SCHEDULE I – REQUIRED NARRATIVES

Budget Period: 2016-17

Agency: Florida Public Service Commission (PSC)

Trust Fund: Regulatory Trust Fund

Fund No.: 2573

5% Trust Fund Reserve:

The PSC's Regulatory Trust Fund receives no revenues that are excluded in the General Policy Guidelines section of the Legislative Budget Instructions. There is no negative impact of establishing the reserve in this LBR. Revenues are collected primarily only twice per year, but the majority of expenditures are paid out monthly (salaries/benefits make up the largest single amount, plus other routine costs of doing business) or quarterly (rent to DMS). Therefore, the trust fund balance must be sufficient to allow for this uneven cash flow.

FY 15-16 total revenue Less 8% Service Charge to GR Less Risk Management Casualty Insurance Less Operating Transfer to DMS STW Contract	\$25,582,857 (2,046,629) (96,035) (84,904)
Total Revenue Subject to 5% Reserve Calculation	\$23,355,289
Multiplied by 5%	.05
Total 5% Reserve for Regulatory Trust Fund	\$ 1,167,764

Section III Adjustments:

Adjustments are included for FY 2014-15 as listed on the "Reconciliation of Schedule 1C to Agency Trial Balance" form.

Revenue Estimating Methodology:

The trust fund's primary revenues are from the regulatory assessment fees (RAFs) charged to the utilities regulated by the PSC. Maximum allowable rates are established in Florida Statutes, and actual assessable rates, up to the statutory cap, are established by PSC rule in the Florida Administrative Code. RAFs are computed on the utility companies' gross operating revenues derived from intrastate business, which must be estimated for the current year (Column A02) and the request year (Column A03). The PSC's revenue forecast is based on near-term company projections, when available, and past year growth rates when projections are not available. The

Florida Public Service Commission Page 2

projections also take into account relevant developments in the various industries that will affect the utilities' revenue.

The 2015 and 2016 investor-owned electric RAF revenues are based on actual revenues and projected revenue growth. The projected 2015 RAF revenue is a combination of the investor-owned electric utilities actual RAF revenues for the first half of the year and company projections for the second half of the year. Significant revenue growth during the first half of the year, relative to the revenue of the first half of 2014, is projected to flatten throughout the remainder of the year. For 2016, RAF revenues are based on company projections, and in the aggregate these revenues are expected to decline relative to 2015 due to a combination of projected declines in fuel prices and projected 2015 clause over-recovery amounts to be credited in 2016 rates. This decline in investor-owned electric RAF revenue is projected despite the continued expected increase in electric sales (1.72 percent). Note that the 2016 revenue projections in the September 2015 clause filings (fuel, capacity, environmental) could deviate from the projections which have been provided to the Commission for purposes of estimating RAF revenues. The investor-owned electric utilities will submit 2016 cost recovery projections for the fuel, capacity, and environmental cost recovery clauses in late August 2015 and early September 2015.

For municipal and rural electrics, 2015 and 2016 RAF revenues are forecasted based on the projected gigawatt hours sales growth rate of the investor-owned utilities.

Except for two small gas utilities, the 2015 and 2016 RAF revenue estimates of the investor-owned gas utilities are based on actual revenues and projected revenue growth. The projected 2015 RAF revenues of the five larger investor-owned gas utilities are based on the actual RAF revenues for the first half of the year and company projections for the second half of the year. The projected 2016 RAF revenues for the five larger utilities are based on company projections. The PSC projects the RAF revenues for the two small gas utilities based on the most recent five year average revenue amounts for these utilities.

With respect to the municipal gas and gas districts (gas safety entities), the growth rate in 2015 and 2016 RAF revenue are projected to be equal to the growth rate of the gas utilities during those years. The two revenue data series have a history of following a similar trend with a relatively high positive correlation in annual revenue between the gas utilities and municipal and gas districts. We anticipate that trend to continue.

The Commission has two gas pipelines under its jurisdiction. The projected 2015 RAF revenue of the gas pipelines is based on the actual RAF revenues for the first half of the year and company projections for the second half of the year. The projected RAF revenue for 2016 is based on company revenue projections for the two pipelines.

Florida Public Service Commission Page 3

Telecommunications companies' revenues have been decreasing mainly due to a loss of access lines to wireless and other companies that do not pay RAFs. The 2015-2016 RAFs are expected to decline based on the actual historical decline in RAF revenues and a review of the actual revenues for the first half of 2015. This same negative growth is expected to continue in 2016.

Despite the inclusion of nominal projected growth, the water and wastewater industry revenue forecast for 2015-2016 shows a slight increase. The companies are predicted to grow at a slightly slower rate for 2015 (1.5 percent) than in prior years. The 2016 projection includes a slightly lower growth rate (1.0 percent) than for 2015 for existing companies and the RAF amount is adjusted as well for a certificate cancellation for a water system in late 2015.

The revenue estimates are the latest we have available, but we will be monitoring and looking at the revenues again after our January 2016 collections. We will notify OPB of any significant changes in revenue estimates that occur prior to the Governor's Budget Recommendations.

Computing Distribution of Cost for General Management and Administrative Services:

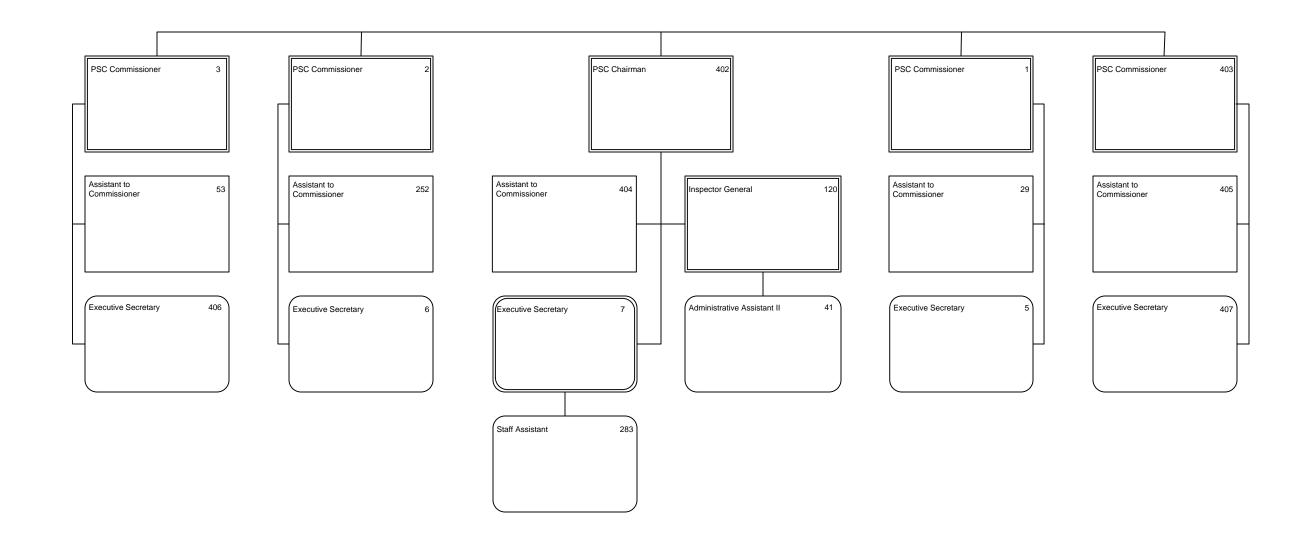

Indirect costs for purposes of the Schedule 1A are derived from the People First time accounting component based on work hour "charge objects."

EXPLANATION of LINE C:

Over the past year, the PSC has been working to develop and create efficiencies. Through internal controls which include the management $\underline{\text{of vacancies, closely monitoring discretionary expenditures, and using a small }\underline{\text{a}}\\ \underline{\text{mount of the cash balance, the PSC can manage both the}}$ projected negative balances in FY 2015-2016 and FY 2016-2017. Trust fund sweeps will jeopardize our continued ability to meet our fiscal obligations. Page 27 of 40

Review budget amendments to verify that 160XXX0 issue amounts correspond accurately and net to zero for General Revenue funds.						
TIP	If an agency is receiving federal funds from another agency the FSI should = 9 (Transfer - Recipient of Federal Funds). The agency that originally receives the funds directly from the federal agency should use FSI = 3 (Federal Funds).						
TIP	If a state agency needs to include in its LBR a realignment or workload request issue to align its data processing services category with its projected FY 2016-17 data center costs, this can be completed by using the new State Data Center data processing services category (210001).						
TIP	If an appropriation made in the FY 2015-16 General Appropriations Act duplicates an appropriation made in substantive legislation, the agency must create a unique deduct nonrecurring issue to eliminate the duplicated appropriation. Normally this is taken care of through line item veto.
