## SCHEDULE I – REQUIRED NARRATIVES

**Budget Period: 2015-16**

**Agency:** Florida Public Service Commission (PSC)  
**Trust Fund:** Regulatory Trust Fund  
**Fund No.:** 2573

### **5% Trust Fund Reserve:**

The PSC’s Regulatory Trust Fund receives no revenues that are excluded in the General Policy Guidelines section of the Legislative Budget Instructions. There is no negative impact of establishing the reserve in this LBR. Revenues are collected primarily only twice per year, but the majority of expenditures are paid out monthly (salaries/benefits make up the largest single amount, plus other routine costs of doing business) or quarterly (rent to DMS). Therefore, the trust fund balance must be sufficient to allow for this uneven cash flow.

FY 14-15 total revenue	\$25,475,155
Less 8% Service Charge to GR	(2,038,012)
Less Risk Management Casualty Insurance	(62,065)
Less Operating Transfer to DMS STW Contract	<u>(97,826)</u>
Total Revenue Subject to 5% Reserve Calculation	<u>\$23,277,252</u>
Multiplied by 5%	<u>.05</u>
Total 5% Reserve for Regulatory Trust Fund	<u>\$ 1,163,863</u>

### **Section III Adjustments:**

Adjustments are included for FY 2013-14 as listed on the “Reconciliation of Schedule 1C to Agency Trial Balance” form.

### **Revenue Estimating Methodology:**

The trust fund’s primary revenues are from the regulatory assessment fees (RAFs) charged to the utilities regulated by the PSC. Maximum allowable rates are established in Florida Statutes, and actual assessable rates, up to the statutory cap, are established by PSC rule in the Florida Administrative Code. RAFs are computed on the utility companies’ gross operating revenues derived from intrastate business, which must be estimated for the current year (Column A02) and the request year (Column A03). The PSC’s revenue forecast is based on near-term company

Schedule 1 Required Narratives

projections, when available, and past year growth rates when projections are not available. The projections also take into account relevant developments in the various industries that will affect the utilities' revenue.

The 2014 and 2015 investor-owned electric RAF revenues are based on actual revenues and projected revenue growth. The projected 2014 RAF revenue is a combination of the investor-owned electric utilities actual RAF revenues for the first half of the year and company projections for the second half of the year. Significant revenue growth during the first half of the year, relative to the revenue of the first half of 2013, is projected to continue throughout the remainder of the year. For 2015, RAF revenues are based on company projections.

The RAF revenue projections are consistent with company sales growth estimates for the four largest investor-owned electric utilities as well as the 2013 and 2014 increases in base rates approved for all five investor-owned electric utilities by the Commission. The state's largest investor-owned electric utility implemented base rate increases in 2013 and 2014. The four other investor-owned electric utilities have or will implement one or more base rate increases during the period of 2013 to 2015.

For municipal and rural electrics, 2014 and 2015 RAF revenues are forecasted based on the projected gigawatt hours sales growth rate of the investor-owned utilities.

Except for two small gas utilities, the 2014 and 2015 RAF revenue estimates of the investor-owned gas utilities are based on actual revenues and projected revenue growth. The projected 2014 RAF revenues of the five larger investor-owned gas utilities are based on the actual RAF revenues for the first half of the year and company projections for the second half of the year. The projected 2015 RAF revenues for the five larger utilities are based on company projections. The PSC projects the RAF revenues for the two small gas utilities based on a five year average.

With respect to the municipal gas and gas districts (gas safety entities), the growth rate in 2014 and 2015 RAF revenue are projected to be equal to the growth rate of the gas utilities during those years. The two revenue data series have a history of following a similar trend with a relatively high positive correlation in annual revenue between the gas utilities and municipal and gas districts. We anticipate that trend to continue.

The Commission has two gas pipelines under its jurisdiction. The projected 2014 RAF revenue of the gas pipelines is based on the actual RAF revenues for the first half of the year and company projections for the second half of the year. The projected RAF revenue for 2015 is based on company revenue projections for the two pipelines.

Telecommunications companies' revenues have been decreasing mainly due to a loss of access lines to wireless and other non-regulated companies that do not pay RAFs. The 2014-2015 RAFs are expected to decline based on the actual historical decline in RAF revenues and a

review of the actual Revenues for the first half of 2014. This same negative growth is expected to continue in 2015.

Despite the inclusion of nominal projected growth, the water and wastewater industry revenue forecast for 2014-2015 shows a decline. The decline is the result of the majority of water and wastewater systems of the state's largest regulated water and wastewater utility being sold to governmental entities. The remaining systems are predicted to grow at a slightly slower rate for 2014 (1.5 percent) than in prior years. The 2015 projection includes a slightly lower growth rate (1.0 percent) than for 2014 for existing companies and the RAF amount is adjusted as well for the transfer of an additional system to a governmental entity.

The revenue estimates are the latest we have available, but we will be monitoring and looking at the revenues again after our January 2015 collections. We will notify OPB of any significant changes in revenue estimates that occur prior to the Governor's Budget Recommendations.

**Computing Distribution of Cost for General Management and Administrative Services:**

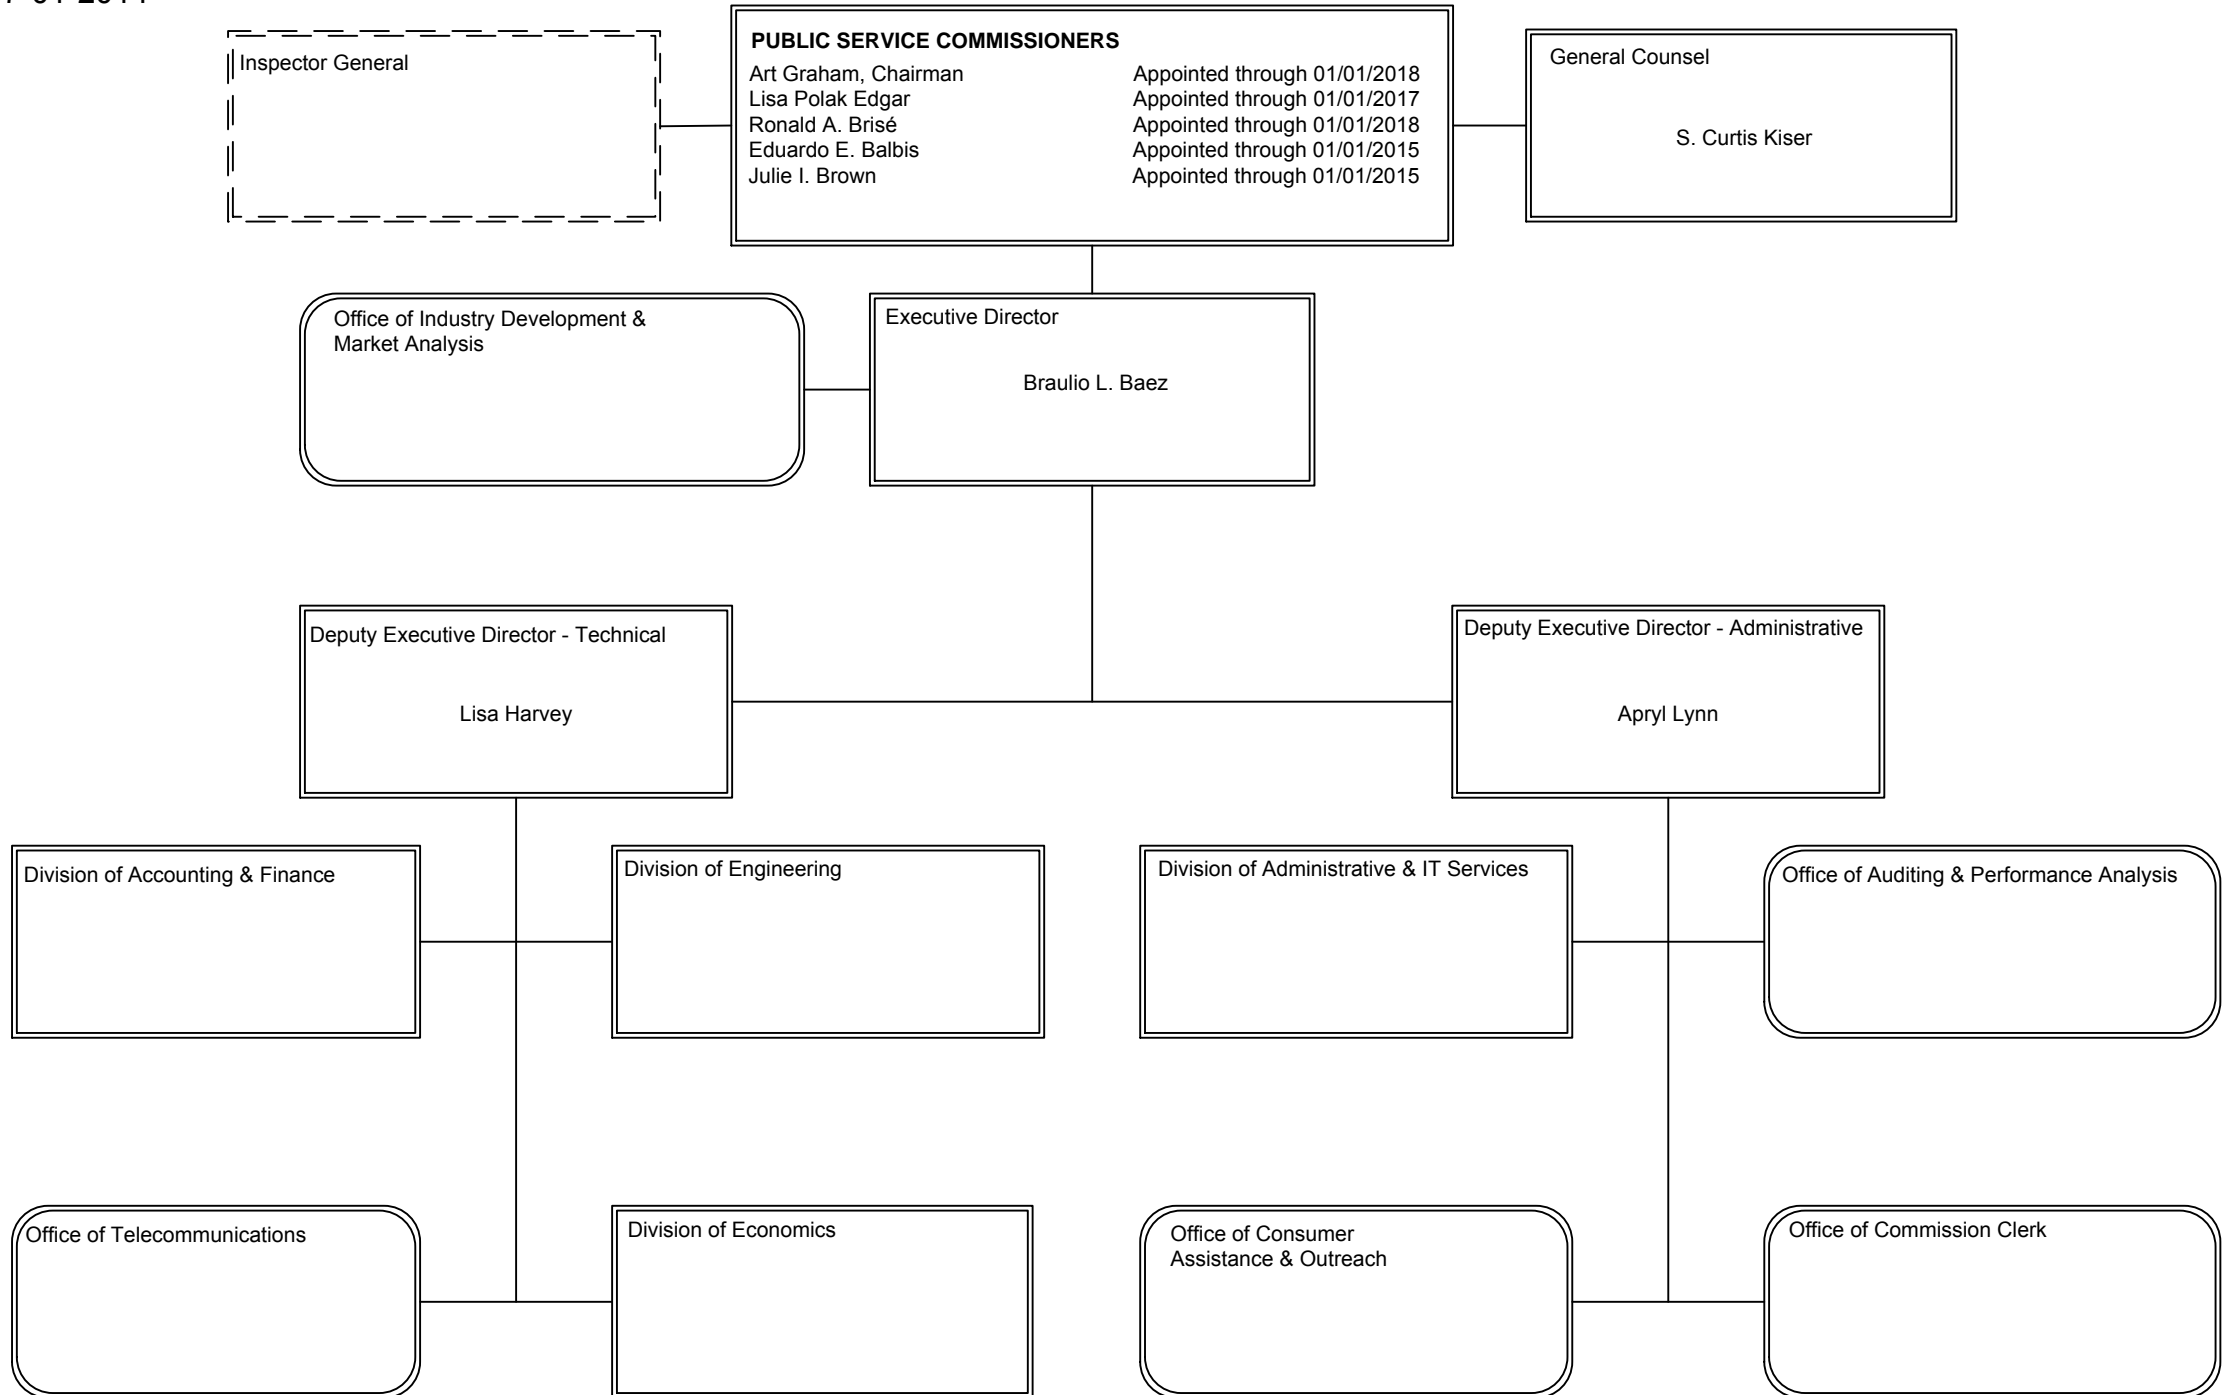

Indirect costs for purposes of the Schedule 1A are derived from the People First time accounting component based on work hour "charge objects."

**EXPLANATION of LINE C:**

Over the past year, the PSC has been working to develop and create efficiencies. These efforts should generate reversions of roughly \$800,000 for the current FY 2014-2015 with recurring savings in FY 2015-2016. Through internal controls, which include the previously mentioned anticipated reversions, management of vacancies, closely monitoring discretionary expenditures, and using a small amount of the cash balance, the PSC can manage both the projected negative balances in FY 2014-2015 and FY 2015-2016. Trust fund sweeps will jeopardize our continued ability to meet our fiscal obligations.
