Prop | orietary Software | Open Source | ce Software |
|-----------------------|-----------------|-----------------------|--------------------------|------------------------|
| Investment | | Estimated Total Costs | Estimated Total Costs | |
| | Average Per | (778 Courtrooms; 214 | (778 Courtrooms; 214 | |
| | Room Cost | Hearing Rooms) | Hearing Rooms) | Return on Investment |
| | \$10,500 | | | |
| | Courtroom; | | | |
| Initial Purchase Cost | \$9,000 | | \$150,000 (two year cost | \$9,795,000 (after two |
| (Non-Recurring) | Hearing Room | \$10,095,000 | for development) | years) |
| | \$1,365 | | | |
| | Courtroom; | | | |
| Maintenance and | \$1,170 | | | |
| Upgrade Costs | Hearing Room | | \$200,000 (annual for | |
| (Annual Recurring | (13% of initial | | contract consultants or | |
| Cost) | purchase cost) | \$1,312,350 | programmer 3 FTE) | \$1,112,350 |

Note: Total Rooms (778 Courtrooms; 214 Hearing Rooms) is based on Number of Courtrooms (645)/Hearing Rooms (175) Integrated with Digital Court Reporting as reported by the circuits via the *Court Reporting Circuit Profiles, February 2007* and Number of Courtrooms (133)/Hearing Rooms (39) remaining to be outfitted with digital capacity as listed under Recommendation 2.

Recommendation 8B – Open Source Software Development - It is recommended that the development of open source software be permitted contingent upon open source software being developed based on the principles outlined in this report (below).

"Open source is a development method for software that harnesses the power of distributed peer review and transparency of process. The promise of open source is better quality, higher reliability, more flexibility, lower cost, and an end to predatory vendor lock-in." (Source).

Tenets of Open Source are listed below (Coar):

1. Free Redistribution

The license shall not restrict any party from selling or giving away the software as a component of an aggregate software distribution containing programs from several different sources. The license shall not require a royalty or other fee for such sale.

2. Source Code

The program must include source code, and must allow distribution in source code as well as compiled form. Where some form of a product is not distributed with source code, there must be a well-publicized means of obtaining the source code for no more than a reasonable reproduction cost preferably, downloading via the Internet without charge. The source code must be the preferred form in which a programmer would modify the program. Deliberately obfuscated source code is not allowed. Intermediate forms such as the output of a preprocessor or translator are not allowed.

3. Derived Works

The license must allow modifications and derived works, and must allow them to be distributed under the same terms as the license of the original software.

4. Integrity of the Author's Source Code

The license may restrict source-code from being distributed in modified form only if the license allows the distribution of "patch files" with the source code for the purpose of modifying the program at build time. The license must explicitly permit distribution of software built from modified source code. The license may require derived works to carry a different name or version number from the original software.

5. No Discrimination Against Persons or Groups

The license must not discriminate against any person or group of persons.

6. No Discrimination Against Fields of Endeavor

The license must not restrict anyone from making use of the program in a specific field of endeavor. For example, it may not restrict the program from being used in a business, or from being used for genetic research.

7. Distribution of License

The rights attached to the program must apply to all to whom the program is redistributed without the need for execution of an additional license by those parties.

8. License Must Not Be Specific to a Product

The rights attached to the program must not depend on the program's being part of a particular software distribution. If the program is extracted from that distribution and used or distributed within the terms of the program's license, all parties to whom the program is redistributed should have the same rights as those that are granted in conjunction with the original software distribution.

9. License Must Not Restrict Other Software

The license must not place restrictions on other software that is distributed along with the licensed software. For example, the license must not insist that all other programs distributed on the same medium must be open-source software.

10. License Must Be Technology-Neutral

No provision of the license may be predicated on any individual technology or style of interface.

FLORIDA JUDICIAL BRANCH

Court Reporting Services

Office of the State Courts Administrator, Court Services

Florida Supreme Court Building 500 South Duval Street Tallahassee, FL 32399-1900 Phone: 850-922-5094 Fax: 850-414-1342 www.flcourts.org

INTRODUCTION

In 2005, the Commission on Trial Court Performance and Accountability (TCP&A) approved the annual publication of the *Court Reporting Services Circuit Profiles*. This publication was created for the purpose of providing court managers with easy access to information on court reporting programs within Florida's trial courts. Each circuit profile contains court reporting circuit specific information such as fiscal allotments, staffing models, service delivery models, digital logistics, measurable workload outputs, contractual rates, and network configurations.

In Florida's trial courts, court reporting programs have evolved over the last decade as the trial courts have adjusted to changes in the funding structure. Prior to 2004, court reporting programs were funded by the counties and because some counties provided more funding than others, significant variations existed in the delivery of services across the state. Upon the implementation of Revision 7 to Article V of the Florida Constitution in 2004, circuits transitioned to being funded by the state. This funding shift allowed for equity in service delivery across the circuits and thus, enabled the trials courts to work systematically towards similar court reporting goals. Since then, the courts have been working steadily to improve the effectiveness and efficiency of court reporting services statewide. To keep pace with evolving court reporting programs, the profiles serve as a resource tool as we continue to explore and implement best business practices.

In addition to the court reporting circuit profiles, the TCP&A has issued three reports to help guide the circuits on the most efficient and effective management of court reporting services. The first report issued in December 2002 in preparation for Revision 7 addresses the purpose, legal necessity, delivery methods, costs, and performance measurement of court reporting services. The second report issued in February 2005 outlines a *Statewide Plan for Effective Use and Management of Court Reporting Services*. This plan provides overall goals, objectives, and strategies for court reporting services in Florida's trial courts post-Revision 7. The third report issued in October 2007 titled, *Recommendations for the Provision of Court Reporting Services in Florida's Trial Courts* provides several standards of operation and best practices aimed at improving the efficient and effective functioning of court reporting services. This report also includes proposed rule and statute revisions. These reports may be viewed on the State Courts System's website at: http://www.flcourts.org/qen_public/court_reportingPandA.shtml.

To assist in reviewing the information contained in each profile, the following definitions (listed in the same order they appear on the profile) are provided:

Circuit-Wide Fiscal Allotments FY 2007-08 – Indicates original FY 2007-08 allotments after Special Session C budget reductions. This includes state funded recurring general revenue (GR) and trust authority. FTE amounts are listed by funding type (GR and trust authority). Budget amounts are listed by funding type (GR and trust authority) as well as by budget category (salaries, benefits, expenses, contractual, maintenance, total paid to clerks, cost recovery, and cost sharing).

Filings Recorded at Public Expense – Refers to the number of SRS (Summary Reporting System) filings for case types that are required to be recorded at public expense. This includes felony, domestic violence, repeat violence, guardianship, Baker Act, substance abuse, delinquency, dependency, TPR (Termination of Parental Rights), misdemeanor, worthless checks, county ordinances, municipal ordinances, DUI, and other criminal.

Unit Cost – Refers to the sum of August 2007 projected total salaries, benefits, expenses, contractual, and clerk allocations, reduced by cost sharing authority if applicable, divided by the number of FY 2005-06 filings recorded at public expense.

Overall Staffing Model – Indicates the staffing model(s) used to deliver court reporting services by county. There are three types of staffing models: 1) Pure employee model, 2) Pure contractual model, and 3) Hybrid model which includes both employee and contractual models.

Clerk of Court Staff Usage – Indicates whether or not clerk of court staff are utilized to assist in the delivery of court reporting services by county.

Transcript Services Model - Indicates the entities (i.e., State Attorney, Public Defender, or Justice Administrative Commission) in which a circuit has a shared cost arrangement for court reporting transcription services. Under a transcript services model, transcription services are provided to one or more of these entities using court resources in exchange for funds to cover the cost of transcription services. These funds are transferred to the court's budget at the state level and cost sharing authority is allocated to the participating circuits.

Monitoring Ratio (Overall) – The row labeled Monitoring Ratio (Overall) indicates the overall monitoring ratio for all types of proceedings combined by county. Subsequent rows indicate the monitoring ratio for each type of proceeding by county. Monitoring ratio is defined as the average number of proceedings monitored simultaneously per court employee and contractual staff (number of proceedings vs. court reporters). Monitoring ratios consider time to monitor and tag proceedings. Time for production of transcripts is not considered.

Classifications (Total FTE Employees) – Indicates the total number of state funded court reporting FTEs by classification and by county in which they are headquartered.

Service Delivery – Indicates the service delivery type(s) used to deliver court reporting services for each type of proceeding by county. The following is a description of each service delivery type:

<u>Steno</u> – Refers to a stenograph machine that is operated by a court reporter. A court reporter, by pressing a system of keys, creates a series of letters and numbers that are printed on a scrolling paper tape.

<u>CAT</u> – Refers to computer-aided transcription in which a computer is added to stenograph machine allowing

keystrokes to be recorded on a disk or in the internal memory of a computer, as well as on paper tape.

<u>Real-Time</u> - Known as real-time stenography, a court reporter uses a CAT system to translate a digitized record contemporaneously, producing an unedited written document as the proceeding occurs. The unedited text can be viewed immediately, and later corrected by the stenographer. The speed and quality of this type of system is familiar to anyone who has followed the closed caption text of a live television program.

<u>Analog Audio</u> – Refers to analog audio recording technology such as a tape recorder used to directly capture and preserve actual sounds of spoken words. Analog audio recordings are stored on magnetic or analog (cassette) tape.

<u>Analog Video</u> - Refers to analog video cameras used to capture actual sounds as well as video. Analog video recordings are stored on magnetic or analog (VHS) tape.

<u>Digital</u> – Refers to audio, and often video, recording of a court proceeding using digital technology that may be saved to a CD, DVD, network drive, or server. There are generally four distinctions of digital:

- 1. <u>Digital Portable</u> Refers to recording technology such as laptops, hand-held devices, MP3 players, etc. to record court proceedings. Digital portable recordings may be stored digitally on a server, CD or DVD.
- 2. <u>Digital Local</u> Commonly referred to as the 'courtroom model', digital local utilizes stationary digital systems such as desktops or stand-alone servers to record proceedings in the courtroom or hearing room. This model requires a court reporter to be present in the courtroom to operate the system. The court reporter 'monitors' the recording by logging speakers, making notations of who is present, checking sound quality, and providing playback when directed to do so by the judge. This form of monitoring is referred to as 'local monitoring' because the court reporter is physically present in the courtroom to monitor the recording.
- 3. <u>Digital Central</u> The digital central model utilizes a local area network to allow court reporters to monitor proceedings from a remote room located within the same building. Under this model, monitor workstations are placed in a central control room to allow staff to operate audio/video equipment located in the courtroom. By integrating courtrooms to the central control room via a network, digital court reporters are capable of monitoring several courtrooms at once. This form of monitoring is referred to as 'central monitoring'.
- 4. <u>Digital Remote</u> The digital remote model utilizes the same type of equipment as the 'central model' however, court reporters monitor proceedings from a remote room located in a different building over a wide area network. This form of monitoring is referred to as 'remote monitoring' because the court reporter is monitoring 'remotely' from a different building.

<u>Voice Writing</u> – Refers to a court reporter who records words spoken in a court proceeding by speaking directly into a voice silencer, which is a hand-held mask containing a microphone.

Number of Facilities - Refers to the total number of buildings where court proceedings are conducted. This includes judicial centers, jails, etc.

Total Courtrooms – The row labeled <u>Total Courtrooms</u> refers to the total number of courtrooms in each county. A courtroom is defined as a formal space in which a judge regularly holds court proceedings. In the trial courts, courtrooms include a bench, witness stand, jury box, a table for the plaintiff and the defendant, and other necessary amenities such as podiums or miscellaneous desks. The <u>Digital Local</u> row indicates the total number of *courtrooms* where court proceedings are primarily locally monitored by staff in the same room. The <u>Digital Central</u> row indicates the total number of *courtrooms* where court proceedings are primarily centrally monitored by staff located in a central control room within the same building (internally within same courthouse). The <u>Digital Remote</u> row indicates the total number of *courtrooms* where court proceedings are primarily remotely monitored by staff located in a central control room from a separate building (externally courthouse to courthouse).

Total Hearing Rooms – The row labeled <u>Total Hearing Rooms</u> refers to the total number of hearing rooms in each county. A hearing room is defined as a room (judge chamber, conference room, etc.) that is utilized typically for conducting civil (non-criminal) proceedings. Hearing rooms have no requirements for prisoner handling, are smaller in scale, and have a variety of agency specific support space requirements that differ from courtrooms. The <u>Digital Local</u> row indicates the total number of *hearing rooms* where court proceedings are primarily locally monitored by staff in the same room. The <u>Digital Central</u> row indicates the total number of *hearing rooms* where court proceedings are primarily centrally monitored by staff located in a central control room within the same building (internally within same courthouse). The <u>Digital Remote</u> row indicates the total number of *hearing rooms* where court proceedings are primarily remotely monitored by staff located in a central control room from a separate building (externally courthouse to courthouse).

Percent of Courtrooms & Hearing Rooms w/Digital Recording Technology – Refers to the percent of total courtrooms and hearing rooms integrated and configured with digital local, digital central, and digital remote technology. This percentage does not include rooms covered by digital portable hand-held devices and laptops.

Total Digital Portable Units – Indicates the total number of digital portable hand-held devices and laptops used to record court proceedings.

Total Monitor Workstations – Refers to a collection of technology components that have been built into one workstation to enable staff to monitor recordings in courtrooms or hearing rooms from a remote room (central control room) via a court's distributed local, metropolitan or wide area network. Monitoring workstations allow a person to monitor, capture, and in some cases play back recordings of court proceedings, from a central control room as well as view live images of at least four rooms on a single display. Desktops and workstations that are located directly in a courtroom or hearing room as part of a digital local model are not included.

Total General Court Reporting Desktops - Refers to a stationary desktop computer that is primarily used for the purpose of providing non-monitoring court reporting services such as transcript production, file transfers, etc.

Total Primary Servers – Refers to hardware computer systems that are used to provide one or more services to other users (clients) or devices on the network or internet. Examples include: encoding servers, video servers, etc.

Total Secondary Servers – Refers to hardware computer systems that serve as back up to the primary server, but also preserve records created during the life of an organization for long-term preservation. Examples include: archive servers, back up servers, etc.

Digital Court Reporting Vendor – Refers to the digital court reporting vendor(s). Currently, four vendors are on state contract: JAVS (Jefferson Audio Video Systems), FTR (For The Record), CourtSmart, and USF (University of South Florida).

Digital Court Reporting Central and Remote Monitoring Network Diagram - Refers to the operational aspects of a circuit's digital court reporting central and remote monitoring network. For each court venue, the number of rooms monitored centrally and remotely is indicated. For example, if a room is monitored centrally on a regular basis, it is listed as 'central monitored room'. If a room is monitored remotely on a regular basis, it is listed as 'remote monitored room'. The number of monitor workstations and servers integrated as part of the

central and remote monitored network are also included. However, non-integrated devices, digital portable and digital local monitored rooms are not captured in this diagram unless otherwise indicated by the circuit.

Summary UDR FY 2006-07 Circuit-Wide – Refers to the summary of a circuit's total court reporting Uniform Data Reporting statistics for FY 2006-07.

<u>Number of Hours</u> – Indicates, for the proceeding types listed, the total number of hours recorded for each type of service delivery model. This does not include hours recording depositions, traveling, taking long breaks, or when a reporter appears for an event and no record is taken.

<u>Number of Pages</u> – Indicates, for the proceeding types listed, the total number of transcript pages produced for each entity requesting transcripts from the courts. This does not include transcript copies made or deposition transcriptions.

<u>Number of Media Provided (CD, Audio or Video)</u> – Indicates the total number of CDs, DVDs, cassette tapes, and video tapes provided to each entity requesting media from the courts. This does not include number of media provided to judges, court staff, or for archival purposes.

Additional Information – Refers to any caveats related to the profile's contents or additional information that may be unique to the circuit's court reporting program.

Contractual Service Providers – Circuit-Wide Fee/Rate Structure – Indicates the rates and/or rate ranges the circuit has established for the payment of contract vendor steno and digital appearances and for the payment of contract vendors providing steno and digital transcription services.

Note: Absent an allocation of additional positions to manage the day-to-day operations in Clay & Nassau Counties, we have to rely on Clerk of Court staff to manage the day-to-day operations in those counties. In FY 08/09, Contractual staff will monitor Clay Co. proceedings instead of Clerk staff. Contractual staff will also handle other digital recording duties in Duval County where there is only one FTE employee.

Fifth Judicial Circuit FY 2007-08

Digital Court Reporting Central & Remote Monitoring Network

Note: Not depicted in this diagram is the remote monitoring capability from each of the outlying counties. Staff located in outlying counties may monitor central/remote courtrooms of other counties. Circuit utilizes this capability on an as needed basis (back-up).

Network Lines:

State Courts System Network Line MAN
Circuit Court Network Fiber

Note: Arrows at network line endpoints indicate direction of remote monitoring use. No arrow indicates no remote monitoring at this time, although all courtrooms listed are capable of remote monitoring.

Sixth Judicial Circuit FY 2007-08

Court Reporting Central and Remote Network

As of January 2008

Note: The Circuit utilizes remote-monitoring capabilities between Pinellas and Pasco Counties on an as-needed basis (for backup purposes). In Pinellas County, St. Petersburg and Clearwater have the ability to remote-monitor the Criminal Justice Center and the Criminal Justice Center has the ability to remote-monitor Clearwater. Primary monitoring is performed by on-site staff with the exception of the traffic courts, which are remote-monitored from the Criminal Justice Center.

^{*} Calculations of staffing ratios by county and division is problematic. Steno staff are headquartered in specific counties, but cover Circuit Criminal and TPR proceedings in multiple counties. Likewise, digital staff are headquartered in specific counties, but monitor proceedings across county lines and cover multiple divisions.

Digital Court Reporting Central & Remote Monitoring Network

Note: Circuit utilizes remote monitoring capabilities between Charlotte, Collier and Lee on an as needed basis (back-up). Currently, Charlotte/Collier are capable of monitoring Lee; and Lee is capable of monitoring Charlotte/Collier. Charlotte & Collier are 100 Mb Ethernet; Glades & Hendry are 10 Mb (provided by Lee county & the state).

Note: Arrows at network line endpoints indicate direction of remote monitoring. No arrows indicate no remote monitoring at this time.

SCHEDULE IX: MAJOR AUDIT FINDINGS AND RECOMMENDATIONS Budget Period: 2009-2011

Department: State Courts System Chief Internal Auditor: Ken Chambers

Budget Entity: 22300100 **Phone Number:** 488-9123

| (1) | (2) | (3) | (4) | (5) | (6) |
|--------------|------------|--|---|--|-------|
| REPORT | PERIOD | | SUMMARY OF | SUMMARY OF | ISSUE |
| NUMBER | ENDING | UNIT/AREA | FINDINGS AND RECOMMENDATIONS | CORRECTIVE ACTION TAKEN | CODE |
| AG #2010-055 | 12/31/2008 | Florida Uniform Caseload Reporting System | Finding: The varied systems used by the Clerks of Court, State Attorneys, and Public Defenders did not alllow for comparability, and were duplicative and inefficient. Recommendation: The Surpeme Court, State Attorneys, and Public Defenders should work with Legislature, judges, and other users of the data to explore the possibility of jointly developing one statewide system that would provide timely, accurate, and reliable data in a more efficient and effective manner. | The Office of State Courts Administrator is always prepared to work with the State Attorneys and Public Defendors to improve interoperability. Currently, there appears little desire to align data systems. This is primarily due to the fact that each entity has a system that works for them. Thus, it is difficult to justify dedicating the manpower and cost to redesign systems for interoperability. It should also be noted that the Legislature's Technology Review Workgroup issued a report on this issue in February 2010. The report is an extensive study that documents the complexities of integration and mutiple strategies for implementation. The Legislature did not act upon the report recommendations during the 2010 Legislative Session. | |

Fiscal Year 2011-12 LBR Technical Review Checklist (Rev. 10-13-2010)

Department/Budget Entity (Service):

Agency Budget Officer/OPB Analyst Name:

A "Y" indicates "YES" and is acceptable, an "N/J" indicates "NO/Justification Provided" - these require further explanation/justification (additional sheets can be used as necessary), and "TIPS" are other areas to consider

| | icates "YES" and is acceptable, an "N/J" indicates "NO/Justification Provided" - these require ecessary), and "TIPS" are other areas to consider. | | | | (Budget Enti | | |
|---------|---|----------|-------------|------------|--------------|-------------|------------|
| | Action | 22010100 | 22010200 | 22100600 | 22300100 | 22300200 | 22350100 |
| 4 (77) | | | | | | | |
| 1. GEN. | ERAL Are Columns A01, A02, A04, A05, A36, A90, A91, A92, A93, A94, A95, IA1, | | | | | | |
| | IA4, IA5, IP1,V1, IV3 and NV1 set to TRANSFER CONTROL for DISPLAY status and MANAGEMENT CONTROL for UPDATE status for both the Budget and Trust Fund columns? Are Columns A06, A07, A08 and A09 for Fixed Capital Outlay (FCO) set to TRANSFER CONTROL for DISPLAY status only? (CSDI) | Y | Y | Y | Y | Y | Y |
| 1.2 | Is Column A03 set to TRANSFER CONTROL for DISPLAY and UPDATE status for both the Budget and Trust Fund columns? (CSDI) | Y | Y | Y | Y | Y | Y |
| AUDITS | | | | | | | |
| 1.3 | Has Column A03 been copied to Column A12? Run the Exhibit B Audit | ₹7 | X 7 | X 7 | X 7 | X 7 | X 7 |
| | Comparison Report to verify. (EXBR, EXBA) | Y | Y | Y | Y | Y | Y |
| 1.4 | Has security been set correctly? (CSDR, CSA) | Y | Y | Y | Y | Y | Y |
| TIP | The agency should prepare the budget request for submission in this order: 1) Lock columns as described above; 2) copy Column A03 to Column A12; and 3) set Column A12 column security to ALL for DISPLAY status and MANAGEMENT CONTROL for UPDATE status. | | | | | | |
| 2. EXH | IBIT A (EADR, EXA) | | | | | | |
| 2.1 | Is the budget entity authority and description consistent with the agency's LRPP and does it conform to the directives provided on page 56 of the LBR Instructions? | Y | Y | Y | Y | Y | Y |
| 2.2 | Are the statewide issues generated systematically (estimated expenditures, nonrecurring expenditures, etc.) included? | Y | Y | Y | Y | Y | Y |
| 2.3 | Are the issue codes and titles consistent with <i>Section 3</i> of the LBR Instructions (pages 15 through 27)? Do they clearly describe the issue? | Y | Y | Y | Y | Y | Y |
| 2.4 | Have the coding guidelines in <i>Section 3</i> of the LBR Instructions (pages 15 through 27) been followed? | Y | Y | Y | Y | Y | Y |
| 3. EXH | IBIT B (EXBR, EXB) | | | | | | |
| 3.1 | Is it apparent that there is a fund shift and were the issues entered into LAS/PBS correctly? Check D-3A funding shift issue 340XXX0 - a unique deduct and unique add back issue should be used to ensure fund shifts display correctly on the LBR exhibits. | _ | | _ | | oit B; howe | |
| 3.2 | Are the 33XXXX0 issues negative amounts only and do not restore nonrecurring cuts from a prior year or fund any issues that net to a positive or zero amount? Check D-3A issues 33XXXX0 - a unique issue should be used for issues that net to zero or a positive amount. | an ye | s ior a DSA | A OF EXHID | n A and 3. | 2 does not | арріу. |
| AUDITS | | | | | | | |
| 3.3 | Negative Appropriation Category Audit for Agency Request (Columns A03 and A04): Are all appropriation categories positive by budget entity at the FSI level? Are all nonrecurring amounts less than requested amounts? (NACR, NAC - Report should print "No Negative Appropriation Categories Found") | Y | Y | Y | Y | Y | Y |
| 3.4 | Current Year Estimated Verification Comparison Report: Is Column A02 equal to Column B07? (EXBR, EXBC - Report should print "Records Selected Net To Zero") | Y | Y | Y | Y | Y | Y |
| TIP | Generally look for and be able to fully explain significant differences between A02 and A03. | | | | | | |
| TIP | Exhibit B - A02 equal to B07: Compares Current Year Estimated column to a backup of A02. This audit is necessary to ensure that the historical detail records have not been adjusted. Records selected should net to zero. | | | | | | |

| | | | Progran | n or Service | (Budget Enti | ty Codes) | |
|---------------|--|----------|----------|--------------|--------------|-----------|----------|
| | Action | 22010100 | 22010200 | 22100600 | 22300100 | 22300200 | 22350100 |
| TIP | Requests for appropriations which require advance payment authority must use the sub-title "Grants and Aids". For advance payment authority to local units of government, the Aid to Local Government appropriation category (05XXXX) should be used. For advance payment authority to non-profit organizations or other units of state government, the Special Categories appropriation category (10XXXX) should be used. | | | | | | |
| 4. EXH | IBIT D (EADR, EXD) | | | | | | |
| 4.1 | Is the program component objective statement consistent with the agency LRPP, and does it conform to the directives provided on page 59 of the LBR Instructions? | Y | Y | Y | Y | Y | Y |
| 4.2 | Is the program component code and title used correct? | Y | Y | Y | Y | Y | Y |
| TIP | Fund shifts or transfers of services or activities between program components will be displayed on an Exhibit D whereas it may not be visible on an Exhibit A. | | | | | | |
| I | (BIT D-1 (ED1R, EXD1) | *7 | T | T *7 | T | T *7 | T |
| 5.1 AUDITS | Are all object of expenditures positive amounts? (This is a manual check.) | Y | Y | Y | Y | Y | Y |
| 5.2 | Do the fund totals agree with the object category totals within each appropriation category? (ED1R, XD1A - Report should print "No Differences Found For This Report") | Y | Y | Y | Y | Y | Y |
| 5.3 | FLAIR Expenditure/Appropriation Ledger Comparison Report: Is Column A01 less than Column B04? (EXBR, EXBB - Negative differences need to be corrected in Column A01.) | Y | Y | Y | Y | Y | Y |
| 5.4 | A01/State Accounts Disbursements and Carry Forward Comparison Report: Does Column A01 equal Column B08? (EXBR, EXBD - Differences need to be corrected in Column A01.) | Y | Y | Y | Y | Y | Y |
| TIP | If objects are negative amounts, the agency must make adjustments to Column A01 to correct the object amounts. In addition, the fund totals must be adjusted to reflect the adjustment made to the object data. | | I | | I | I | |
| TIP | If fund totals and object totals do not agree or negative object amounts exist, the agency must adjust Column A01. | | | | | | |
| TIP | Exhibit B - A01 less than B04: This audit is to ensure that the disbursements and carry/certifications forward in A01 are less than FY 2009-10 approved budget. Amounts should be positive. | | | | | | |
| TIP | If B08 is not equal to A01, check the following: 1) the initial FLAIR disbursements or carry forward data load was corrected appropriately in A01; 2) the disbursement data from departmental FLAIR was reconciled to State Accounts; and 3) the FLAIR disbursements did not change after Column B08 was created. | | | | | | |
| 6. EXH | IBIT D-3 (ED3R, ED3) (Not required in the LBR - for analytical purposes only | | | | | | |
| 6.1 TIP | Are issues appropriately aligned with appropriation categories? Exhibit D-3 is no longer required in the budget submission but may be needed for this particular appropriation category/issue sort. Exhibit D-3 is also a useful report when identifying negative appropriation category problems. | Y | Y | Y | Y | Y | Y |
| | | | | | | | |
| | (BIT D-3A (EADR, ED3A) | | | | | | |
| 7.1 | Are the issue titles correct and do they clearly identify the issue? (See pages 15 through 31 of the LBR Instructions.) | Y | Y | Y | Y | Y | Y |
| 7.2 | Does the issue narrative adequately explain the agency's request and is the explanation consistent with the LRPP? (See page 65 of the LBR Instructions.) | Y | Y | Y | Y | Y | Y |
| 7.3 | Does the narrative for Information Technology (IT) issue follow the additional narrative requirements described on pages 66 through 69 of the LBR Instructions? | N/A | Y | N/A | N/A | N/A | N/A |

| | | ĺ | Progran | n or Service | (Budget Enti | ty Codes) | |

| 7.4 | Are all issues with an IT component identified with a "Y" in the "IT COMPONENT?" field? If the issue contains an IT component, has that component been identified and documented? | N/A | Y | N/A | N/A | N/A | N/A |
| 7.5 | Does the issue narrative explain any variances from the Standard Expense and Human Resource Services Assessments package? Is the nonrecurring portion in the nonrecurring column? (See pages E-4 and E-5 of the LBR Instructions.) | N/A | N/A | N/A | N/A | N/A | N/A |
| 7.6 | Does the salary rate request amount accurately reflect any new requests and are the amounts proportionate to the Salaries and Benefits request? Note: Salary rate should always be annualized. | Y | Y | Y | Y | Y | Y |
| 7.7 | Does the issue narrative thoroughly explain/justify all Salaries and Benefits amounts entered into the Other Salary Amounts transactions (OADA/C)? Amounts entered into OAD are reflected in the Position Detail of Salaries and Benefits section of the Exhibit D-3A. | Y | Y | Y | Y | Y | Y |
| 7.8 | Does the issue narrative include the Consensus Estimating Conference forecast, where appropriate? | Y | Y | Y | Y | Y | Y |
| 7.9 | Does the issue narrative reference the specific county(ies) where applicable? | N/A | N/A | Y | Y | N/A | N/A |
| 7.10 | Do the 160XXX0 issues reflect budget amendments that have been approved (or in the process of being approved) and that have a recurring impact (including Lump Sums)? Have the approved budget amendments been entered in Column A18 as instructed in Memo #11-006? | N/A | Y | N/A | Y | N/A | N/A |
| 7.11 | When appropriate are there any 160XXX0 issues included to delete positions placed in reserve in the OPB Position and Rate Ledger (e.g. unfunded grants)? Note: Lump sum appropriations not yet allocated should <u>not</u> be deleted. (PLRR , PLMO) | N/A | N/A | N/A | N/A | N/A | N/A |
| 7.12 | Does the issue narrative include plans to satisfy additional space requirements when requesting additional positions? | N/A | N/A | N/A | N/A | N/A | N/A |

| | | - | Progran | or Service | (Budget Enti | ty Codes) | |
|--------|--|----------|----------|------------|--------------|-----------|----------|
| | Action | 22010100 | 22010200 | 22100600 | 22300100 | 22300200 | 22350100 |
| 7.13 | Has the agency included a 160XXX0 issue and 210XXXX and 260XXX0 issues | N/A | N/A | N/A | N/A | N/A | N/A |
| 7.14 | as required for lump sum distributions? Do the amounts reflect appropriate FSI assignments? | Y | Y | Y | Y | Y | Y |
| 7.14 | Do the amounts reflect appropriate FSI assignments? Do the issues relating to <i>salary and benefits</i> have an "A" in the fifth position of | Y | Y | Y | Y | Y | <u> </u> |
| 7.13 | the issue code (XXXXAXX) and are they self-contained (not combined with other issues)? (See page 26 and 86 of the LBR Instructions.) | Y | N/A | Y | Y | Y | N/A |
| 7.16 | Do the issues relating to <i>Information Technology (IT)</i> have a "C" in the sixth position of the issue code (36XXXCX) and are the correct issue codes used (361XXC0, 362XXC0, 363XXC0, 17C01C0, 17C02C0, 17C03C0, 24010C0, 33001C0 or 55C01C0)? | N/A | Y | N/A | N/A | N/A | N/A |
| 7.17 | Are the issues relating to <i>major audit findings and recommendations</i> properly coded (4A0XXX0, 4B0XXX0)? | N/A | N/A | N/A | N/A | N/A | N/A |
| AUDIT: | | | | | _ | | |
| 7.18 | Are all FSI's equal to '1', '2', '3', or '9'? There should be no FSI's equal to '0'. (EADR, FSIA - Report should print "No Records Selected For Reporting") | Y | Y | Y | Y | Y | Y |
| 7.19 | Does the General Revenue for 160XXXX issues net to zero? (GENR, LBR1) | N/A | N/A | N/A | N/A | N/A | N/A |
| 7.20 | Does the General Revenue for 180XXXX issues net to zero? (GENR, LBR2) | N/A | N/A | N/A | N/A | N/A | N/A |
| 7.21 | Does the General Revenue for 200XXXX issues net to zero? (GENR, LBR3) | N/A | N/A | N/A | N/A | N/A | N/A |
| 7.22 | Have FCO appropriations been entered into the nonrecurring column A04? (GENR, LBR4 - Report should print "No Records Selected For Reporting" or a listing of D-3A issue(s) assigned to Debt Service (IOE N) or in some cases State Capital Outlay - Public Education Capital Outlay (IOE L)) | Y | Y | Y | Y | Y | Y |
| TIP | Salaries and Benefits amounts entered using the OADA/C transactions must be thoroughly justified in the D-3A issue narrative. Agencies can run OADA/OADR from STAM to identify the amounts entered into OAD and ensure these entries have been thoroughly explained in the D-3A issue narrative. | | I | | | I | |
| TIP | The issue narrative must completely and thoroughly explain and justify each D-3A issue. Agencies must ensure it provides the information necessary for the OPB and legislative analysts to have a complete understanding of the issue submitted. Thoroughly review pages 64 through 70 of the LBR Instructions. | | | | | | |
| TIP | Check BAPS to verify status of budget amendments. Check for reapprovals not picked up in the General Appropriations Act. Verify that Lump Sum appropriations in Column A02 do not appear in Column A03. Review budget amendments to verify that 160XXX0 issue amounts correspond accurately and net to zero for General Revenue funds. | _ | | | | | |
| TIP | If an agency is receiving federal funds from another agency the FSI should = 9 (Transfer - Recipient of Federal Funds). The agency that originally receives the funds directly from the federal agency should use FSI = 3 (Federal Funds). | | | | | | |
| TIP | If an appropriation made in the FY 2009-10 General Appropriations Act duplicates an appropriation made in substantive legislation, the agency must create a unique deduct nonrecurring issue to eliminate the duplicated appropriation. Normally this is taken care of through line item veto. | | | | | | |

| | | | Progran | n or Service | (Budget Enti | ty Codes) | |
|--------|---|-------------|------------|--------------|--------------|-----------|----------|
| | Action | 22010100 | 22010200 | 22100600 | 22300100 | 22300200 | 22350100 |
| 8. SCH | EDULE I & RELATED DOCUMENTS (SC1R, SC1 - Budget Entity Level or SC1R | R, SC1D - I | Department | Level) | | | |
| 8.1 | Has a separate department level Schedule I and supporting documents package been submitted by the agency? | | | | Y | | |
| 8.2 | Has a Schedule I been completed in LAS/PBS for each operating trust fund? | Y | Y | Y | Y | Y | Y |
| 8.3 | Have the appropriate Schedule I supporting documents been included for the trust funds (Schedule IA, Schedule IB, Schedule IC, and Reconciliation to Trial Balance)? | Y | Y | Y | Y | Y | Y |
| 8.4 | Have the Examination of Regulatory Fees Part I and Part II forms been included for the applicable regulatory programs? | | | N | I/A | | |
| 8.5 | Have the required detailed narratives been provided (5% trust fund reserve narrative; method for computing the distribution of cost for general management and administrative services narrative; adjustments narrative; revenue estimating methodology narrative)? | Y | Y | Y | Y | Y | Y |
| 8.6 | Has the Inter-Agency Transfers Reported on Schedule I form been included as applicable for transfers totaling \$100,000 or more for the fiscal year? | N/A | Y | Y | Y | N/A | N/A |
| 8.7 | If the agency is scheduled for the annual trust fund review this year, have the Schedule ID and applicable draft legislation been included for recreation, modification or termination of existing trust funds? | | | N | // A | | |
| 8.8 | If the agency is scheduled for the annual trust fund review this year, have the necessary trust funds been requested for creation pursuant to <i>section</i> 215.32(2)(b), <i>Florida Statutes</i> - including the Schedule ID and applicable legislation? | | | N | //A | | |
| 8.9 | Are the revenue codes correct? In the case of federal revenues, has the agency appropriately identified direct versus indirect receipts (object codes 000700, 000750, 000799, 001510 and 001599)? | Y | Y | Y | Y | Y | Y |
| 8.10 | Are the statutory authority references correct? | Y | Y | Y | Y | Y | Y |
| 8.11 | Are the General Revenue Service Charge percentage rates used for each revenue source correct? (Refer to Chapter 2009-78, Laws of Florida, for appropriate general revenue service charge percentage rates.) | N/A | Y | N/A | Y | N/A | N/A |
| 8.12 | Is this an accurate representation of revenues based on the most recent Consensus Estimating Conference forecasts? | Y | Y | Y | Y | Y | Y |
| 8.13 | If there is no Consensus Estimating Conference forecast available, do the revenue estimates appear to be reasonable? | N/A | Y | Y | Y | N/A | N/A |
| 8.14 | Are the federal funds revenues reported in Section I broken out by individual grant? Are the correct CFDA codes used? | N/A | Y | N/A | Y | N/A | N/A |
| 8.15 | Are anticipated grants included and based on the state fiscal year (rather than federal fiscal year)? | N/A | Y | N/A | Y | N/A | N/A |
| 8.16 | Are the Schedule I revenues consistent with the FSI's reported in the Exhibit D-3A? | N/A | Y | N/A | Y | N/A | N/A |
| 8.17 | If applicable, are nonrecurring revenues entered into Column A04? Has the agency certified the revenue estimates in columns A02 and A03 to be the latest and most accurate available? Does the certification include a statement that the agency will notify OPB of any significant changes in revenue estimates that occur prior to the Governor's Budget Recommendations being issued? | N/A Y | | | | | |
| 8.19 | Is a 5% trust fund reserve reflected in Section II? If not, is sufficient justification provided for exemption? Are the additional narrative requirements provided? | N/A | Y | N/A | Y | N/A | N/A |
| 8.20 | Are appropriate service charge nonoperating amounts included in Section II? | N/A | Y | N/A | Y | N/A | N/A |
| 8.21 | Are nonoperating expenditures to other budget entities/departments cross-referenced accurately? | N/A | Y | N/A | Y | N/A | N/A |
| 8.22 | Do transfers balance between funds (within the agency as well as between agencies)? (See also 8.6 for required transfer confirmation of amounts totaling \$100,000 or more.) | Y | Y | Y | Y | Y | Y |

| | | | Progran | n or Service | (Budget Enti | ty Codes) | |
|---------|--|----------|----------|--------------|--------------|-----------|----------|
| | Action | 22010100 | 22010200 | 22100600 | 22300100 | 22300200 | 22350100 |
| 8.23 | Are nonoperating expenditures recorded in Section II and adjustments recorded in Section III? | Y | Y | Y | Y | Y | Y |
| 8.24 | Are prior year September operating reversions appropriately shown in column A01? | N/A | Y | Y | Y | N/A | N/A |
| 8.25 | Are current year September operating reversions appropriately shown in column A02? | Y | Y | Y | Y | Y | Y |
| 8.26 | Does the Schedule IC properly reflect the unreserved fund balance for each trust fund as defined by the LBR Instructions, and is it reconciled to the agency accounting records? | Y | Y | Y | Y | Y | N/A |
| 8.27 | Does Column A01 of the Schedule I accurately represent the actual prior year accounting data as reflected in the agency accounting records, and is it provided in sufficient detail for analysis? | Y | Y | Y | Y | Y | N/A |
| 8.28 | Does Line I of Column A01 (Schedule I) equal Line K of the Schedule IC? | Y | Y | Y | Y | Y | N/A |
| AUDITS | | | T | • | • | 1 | • |
| 8.29 | Is Line I a positive number? (If not, the agency must adjust the budget request to eliminate the deficit). | Y | Y | Y | Y | Y | Y |
| 8.30 | Is the June 30 Adjusted Unreserved Fund Balance (Line I) equal to the July 1 Unreserved Fund Balance (Line A) of the following year? (SC1R, SC1A - Report should print "No Discrepancies Exist For This Report") | Y | Y | Y | Y | Y | Y |
| 8.31 | Has a Department Level Reconciliation been provided for each trust fund and does Line A of the Schedule I equal the CFO amount? If not, the agency must correct Line A. (SC1R, DEPT) | | | | Y | | |
| TIP | The Schedule I is the most reliable source of data concerning the trust funds. It is very important that this schedule is as accurate as possible! | | | | | | |
| TIP | Determine if the agency is scheduled for trust fund review. (See page 125 of the LBR Instructions.) | | | | | | |
| TIP | Review the unreserved fund balances and compare revenue totals to expenditure totals to determine and understand the trust fund status. | | | | | | |
| TIP | Typically nonoperating expenditures and revenues should not be a negative number. Any negative numbers must be fully justified. | | | | | | |
| | EDULE II (PSCR, SC2) | | | | | | |
| AUDIT: | | | | | | | |
| 9.1 | Is the pay grade minimum for salary rate utilized for positions in segments 2 and 3? (BRAR, BRAA - Report should print "No Records Selected For This Request") Note: Amounts other than the pay grade minimum should be fully justified in the D-3A issue narrative. (See <i>Base Rate Audit</i> on page 157 of the LBR Instructions.) | Y | Y | Y | Y | Y | Y |
| 10. SCF | HEDULE III (PSCR, SC3) | | | | | | |
| 10.1 | Is the appropriate lapse amount applied in Segment 3? (See page 87 of the LBR Instructions.) | Y | Y | Y | Y | Y | Y |

| | | | Progran | ı or Service | (Budget Enti | ty Codes) | |
|---------|---|------------|----------|--------------|--------------|-----------|----------|
| | Action | 22010100 | 22010200 | 22100600 | 22300100 | 22300200 | 22350100 |
| 10.2 | Are amounts in <i>Other Salary Amount</i> appropriate and fully justified? (See page 94 of the LBR Instructions for appropriate use of the OAD transaction.) Use OADI or OADR to identify agency other salary amounts requested. | Y | Y | Y | Y | Y | Y |
| 11. SCF | HEDULE IV (EADR, SC4) | | | | | | |
| 11.1 | Are the correct Information Technology (IT) issue codes used? | N/A | Y | N/A | N/A | 22300200 | N/A |
| TIP | If IT issues are not coded correctly (with "C" in 6th position), they will not appear in the Schedule IV. | | | | | | |
| | HEDULE VIIIA (EADR, SC8A) | | 1 | | 1 | 1 | |
| 12.1 | Is there only one #1 priority, one #2 priority, one #3 priority, etc. reported on the Schedule VIII-A? Are the priority narrative explanations adequate? | Y | Y | Y | Y | Y | N/A |
| | HEDULE VIIIB-1 (EADR, S8B1) | | 1 | | 1 | 1 | |
| 13.1 | Do the reductions comply with the instructions provided on pages 98 through 101 of the LBR Instructions regarding a 5% reduction in recurring and nonrecurring General Revenue and Trust Funds? | Y | Y | Y | Y | Y | Y |
| 14. SCF | HEDULE VIIIB-2 (EADR, S8B2) | | | | | | |
| 14.1 | Do the reductions comply with the instructions provided on pages 102 through 104 of the LBR Instructions regarding a 15% reduction in recurring General Revenue and Trust Funds? | Y | Y | Y | Y | Y | Y |
| 15. SCF | HEDULE XI (LAS/PBS Web - see page 108 of the LBR Instructions for detailed | instructio | ns) | | • | • | • |
| 15.1 | Has the Schedule XI one page summary Excel file been e-mailed to OPB at OPB.UnitCostSummary@laspbs.state.fl.us? Agencies are required to generate this spreadsheet via the LAS/PBS Web. (Note: Pursuant to <i>section 216.023(4)</i> (b), Florida Statutes, the Legislature can reduce the funding level for any agency that does not provide this information.) | Y | | | | | |
| 15.2 | Do the PDF files uploaded to the Florida Fiscal Portal for the LRPP and LBR match the Excel file e-mailed to OPB? | | | | Y | | |
| | INCLUDED IN THE SCHEDULE XI REPORT: | | ı | | T | ı | |
| 15.3 | Does the FY 2009-10 Actual (prior year) Expenditures in Column A36 reconcile to Column A01? (GENR, ACT1) | Y | Y | Y | Y | Y | Y |
| 15.4 | None of the executive direction, administrative support and information technology statewide activities (ACT0010 thru ACT0490) have output standards (Record Type 5)? (Audit #1 should print "No Activities Found") | Y | Y | Y | Y | Y | Y |
| 15.5 | Does the Fixed Capital Outlay (FCO) statewide activity (ACT0210) only contain 08XXXX or 14XXXX appropriation categories? (Audit #2 should print "No Operating Categories Found") | Y | Y | Y | Y | Y | Y |
| 15.6 | Has the agency provided the necessary demand (Record Type 5) for all activities which should appear in Section II? (Note: Audit #3 will identify those activities that do NOT have a Record Type '5' and have not been identified as a 'Pass Through' activity. These activities will be displayed in Section III with the 'Payment of Pensions, Benefits and Claims' activity and 'Other' activities. Verify if these activities should be displayed in Section III. If not, an output standard would need to be added for that activity and the Schedule XI submitted again.) | Y | Y | Y | Y | Y | Y |
| 15.7 | Does Section I (Final Budget for Agency) and Section III (Total Budget for Agency) equal? (Audit #4 should print "No Discrepancies Found") | Y | Y | Y | Y | Y | Y |
| TIP | If Section I and Section III have a small difference, it may be due to rounding and therefore will be acceptable. | | | | | | |

| | | | Program | n or Service | (Budget Enti | ty Codes) | |
|--------|---|----------|----------|--------------|--------------|-----------|----------|
| | Action | 22010100 | 22010200 | 22100600 | 22300100 | 22300200 | 22350100 |
| 16. MA | NUALLY PREPARED EXHIBITS & SCHEDULES | | | | | | |
| 16.1 | Do exhibits and schedules comply with LBR Instructions (pages 110 through 154 of the LBR Instructions), and are they accurate and complete? | Y | Y | Y | Y | Y | Y |
| 16.2 | Are appropriation category totals comparable to Exhibit B, where applicable? | Y | Y | Y | Y | Y | Y |
| 16.3 | Are agency organization charts (Schedule X) provided and at the appropriate level of detail? | Y | Y | Y | Y | Y | Y |
| AUDITS | S - GENERAL INFORMATION | | • | <u> </u> | • | • | |
| TIP | Review <i>Section 6: Audits</i> of the LBR Instructions for a list of audits and their descriptions. | | | | | | |
| TIP | Reorganizations may cause audit errors. Agencies must indicate that these errors are due to an agency reorganization to justify the audit error. | | | | | | |
| 17. CA | PITAL IMPROVEMENTS PROGRAM (CIP) | | | | | | |
| 17.1 | Are the CIP-2, CIP-3, CIP-A and CIP-B forms included? | Y | N/A | Y | N/A | N/A | N/A |
| 17.2 | Are the CIP-4 and CIP-5 forms submitted when applicable (see CIP Instructions)? | Y | N/A | Y | N/A | N/A | N/A |
| 17.3 | Do all CIP forms comply with CIP Instructions where applicable (see CIP Instructions)? | Y | N/A | Y | N/A | N/A | N/A |
| 17.4 | Does the agency request include 5 year projections (Columns A03, A06, A07, A08 and A09)? | Y | N/A | Y | N/A | N/A | N/A |
| 17.5 | Are the appropriate counties identified in the narrative? | Y | N/A | Y | N/A | N/A | N/A |
| 17.6 | Has the CIP-2 form (Exibit B) been modified to include the agency priority for each project and the modified form saved as a PDF document? | Y | N/A | Y | N/A | N/A | N/A |
| TIP | Requests for Fixed Capital Outlay appropriations which are Grants and Aids to Local Governments and Non-Profit Organizations must use the Grants and Aids to Local Governments and Non-Profit Organizations - Fixed Capital Outlay major appropriation category (140XXX) and include the sub-title "Grants and Aids". These appropriations utilize a CIP-B form as justification. | | | | | | |
| 18. FL | ORIDA FISCAL PORTAL | | | | | | |
| 18.1 | Have all files been assembled correctly and posted to the Florida Fiscal Portal as outlined in the Florida Fiscal Portal Submittal Process? | Y | Y | Y | Y | Y | Y |
